July 2001

Dear SRM Customer:

Since 1998, NIST has issued 188 new and renewal NIST Standard Reference Materials (SRMs). This special catalog supplements the existing printed NIST SRM catalog to help you find exactly the material you need.

This catalog is divided into six sections, grouping SRMs into major categories of use. We encourage you to check all categories, as your use may not fit exactly into these categories. The supplemental information contains a description of each material and the date the material was issued. The latter is to ensure that the material in your possession is the most current.

In addition, I want to announce that online ordering of NIST Standard Reference Materials is now available for U.S. customers only. The NIST SRM Website <http://www.nist.gov/srm> now provides easy access to the information and services that customers need most. A single mouse click reaches the current price list, all new and newly renewed NIST SRMs, and the complete list of all NIST SRMs in order by SRM/Catalog number. Orders can be placed online with virtually no extra effort. Visit the site TODAY! <http://www.nist.gov/srm>

As usual, if you have any questions and comments, contact the NIST SRM Sales Department at:

E-mail: srminfo@nist.gov

Fax: 301-948-3730

Tel: 301-975-6776.

We look forward to helping you meet all your Standard Reference Materials needs.

Standard Reference Materials Program

Industrial Standard Reference Materials

New/Renewal Industrial Standard Reference Materials (SRMs) for Ferrous Metals, Nonferrous Metals, Microanalysis, High Purity Materials, Ceramics and Glasses, Cement, and Engine Wear Measurements.

There are eighteen new and nine renewal industrial materials available. In the area of ferrous and nonferrous metals there are eight new zinc aluminum alloys, nitrogen in low alloy steel, nickel based superalloy, and two new refractory alloys. There are five renewals of high purity materials with a range from sucrose, potassium hydrogen phthalate, acetanilide, cystine and chlorine isotopic, and three new reference materials, isotopically characterized carbon dioxide. There is a new silicon nitride powder, three renewal cements, one renewal of wear metals in oil, and a new lubricating oil additive package.

Environmental Standard Reference Materials

New/Renewal Environmental Standard Reference Materials (SRMs) for Inorganic, Organic, Primary Gases, Fossil Fuels, Geological and Ore Measurements.

There are twenty-one new and thirty-five renewal materials available for environmental measurements. New materials listed below cover a large range, such as; LC column performance, and chiral selectivity, reformulated gasoline, petroleum and furnace coke, sludge and sediments, diesel particulate matter and extract, mussel tissue contaminants, trace elements in coal subbituminous, and trace elements in soil. The thirty-five renewal materials include primary gas mixtures, sulfur, mercury, and trace elements in coal, PCB's in human serum, organics in cod liver oil, transformer oil, and urban dust.

Physical Property Standard Reference Materials

New/Renewal Physical Property Standard Reference Materials (SRMs) for Ion Activity, Polymeric, Thermodynamic Properties, Optical Properties, Metrology, and X-Ray Spectrometry Measurements.

There are twenty-eight new and fifteen renewal SRMs certified for physical properties. Four renewals for ion activity include sodium tetraborate, potassium tetroxalate, sodium bicarbonate, sodium carbonate. One new and one renewal material for polymeric properties range from polystyrene, to ultra-hi molecular wt. polyethylene bar. There are three new and one renewal materials certified for thermodynamic properties that include tin and indium freezing point, gold vs. platinum thermocouple, and indium DSC calibration standards. Thirteen new optical standards are available ranging from liquid refractive index, potassium dichromate solution, six transmittance filters for optical density, and three IR transmittance SRMs. For metrology measurements there are ten new and six renewal materials ranging from coating thickness, arsenic implant, thin film depth profile, mode field diameter, wavelength absorption cells, polarization mode dispersion, optical fiber coating, and coplanar waveguide calibration. For x-ray spectrometry measurements, one new and two renewals include materials for liquid density, and line positioning.

Health/Clinical/Food Standard Reference Materials

New/Renewal Health/Clinical/Food Standard Reference Materials (SRMs) for Health, Industrial Hygiene, Food Measurements.

There are twelve new and nineteen renewal materials available for health/clinical/food measurements. In the health area, there are four renewal and three new materials that range from uric acid, D-glucose, bovine serum albumin, toxic metals in blood, PCR-based DNA profiling, mitochondrial DNA sequencing, to ascorbic acid in human serum. There are eight new materials for industrial hygiene, and four renewal materials ranging from cocaine metabolite in urine, respirable alpha quartz, respirable cristobalite, lead paint films for XRF. The eight new materials include seven individual lead paint films, and trace elements in indoor dust. For foods and related products there are two renewals and one new SRM, meat homogenate. The renewals include typical diet, and oyster tissue. All new and renewal materials are listed below.

In addition, nutrition composition information has been added to a number of our existing reference materials. The certificates and reports of investigation have been revised to include this new information. The materials are SRM 1563 Cholesterol and Fat-Soluble Vitamins in Coconut Oil (Natural and Fortified), SRM 1974a Organics in Mussel Tissue (*Mytilus edulis*), SRM 1570a Trace Elements in Spinach Leaves, RM 8415 Whole Egg Powder, RM 8418 Wheat Gluten, RM 8432 Corn Starch, RM 8433 Corn Bran, RM 8435 Whole Milk Powder, and RM 8436 Durum Wheat Flour. The nutrition composition data that has been added are proximates (solids, fat, protein, etc.), individual fatty acids, calories, and total dietary fiber, as appropriate.
