COMMODITY STANDARDS

Simplified Practice Recommendations and Commercial Standards are developed by manufacturers, distributors, and users in cooperation with the Commodity Standards Division of the National Bureau of Standards. The purpose of Simplified Practice Recommendations is to eliminate avoidable waste through the establishment of standards of practice for stock sizes and varieties of specific commodities that currently are in general production and demand. The purpose of Commercial Standards is to establish standard methods of test, rating, certification, and labeling of commodities, and to provide uniform bases for fair competition.

The adoption and use of a Simplified Practice Recommendation or Commercial Standard is voluntary. However, when reference to a Commercial Standard is made in contracts, labels, invoices, or advertising literature, the provisions of the standard are enforceable through usual legal channels as a part of the sales contract.

A Simplified Practice Recommendation or Commercial Standard originates with the proponent industry. The sponsors may be manufacturers, distributors, or users of the specific product. One of these three elements of industry submits to the Commodity Standards Division the necessary data to be used as the basis for developing a standard of practice. The Division, by means of assembled conferences or letter referenda, or both, assists the sponsor group in arriving at a tentative standard of practice and thereafter refers it to the other elements of the same industry for approval or for constructive criticism that will be helpful in making any necessary adjustments. The regular procedure of the Division assures continuous servicing of each effective Simplified Practice Recommendation and Commercial Standard, through review and revision, whenever, in the opinion of the industry, changing conditions warrant such action. Simplified Practice Recommendations and Commercial Standards are printed and made available by the Department of Commerce through the Government Printing Office.

COMMERCIAL STANDARD FOR MEN'S SPORT SHIRT SIZES

On September 15, 1944, a proposed commercial standard was submitted by the National Association of Shirt and Pajama Manufacturers. It was later adjusted to meet the composite recommendations of those concerned, and was subsequently accepted by industry and the trade and promulgated as Commercial Standard CS128-45.

On June 30, 1949, the Standing Committee recommended that the standard be revised to include recommendations concerning fabrics, size designation on labels, and identification. Those concerned have since accepted and approved the revised standard as shown herein.

Project Manager: L. R. GILBERT, Commodity Standards Division, National Bureau of Standards.

Technical Adviser: R. S. CLEVELAND, Organic and Fibrous Materials Division, National Bureau of Standards.

COMMERCIAL STANDARD CS128-49

for

MEN'S SPORT SHIRT SIZES—WOVEN FABRICS

(Other Than Those Marked With Regular Neck-Band Sizes)

(Second Edition)

1. PURPOSE

1.1 The purpose is to provide standard size designations, methods of measuring and standard minimum measurements in order to eliminate confusion among producers, distributors and users.

2. SCOPE

2.1 This standard covers size designations, methods of measuring, and standard minimum measurements for men's sport shirts in sizes marked small, medium, medium large, and large or alternative markings 1, 2, 3 and 4¹ whether made from shrunk or unshrunk² woven material.

The standard includes a recommendation that *the label indicating size whether by letter or number, also carry the neck size*. It also carries a recommendation concerning fabrics used in the production of men's sport shirts together with a recommended method of identification.

3. APPLICATION

3.1 The methods and measurements given herein are applicable to finished garments as delivered by the manufacturer.

4. STANDARD METHODS OF MEASURING

4.1 *Method of measuring.* The garment to be measured shall be laid out without tension on a smooth flat surface so that creases and wrinkles will not affect the measurements. Measurements shall be taken to the nearest $\frac{1}{8}$ inch.

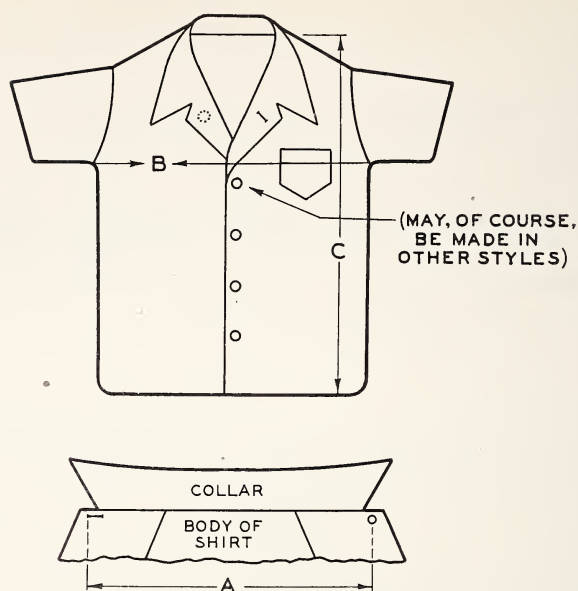

4.2 *Collarband—length.* Measured from outside end of buttonhole inside of bar to center of button, with collar laid out flat. (A, fig. 1.)

4.3 *Chest.* Measured across garment at bottom of the armhole. (Twice B, fig. 1.)

4.4 *Total length.* Measured from the point where either the highest part of the yoke, or the highest part of the body of the shirt joins the collar, to the bottom of the shirt when the front and back lengths are even at the bottom. (C, fig. 1.)

¹ This standard does not include men's sport shirts carrying regular dress shirt size marks such as 14, 14½, 15, 15½, 16, 16½, and 17.

² See "Fabrics," paragraph 6.1.

FIGURE 1. *Men's sport shirt.*

5. STANDARD MINIMUM MEASUREMENTS

5.1 The standard minimum measurements for men's sport shirts—woven fabrics (other than those marked with regular neckband sizes), are shown in table 1.

TABLE 1. *Standard size designations and minimum size measurements for men's sport shirts*¹

Location	S (Small)	M (Medium)	ML (Medium large)	L (Large)
	(Alternative Markings)			
	1	2	3	4
Neck sizes ²(A).....	<i>In.</i> 14-14½	<i>In.</i> 15-15½	<i>In.</i> 16-16½	<i>In.</i> 17-17½
Chest.....(B).....	42	46	50	54
Total length.....(C).....	27½	28	28½	29

¹ XL or extra large sizes are optional.

² Body neck sizes—not to be construed as collarband sizes.

6. RECOMMENDATIONS

6.1 *Fabrics*

6.1.1 It is recognized that fabrics having a varying degree of shrinkage may sometimes be used in the general production of men's sport shirts. Since it is not practical to set up measurements for sport shirts made from fabrics of every degree of shrinkage, the industry has adopted herein measurements applicable to fabrics having not

more than 1 percent residual shrinkage as determined by the appropriate test method for shrinkage in Textiles—Testing and Reporting, Commercial Standard CS59-44, as issued by the U. S. Department of Commerce.

In view of the above fact, it is recommended that manufacturers using unshrunk fabrics or fabrics having a residual shrinkage of more than 1 percent make proper shrinkage allowance.

6.2 *Size Designation on Labels*

6.2.1 In order that the system of size designation covered by this standard may be more effective, it is recommended that the labels, tags, or stickers on men's sport shirts carry the neck size in addition to either the letter or the number indicating the shirt size. For example, a label indicating a size "S" or size "1" would also carry the neck sizes which are 14-14½. A size "ML" or size "3" would carry the figures 16-16½.

6.3 *Identification*

6.3.1 In order that consumers may become familiar with the significance of standard size markings and corresponding standard minimum measurements, it is recommended that men's sport shirts manufactured to conform to such standards be identified by a sticker, tag, or other label attached to the garment and carrying the following statement:

This garment has been made to measurements that (with proper allowance for shrinkage)³ are in accordance with Commercial Standard CS128-49, as developed by industry and the trade under the procedure of the National Bureau of Standards, and issued by the United States Department of Commerce.

Or, more briefly:

Size (with proper allowance for shrinkage)³ conforms to CS128-49, as developed by industry and the trade and issued by the U. S. Department of Commerce.

7. EFFECTIVE DATE

7.1 Having been passed through the regular procedure of the Commodity Standards Division, and approved by the acceptors herein-after listed, this commercial standard was issued by the United States Department of Commerce, effective from December 10, 1949.

EDWIN W. ELY,

Chief, Commodity Standards Division.

HISTORY OF PROJECT

On September 15, 1944, following the development of a tentative standard by a conference of sport-shirt manufacturers, the National Association of Shirt and Pajama Manufacturers requested the cooperation of the National Bureau of Standards looking to the establishment of a commercial standard for men's sport-shirt sizes.

The proposed commercial standard was sent to representative manufacturers, distributors, and consumers for comment. Following suitable adjustment in the light of comment received, and with the un-

³ The words in parentheses are to be included when applicable.

qualified endorsement by a number of interested organizations, no public hearing was believed necessary.

Accordingly, the Recommended Commercial Standard for Men's Sport-Shirt Sizes—Woven Fabrics (Other Than Those Marked with Regular Neck-band Sizes) was submitted to the entire trade for written acceptance on February 5, 1945. Having received acceptances in writing estimated to represent a satisfactory majority, announcement was issued on July 20, 1945, that the standard would become effective for new production from September 20, 1945.

FIRST REVISION

On August 16, 1948, the National Association of Shirt and Pajama Manufacturers requested the reaction of the standing committee to a proposal that recommendations concerning identification, fabrics, and labeling be added to the standard. The standing committee endorsed the proposal which was circulated to manufacturers, distributors and consumers for written acceptance.

The completion of the revision was announced on November 10, 1949, and Commercial Standard CS128-49 (second edition) became effective on December 10, 1949.

STANDING COMMITTEE

The following individuals comprise the membership of the standing committee, which is to review, prior to circulation for acceptance, revisions proposed to keep the standard abreast of progress. Comment concerning the standard and suggestions for revision may be addressed to any member of the committee or to the Commodity Standards Division, National Bureau of Standards, which acts as secretary for the committee.

ACCEPTANCE OF COMMERCIAL STANDARD

If acceptance has not previously been filed, this sheet properly filled in, signed, and returned will provide for the recording of your organization as an acceptor of this commercial standard.

Date -----

Commodity Standards Division,
National Bureau of Standards,
Washington 25, D. C.

Gentlemen:

We believe that the Commercial Standard CS128-49 constitutes a useful standard of practice, and we individually plan to utilize it as far as practicable in the

Production ¹ Distribution ¹ Purchase ¹ Testing ¹
of men's sport shirts (made from woven fabrics).

We reserve the right to depart from it as we deem advisable.

We understand, of course, that only those articles which actually comply with the standard in all respects can be identified or labeled as conforming thereto.

Signature of authorized officer -----
(In ink)

(Kindly typewrite or print the following lines)

Name and title of above officer -----

Organization -----
(Fill in exactly as it should be listed)

Street address -----

City, zone, and State -----

¹ Underscore which one. Please see that separate acceptances are filed for all subsidiary companies and affiliates which should be listed separately as acceptors. In the case of related interests, trade associations, trade papers, etc., desiring to record their general support, the words "General support" should be added after the signature.

TO THE ACCEPTOR

The following statements answer the usual questions arising in connection with the acceptance and its significance:

1. *Enforcement.*—Commercial standards are commodity specifications voluntarily established by mutual consent of those concerned. They present a common basis of understanding between the producer, distributor, and consumer and should not be confused with any plan of governmental regulation or control. The United States Department of Commerce has no regulatory power in the enforcement of their provisions, but as they represent the will of the interested groups as a whole, their provisions through usage soon become established as trade customs, and are made effective through incorporation into sales contracts by means of labels, invoices, and the like.

2. *The acceptor's responsibility.*—The purpose of commercial standards is to establish for specific commodities, nationally recognized grades or consumer criteria and the benefits therefrom will be measurable in direct proportion to their general recognition and actual use. Instances will occur when it may be necessary to deviate from the standard and the signing of an acceptance does not preclude such departures; however, such signature indicates an intention to follow the commercial standard where practicable, in the production, distribution, or consumption of the article in question.

3. *The Department's responsibility.*—The major function performed by the Department of Commerce in the voluntary establishment of commercial standards on a Nation-wide basis is fourfold: first, to act as an unbiased coordinator to bring all interested parties together for the mutually satisfactory adjustment of trade standards; second, to supply such assistance and advice as past experience with similar programs may suggest; third, to canvass and record the extent of acceptance and adherence to the standard on the part of producers, distributors, and users; and fourth, after acceptance, to publish and promulgate the standard for the information and guidance of buyers and sellers of the commodity.

4. *Announcement and promulgation.*—When the standard has been endorsed by a satisfactory majority of production or consumption in the absence of active, valid opposition, the success of the project is announced. If, however, in the opinion of the standing committee or the Department of Commerce, the support of any standard is inadequate, the right is reserved to withhold promulgation and publication.

ACCEPTORS

The organizations listed below have individually accepted this standard for use as far as practicable in the production, distribution, testing or purchase of men's sport shirts. In accepting the standard, they reserved the right to depart therefrom as they individually deem advisable. It is expected that articles that actually comply with the requirements of this standard in all respects will be regularly identified or labeled as conforming thereto, and that purchasers will require such specific evidence of conformity.
