

S I M P L I F I E D P R A C T I C E R E C O M M E N D A T I O N S

Alphabetical List Revised to April, 1948

Simplified Practice means reduction of excessive variety of manufactured products, or of methods. Simplified Practice Recommendations are records of stock items retained after superfluous variety has been eliminated. These recommendations are developed by voluntary cooperation among manufacturers, distributors, consumers, and other interests, upon the initiative of any of these groups, through a regular procedure of the National Bureau of Standards established for that purpose. ¹

With certain exceptions² current recommendations are available in printed form for 5 cents per copy, unless otherwise indicated. When ordering give number and title of the publication, as, for example, "R133-47, Surgical Dressings."

A discount of 25 percent will be allowed on orders for 100 or more copies.

Domestic orders for publications should be addressed to the Superintendent of Documents, Government Printing Office, Washington, D. C., and accompanied by coupons (obtainable from the Superintendent of Documents, in sets of 20 for \$1.00 and good until used), or by check or money order payable to the "Superintendent of Documents." Remittance is required in advance of shipments. The prices in this list are for publications which are to be delivered to addresses in the United States and its possessions, and to countries extending the franking privilege.

Orders from other countries should identify the desired publications by number and title, and should be accompanied by remittances which include one-third of the total cost of the specified publications, to cover postage. Remittances should be made payable to the "Superintendent of Documents," and mailed with order to that officer at the Government Printing Office, Washington, D. C., U.S.A.

¹The procedure is explained in detail in Simplified Practice, Its Purpose and Application, Letter Circular LC-590, April 15, 1940, National Bureau of Standards.

²Numbers indicated by an asterisk (*) are available, at present, only in mimeographed form. They can be obtained, free of charge, from the Commodity Standards Division, National Bureau of Standards, Washington 25, D. C.

MEMORANDUM FOR THE RECORD

DATE: 10/15/54

Cases, flashlight, metal and non-conducting.....	68-41	Cones, warp and knitting yarn; basic dimensions for; and hole sizes for bobbins for filling cop winders.....	152-34
Chain, welded.....	10¢. 100-47	Containers and lids, paper; for foods and beverages (heavy duty, round, nesting type).....	175-40
Chairs, wooden; folding and portable.....	80-28	Containers and packages for household insecticides (liquid spray type).....	203-44
Chalks, crayons, and related art materials for school use (types, sizes, packaging and colors).....	192-45	Containers (cans), fruit and vegetable (names, dimensions, capacities, and designated use).....	155-40
Chasers for self-opening and adjustable die heads....	10¢. 51-29	Containers (cans), tinned steel, for ice-cream.....	164-36
Checks, bank; and notes, drafts, and similar instruments.....	50	Containers, extracted honey...	156-41
Checks, guest, restaurant...	113-30	Containers, glass, for cottage cheese and sour cream ...	10¢. 148-47
Cheese, cottage; and sour cream; containers (glass) for.....	10¢. 148-47	Containers, glass; for green olives.....	196-42
Cherries, maraschino; containers (glass) for.....	197-46	Containers, glass; for maraschino cherries.....	197-46

Section 1: Introduction
This document outlines the project goals and objectives. The primary focus is on developing a robust system that can handle large-scale data processing and analysis. The project is divided into several key phases, including data collection, processing, and reporting. The initial phase involves gathering requirements and defining the scope of the project. This is followed by a detailed design phase where the architecture and data flow are established. The final phase is implementation and testing, ensuring that the system meets all requirements and is ready for deployment.

Section 2: System Architecture
The system architecture is designed to be modular and scalable. It consists of several interconnected components: a data source layer, a processing layer, and a reporting layer. The data source layer is responsible for collecting and ingesting data from various sources. The processing layer handles the transformation and analysis of the data. The reporting layer generates visualizations and reports based on the processed data. The architecture is built using modern technologies and follows industry best practices for system design. This ensures that the system can evolve over time to accommodate changing requirements and data volumes.

Section 3: Implementation Details
The implementation details describe the specific steps and tasks involved in building the system. This includes setting up the development environment, configuring the database, and implementing the core logic of the application. The development team has chosen a microservices-based approach to build the system, allowing for independent development and deployment of different components. The database is configured to optimize for performance and scalability. The reporting module is integrated with a data visualization library to provide an intuitive user interface. The implementation phase is closely monitored to ensure that the system is built according to the design and meets the project's timeline and budget.

SIMPLIFIED PRACTICE RECOMMENDATIONS

TITLE	S.P.R. No.	TITLE	S.P.R. No.
Containers, Glass, for mayonnaise and kindred products..	R131-35	Dishes, food. (made of waxed paper, wood pulp or wood).....	R187-42
Containers, glass, for preserves, jellies and apple butter.....	91-32	Doors, Hollow metal single-acting, swing; frames and trim...	82-28
Containers for paints, varnishes, and related products; and colors.....	144-45	Doors, Kalamein; single-acting, swing; frames and trim.....	83-28
Containers; for peanut butter; and packaging of.....	209-45	Doubletrees, singletrees, and neckyokes.....	134-32
Containers, spice (tin and fiber).....	170-38	Dressings, surgical.....	10¢. 133-47

		Invoice, purchase order and inquiry forms (paper).....10¢.	37-38

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is crucial for the company's financial health and for providing transparency to stakeholders. The text notes that without proper record-keeping, it would be difficult to track expenses and revenues, which could lead to significant financial discrepancies.

2. The second part of the document outlines the specific procedures for recording transactions. It details the steps involved in entering data into the accounting system, from initial receipt of documents to the final posting of entries. The text stresses the need for consistency and accuracy in these procedures to ensure the reliability of the financial statements.

3. The third part of the document addresses the role of the accounting department in monitoring and controlling the company's financial resources. It discusses how the department uses the recorded data to identify areas of potential waste or inefficiency and to recommend corrective actions. The text highlights the department's responsibility in ensuring that the company's financial goals are being met and that resources are being used effectively.

4. The fourth part of the document discusses the importance of regular audits and reviews of the accounting records. It explains that these audits are necessary to verify the accuracy of the records and to detect any errors or irregularities. The text notes that regular audits also help to ensure compliance with applicable laws and regulations, which is essential for the company's long-term success.

5. The fifth part of the document concludes by summarizing the key points discussed and reiterating the importance of a strong accounting system. It emphasizes that a well-maintained and accurate accounting system is the foundation of a successful business, and that the accounting department plays a vital role in ensuring its integrity and reliability.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice to ensure transparency and accountability.

2. The second section outlines the procedures for handling discrepancies between the recorded amounts and the actual cash received. It states that any such variance must be investigated immediately and reported to the appropriate authority.

3. The third part of the document details the process of reconciling the accounts at the end of each month. It requires that the total of the recorded transactions be compared against the bank statements to identify any differences.

4. The fourth section describes the requirements for the physical custody of the cash and the safekeeping of the records. It mandates that all cash must be stored in a secure location and that the records be kept in a fireproof safe.

5. The fifth part of the document discusses the periodic audits conducted by the internal control department. It notes that these audits are essential for detecting any potential fraud or mismanagement of funds.

6. The sixth section outlines the consequences of failing to comply with the established financial controls. It states that any employee found to be in violation of these rules will face disciplinary action, up to and including termination.

7. The seventh part of the document provides a summary of the key points discussed and reiterates the commitment to maintaining the highest standards of financial integrity.

8. The eighth section contains the signature of the responsible officer and the date of the document's issuance.

9. The ninth part of the document includes a list of the relevant departments and personnel involved in the implementation and monitoring of these financial controls.

10. The final section of the document provides contact information for any inquiries or further information regarding the financial policies and procedures.
