COTTON FABRIC TENTS TARPAULINS, AND COVERS

(Second Edition)

COMMERCIAL STANDARD CS28-46

(Supersedes CS28-32)

Effective Date for New Production from April 15, 1946

A RECORDED VOLUNTARY STANDARD
OF THE TRADE

UNITED STATES
GOVERNMENT PRINTING OFFICE
WASHINGTON : 1946

PROMULGATION
of
COMMERCIAL STANDARD CS28-46
for
**COTTON FABRIC TENTS, TARPAULINS, AND
COVERS**
(Second Edition)

On December 12, 1930, at the instance of the National Tent and Awning Manufacturers Association, Inc. (now National Canvas Goods Manufacturers' Association, Inc.) a general conference of manufacturers, distributors, and users of cotton fabric tents, tarpaulins, and covers adopted a recommended commercial standard for these commodities, which was subsequently accepted by the trade and promulgated as Commercial Standard CS28-32.

At the request of the above-mentioned association, and with the approval of the standing committee, the standard was revised to include marking as to size. The revision has since been accepted by the trade for promulgation through the National Bureau of Standards.

The standard is effective for new production from April 15, 1946.

Promulgation recommended.

F. W. Reynolds,
Acting Chief, Division of Trade Standards.

Promulgated.

E. U. Condon,
Director, National Bureau of Standards.

Promulgation approved.

Henry A. Wallace,
Secretary of Commerce.

COTTON FABRIC TENTS, TARPAULINS, AND COVERS

(Second Edition)

COMMERCIAL STANDARD CS28-46

PURPOSE

1. *Treated goods*.—As the use of indefinite and misleading markings and descriptions on treated fabric tents, tarpaulins, and covers for type, weight, and size works an injustice and is misleading to the buying public, the industry desires to eliminate this practice and arrange in place thereof a definite standard method of marking that will be clear to both buyer and seller.

2. *Untreated goods*.—Further, as the use of indefinite markings and descriptions on untreated fabric tents, tarpaulins, and covers for type, weight, and size is so often misleading to the tent or cover buyer, the industry desires to eliminate this practice and arrange in place thereof a definite standard method of marking that will be clear to both buyer and seller.

SCOPE

3. This commercial standard provides the basis and method of marking the type, weight, and size of cotton fabric tents, tarpaulins, and covers, either treated or untreated. It also illustrates the manner in which manufacturers and distributors may label their products to show compliance with the commercial standard.

DEFINITIONS

4. *Treated*.—For the purposes of this standard, the term “treated” means subjected to any process applied either to a finished tent, tarpaulin, or cover, or to the fabric thereof, to render it less penetrable to water, or more resistant to fire, weather, or mildew.

5. *Cover*.—For the purposes of this standard the term “cover” refers to articles such as floor coverings, truck covers, drop cloths, automobile covers, furniture covers, refrigerator covers, awnings, or any other type of cover that is sold under two dimensions or made to size to fit a definite object.

6. *Tent*.—For the purposes of this standard the term “tent” applies to all standard tents such as wall tents, umbrella tents, lean-to, house tents, Boy Scout tents, pup tents, children’s play tents, crawl-ins, decorative tents, and special tents made exclusively by manufacturers under design patents.

7. *Cut size*.—For the purposes of this standard, the term “cut size” means the size of the tent, tarpaulin, or cover before the making of its seams, hems, or reinforcement turn-overs.

REQUIREMENTS

8. *Marking weight.*

8a. *Grey goods.*—With the exception of children's play tents, crawl-ins, and decorative tents, all treated and untreated cotton fabric tents, tarpaulins, and covers shall be marked by stenciling directly on the goods or by sewing in a printed label to show the original grey goods weight in ounces per square yard. Such ounce weight designation shall be shown to the nearest 1/100 ounce. (See table 1 and conversion tables.)

TABLE 1.—*Examples of standard marking*

Mill designation weight, grey goods, 29-inch basis (29 by 36 inches)	Recommended marking standard weight, grey goods, per square yard
<i>Ounces</i>	<i>Ounces</i>
7	8.69
8	9.93
10	12.41
12	14.90

8b. *Type of fabric.*—With the exception of children's play tents, crawl-ins, and decorative tents, all treated and untreated cotton fabric tents, tarpaulins, and covers shall also be marked by stenciling or a sewed-in printed label to show the commercial type of fabric, as "single-filling duck", "double-filling duck", "army duck", "numbered duck", "sheeting", "osnaburg", "drill", and any other fabrics that may be used. (See nomenclature.)

8c. *Finished fabric.*—No marking or sales description shall be used referring to the finished or loaded weight after treatment of, or the amount of waterproofing material contained in tents, tarpaulins, or covers, which creates or tends to create confusion or deception in the merchandising of these products.

8d. *Width.*—No marking or sales description of untreated fabric covers and tents shall be used for the weight of the fabric which refers to any other than 36-inch width, regardless of the width actually used in the tent or cover.

8e. *Play tents, crawl-ins, and decorative tents.*—Whenever play tents, crawl-ins, or decorative tents are marked or otherwise described to indicate the weight or type of fabric, such markings or descriptions shall conform with the requirements of paragraphs 8a and 8b, respectively.

9. *Weight tolerance.*—The weight tolerance shall be in accordance with approved commercial practice.

10. *Used goods.*—Treated and untreated tents, tarpaulins, and covers made from second-hand or used materials shall be properly designated by label or tag—"Second-hand" or "Used Fabric."

11. *Marking size.*

11a. *Tarpaulins and covers.*—With the exception of automobile covers, furniture covers, refrigerator covers, awnings, or any other type of cover which is made to size to fit a definite object, each tar-

paulin or flat cover shall be so marked as to disclose plainly the cut size and minimum finished size at the time of the completion of manufacture thereof. The cut size shall be disclosed in immediate conjunction with the minimum finished size aforesaid, and shall not be disclosed more conspicuously than the said minimum finished size.

11b. *Tents*.—With the exception of children's play tents, crawl-ins, decorative tents or special tents made exclusively by manufacturer under design patents, tents shall be so marked as to disclose plainly the cut and minimum finished dimensions, at the time of the completion of manufacture, of width and length, and the finished dimension of the center height, or such dimensions as will accurately disclose the size of the tent. If any dimensions are given in addition to those herein mentioned, such dimensions shall be the minimum finished dimensions only.

11c. *Shrinkage*.—Those products which are described or labeled as to size shall disclose the following statement immediately in conjunction with, and as conspicuously as, the minimum finished size: "Products made of canvas are subject to shrinkage due to variable climatic conditions."

LABELING

12. *Guarantee*.—In order to assure the purchaser that he is receiving a tent, tarpaulin, or cover marked in conformity with the requirements of this standard, tents, tarpaulins, and covers shall be accompanied by a certificate, tag, card, or other label incorporating the following wording:

This article is marked in accordance with Commercial Standard CS28-46 as issued by the National Bureau of Standards of the U. S. Department of Commerce.

The weight per square yard in the grey goods (before treating), type of fabric, and size are as follows:

 (Name of manufacturer or distributor)

13. *Example*.—The following illustrates the manner in which the space in the above label is to be filled in by the manufacturer:

"12.41-oz Double-Filling Duck.

Cut size: 8' by 10'.

Minimum finished size at the time of completion of manufacture:

7'6" by 9'6".

Products made of canvas are subject to shrinkage due to variable climatic conditions.

JOHN DOE Co."

NOMENCLATURE

14. *Drill*.—A commercial term for a fabric with warp-face twill. Usually constructed with single yarn in both warp and filling and woven in such a way as to produce in the face of the fabric a slight diagonal wale or rib. Generally woven two up, one down, 24 to 72 inches wide, 4 to 9 ounces per square yard.

15. *Duck*.—A closely woven, firm, heavy, plain-weave fabric.

15a. *Army duck*.—Warp and filling each consisting of two or more yarns twisted together, made principally in weights of 7, 8, 9, 10, 12, and 15 ounces to a width of 28½ inches.

15b. *Double-filling duck*.—Warp consisting of single yarns, sized, with two yarns woven as one (not twisted); filling consisting of two or more yarns twisted together; made principally in weights as follows:

7, 8, 9, 10, and 12 oz.....	29 inches wide.
10 and 12 oz.....	36 inches wide.
10 and 11 oz.....	40 inches wide.

15c. *Single-filling duck*. Warp consisting of single yarns, sized, with two yarns woven as one (not twisted); with filling of single yarns; made principally in weights, as follows:

6, 7, 8, 9, 10, and 12 oz.....	29 inches wide.
8, 10, and 12 oz.....	36 inches wide.
10 and 11 oz.....	40 inches wide.

15d. *Enameling duck*.—Single- and double-filling duck in special weights, made principally in widths of 38, 46½, 51½, 61, 72, 84, and 90 inches.

15e. *Flat duck*.—A name often applied to both single- and double-filling ducks owing to the method of weaving two warp yarns side by side as one.

15f. *Numbered duck (sail and wide duck)*.—Warp and filling each consisting of two or more yarns twisted together. The number of numbered duck is based on the computation: Number of duck equals 19 minus weight in ounces per linear yard 22 inches wide. When the weight per linear yard exceeds 19 the number is indicated as follows: 19 ounces per linear yard is numbered 1/0, 20 ounces is 2/0, etc.

15g. *Wagon-cover duck*.—Single- and double-filling duck, made principally in widths of 48, 54, 60, 66, 72, 84, and 90 inches, in weights based upon 8, 10, and 12 ounces to 29-inch width.

16. *Jean*.—A commercial term for a fabric with warp-face twill like a drill, but with higher count and finer yarns. When the fabric is examined face up with one selvage on the left and the other on the right, on a jean drill the direction of the diagonal wale or rib is upward to the left.

17. *Osnaburg*.—A coarse, open, plain-weave fabric of yarns from 3's to 12's, weight 4 to 14 ounces per square yard, threads per inch approximately 20 to 40 warp and 20 to 38 filling.

18. *Sheeting*.—A light or medium weight plain-weave fabric of single yarns from 12's to 30's.

EFFECTIVE DATE

19. The standard is effective for new production from April 15, 1946.

STANDING COMMITTEE

20. The following individuals comprise the membership of the standing committee, which is to review, prior to circulation for acceptance, revisions proposed to keep the standard abreast of progress. Each organization nominated its own representative. Comment concerning the standard and suggestions for revision may be addressed to any member of the committee or to the Division of Trade Standards, National Bureau of Standards, which acts as secretary for the committee.

- J. E. DILG (chairman), Dougherty Brothers Tent & Awning Co., 6303 South Broadway, St. Louis 11, Mo.
- RAY H. BRYAN, Acting Director of Engineering, Division of Operations, National Council Offices, Boy Scouts of America, 2 Park Avenue, New York 16, N. Y.
- WALTER B. EAGAN, Brook Tarpaulin Co., 429 Celeste Street, New Orleans, La. Representing National Association of Purchasing Agents.
- CHARLES K. EVERETT, Director of Merchandising, Cotton-Textile Institute, Inc., 320 Broadway, New York 7, N. Y.
- JAS. E. HOOPER, Vice President, Wm. E. Hooper & Sons, 3502 Parkdale Avenue, Woodberry, Baltimore, Md.
- S. T. JESSOP, President, United States Tent & Awning Co., 2315 West Huron Street, Chicago 12, Ill.
- LIEUT. COL. S. J. KENNEDY, Quartermaster Corps, Army Service Forces, War Department, Second and Q Streets SW., Washington 25, D. C.
- G. P. LOCKER, Metropolitan Building Co., 1201 Fourth Avenue, Seattle 1, Washington. Representing National Association of Purchasing Agents.
- LAURA E. PRATT, Technical Laboratories, Department 817, Sears, Roebuck & Co., Chicago 7, Ill. Representing National Retail Dry Goods Association.
- GEORGE B. REID, American Waterproofing Co., 3200 Beckman Street, Cincinnati, Ohio. Representing Canvas Waterproofers Association.
- WILLIAM E. RUSSELL, President, Capital Awning Co., 1503 North Capitol Street, Washington 2, D. C.
- I. P. SMITH, President, The Hettrick Manufacturing Co., Summit and Magnolia Streets, Toledo, Ohio.
- C. J. STIND, Department 606, Sears, Roebuck & Co., Homan and Arthington Streets, Chicago 7, Ill. Representing Mail Order Association of America.
- HERBERT A. EHRLMAN (secretary), Division of Trade Standards, National Bureau of Standards, Washington 25, D. C.

HISTORY OF PROJECT

21. Pursuant to a request from the National Tent and Awning Manufacturers Association (National Canvas Goods Manufacturers' Association, Inc.) a general conference was held at the National Bureau of Standards on December 12, 1930, to consider the adoption of a commercial standard for cotton fabric tents, tarpaulins, and covers. Previously, waterproofers had met at the Department of Commerce on June 7, 1929, and at Memphis, Tenn., on October 6, 1930. A committee of waterproofers and tent manufacturers had met on March 21, 1930, at St. Louis, Mo.

22. The resolutions as adopted by the Canvas Waterproofers Association on October 6, 1930, state, in effect, that waterproofed fabric tents, tarpaulins, and covers be marked to show the weight of the grey goods in ounces per square yard to the nearest one-hundredth of an ounce. These were presented to the NTAMA on October 7, 1930, were adopted in modified form by that association the next day, and later were submitted to the National Bureau of Standards as a proposed commercial standard.

23. Following minor adjustments, the inclusion of an appendix covering nomenclature and definitions prepared under the auspices of the Cotton Textile Institute, Inc., and conversion tables at the general conference, the revised draft was subsequently accepted by a satisfactory majority of the trade and promulgated as CS28-32, effective for new production and clearance of existing stocks from January 1, 1932.

24. *First revision.*—A revision of the standard to include the marking of tents, tarpaulins, and covers to indicate the cut and the finished size at time of completion of manufacture was approved by the Board of Directors of the National Canvas Goods Manufacturers' Association, Inc., on January 29, 1944. A revised draft containing this recommendation as modified and approved by the standing committee, was accepted by a large majority of production by volume of tents, tarpaulins, and covers and announcement of the effective date of the revision, CS28-46, was issued on March 15, 1946.

APPENDIX

25. The standard contemplates that the retraction of and shrinkage in the fabric are compensated for when the fabric is cut and that retraction of the fabric has occurred before the cut pieces are sewed into the finished article. Therefore, normally, the dimensions placed on the article at the time of completion of its manufacture will be the dimensions at a later date. However, because of the variable nature of such fabric shrinkages, the manufacturers find it impracticable to guarantee that the dimensions of the article when purchased by the ultimate user will comply exactly with the dimensions at the time of completion of manufacture as stenciled thereon or stated on a label attached thereto.

ACCEPTANCE OF COMMERCIAL STANDARD

If acceptance has not previously been filed, this sheet properly filled in, signed, and returned will provide for the recording of your organization as an acceptor of this commercial standard.

Date_____

Division of Trade Standards,
National Bureau of Standards,
Washington 25, D. C.

Gentlemen:

We believe that the Commercial Standard CS28-46 constitutes a useful standard of practice, and we individually plan to utilize it as far as practicable in the

Production ¹ Distribution ¹ Purchase ¹ Testing ¹

of cotton fabric tents, tarpaulins, and covers.

We reserve the right to depart from it as we deem advisable.

We understand, of course, that only those articles which actually comply with the standard in all respects can be identified or labeled as conforming thereto.

Signature of authorized officer_____

(In ink)

(Kindly typewrite or print the following lines)

Name and title of above officer_____

Organization_____

(Fill in exactly as it should be listed)

Street address_____

City, zone, and State_____

¹ Underscore which one. Please see that separate acceptances are filed for all subsidiary companies and affiliates which should be listed separately as acceptors. In the case of related interests, trade associations, trade papers, etc., desiring to record their general support, the words "General support" should be added after the signature.

TO THE ACCEPTOR

The following statements answer the usual questions arising in connection with the acceptance and its significance:

1. *Enforcement.*—Commercial standards are commodity specifications voluntarily established by mutual consent of those concerned. They present a common basis of understanding between the producer, distributor, and consumer and should not be confused with any plan of governmental regulation or control. The United States Department of Commerce has no regulatory power in the enforcement of their provisions, but since they represent the will of the interested groups as a whole, their provisions through usage soon become established as trade customs, and are made effective through incorporation into sales contracts by means of labels, invoices and the like.

2. *The acceptor's responsibility.*—The purpose of commercial standards is to establish for specific commodities, nationally recognized grades or consumer criteria and the benefits therefrom will be measurable in direct proportion to their general recognition and actual use. Instances will occur when it may be necessary to deviate from the standard and the signing of an acceptance does not preclude such departures; however, such signature indicates an intention to follow the commercial standard where practicable, in the production, distribution, or consumption of the article in question.

3. *The Department's responsibility.*—The major function performed by the Department of Commerce in the voluntary establishment of commercial standards on a Nation-wide basis is fourfold: first, to act as an unbiased coordinator to bring all interested parties together for the mutually satisfactory adjustment of trade standards; second, to supply such assistance and advice as past experience with similar programs may suggest; third, to canvass and record the extent of acceptance and adherence to the standard on the part of producers, distributors, and users; and fourth, after acceptance, to publish and promulgate the standard for the information and guidance of buyers and sellers of the commodity.

4. *Announcement and promulgation.*—When the standard has been endorsed by a satisfactory majority of production or consumption in the absence of active, valid opposition, the success of the project is announced. If, however, in the opinion of the standing committee or the Department of Commerce, the support of any standard is inadequate, the right is reserved to withhold promulgation and publication.

ACCEPTORS

26. The organizations listed below have individually accepted this standard for use as far as practicable in the production, distribution, testing, or purchase of cotton fabric tents, tarpaulins, and covers. In accepting the standard they reserved the right to depart therefrom as they individually deem advisable. It is expected that articles which actually comply with the requirements of this standard in all respects will be regularly identified or labeled as conforming thereto, and that purchasers will require such specific evidence of conformity.
