

## INDEX TO VOLUME 16

	Page		Page
<b>A</b>			
Absolute reflectometer.....	421	<i>Coblentz, W. W.</i> , Infra-red transmission and refraction data on standard lens and prism material.....	701
Adjustment of parabolic and linear curves to observations taken at equal intervals of the independent variable.....	363	—, Positive and negative photoelectrical properties of molybdenite and several other substances.....	595
<i>Agnew, P. G.</i> , A new form of vibration galvanometer.....	37	—, Reflecting power of Monel metal, stellite, and zinc.....	249
Air forces on circular cylinders, axes normal to the wind, with special reference to dynamical similarity.....	489	—, Spectrophotoelectric sensitivity of thalofide.....	253
Alternating-current resistance and inductance of conductors.....	93	—, and <i>H. Kahler</i> , A new spectropyrheliometer and measurements of the component radiations from the sun and from a quartz-mercury vapor lamp.....	233
Ammonia, Vapor pressure.....	1	Coercive force.....	291
Ammonium persulphate for revealing the macrostructure of iron and steel.....	715	Commercial nickel steels, critical ranges of...	195
Annealed carbon steels.....	557	Common failures of the Clark standard cell..	409
Arc lamp, cadmium-vapor.....	45	Compasses, magnetic.....	273
Arc spectra of seven elements, Wave lengths longer than 5500 A in.....	51	Completely modulated waves, transmitter of..	259
Arcs, low-voltage.....	309, 725	Complicated group of objects, detection of changes in.....	437
Atmosphere, relative spectral transmission of the.....	377	Component radiations from the sun and from a quartz-mercury vapor lamp.....	233
Atomic theory and low-voltage arcs in caesium vapor.....	309	Conductors, resistance and inductance of...	93
<b>B</b>			
<i>Bates, Frederick</i> , A new cadmium-vapor arc lamp.....	45	Copper, reagents for etching.....	641
<i>Bennett, A. H., T. T. Smith, and G. E. Merritt</i> , Characteristics of striae in optical glass.....	75	<i>Cragoe, Carl S., Cyril H. Meyers, and Cyril S. Taylor</i> , Vapor pressure of ammonia.....	1
Brinell hardness of annealed carbon steels...	557	<i>Cragoe, C. H., C. G. Peters and</i> , Measurements on the thermal dilatation of glass at high temperatures.....	449
Brittleness of lead.....	215	Critical ranges of some commercial nickel steels.....	195
<b>C</b>			
Cadmium-vapor arc lamp.....	45	<i>Curtis, Harvey L.</i> , An integration method of deriving the alternating-current resistance and inductance of conductors.....	93
Caesium vapor, low-voltage arcs in.....	309	Cylinders, circular, Air forces on.....	489
Carbon steel, eutectoid, as related to magnetic reluctivity.....	739	<b>D</b>	
Carbon steels, heating of.....	537	Densities, photographic, microphotometer for	299
Cell, Clark, Two common failures of.....	409	Deriving the alternating-current resistance and inductance of conductors.....	93
Changes in a group of objects, detection of...	437	Detecting changes in a complicated group of objects.....	437
Changes, Thermal and physical, accompanying the heating of hardened carbon steels..	537	Diffuse reflection factors, Measurement.....	421
Characteristics of striae in optical glass.....	75	Dilatation, thermal, of glass at high temperatures.....	449
<i>Cheney, W. L.</i> , Measurement of hysteresis values from high magnetizing forces.....	281	Divisor, Clerget.....	125
—, <i>C. Nusbaum, and H. Scott</i> , Magnetic reluctivity relationship as related to certain structures of a eutectoid carbon steel.....	739	Double-polarization method for estimation of sucrose, and the evaluation of the Clerget divisor.....	125
—, <i>R. L. Sanford, and</i> , Variation of residual induction and coercive force with magnetizing force.....	291	<i>Dryden, Hugh L.</i> , Air forces on circular cylinders, axes normal to the wind, with special reference to dynamical similarity.....	489
Clark standard cell.....	409	Dynamical similarity.....	489
Clerget divisor.....	125		

E	Page	Page
<i>Edwards, Junius David, and S. F. Pickering, Permeability of rubber to gases.</i>	327	
Electron tube transmitter of completely modulated waves.	259	
Elements, nonmetallic, Ionization and resonance potentials of.	669	
Elements, Wave lengths longer than 5500 Å in the arc spectra of.	51	
Estimation of sucrose.	125	
Etching reagents for copper.	641	
Eutectoid carbon steel, certain structures of, as related to magnetic reluctivity.	739	
Evaluation of the Clerget divisor.	125	
F		
Factors, diffuse reflection.	421	
Failure, The two common, of the Clark standard cell.	409	
Force, coercive.	291	
Forces, Air, on circular cylinders.	489	
Forces, magnetizing.	281, 291	
<i>Foote, Paul D., and W. F. Meggers, Atomic theory and low-voltage arcs in caesium vapor.</i>	309	
—, <i>W. F. Meggers and, New microphotometer for photographic densities.</i>	299	
—, <i>F. L. Mohler and, Ionization and resonance potentials of some nonmetallic elements.</i>	669	
—, <i>F. L. Mohler, and W. F. Meggers, Resonance potentials and low-voltage arcs for metals of the second group of the periodic table.</i>	725	
G		
Galvanometer, vibration, New form.	37	
Gases, Permeability of rubber to.	327	
<i>Gillis, Clara L., Richard F. Jackson and, The double-polarization method for estimation of sucrose, and the evaluation of the Clerget divisor.</i>	125	
Glass, optical, striae in.	75	
Grain size of annealed carbon steels.	557	
H		
Hardened carbon steels, heating of.	537	
Heating of hardened carbon steels.	537	
High magnetizing forces, hysteresis values from.	281	
High-speed steel.	521	
High temperatures, glass at.	449	
High-temperature treatment of high-speed steel.	521	
<i>Hull, Lewis M., An electron tube transmitter of completely modulated waves.</i>	259	
Hysteresis values from high magnetizing forces.	281	
I		
Independent variables.	363	
Inductance of conductors.	93	
Induction, residual.	291	
Infra-red transmission and refraction data on standard lens and prism material.	701	
Integration method of deriving the alternating-current resistance and inductance of conductors.	93	
Intercrystalline brittleness of lead.	215	
Ionization and resonance potentials of some nonmetallic elements.	669	
Iron, macrostructure revealed by ammonium persulphate.	715	
J		
<i>Jackson, Richard F., and Clara L. Gillis, The double-polarization method for estimation of sucrose, and the evaluation of the Clerget divisor.</i>	125	
<i>Jimeno-Gil, Emilio, H. S. Rawdon and, A study of the relation between the Brinell hardness and the grain size of annealed carbon steels.</i>	557	
K		
<i>Kahler, H., W. W. Coblenz and, A new spectropyrheliometer and measurements of the component radiations from the sun and from a quartz-mercury vapor lamp.</i>	233	
<i>Karrer, Enoch, and E. P. T. Tyndall, Relative spectral transmission of the atmosphere.</i>	377	
<i>Kiess, C. C. and W. F. Meggers, Wave lengths longer than 5500 Å in the arc spectra of seven elements.</i>	51	
L		
Lamp, cadmium-vapor arc.	45	
Lamp, quartz-mercury vapor.	233	
Lead, Intercrystalline brittleness of.	215	
<i>Lorentz, Marjorie G., H. S. Rawdon and, Metallographic etching reagents; I, for copper.</i>	641	
Low-voltage arcs for metals.	725	
Low-voltage arcs in caesium vapor.	309	
M		
Macrostructure of iron and steel revealed by ammonium persulphate.	715	
Magnetic compasses, Testing of.	273	
Magnetic reluctivity relationship as related to certain structures of a eutectoid carbon steel.	739	
Magnetizing forces.	281, 291	
<i>McKelvy, E. C., and M. P. Shoemaker, Two common failures of the Clark standard cell.</i>	409	
Measurement of hysteresis values from high magnetizing forces.	281	
Measurements of diffuse reflection factors, and a new absolute reflectometer.	421	
Measurements of the component radiations from the sun and from a quartz-mercury vapor lamp.	233	
Measurements on the thermal dilatation of glass at high temperatures.	449	
<i>Meggers, W. F., and Paul D. Foote, New microphotometer for photographic densities.</i>	299	
—, <i>Paul D. Foote and, Atomic theory and low-voltage arcs in caesium vapor.</i>	309	
—, <i>C. C. Kiess and, Wave lengths longer than 5500 Å in the arc spectra of seven elements.</i>	51	

	Page
<i>Meggers, W. F., F. L. Mohler, Paul D. Foote, and</i> , Resonance potentials and low-voltage arcs for metals of the second group of the periodic table.....	725
<i>Merritt, G. E., T. T. Smith, A. H. Bennett and</i> , Characteristics of striae in optical glass.....	75
Metallographic etching reagents; I, for copper. Metals of the second group of the periodic table.....	641
Method, double-polarization, for estimation of sucrose.....	725
Method, integration, of deriving the alternating-current resistance and inductance of conductors.....	125
Method, Photographic, of detecting changes in a complicated group of objects.....	93
<i>Meyers, Cyril H., Carl S. Cragoe, and Cyril S. Taylor</i> , Vapor pressure of ammonia.....	437
Microphotometer for photographic densities..	1
Modulated waves, transmitter of.....	299
<i>Mohler, F. L., and P. D. Foote</i> , Ionization and resonance potentials of some nonmetallic elements.....	259
—, <i>Paul D. Foote, and W. F. Meggers</i> , Resonance potentials and low-voltage arcs for metals of the second group of the periodic table.....	669
Molybdenite, photoelectrical properties of....	725
Monel metal.....	595
<i>Movius, H. Gretchen, Howard Scott and</i> , Thermal and physical changes accompanying the heating of hardened carbon steels.....	249
<b>N</b>	
Negative photoelectrical properties of molybdenite.....	537
New absolute reflectometer.....	595
New cadmium-vapor arc lamp.....	421
New form of vibration galvanometer.....	45
New microphotometer for photographic densities.....	37
New spectropheliometer and measurements of the component radiations from the sun and from a quartz-mercury vapor lamp....	299
Nickel steels, Critical ranges of.....	233
Nonmetallic elements, Ionization and resonance potentials of.....	195
<i>Nusbaum, C., W. L. Cheney, and H. Scott</i> , Magnetic reluctivity relationship as related to certain structures of a eutectoid carbon steel.....	669
<b>O</b>	
Optical glass, striae in.....	739
<b>P</b>	
Parabolic and linear curves, Adjustment of..	75
Periodic table, metals of the second group...	363
Permeability of rubber to gases.....	725
<i>Peters, C. G., and C. H. Cragoe</i> , Measurements on the thermal dilatation of glass at high temperatures.....	327
Photoelectrical properties of molybdenite....	449
Photographic densities, microphotometer for.	595

	Page
Photographic method of detecting changes in a complicated group of objects.....	437
Physical changes accompanying the heating of hardened carbon steels.....	537
<i>Pickering, S. F., Junius David Edwards and</i> , Permeability of rubber to gases.....	327
Positive and negative photoelectrical properties of molybdenite and several other substances.....	595
Potentials, ionization.....	669
Potentials, resonance.....	669, 725
Pressure, Vapor, of ammonia.....	1
Properties, photoelectrical, of molybdenite...	595

**Q**

Quartz-mercury vapor lamp, measurements of radiation from.....	233
--	-----

**R**

Radiations from the sun and from a quartz-mercury vapor lamp.....	233
Ranges, Critical, of some commercial nickel steels.....	195
<i>Rawdon, Henry S.</i> , Intercrystalline brittleness of lead.....	215
—, Use of ammonium persulphate for revealing the macrostructure of iron and steel.	715
—, and <i>Emilio Jimeno-Gil</i> , A study of the relation between the Brinell hardness and the grain size of annealed carbon steels....	557
—, and <i>Marjorie G. Lorentz</i> , Metallographic etching, reagents; I, for copper.....	641
Reagents for etching copper.....	641
Red hardness of high-speed steel.....	521
Reflecting power of Monel metal, stellite, and zinc.....	249
Reflection factors, diffuse.....	421
Reflectometer, new absolute.....	421
Refraction, Infra-red, data.....	701
Relation between the Brinell hardness and the grain size of annealed carbon steels....	557
Relation of the high-temperature treatment of high-speed steel to secondary hardening and red hardness.....	521
Relative spectral transmission of the atmosphere.....	377
Reluctivity, magnetic.....	739
Residual induction.....	291
Resistance of conductors.....	93
Resonance potentials.....	669
Resonance potentials and low-voltage arcs for metals of the second group of the periodic table.....	725
<i>Roeser, Harry M.</i> , Adjustment of parabolic and linear curves to observations taken at equal intervals of the independent variable.	363
Rubber, Permeability of, to gases.....	327
<b>S</b>	
<i>Sanford, R. L.</i> , Testing of magnetic compasses.....	273
—, and <i>W. L. Cheney</i> , Variation of residual induction and coercive force with magnetizing force.....	291

	Page		Page
<i>Scott, Howard</i> , Critical ranges of some commercial nickel steels.....	195	Testing of magnetic compasses.....	273
—, Relation of the high-temperature treatment of high-speed steel to secondary hardening and red hardness.....	521	Thalofide, Spectrophotometric sensitivity of.....	253
—, and <i>H. Gretchen Moxius</i> , Thermal and physical changes accompanying the heating of hardened carbon steels.....	537	Theory, Atomic.....	309
—, <i>C. Nusbaum, W. L. Cheney and</i> , Magnetic reluctivity relationship as related to certain structures of a eutectoid carbon steel.....	739	Thermal and physical changes accompanying the heating of hardened carbon steels.....	537
Secondary hardening of high-speed steel.....	521	Thermal dilatation of glass at high temperatures.....	449
Sensitivity of thalofide.....	253	The two common failures of the Clark standard cell.....	409
<i>Shoemaker, M. P., E. C. McKelvy and</i> , Two common failures of the Clark standard cell.....	390	Transmission, Infra-red, data.....	701
<i>Smith, T. T., A. H. Bennett, and G. E. Merritt</i> , Characteristics of striae in optical glass.....	75	Transmission, Relative spectral, of the atmosphere.....	377
Spectra, arc, of seven elements.....	51	Transmitter, Electron tube, of completely modulated waves.....	259
Spectral transmission of the atmosphere.....	377	Treatment, high-temperature, of high-speed steel.....	521
Spectrophotometric sensitivity of thalofide.....	253	<i>Tyndall, E. P. T., Enoch Karrer and</i> , Relative spectral transmission of the atmosphere.....	377
Spectropyrheliometer, new.....	233		
Standard cell, Clark.....	409	<b>U</b>	
Standard lens and prism material, Infra-red transmission and refraction data on.....	701	Use of ammonium persulphate for revealing the macrostructure of iron and steel.....	715
Steel, high-speed.....	521		
Steel, macrostructure revealed by ammonium persulphate.....	715	<b>V</b>	
Stellite.....	249	Values, hysteresis, from high magnetizing forces.....	281
<i>Stillman, M. H.</i> , A photographic method of detecting changes in a complicated group of objects.....	437	Vapor, cadmium, arc lamp.....	45
Striae in optical glass.....	75	Vapor, caesium, low-voltage arcs in.....	309
Study of the relation between the Brinell hardness and the grain size of annealed carbon steels.....	557	Vapor lamp, quartz-mercury.....	233
Sucrose, estimation of.....	125	Vapor pressure of ammonia.....	1
Sun, measurements of radiations from.....	233	Variable, independent.....	363
		Variation of residual induction and coercive force with magnetizing force.....	291
<b>T</b>		Vibration galvanometer, new form of.....	37
<i>Taylor, A. H.</i> , Measurement of diffuse reflection factors and a new absolute reflectometer.....	421		
<i>Taylor, Cyril S., Carl S. Cragoe, Cyril H. Meyers, and</i> , Vapor pressure of ammonia.....	1	<b>W</b>	
		Wave lengths longer than 5500 A in the arc spectra of seven elements.....	51
		Waves, transmitter of modulated.....	259
		<b>Z</b>	
		Zinc.....	249
