

International Union of Geodesy and Geophysics to Meet in the United States

The XIII General Assembly of the International Union of Geodesy and Geophysics will be held at the University of California, Berkeley, 19–31 August 1963. The Union embraces the fields of geodesy, seismology, meteorology, geomagnetism, oceanography, volcanology, and hydrology. This will be the first meeting of the IUGG in the United States since 1939. With an estimated attendance of some 3000 scientists it is expected to be the largest international scientific meeting in the United States next year.

The two-week meeting will be preceded by a symposium at the University of California, Los Angeles, on the International Geophysical Year, and by a hydrology symposium at Stanford University. Following the General Assembly various technical field tours are being planned, and in addition a symposium on meteorology will be held at Boulder, Colorado.

Copies of the First Circular describing the meeting are available upon request from Prof. David K. Todd, IUGG, University of California, Berkeley 4, California.
