NATIONAL BUREAU OF STANDARDS

PROMULGATION

of

COMMERCIAL STANDARD CS133-46

for

WOVEN-WIRE NETTING

On June 27, 1945, at the instance of the Hardware Cloth and Poultry Netting Institute, a meeting of producers of woven-wire netting adopted the proposed commercial standard for this commodity. This was submitted on July 30, to leading manufacturers, interested Government agencies, and distributor and user organizations, for constructive comment. Following adjustment in the light of the comment received, the recommended commercial standard was circulated for written acceptance on February 26, 1946.

Those concerned have since accepted and approved the standard as shown herein for promulgation by the United States Department of Commerce, through the National Bureau of Standards.

The standard is effective for new production from June 1, 1946.

Promulgation recommended.

F. W. Reynolds, Acting Chief, Division of Trade Standards.

Promulgated.

E. U. Condon, Director, National Bureau of Standards.

Promulgation approved.

Henry A. Wallace, Secretary of Commerce.

п

WOVEN-WIRE NETTING

COMMERCIAL STANDARD CS133-46

PURPOSE

1. The purpose of this commercial standard is to provide a nationally recognized minimum standard of quality of woven-wire netting. It will enable consumers and other interested parties to know what sizes and types of woven-wire netting are standard and are regularly produced in sufficient volume to reasonably assure their being readily obtainable through normal channels of trade.

SCOPE

2. This standard covers materials, workmanship, and dimensional requirements for various types and kinds of galvanized carbon-steel woven-wire netting ordinarily employed for poultry runs and pens, domestic animal pens, fur-bearing animal pens, crab traps, and stucco (exterior plaster) reinforcement. These commodities are sometimes colloquially known as chicken wire, fox pen netting, tennis court netting, stucco mesh, etc. This standard does not include welded mesh or fabric of any description, nor does it cover farm or field fencing. A recommended form for guaranteeing compliance with this standard is included.

DEFINITIONS

3. Poultry netting .- A carbon-steel woven-wire netting made in either hexagonal or straight line types of mesh, and in both galvanizedbefore-woven and galvanized-after-woven finishes.

4. Fur farm netting.—Hexagonal mesh only; identically the same in type as galvanized-after-woven, hexagonal-mesh poultry netting, the only difference being that the wire sizes employed are heavier than No. 20. (See par. 10.) Under normal conditions, the heavier the wire size, the longer will be the life of the netting. Wire diameters increase in inverse ratio to the gage numbers, i. e., No. 14 wire is heavier than No. 16. (See par. 13.)

5. Heavy netting.—Same as fur farm netting. (See par. 4.)
6. Stucco netting.—Identical in mesh with galvanized-after-woven, hexagonal-mesh fur farm netting, but specially rolled and otherwise manipulated to insure perfectly straight selvages and with a minimum of "curl" to promote ease and efficiency in its application. (See par.10.)

7. Animal pen netting.—Same as fur farm netting. (See par. 4.)

8. Crab trap netting .- Three-fourths inch and 1 inch of No. 20, and 1½ inch of No. 18 hexagonal mesh, are usually considered as being crab trap netting, although other sizes of hexagonal netting may also be used for this purpose.

694740-46

MATERIALS AND WORKMANSHIP

9. All standard woven-wire netting shall be made of high-grade materials and with good workmanship. It shall be free from any defects that might detract from its serviceability, or its appearance.

9a. All galvanized-after-woven poultry, crab trap, fur farm, and stucco netting shall be coated with zinc by the hot-dip process. The metal used for the coating shall be zinc of at least 98 percent purity.

GENERAL SPECIFICATIONS

10. Sizes and types of mesh, and wire sizes and finishes for standard poultry netting, fur farm, animal pen, crab trap netting and stucco reinforcement netting shall be as follows:

ROLL LENGTH

11. All standard rolls of poultry, fur farm, crab trap, and stucco netting shall be 150 linear feet long, in one continuous length. In trade parlance "rolls" of netting are frequently spoken of as "bales."

MEASUREMENT OF MESH SIZES

12. Absolute uniformity of mesh size in woven-wire netting is commercially impracticable of attainment owing to the extreme flexibility of this type of weave. However, there shall be but slight commercial variations from true mesh sizes in any standard netting. The measure of the mesh size in hexagonal netting shall be taken between any two parallel twists. The measure of straight-line netting mesh size shall likewise be taken between any two parallel twists.

WIRE DIAMETER, OR GAGE

13. All gage numbers used for designating wire sizes for standard woven-wire netting shall be understood to mean the Steel Wire Gage (also known as the Washburn and Moen, "W and M," Gage) after galvanizing, of which the following comprise the decimal equivalents: No. 20, 0.0348 inch; No. 17, 0.0540 inch; No. 14, 0.0800 inch; No. 18, 0.0475 inch; No. 16, 0.0625 inch.

The designated gage (number) of wire for standard woven-wire netting shall mean the size after galvanizing; namely, the bare wire plus the zinc coating.

TOLERANCES

14. Permissible variations shall be:

- (a) for wire diameters: 0.0015 inch minus for Nos. 16 to 20; 0.002 inch minus for all wire diameters coarser than No. 16.¹
- (b) for mesh size (measurement): Hexagonal mesh, ½-inch plus or minus; Straight Line mesh, ½-inch plus or minus.
- (c) for width: 5 percent plus or minus
- (d) for roll (bale) weight: minus 10 percent.¹
- (e) for roll (bale) length: minus 1 percent.¹

LABELING

15. The mesh type and size, finish and size of wire, and the length and the width of netting, in each roll of standard woven-wire netting, shall be shown in a conspicuous place, preferably by means of a printed tag securely attached to the roll.

GUARANTEE

16. In order to assure the purchaser that he is receiving woven-wire netting that complies with the requirements of this standard, it is recommended that the label or tag on each roll carry the following guarantee:

We hereby guarantee that this woven-wire netting complies with all requirements of Commercial Standard CS133-46, as issued by the National Bureau of Standards of the United States Department of Commerce.

(Signed)

¹ No limitation specified for oversize wire diameter, overweight, or overlength.

EFFECTIVE DATE

17. The standard is effective for new production from June 1, 1946.

STANDING COMMITTEE

18. The following individuals comprise the membership of the standing committee, as appointed by the National Bureau of Stand-This committee is to review, prior to circulation for acceptance, ards. revisions proposed to keep the standard abreast of progress. Each organization nominated its own representative. Comment concerning the standard and suggestions for revision may be addressed to any member of the committee or to the Division of Trade Standards, National Bureau of Standards, which acts as secretary for the committee.

HISTORY OF PROJECT

19. On September 26, 1944, the Hardware Cloth & Poultry Netting Institute requested the cooperation of the National Bureau of Standards in the establishment of a commercial standard for woven-wire netting. A preliminary draft of the proposed commercial standard was submitted to manufacturers for their review and comment. All comment was carefully considered at a meeting held in New York City on June 27, 1945. An adjusted draft was then prepared and submitted on July 30, 1945, to technical organizations, Government agencies, testing laboratories, and manufacturers, and wholesale, retail, and user organizations for further review and comment. The standard was then modified in accordance with composite recommendations of those concerned and circulated on February 26, 1946, to the trade for written acceptance.

20. Upon receipt of official acceptances estimated to represent a satisfactory majority of the production by volume and in the absence of active valid opposition, the standard was promulgated on May 1. 1946 as Commercial Standard CS133-46.

ACCEPTANCE OF COMMERCIAL STANDARD

If acceptance has not previously been filed, this sheet properly filled in, signed, and returned will provide for the recording of your organization as an acceptor of this commercial standard.

Date_____

Division of Trade Standards, National Bureau of Standards, Washington 25, D. C.

Gentlemen:

We believe that the Commercial Standard CS133-46 constitutes a useful standard of practice, and we individually plan to utilize it as far as practicable in the

production ¹ distribution ¹ purchase ¹ testing ¹

of woven-wire netting.

We reserve the right to depart from it as we deem advisable.

We understand, of course, that only those articles which actually comply with the standard in all respects can be identified or labeled as conforming thereto.

Signature of authorized officer_______(In ink)

(Kindly typewrite or print the following lines)

City, Zone, and State_____

¹ Underscore which one. Please see that separate acceptances are filed for all subsidiary companies and affiliates which should be listed separately as acceptors. In the case of related interests, trade associations, trade papers, etc., desiring to record their general support, the words "General Support" should be added after the signature.

7

TO THE ACCEPTOR

The following statements answer the usual questions arising in connection with the acceptance and its significance:

1. Enforcement.—Commercial standards are commodity specifications voluntarily established by mutual consent of those concerned. They present a common basis of understanding between the producer, distributor, and consumer and should not be confused with any plan of governmental regulation or control. The United States Department of Commerce has no regulatory power in the enforcement of their provisions, but since they represent the will of the interested groups as a whole, their provisions through usage soon become established as trade customs, and are made effective through incorporation into sales contracts by means of labels, invoices and the like.

2. The acceptor's responsibility.—The purpose of commercial standards is to establish for specific commodities, nationally recognized grades or consumer criteria and the benefits therefrom will be measurable in direct proportion to their general recognition and actual use. Instances will occur when it may be necessary to deviate from the standard and the signing of an acceptance does not preclude such departures; however, such signature indicates an intention to follow the commercial standard where practicable, in the production, distribution, or consumption of the article in question.

3. The Department's responsibility.—The major function performed by the Department of Commerce in the voluntary establishment of commercial standards on a Nation-wide basis is fourfold: first, to act as an unbiased coordinator to bring all interested parties together for the mutually satisfactory adjustment of trade standards; second, to supply such assistance and advice as past experience with similar programs may suggest; third, to canvass and record the extent of acceptance and adherence to the standard on the part of producers, distributors, and users; and fourth, after acceptance, to publish and promulgate the standard for the information and guidance of buyers and sellers of the commodity.

4. Announcement and promulgation.—When the standard has been endorsed by a satisfactory majority of production or consumption in the absence of active, valid opposition, the success of the project is announced. If, however, in the opinion of the standing committee or the Department of Commerce, the support of any standard is inadequate, the right is reserved to withhold promulgation and publication.

8

ACCEPTORS

21. The organizations listed below have individually accepted these grading rules for use as far as practicable in the production, distribution, testing, or purchase of woven-wire netting. In accepting the standard, they reserve the right to depart therefrom as they individually deem advisable. It is expected that articles which actually comply with the requirements of this standard in all re-spects will be regularly identified or labeled as conforming thereto, and that purchasers will require such specific evidence of conformity.
