INDEX TO VOLUME 21

A

Page

Absorption, transmission and, of sound by some building materials 37
Amplifier, harmonic, used in radio-frequency standardization 179
Analysis, dental gold alloys 209
Anderson bridge 191
Animals, spectral energy distribution of the light emitted by plants and 521
Antenna, coil 409
directional receiving 409
Audio beat, measurement of frequency by use of sonometer 179

B

Bearce, H. W., A fundamental basis for measurements of length 895
Blanchard, Marion Smith, and S. F. Pickering, A review of the literature relating to the normal densities of gases 141
Brooks potentiometer 191
Building materials, transmission and absorption of sound by some 37

C

Carbon arc and other light sources use in phototherapy, radiometric measurements on the 535
Cadmium light waves as a basis for length measurements 895
Chrisler, V. L., E. A. Eckhardt and, Transmission and absorption of sound by some building materials 37
Coblentz, W. W., M. J. Dorcas, and C. W. Hughes, Radiometric measurements on the carbon arc and other light sources used in phototherapy 535
—— *and C. W. Hughes*, Spectral energy distribution of the light emitted by plants and animals 521
Coil antenna 409
Compass, radio 409
Concentrated loads, effect of, on the length of measuring tapes 385
Constants of various gases, review of literature relating to 563
Conductor, electric field of a charged wire and a slotted cylindrical 631
Copper, determination in dental gold alloys 209
Critical constants of various gases, a review of the literature relating to the 141
Current distribution 191
Currents, eddy, effect of, in a core consisting of circular wires 701

D

Davis, Raymond, Experimental study of the relation between intermittent and nonintermittent sector-wheel photographic exposures 95
Densities of gases, a review of the literature relating to the normal 141
Dental gold alloys, analysis 209
composition 209
Direction finder, a unicontrol high-frequency radio 25
radio, 90–7,700 kc (3,300–39 m) 409
Distribution of current 191
Dorcas, M. J., C. W. Hughes, W. W. Coblentz and, Radiometric measurements on the carbon arc and other light sources used in phototherapy 535
Dorsey, Ernest, Measurement of surface tension 563
Dunmore, F. W., A unicontrol high-frequency radio direction finder 25
——, A portable radio direction finder for 90 to 7,700 kilocycles 409

E

Eckhardt, E. A., and V. L. Chrisler, Transmission and absorption of sound by some building materials 37
Eddy currents in a core of circular wires, effect of 701
Electric field of a charged wire and a slotted cylindrical conductor 631
Establishment of radio standards of frequency by the use of a harmonic amplifier 179
Expansion, thermal, of fused silica, measurements on the 1

F

Formula for the inductance of a helix made with wire of any section 431
Frequency meter, method of standardization by harmonic amplifier 179

Page

Fundamental basis for length measurements 395
Fundamental standard of length 395
Fused silica, measurements on the thermal expansion of 1

G

Galvanometer shunt 191
Gases, a review of the literature relating to the normal densities of various 141
review of literature relating to the critical constants of various 563
Gold, dental alloys analysis 209
dental alloys composition 209

H

Harmonic amplifier, use in radio-frequency standardization 179
Hazen, Grace, C. B. Jolliffe and, Establishment of radio standards of frequency by the use of a harmonic amplifier 179
Helix made with wire of any section, formula for the inductance of a 431
Hidnert, Peter, Wilmer Souder and, Measurements on the thermal expansion of fused silica 1
High-frequency radio direction finder, a unicontrol 25
Hudson, C. S., Relations between rotary power and structure in the sugar group. Part I–(1 to 10) 241
Hughes balance 191
Hughes, C. W., W. W. Coblentz and, Spectral energy distribution of light emitted by plants and animals 521
——, *M. J. Dorcas, W. W. Coblentz and,* Radiometric measurements on the carbon arc and other light sources used in phototherapy 535

I

Induction in sheet steel, determination of the magnetic 727
Inductance of a helix made with wire of any section, formula for the 431
Iridium, determination in dental gold alloys 209
Iron, determination in dental gold alloys 209

J

Jolliffe, C. B., and Grace Hazen, Establishment of radio standards of frequency by the use of a harmonic amplifier 179
Judson, Lewis V., Effect of concentrated loads on the length of measuring tapes 385

K

Page

Kirchoff's laws 191

L

Laboratory weights, short tests for sets of 65
Length measurements, fundamental basis for 395
Light emitted by plants and animals, spectral energy distribution of the 521
Light waves as a basis for length measurements 395
Linkage-current diagram for representing magneto operation 647
Literature relating to the critical constants of various gases, review of 563

M

Magnesium, determination in dental gold alloys 209
Magnetic induction in sheet steel, determination of the 727
Magnetic reluctivity relationship 743
Magneto operation, linkage-current diagram for representing 647
Manganese, determination in dental gold alloys 209
Measurement of length, basis for 395
Measurement of surface tension 563
Measurements on the thermal expansion of fused silica 1
Measurements, radiometric, on the carbon arc and other light sources used in phototherapy 535
Measuring tapes, effect of concentrated loads on the length of 385

N

Nickel, determination in dental gold alloys 209

O

Ohm's law 191

P

Palladium, determination in dental gold alloys 209
Plants and animals, special energy distribution of the light emitted by 521
Platinum, determination in dental gold alloys 209
Photographic exposures, experimental study of the relation between intermittent and nonintermitten sector-wheel 95
Phototherapy, radiometric measurements on the carbon arc and other light sources used in 535

Page

Pickering, S. F., A review of the literature relating to the critical constants of various gases 563
——, *Marion Smith Blanchard and*, A review of the literature relating to the normal densities of gases 141
Pienkowsky, A. T., Short test for sets of laboratory weights 65
Piezo-oscillator, standardization of 179

R

Radiocompass, portable 409
Radio direction finder, a unicontrol high-frenquency 25
portable, 90–7,700 kc (3,300–39 m) 409
Radiogoniometer, portable 409
Radiometric measurements on the carbon arc and other light soucres used in phototherapy 535
Randolph, D. W., F. B. Silsbee and, Linkage-current diagram for representing magneto operation 647
Relations between rotary power and structure in the sugar group 241
Reluctivity relationship, magnetic 743
Rhodium, determination in dental gold alloys 209
Rotary power and structure in the sugar group, relations between 241

S

Sanford, Raymond L., Magnetic reluctivity relationship 743
——, *and James M. Barry*, Determination of the magnetic induction in sheet steel 727
Sector-wheel photographic exposures, experimental study of the relation between intermittent and nonintermittent 95
Sheet steel, determination of the magnetic induction in 727
Silica, fused, measurements on the thermal expansion of 1
Silsbee, F. B., and D. W. Randolph, Linkage-current diagram for representing magnetic operation 647
Silver, determination in dental gold alloys 209
Slotted cylindrical conductor, electric field of a charged wire and a 631
Snow, Chester, Effect of eddy currents in a core consisting of circular wires 701
——, Electric field of a charged wire and a slotted cylindrical conductor 631
Snow, Chester, Formula for the inductance of a helix made with wire of any section 431
Sonometer, use in standardization of piezo oscillators 179
Souder, Wilmer, and Peter Hidnert, Measurements on the thermal expansion of fused silica 1
Sound, transmission and absorption of, by some building materials 37
Spectral energy distribution of the light emitted by plants and animals 521
Standardization of piezo oscillators 179
Steel, sheet, determination of the magnetic inductance in 727
Sugar group, relations between rotary power and structure in 241
Surface tension, measurement of 563
Swanger, William H., Analysis of dental gold alloys 209

T

Tapes, effect of concentrated loads on the length of measuring 385
Tension, surface, measurement of 563
Tests, short, for sets of laboratory weights 65
Thermal expansion of fused silica, measurements on the 1
Tin, determination in dental gold alloys 209
Transmission and absorption of sound by some building materials 37
Tuning fork, comparison of, by radio-frequency harmonics 179

U

Unicontrol high-frequency radio direction finder, a 25

W

Wave length of light as a standard of length 395
Weights, laboratory, short tests for sets of 65
Wenner, F., A principle governing the distribution of current in system of linear conductors 191
Wheatstone bridge 191

Z

Zinc, determination in dental gold alloys 209
