

# This bright monthly magazine

- tells you what Government research is doing with your money,
  - helps you understand the role of science and technology in your life today (and tomorrow!)
  - improves your knowledge of everything from smoke detectors to microwave radiation,
- and lets you take advantage of NBS research on your job, in your home, in schools, everywhere you go.

# Knowledge, News, & Facts You Can Use *and enjoy*

Plus . . .  
your own copy of  
Metric Guidelines  
from Dimensions,  
an award-winning magazine  
published by  
the National Bureau of Standards  
of the  
U.S. Department of Commerce

to give you important information on research  
affecting national problems

# Knowledge for the inquisitive mind . . .

yours with **DIMENSIONS**<sup>(NBS)</sup>

Now you can be more informed about the latest research at the Nation's physical sciences, engineering, and measurement laboratory . . .

- Subscribe to DIMENSIONS/NBS,
- and receive a special publication on the metric system.

Just use the order form below to tell us you want interesting articles on today's challenges, policies, and developments in:

- energy research and conservation
- building technology
- environmental research
- computer science
- consumer product technology
- radiation measurement
- electronic technology
- cryogenics
- fire prevention and control
- materials research

In addition, departments in the magazine are tailored to the interests of the technical specialist. In each issue you'll find articles on such topics as:

**Staff Reports.** Announcements by scientists and engineers of developments in the laboratory. A computer memory device with application in industry. A method for calibrating the pressure transducers used in the new space shuttle. The availability to the scientific community of a synchrotron radiation facility. A graphic pen for computer identification by fingerprint. The discovery of a sink in the troposphere for fluorocarbons.

**On Line with Industry.** A discussion of a cooperative research project between NBS and a segment of industry. Dentistry. The development

of a new "degree sugar." Fire studies of gypsum.

**Standard Status.** Reports by experts on one of the many areas of standards development and services. Engineering standards. Basic standards. Changes in the voluntary standards system. Standard Reference Materials. Standards information services.

**Conferences.** A listing of all scheduled NBS conferences and workshops, updated every month, with reports on selected meetings. Neutron standards. Flow measurement. Roofing technology. Computer simulation. Privacy and computer security. Building energy conservation. Nondestructive evaluation. Mechanical failures. Environmental measurements. Product safety.

**Publications.** Reviews and listings of NBS formal publications. Analytical chemistry. Building technology. Health and safety. Electromagnetics. Metrology. Engineering, product, and information standards. Environmental studies. Physical measurements. Nuclear physics and radiation technology. Processing and performance of materials. Thermodynamics and chemical kinetics.

**News Briefs.** Timely notes on policies, programs, and technical developments.

With your subscription to DIMENSIONS/NBS, if you use this card, you will receive everything you've wanted to know about the International System of Units (SI) used in science and technology.

(please detach here)

## SUBSCRIPTION ORDER FORM

Enter my subscription to DIMENSIONS/NBS (Code DNBS) at \$11.00. Add \$2.75 for foreign mailing. No additional postage is required for mailing within the United States or its possessions.
