COMMERCIAL STANDARD CS134-46

Effective Date for New Production From July 20, 1946

A RECORDED VOLUNTARY STANDARD
OF THE TRADE

UNITED STATES DEPARTMENT OF COMMERCE

W. AVERELL HARRIMAN, Secretary

COMMERCIAL STANDARDS

Commercial Standards are voluntary standards of the trade developed through concerted action of those directly concerned, and issued by the United States Department of Commerce upon written evidence of their acceptability to the trade. They are initiated by written request from a responsible element of business to the Division of Trade Standards of the National Bureau of Standards. The Division of Trade Standards acts as a coordinating and fact-finding agency in ascertaining the desires of all concerned.

The Federal Government exercises no regulatory authority in the enforcement of Commercial Standards. In accepting a Commercial Standard, the producer, distributor, or user says in effect that he considers it a useful standard of practice, and plans to utilize it as far as practicable in his business, reserving the right to depart from the standard so long as no deception results from such departure. When reference to a Commercial Standard is made in contracts, labels, invoices, or advertising literature, however, the provisions of the standard are enforceable through usual legal channels as a part of the sales contract.

Organized in 1927, the Division of Trade Standards has assisted many industries in the development of Commercial Standards for a wide variety of commodities. A list of previously established Commercial Standards appears herein.

COMMERCIAL STANDARD FOR CAST ALUMINUM COOKING UTENSILS (Metal Composition)

On March 22, 1945, at the instance of interested manufacturers, a preliminary conference was held at which a proposed commercial standard for cast aluminum cooking utensils (metal composition) was approved. The proposed standard was then submitted to a number of manufacturers and to leading distributor and consumer organizations, as well as Government agencies, for comment. After adjustment in the light of such comment, the proposed standard was circulated, on October 31, 1945, for written acceptance. The trade has since accepted and approved the standard as shown herein, for promulgation by the United States Department of Commerce, through the National Bureau of Standards.

Project Manager: F. E. POWELL, assisted by W. H. JACKETT, JR.,
Division of Trade Standards, National Bureau of Standards.

Technical Advisor: J. G. THOMPSON, Division of Metallurgy,
National Bureau of Standards.

COMMERCIAL STANDARD CS134-46

for

CAST ALUMINUM COOKING UTENSILS

(Metal Composition)

PURPOSE

1. The purpose of this commercial standard is to establish standard specifications and methods of test for the chemical composition of cast aluminum cooking utensils covered herein to minimize staining and corrosion under conditions of normal use, and to provide a uniform basis for better understanding between manufacturers, distributors, and users, for fair competition, and for labeling of utensils which comply with this standard.

SCOPE

2. This standard covers the composition of the metal and methods of test therefor, of cast aluminum utensils designed and intended for use in the cooking of food.

GENERAL REQUIREMENTS

3. Cast aluminum cooking utensils shall be made of aluminum alloys as specified herein, of high quality and workmanship in conformity with good manufacturing practice. They shall be free from imperfections and defects which might affect their serviceability.

DETAIL REQUIREMENTS

4. *Alloying elements.*—The permissible alloying elements of cast aluminum cooking utensils shall be limited to silicon, magnesium, zinc, titanium, chromium, and manganese, which may be employed in any amounts suitable to the respective alloy.

5. *Other than alloying elements.*—The chemical composition of cast aluminum cooking utensils with respect to elements other than the above-named alloying elements, shall conform to the following limits:

Element	Maximum (%) ¹
Copper.....	0.3
Nickel.....	.1
Iron.....	1.0
Other elements, each.....	0.05
Other elements, total.....	.15

¹ The following applies to all numerical requirements in this table: For purposes of acceptance and rejection, an observed value or a calculated value obtained from an analysis should be rounded off "to the nearest unit" in the last right-hand place of figures used in expressing the limiting value. (See par. 7.)

METHODS OF TEST

6. The composition of cast aluminum cooking utensils shall be determined in accordance with Tentative Methods of Chemical Analysis of Aluminum and Aluminum Alloys, American Society for Testing Materials Designation E34-42T, or latest revision thereof.

7. Analysis shall regularly be made only for the elements specifically named in paragraph 5. If, however, the presence of other elements is suspected, or indicated in the course of routine analysis, further analysis shall be made to determine that these other elements are not in excess of the amount specified. The numerical requirements of this standard are subject to the interpretation set forth in the Tentative Recommended Practices for Designation of Numerical Requirements in Standards (A. S. T. M. Designation: E29-40T, or latest revision) of the American Society for Testing Materials.

MARKING

8. *Manufacturer's name or trade mark.*—Each cast aluminum cooking utensil shall bear the manufacturer's name or nationally registered trade mark, legibly and permanently marked.

9. *Symbol.*—Each cast aluminum cooking utensil of composition conforming to this standard, shall also bear the following symbol cast or stamped into the utensil, on the bottom outside where practicable, as evidence of such conformity, and said symbol shall not show through on the inside of the utensil: (S).

LABELING

10. In order to assure that the purchaser is receiving utensils complying with the requirements of this standard, each cast aluminum cooking utensil conforming to this standard shall bear, in addition to the manufacturer's name or trade mark, a legible label or sticker embodying the following wording:

The manufacturer guarantees that the metal of this cast aluminum utensil bearing this symbol (S) conforms to Commercial Standard CS134-46, as issued by the National Bureau of Standards of the United States Department of Commerce.

11. Figure 1 illustrates the label adopted by the Cast Division of the Aluminum Wares Association for its members' use in guaranteeing compliance.

EFFECTIVE DATE

12. The standard is effective for new production from July 20, 1946.

STANDING COMMITTEE

13. The following individuals comprise the membership of the standing committee, which is to review, prior to circulation for acceptance, revisions proposed to keep the standard abreast of progress. Comment concerning the standard and suggestions for revision may be addressed to any member of the committee or to the Division of Trade Standards, National Bureau of Standards, which acts as secretary for the committee.

RAYMOND DEUTSCH, *Chairman*

Manufacturers

RAYMOND DEUTSCH, Monarch Aluminum Manufacturing Co., Detroit Avenue and West Ninety-third Street, Cleveland 2, Ohio.
WILLIAM ECK, Wisconsin Aluminum Foundry Co., Inc., Manitowoc, Wis.
ELY GRISWOLD, The Griswold Manufacturing Co., Erie, Pa.
STUART J. SWENSSON, Aluminum Wares Association, 1611 First National Bank Building, Pittsburgh, Pa.
W. E. WAHL, National Pressure Cooker Co., Eau Claire, Wis.
ARTHUR L. WILDERMUTH, Advance Aluminum Castings Corp., 2742 West Thirty-sixth Place, Chicago 32, Ill.

Distributors

A. F. BISGOOD, D. E. Sanford Co., 1049 South Hill Street, Los Angeles, Calif.
RIVERS PETERSON, National Retail Hardware Association, 333 North Pennsylvania Street, Indianapolis 4, Ind.
LOGAN SCHILB, Montgomery Ward & Co., 618 West Chicago Avenue, Chicago 10, Ill. (Representing Mail Order Association of America.)

Users

MRS. CHARLOTTE PAYNE, National Council of Women of the United States, 501 Madison Avenue, New York 22, N. Y.

HISTORY OF PROJECT

14. On October 20, 1944, the Cast Division of the Aluminum Wares Association requested the cooperation of the National Bureau of Standards in the establishment of a commercial standard for cast aluminum cooking utensils (metal composition). A draft was considered at a manufacturers' conference held in Pittsburgh, Pa., on March 22, 1945, and constructive changes were made. It was then submitted to producers, distributor and consumer organizations, and Government agencies, for review and comment. After the requirements were harmonized and adjusted so that the draft represented the composite views of all interested groups, the proposed commercial standard was circulated on October 31, 1945, to all those directly concerned for written acceptance.

15. Upon receipt of official acceptances, estimated to represent a satisfactory majority of the production volume, and in the absence of active, valid opposition, the standard was promulgated as Commercial Standard CS134-46, effective for new production from July 20, 1946.

ACCEPTANCE OF COMMERCIAL STANDARD

If acceptance has not previously been filed, this sheet, properly filled in, signed, and returned, will provide for the recording of your organization as an acceptor of this commercial standard.

Date -----

Division of Trade Standards,
National Bureau of Standards,
Washington 25, D. C.

Gentlemen:

We believe that the Commercial Standard CS134-46 constitutes a useful standard of practice, and we individually plan to utilize it as far as practicable as a

Manufacturer ¹
 Testing Laboratory ¹

Distributor ¹
 User ¹

of Cast Aluminum Cooking Utensils. We reserve the right to depart from it as we deem advisable.

We understand, of course, that only those articles which actually comply with the standard in all respects can be identified or labeled as conforming thereto.

Signature of authorized officer -----
(In ink)

(Kindly typewrite or print the following lines)

Name and title of above officer -----

Organization ² -----
(Fill in exactly as it should be listed)

Street address -----

City, Zone, and State -----

¹ In the case of related interests, trade associations, trade papers, etc., desiring to record their general support, the words "General support" should be added after the signature.

² Please see that separate acceptances are filed for all subsidiary companies and affiliates which should be listed separately as acceptors.

TO THE ACCEPTOR

The following statements answer the usual questions arising in connection with the acceptance and its significance:

1. *Enforcement.*—Commercial standards are commodity specifications voluntarily established by mutual consent of those concerned. They present a common basis of understanding between the producer, distributor, and consumer and should not be confused with any plan of governmental regulation or control. The United States Department of Commerce has no regulatory power in the enforcement of their provisions, but since they represent the will of the interested groups as a whole, their provisions through usage soon become established as trade customs, and are made effective through incorporation into sales contracts by means of labels, invoices and the like.

2. *The acceptor's responsibility.*—The purpose of commercial standards is to establish for specific commodities, nationally recognized grades or consumer criteria and the benefits therefrom will be measurable in direct proportion to their general recognition and actual use. Instances will occur when it may be necessary to deviate from the standard and the signing of an acceptance does not preclude such departures; however, such signature indicates an intention to follow the commercial standard where practicable, in the production, distribution, or consumption of the article in question.

3. *The Department's responsibility.*—The major function performed by the Department of Commerce in the voluntary establishment of commercial standards on a Nation-wide basis is fourfold: First, to act as an unbiased coordinator to bring all interested parties together for the mutually satisfactory adjustment of trade standards; second, to supply such assistance and advice as past experience with similar programs may suggest; third, to canvass and record the extent of acceptance and adherence to the standard on the part of producers, distributors, and users; and fourth, after acceptance, to publish and promulgate the standard for the information and guidance of buyers and sellers of the commodity.

4. *Announcement and promulgation.*—When the standard has been endorsed by a satisfactory majority of production or consumption in the absence of active, valid opposition, the success of the project is announced. If, however, in the opinion of the standing committee or the Department of Commerce, the support of any standard is inadequate, the right is reserved to withhold promulgation and publication.

ACCEPTORS

16. The organizations listed below have individually accepted this standard for use as far as practicable in the production, distribution, testing or purchase of cast aluminum cooking utensils. In accepting the standard, they reserved the right to depart therefrom as they individually deem advisable. It is expected that articles which actually comply with the requirements of this standard in all respects will be regularly identified or labeled as conforming thereto, and that purchasers will require such specific evidence of conformity.
