- Thermal explosives: adiabatic self-heating of explosive and propellants, D. Gross and A. B. Amster, Eighth Symp. (Intern.) on Combustion, pp. 728-734 (The Williams and Wilkins Co., Baltimore, Md., 1962).

**Publications for which a price is indicated (except for Technical Notes) are available only from the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C. (foreign postage, one-fourth additional). Technical Notes are available only from the Offices of Technical Services, U.S. Department of Commerce, Washington 25, D.C. (order by PB number). Reprints from outside journals and the NBS Journal of Research may often be obtained directly from the authors.*

ANNOUNCEMENT

Fundamental Change in the CRPL-D Series, Basic Radio Propagation Predictions

A fundamental change in the form and content of the CRPL-D series, Basic Radio Propagation Predictions, will be made in January 1963. The first of the new form of predictions will be CRPL-D221, issued in January 1963, containing predictions for April 1963. Beginning with that issue, the predictions will be prepared by a method of numerical mapping using a high speed electronic computer. This method was developed by W. B. Jones and R. M. Gallet of CRPL. Instructions for use of the new predictions will be issued concurrently.

The new format will include tables of coefficients which, when used as input data with a suitable program, make possible the efficient use of a computer for calculation of detailed high frequency radio propagation predictions for any application.

World prediction maps for every even hour, Universal Time, will be provided for those who do not have the use of a computer. These will be actual world maps of zero-MUF and 4000-MUF, instead of the time charts for four zones appearing in previous issues. Methods for using the new maps will be similar to methods for using the former time charts. The D-series predictions will continue to be issued through the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C. No change in subscription price is planned.
