## RADIO PUBLICATIONS OF THE BUREAU OF STANDARDS

The radio publications of the Bureau of Standards printed at the Government Printing Office can be secured by purchase from the Superintendent of Documents, Government Printing Office, Washington, D.C., at the prices stated in the following list. This list also includes references to articles emanating from this Bureau which have been published in outside periodicals. The Bureau can not supply copies of papers published in outside periodicals; inquiries for copies of such papers should be addressed directly to the periodical concerned. A list of Letter Circulars on radio subjects is also given herein; see section of that title below.

Persons who wish to keep in touch with the radio publications of the Bureau as they are issued should subscribe to the "Radio Service Bulletin," published monthly by the Bureau of Navigation, Department of Commerce. Besides notices regarding new Government radio publications, the "Radio Service Bulletin" contains brief news items concerning Government radio work, additions and changes to the lists of radio calls and radio regulations, and other useful information. The "Radio Service Bulletin" also publishes each month a list of references to the more important radio articles appearing in the technical radio periodicals. These references are classified, and furnish a means of keeping in touch with the material appearing on a particular subject. Subscriptions should be sent to the Superintendent of Documents. The price is 25 cents per year for subscribers in the United States and its possessions, Canada, Cuba and Mexico. To other countries the subscription price is 40 cents per year. The Bureau does not send individual notices of its publications as they appear.

The publications of the Bureau of Standards printed by the Government Printing Office are divided into five series: Scientific Papers, Technologic Papers, Circulars, Miscellaneous Publications, and Handbooks.

The Scientific Papers are published separately, and also in cloth-bound volumes. Scientific Papers Nos. 1 to 329 are included in volumes 1 to 14, which were called "Bulletin of the Bureau of Standards." Volumes 15, 16, and 17, and subsequent volumes are called "Scientific Papers of the Bureau of Standards." Volume 15 includes Nos. 330-368, volume 16 includes Nos. 369-404, and volume 17 includes Nos. 405-438. The bound volumes can be procured only by purchase from the Superintendent of Documents. Volumes 1 to 14 cost \$1.50 per volume, and later volumes cost \$2.00 per volume. Subscriptions in advance for the separate unbound Scientific Papers constituting a volume, to be sent promptly as issued, may be placed with the Superintendent of Documents at

the rate of \$1.25 per volume. Advance subscriptions for unbound copies of the Technologic Papers may also be placed at the same rate. The earlier volumes (from vol.1. to vol.14) were published in four paper-bound "Numbers" each, as well as in a complete cloth-bound volume, and "vol.10, No.4" means that the paper in question will be found in the paper-bound part of vol.10 marked "No.4." These separate paper-bound numbers can be purchased separately.

The prices stated for publications printed at the Government Printing Office, include postage in the United States and its possessions, Canada, Cuba, and Mexico. On shipments to be sent to other countries the actual cost of the postage is charged, which is at the rate of eight cents per pound. In general, an allowance should be made for foreign postage equal to about 25% of the amount of the order.

The following abbreviations are used to indicate the several classes of publications:

- S = Scientific Paper
- T = Technologic Paper
- C = Circular
- M = Miscellaneous publications
- H = Handbook
- ° = Not printed at the Government Printing Office
- \* = Publications of the Naval Radio Research Laboratory, which is located at the Bureau of Standards.

For example, S189 means Scientific Paper No. 189.

°Papers designated by the mark ° are not printed by the Government Printing Office, but are publications in an outside periodical by a member of the staff of the Bureau. They should be consulted at libraries which maintain files of the particular periodicals referred to.

### General

The Principles Underlying Radio Communication. Signal Corps Radio Communication Pamphlet No.40. Second edition, issued March 23, 1922. Textbook of 619 pages, with 300 illustrations, covering radio principles and practice. Price \$1.00. Foreign postage 15 cents extra. (See note above regarding foreign postage.)

### Letter Circulars.

The following documents are not available in printed form. They have been prepared in mimeographed form only, like this pamphlet, and can be consulted at the Bureau of Standards. The Bureau has only a small number of copies of these, but where a person can show special need for the information, a copy may be furnished without charge.

- Letter Circular No. 40, Radio publications of the Bureau of Standards.
- Letter Circular No. 49, Description and operation of an audio-frequency amplifier unit for simple radio receiving outfits.
- Letter Circular No. 56, Methods of radio direction finding as an aid to navigation: The relative advantages of locating the direction finder on shore and on shipboard.

- Letter Circular No. 50, Bibliography of books and periodicals on tests, properties and uses of electrical insulating materials.
- Letter Circular No. 51, List of the more important United States patents covering the material and methods of manufacture of insulating materials.
- Letter Circular No. 73, Fees for testing radio apparatus.
- Letter Circular No. 75, The secondary standardization of radio wavemeters.
- Letter Circular No. 76, The standardization of inductors at radio frequencies.
- Letter Circular No. 77, The comparison of condensers at radio frequencies.
- Letter Circular No. 78, Design of a portable short-wave radio wavemeter.
- Letter Circular No. 86, Methods of Measuring voltage amplification of amplifiers.
- Letter Circular No. 87, Methods of measuring properties of electron tubes.
