ELECTRODEPOSITION.

PUBLICATIONS BY THE STAFF OF THE NATIONAL BUREAU OF STANDARDS.

January 8, 1945

I. SCOPE OF ACTIVITIES.

The principal activities of the Bureau in the field of electro-deposition are as follows:

1. Researches upon the fundamental principles of electro-deposition.
2. Studies upon the quality and value of electroplated coatings and the development of specifications for use by the Government and industry.
3. The development of special processes and equipment required by other branches of the Government, such as the War, Navy, and Treasury Departments.
4. Investigation of the methods of testing electroplated products and the solutions used in electrodeposition.
5. Testing of electroplated metals, such as hardware and plumbing fixtures, that are purchased by the Federal Government on specifications. (Tests are not made for the general public.)
6. Furnishing information to the Government and the public. Requests for information in this field that are not covered by the inclosed publications will receive careful attention.

In all the above activities the Bureau cooperates directly with other Government agencies and with appropriate technical organizations, such as the American Electroplaters' Society, the International Association of Electrotypers, and the American Society for Testing Materials.

II. SCOPE OF THIS LETTER CIRCULAR

The publications that are listed in this letter circular are divided into three parts.

A-- Government publications on electroplating, principally from the National Bureau of Standards.

FS - Federal Specifications that include definite requirements for electroplated coatings. (In certain cases, individual

agencies, especially the War and Navy Departments, have separate specifications to meet their particular needs. Information regarding such specifications may be obtained from the Office of the Quartermaster General, War Department, Washington, D. C.; or the Bureau of Supplies and Accounts, Navy Department, Washington, D.C.

B - Papers from the National Bureau of Standards that were published in outside journals, files of which are available in many libraries.

In the first column, each paper is assigned a "reference number", purely for use in the index of this circular. This number should not be included in requests addressed to the Superintendent of Documents, but only the "serial number" and title.

For convenience, a list "C" is added, of journals and books printed in the English language, that contain information on electrodeposition.

The index contains reference to the principal subjects covered in lists A, FS, and B.

III. PUBLICATIONS

Government Publications:

List "A" includes in chronological order those papers published by the Government. Where the price is stated in the extreme right-hand column, the publication can be purchased from the Superintendent of Documents, Government-Printing Office, Washington 25, D.C. The prices quoted are for delivery to addresses in the United States and its territories and possessions and in certain foreign countries which extend the franking privilege. In the case of all other countries, one-third of the cost of the publication should be added to cover postage. Remittances should be made either by coupons (obtainable from the Superintendent of Documents in sets of 20 for \$1.00 and good until used), or by check or money order payable to the "Superintendent of Documents, Government Printing Office" and sent to him with order. Letter Circulars are obtainable, without charge, from the Bureau. Publications marked "CP" are out of print. Files of the Government publications will be found in the larger libraries.

The explanation for the serial letters used for designating the separate papers of the Bureau is as follows:

RP = "Research Paper". These are reprints of articles appearing in the Bureau of Standards Journal of Research" (BS J. Research) and the "Journal of Research of the National Bureau of Standards" (J. Research NBS), the latter being the title of this periodical since July 1934 (vol. 13, number 1).

S = "Scientific Paper" of the National Bureau of Standards. From Nos. 1 to 329, inclusive, the separate papers of this series were known as reprints from the "Bulletin of the Bureau of Standards" (Bul. BS). Subsequently, from Nos. 330 to 572, the separates were known as reprints from the "Scientific Papers of the Bureau of Standards" (Sci.Pap.BS). This series was superseded by the "Bureau of Standards Journal of Research" in 1928.

T = "Technologic Paper" of the National Bureau of Standards. Nos. 1 to 202 were issued each independent of the other with individual pagination. Later they were assembled to make the first 15 volumes of this series, and subsequent separates were given volume pagination. (Tech. Pap. BS). This series was superseded by the "Bureau of Standards Journal of Research" in 1928.

C = "Circular" of the National Bureau of Standards.

LC = Mimeographed "Letter Circular of the National Bureau of Standards".

PHR = Public Health Reports, issued by the U. S. Public Health Service, Federal Security Agency.

LIST "A"

Published by the Government

Ref. No.	Title	Year	Series	Price
1	Relation between composition and density of aqueous solutions of copper sulfate and sulfuric acid. H.D.Holler and E.L.Peffer, Bul. BS <u>13</u> , 273 (1916-17)	1916	S. 275	CP
2	Black nickel plating solutions. G.B.Hoga-boom, T.F.Slattery, and L.B.Ham. Tech.Pap. BS <u>15</u> (1921)	1921	T 190	CP
3	Zinc cyanide plating solutions. W.Blum, F.J.Liscomb, and C.M. Carson, Tech. Pap. BS <u>15</u> (1921)		T 195	CP
4	Electrodeposition of chromium from chromic acid baths, H.E.Haring, and W.P.Barrows. Tech. Pap. BS <u>21</u> , 413 (1926-27)	1927	T 346	15 c.
5	Health hazards in chromium plating, J.J. Bloomfield (Public Health Service) and W. Blum. Public Health Reports <u>43</u> , 2330 (1928)	1928	PHR 1245	5 c.

30	Dropping tests for measuring the thickness of zinc and cadmium coatings on steel. A. Brenner. J. Research NBS <u>23</u> , 387 (1939).	1939	RP 1240	10 c
31	Methods of measuring pH in alkaline cyanide plating baths. M.R. Thompson. J. Research NBS <u>24</u> , 423 (1940).	1940	RP 1291	5 c
32	Outdoor exposure tests of electroplated nickel and chromium coatings on steel and nonferrous metals. W. Blum. and P.W.C. Strausser, J. Research NBS <u>24</u> , 443 (1940).		RP 1293	5 c

LIST "FS"

Federal Specifications Relating to Electroplating¹.

Federal Specifications may be obtained by sending the list price (not stamps) to the Superintendent of Documents, Government Printing Office, Washington, D. C. DO NOT send money to the National Bureau of Standards.

¹ In recent years certain "Emergency Specifications" have been adopted. Information regarding the status of these may be secured from the Procurement Division, Treasury Department, Washington, D. C.

Ref. No.	Title	Plating Reference	Series	Date	Price
201	Bolts, lag; steel (lagscrews)	Zinc cadmium	FF-B-561	8/27/37	5 c
203	Hardware, builders'; Locks and lock-trim	Nickel, chromium on nonferrous metals. Nickel, chromium, zinc, cadmium on steel.	FF-H-106	8/19/30	5 c
203a	Hardware, builders'; Door-closers.	as above	FF-H-121a	4/12/37	5 c

Ref. No.	Title	Plating Reference	Series	Date	Price
204	Hardware, builders'; shelf, and miscellaneous	Nickel, chromium on non-ferrous metals. Nickel, Chromium, zinc, cadmium on steel	FF-H-111	8/19/30	10 c
205	Hardware, builders'; hinges	As above	FF-H-116a	2/10/37	10 c
206	Hardware, and fittings, (for) lavatory partitions and inclosures	Nickel, chromium on brass and bronze	FF-H-136	10/29/36	5 c
207	Turnbuckles	Zinc, cadmium on steel	FF-T-791	1/28/36	5 c
208	Salts; nickel (for) electroplating and electrotyping	Nickel sulfate Nickel ammonium sulfate. Nickel chloride	O-S-61	5/27/30	5 c
220	Tableware; silver-plated	Silver plating	RR-T-51a	6/5/34	5 c
221	Tableware; steel	Chromium, nickel, silver and tin plating	RR-T-56	8/22/41	5 c
221a	Emergency Alternate Federal Specification for Tableware; Steel	Silver plating only	E-RR-T-56	5/20/42	free
231	Outlet boxes; steel cadmium or zinc coated, with covers and accessories	Cadmium, zinc on steel	W-O-821a	6/10/37	5 c

L.C. 775 - #8

Ref. No.	Title	Plating Reference	Series	Date	Price
232	Conduit; steel rigid, zinc-coated	Zinc on steel	WW-C-581a	5/7/35	5 c
233	Plumbing fixtures; (for) land use.	Nickel; chromium on brass and bronze. Zinc on steel.	WW-P-541a	3/30/40	15 c
234	Tubing, electrical metallic	Zinc on steel	WW-T-806a	1/8/35	5 c
235	Unions; brass or bronze, 250 lbs.	Nickel, chromium on brass	WW-U-516	12/5/33	5 c
236	Valves, radiator; air, thermostatic (gravity steam heating systems)	Nickel, chromium on brass	WW-V-151	4/23/37	5 c

377	General principles and methods of electroplating. W. Blum. Trans. Electrochem. Soc. <u>80</u> , 249 (1941)	
378	Lead plating. Allen G. Gray and W. Blum. Trans. Electrochem. Soc. <u>80</u> , 645 (1941).	
379	Substitution of iron for nickel and copper in printing plates. Vernon A. Lamb. and W. Blum. Technical Bulletin No. 7, issued April 15, 1942 by the International Association of Electrotypers & Stereotypers, Cleveland, Ohio.	1942
380	The theory of the potential and the technical practice of electrodeposition. V. The Two-dimensional rectangular enclosures. Charles Kasper. Trans. Electrochem. Soc. <u>82</u> , 153 (1942).	1942
381	Military applications of electroplating. W. Blum. Convention Proc. Am. Electroplaters' Soc., p. 5, (1942)	

Ref. No.	Title	Year
382	Effect of polishing base metals upon the protective value of electroplated coatings (Progress Report), G.A. Lux and M. Berdick. Convention Proc. Am. Electroplaters' Soc., p. 19 (1942).	1942
383	Iron plating and its application to printing plates. V.A. Lamb and W. Blum. Convention Proc. Am. Electroplaters' Soc., p. 106 (1942).	
384	Cleaning and pickling (Review of 1942), V.A. Lamb Metals and Alloys <u>17</u> , 86 (1943)	1943
385	Applications of electroplating to military supplies. W. Blum. Convention Proc. Am. Electroplaters' Soc., p. 3 (1943).	
386	Electroplating and the war. W. Blum. Convention Proc. Am. Electroplaters' Soc., p. 1, (1944).	1944
	Among the recent books in English on electro-deposition are:	
	Electrodeposition of metals. G. Langbein and W.T. Brannt. (Henry Carey Baird and Co., 8th Ed., 1920).	
	Practical electroplating. (5th Ed., 1923) W.L.D. Pedell.	
	Modern electroplating. W.E. Hughes. (Oxford Technical Publications, 1923).	
	The chemical coloring of metals. S. Field and S.R. Bonney. (Chapman and Hall, Ltd., 1925)	
	Electroplating with chromium, copper, and nickel. D. Freeman and F.G. Hoppe. (Prentice-Hall Co., 1929).	
	Principles of electroplating and electroforming. W. Blum and G.B. Hogaboom. (McGraw-Hill Book Co., 2d ed., 1930).	
	Electroplating. S. Field and A.E. Weill. (I. Pitman and Sons, Ltd., 1930).	
	Chromium plating. E.S. Richards. (J.B. Libbincott Co., 1932).	
	Chromium plating. O. Bauer, H. Arndt, and W. Krause. English translation by E.W. Parker. (Edward Arnold and Co., 1935).	

IV. INDEX

In the following list, each publication is referred to by the reference number, by which it is listed in the first column in the preceding pages of this circular, in which are given explicit references, and directions for ordering Government publications.

Accelerated tests	22,25,29
Adhesion of electrodeposits	342
Alternate deposits	306
Anodes	
Chromium plating	4
Nickel	316
Base metal, effect on structure of deposits	311
Black nickel plating	2
Brass, protection by	
Nickel	32
Chromium	32
Cadmium, protective value on steel	25,326
Cathode film composition	369
Chord method for thickness	24
Chromium deposition	
Applications	
Gages	13
Mechanical	338
Printing	341
Protection against corrosion	16,21,22
Status	345
Wear resistance	13
Baths	
Chromic acid	4
Conductivity	9
Density	9
Health hazards	5
Structure	18
Theory	18,23
Throwing power	8
Chromic salt	20
Chromous salt	20

Baths contin'd

Deposits	
Accelerated tests	22
Appearance	4
Porosity	16
Protective value	21, 22
Reflecting power	6
Specifications	202, 203, 204, 205, 206, 233 235, 236, 203a
Structure	334
Thickness measurement	367
Cleaning steel (embrittling effect)	304
Colloids in electrodeposition	337
Conductivity of solutions	
Chromic acid baths	9
Method of measurement	327
Nickel baths	318, 320, 323
Zinc baths	329
Copper deposition	
Acid baths	10
Addition agents	11
Density	1
Electrotyping	1, 10, 11, 301
On silvered glass	12
Throwing power	312
Typical composition	21
Cyanide baths	
Analysis	342a
Throwing power	312
Typical composition	21
Corrosion	
Principles	330, 332
Protection against, by plating	21, 22, 25, 325, 331
Crystal spotting	7
Current distribution	358, 359, 362, 365, 366, 370, 371 380
Cyanides	
Analysis	15, 17, 342a
Constitution of solutions	344, 349, 373
Decomposition	346
Free cyanide, definition	344, 373
Free cyanide, titration	342a
Purification	15
Uses in metallurgy	343

Decomposition potential, definition	351
Dropping tests, thickness of zinc and cadmium	25,30,353,364
Electrodeposition	
Future trends	328
Teaching principles	324
Electrolyte, definition	322
Electroplating	
Adhesion of deposits	342
Automobile industry	333
Progress	315
Protective value	21,22,25,325,331
Scope of	372
Electrotyping	
Copper baths	1,10,11,301
Dimensional changes	14
Graphite	336
Nickel baths	335
Embrittling steel	304
Exposure tests	21,25,325,331
Ferroxyl test	22,32,325,331,360
Fluorides	
Determination in nickel baths	319
Use in nickel baths	305
Freezing cathode films	369
Gages, chromium plated	13
Glass electrode, for pH measurement	19,361
Graphite, for electrotyping	336
Gun barrels, electroplating	317
Hardware, plating specifications	203a,202,203,204,205,206
Health hazards, chromium plating	5
Ionogen, definition	322
Iron	
Deposition	26,340,379,383
Effect in nickel deposition	313
Printing plates	340,379,383
Intermittent immersion test	22,25,323,331

Lead deposition	303,378
Lead-tin alloy deposition	307
Magnetic measurement of nickel deposits on nonferrous metals	27,356
Magnetic measurement of coatings on steel	28,357
Metal shortages	375,376
Mirrors, silvering and plating on	12
Nickel deposition	
Anodes	316
Baths, typical	21,325,331
Acidity	309,339
Cathode efficiency	320
Cathode potential	320
Conductivity	318,320,323
Effect of iron	313
Fluorides in	305
Impurities in	310
Plating on zinc	323
pH	309,339
Polarization	320,323
Throwing power	320,323
Black nickel plating	2
Deposits	
Accelerated tests	22
High current density	352
Protective value	21,22,325,531,355,360
Thickness, magnetic measurement	27,28,356,357
Salts (Nickel)	
Impurities in	310,313
Specification	208,310
Overvoltage, definition	351
pH measurements	377
Alkaline baths	31,361
Glass electrode	19,31,361
Nickel baths	309,339
Zinc baths (acid)	329
Pickling, embrittling effect on steel	304
Plumbing fixtures, plating specifications	233

Polarization	
Definition	351
Measurement	327
Nickel baths	320, 323
Zinc baths	329
Polishing steel	382, 374
Porosity of coatings	22, 355, 360
Principles of plating	377
Printing plates (see also electrotyping)	
Chromium plated	341
Electrolytic reproduction	308
Iron deposition	340
Protection against corrosion	21, 22, 23, 32, 325, 331
Rare metal deposition	372
Resistivity of solutions	
Chromium baths	9
Method of measurement	327
Nickel baths	318, 323
Zinc baths	329
Salt Spray test	22, 25, 29, 355, 360
Silvering glass	12
Silver plating	
Analysis of baths	17
Applications	353, 368
Rapid	368
Specifications	220
Specifications (Federal)	
Nickel salts	208
Builders' hardware	203a, 202, 203, 204, 205, 206
Electrical equipment	231, 232, 234
Plumbing fixtures	233
Silver plated tableware	220
Testing for conformance	350
Spotting out	7
Spot test for chromium	367
Stain spotting	7

Steel	
Embrittling by pickling	304
Gages, chromium plated	13
Polishing	374
Protection against corrosion by	
Cadmium	25,326
Chromium	21,32
Nickel	21,22,32,325,331
Zinc	25
Stripping electrodeposits	347,355
Structure of electrodeposits	26,301,302,306,311,314,352,377
Thickness of deposits, measurement	377
Chord method	24
Dropping method	25,30,353,364
Magnetic methods	27,28,356,357
Spot test	367
Stripping methods	347,355
Throwing power	
Chromium plating	8
Definition	312,370
Measurement	312,370
Nickel plating	320,323
Zinc plating	329
Tin plating	
Analysis of baths	349
Zinc	
Baths	
Acid	25,329
Cyanide	3,25
Plating nickel on zinc	2,323
Protection by	
Nickel	32
Chromium	32
Protective value on steel	25
