Bag, Case, and Strap Leather

U. S. DEPARTMENT OF COMMERCE
BUREAU OF STANDARDS

BAG, CASE, AND STRAP LEATHER

COMMERCIAL STANDARD CS34-31

A RECORDED STANDARD OF THE INDUSTRY
Below are described some of the series of publications of the Department of Commerce which deal with various phases of waste elimination.

**Simplified Practice Recommendations.**

These present in detail the development of programs to eliminate unnecessary variety in sizes, dimensions, styles, and types of over 120 commodities. They also contain lists of associations and individuals who have indicated their intention to adhere to the recommendations. These simplified schedules, as formulated and approved by the industries, are indorsed by the Department of Commerce.

**American Marine Standards.**

These are promulgated by the American Marine Standards Committee, which is controlled by the marine industry and administered as a unit of the division of simplified practice. Their object is to promote economy in construction, equipment, maintenance, and operation of ships. In general, they provide for simplification and improvement of design, interchangeability of parts, and minimum requisites of quality for efficient and safe operation.

**Commercial Standards.**

These are developed by various industries under a procedure similar to that of simplified practice recommendations. They are, however, primarily concerned with considerations of grade, quality, and such other characteristics as are outside the scope of dimensional simplification.

Lists of the publications in each of the above series can be obtained by applying to the Division of Trade Standards, Bureau of Standards, Washington, D. C.

GOVERNMENT

Treasury Department, Washington, D. C.
War Department, Washington, D. C.
On April 28, 1931, a general conference of representative manufacturers, distributors, and users of bag, case, and strap leather adopted a commercial standard for this commodity. The industry has since accepted and approved for promulgation by the Department of Commerce, through the Bureau of Standards, the commercial standard as shown herein.

The standard will become effective for new production on August 1, 1931.

Promulgation recommended.

I. J. Fairchild,
Chief, Division of Trade Standards.

Promulgated.

George K. Burgess,
Director, Bureau of Standards.

APPROVED.

R. P. Lamont,
Secretary of Commerce.
COMMERCIAL STANDARD CS34–31

PURPOSE

This standard of thickness was proposed by the bag, case, and strap leather group of the Tanners' Council of America and recommended by a general conference of the industry for the universal adoption of all interests of the bag, case, and strap leather business to eliminate the confusion and misunderstanding that has hitherto existed in the purchase and sale of bag, case, and strap leather.

All reference to scale weight in connection with the gage thickness is eliminated as inconsequential since the purchaser of leathers in this group is concerned principally with the physical thickness of the leather and its corresponding strength rather than the weight of the piece per square foot.

SCOPE

This standard covers selling thickness for bag, case, and strap leather ¹ and other leathers sold for this purpose.

GENERAL REQUIREMENTS

The thickness of bag, case, and strap leather shall be determined by the use of the Woburn leather gage shown in Figure 1, or its equivalent, accurately calibrated in "ounces" (equivalent to 64ths of an inch), millimeters, or thousandths of an inch.

DETAIL REQUIREMENTS

All bag, case, and strap leather sold as conforming to the commercial standard shall be of reasonably uniform thickness.

The standard thicknesses, together with plus tolerances, are indicated in the following table.

Because of mechanical difficulties in the splitting of leather certain portions of the hide may run slightly less than the nominal thickness in the vicinity of scars, soft tissue around the flanks, etc. To allow for these manufacturing variations a minus tolerance of ½ ounce is permissible in a reasonable number of spots. For example, a 3-"ounce" leather may gage up to 3½ "ounces" at any point or as low as 2½ "ounces" in several spots by reason of variation in the hide texture.

¹Bag, case, and strap leather.—A general term for leathers used in traveling bags, brief cases, suitcases, pocketbooks, and straps. It does not include the light leathers employed for women's fancy handbags. The staple material for bag and case leather at present is leather made from the hides of animals of the bovine species, but heavy seal skins and goat skins are also used. It is the grain side (hair side) of cattle hide, reduced to a specified thickness ranging from 1 to 10 ounces according to the Woburn or equivalent standard gage. Split leather should be designated as "split" leather, as it is not included in the above classification.
Table 1.—Standard thicknesses of bag, case, and strap leather as designated in comparable units

</table>

1 Buffing—a very light cut of grain portion taken from the surface of the hide.

2 Grain—the outer portion or hair side of the hide.

In Table 1, the several designations for leather thickness are listed for comparison and for the purpose of clarity.

The term "ounce" has long been used in the leather industry and because of its general acceptance shall be regarded for the present as the preferred term. It should be remembered, however, that the term "ounce" is a measure of thickness and not weight and is a remnant of the older method of computing the actual weight of leather according to the number of ounces per square foot.

The thickness is designated in millimeters for the ready conversion of those more familiar with the metric system of measurement and should be particularly useful in most export trade.

The third designation, namely, sixty-fourths of an inch, is somewhat awkward of expression, but is included for use by the layman unfamiliar with the terms of the leather industry. The designations
in "ounces" and "sixty-fourths of an inch" are identical; in other words, an ounce is equal to one sixty-fourth of an inch and is so considered in the preparation and sale of leather.

The fourth designation of thousandths of an inch is included for the use of those buying or selling by this unit, and its appearance in the table provides a ready comparison with the other more generally used terms for thickness.

GENERAL CONFERENCE

Pursuant to a request of the Bag, Case, and Strap Leather Group of the Tanners' Council of America, a general conference of tanners, distributors, and leather-goods manufacturers was held at the Roosevelt Hotel, New York, N. Y., on April 28, 1931, to consider the adoption of a thickness standard for bag, case, and strap leather.

The following were present:

BlaTTeRs, V. L., R. H. Macy & Co.
ByrLoN, Joseph W., W. D. Byron & Sons (Inc.).
CHRIsTIAN, James M., Benjamin V. Harrison Co. (Inc.).
ELLiOTT, Robert E., John H. Elliott Leather Co.
FITTS, RoscoE W., Woburn Machine Co.
GARFINKEL Emile, Specialty Handle Manufacturing Co.
HATTON, Julian B., Eagle Ottawa Leather Co.
HerRod, Frank F., August Barth Leather Co.
HerTZ, Norman, Max Hertz Leather Co.
HicKeY, Dan, "Trunks & Leather Goods."
JeFFrey, J. T., Gutmann & Co.
JoNES, M. L., J. G. Curtis Leather Co.
LikINs, V. F., A. C. Lawrence Leather Co.
McCAll, W. G., Eagle Ottawa Leather Co.
MICHIE, William A., American Salpa Corporation.
Rees, L. Dub., Hans Rees Sons.
SAlE, Robert F., Max Hertz Leather Co.
Springer, Capt. H. R., War Department.
SteidLE, Harry H., Bureau of Standards.
WorsDEll, A. J., Gutmann Leather Co.
WorsDEll, Ernest W., American Oak Leather Co.
ZiMMERMAN, William A., Benjamin V. Harrison Co.

The conference held under the auspices of the division of trade standards, Bureau of Standards, was presided over by Harry H. Steidle, while J. T. Jeffrey briefly outlined the desirability of a definite thickness standard for the bag, case, and strap leather industry.

The proposed standard was thoroughly discussed and several constructive changes were made and upon motion by Julian B. Hatton, seconded by A. J. Worsdell, it was voted:

To approve for recommendation to the entire industry the commercial standard for thickness of bag, case, and strap leather as corrected.

STANDING COMMITTEE

A standing committee was appointed to represent the various interests of the bag, case, and strap leather industry and to receive all comments and suggestions for improvement of the standard to keep it abreast of current practices in the industry. No definite interval was fixed for revision of the standard, but the committee may meet at the call of the chairman whenever revision appears necessary.
The standing committee approved by the conference consists of the following:

A. J. Worsdell, chairman, Gutmann Leather Co.
Edgar Hertz, Max Hertz Leather Co.
James M. Christian, Benjamin V. Harrison Co. (Inc.).
W. G. McCall, Eagle Ottawa Leather Co.
H. A. Barth, August Barth Leather Co.
Maurice S. Mosesson, Associated Leather Goods Manufacturers.
A. B. Sheldon, National Luggage Dealers Association.
Harry H. Steidle, ex officio secretary, Bureau of Standards.

**EFFECTIVE DATE**

The effective date for the application of this standard was fixed for August 1, 1931.

**CERTIFICATION PLAN**

The general conference voted against application of the certification plan for the present time, since they preferred to first make a thorough trial of the standard. If it appears desirable at some future date, it may be applied upon recommendation and majority vote of the standing committee.

The certification plan as applied by the Bureau of Standards to commercial standards consists in the compilation and distribution of lists of manufacturers who are willing, when requested to do so, to certify to purchasers that products supplied by them comply with all the requirements and tests set forth in nationally recognized commercial standards. The plan is also applied to selected Federal specifications.

These lists are available on request to individual consumers, consumer groups, companies, and, in fact, to any prospective purchasers, for their guidance.

The benefits now derived from the use of specifications by large consumers are thus made immediately available to the small consumer, with incidental advantage to the larger consumers of convenience in ordering and accepting material with fewer laboratory tests. The manufacturer also benefits from the well-known economies accompanying "mass production."

The lists of manufacturers "willing to certify" to the quality of certain commodities are made by corresponding with, as nearly as possible, all the manufacturers of that product and listing only those who signify their willingness to certify to the purchaser, when requested to do so, that the commodities delivered actually comply with the commercial standard.

Obviously, the purchaser making use of the lists of "willing to certify" manufacturers, will select therefrom such manufacturers as are known (or assumed) by him to be reliable.

The trend toward the purchase of materials of certified quality from sources shown on such "willing to certify" lists supplies added
incentive to standardization on the part of other producers, and thus the benefits of the certification plan will be felt by purchasers either directly or indirectly, whether or not they make use of the plan themselves.

COMMERCIAL STANDARDS SERVICE

Industry has long sensed the need for a wider application and use of specifications developed and approved by nationally recognized organizations. To assist these bodies and the producers and consumers in securing this result and as a natural outgrowth of the movement toward elimination of waste through simplified practice, the Bureau of Standards has set up a procedure under which specifications, properly indorsed, may be printed as official publications of the Department of Commerce and promulgated as "Commercial Standards." This service parallels that of simplified practice in many respects and is available only upon request.

Broadly speaking, the aim is to continue the same character of cooperative service in this field that is being rendered in simplification. The division of trade standards is not designed to act as a standardizing body, nor will it engage in the preparation of specifications. Its service is mainly promotional in character, since its chief mission is to invite attention to a standard or a specification which any branch of industry may want to promulgate on a nation-wide basis; to determine its eligibility for promulgation; to publish and broadcast it in the event the prerequisites of procedure have been met, including a satisfactory majority acceptance; to facilitate the application of the certification plan for the assurance and convenience of the purchaser; to provide means for periodic audits of adherence; and to cooperate with the Bureau of Foreign and Domestic Commerce in determining the desire of industry relative to translation and promulgation of such specifications as a basis for foreign commerce.

In general, it may be said that a simplification covers types, sizes, and varieties of a commodity which are retained by industry on the basis of demand, whereas a commercial standard establishes definite requirements as to grade, quality, or dimensional tolerances in addition to any limitation of variety desired and accepted by the industry.

ORGANIZATION AND DUTIES OF STANDING COMMITTEE

In order to carry on the aims and desires of the industry in the standardization of their product, a standing committee is appointed at the general conference. This committee consists of members from each division of the industry, namely, producers, distributors, and consumers, and thus reflects the well-balanced viewpoint of all concerned.

The members of the committee receive all suggestions regarding the commercial standard and consider its revision in the event that such action is desirable and mutually beneficial.

If the commercial standard does not warrant revision, it is reaffirmed in its existing form, but if any important changes are found
desirable, their adoption is recommended by the committee, where-
upon the industry is again solicited for written acceptance of the
standard in its revised form.

The committee is in effect a centralizing agency for criticisms and
comments regarding the commercial standard and is charged with
the responsibility of recommending revisions to keep the standard
abreast with current industrial practice.

The proper functioning of the committee requires that, when neces-
sary, its members be willing to attend meetings held at some central
place, although in many cases it will be possible to conduct the work
by correspondence.

When any deceptions in reference to the commercial standard are
reported to the standing committee, it applies moral suasion or
such other corrective measures as seem desirable. The Department
of Commerce has no "police power" to compel adherence, therefore,
it is incumbent upon the standing committee to do all in its power
to encourage all divisions of the industry to follow the provisions of
the commercial standard and contribute in every way possible to its
general adoption and usefulness.

YOUR COOPERATION

As a producer, distributor, or consumer of some of the commodities
for which commercial standards have already been established, you
are in a position to avail yourself of the benefits arising from the
use of quality standards and incidentally to add impetus to this
method of eliminating waste.

The first step is a declaration in favor of the standard by record-
ing your intention to adhere, as closely as circumstances will allow,
to the standards for those products which you may buy or sell.

The receipt of your signed acceptance will permit the listing of
your company in new editions of the commercial standards that you
accept.

You will, of course, want to examine any commercial standards
before signing a formal acceptance. The Bureau of Standards will,
therefore, furnish a copy of any standard under consideration for
acceptance. A list of current commercial standards is given on the
inside of the back cover page. The publications may also be secured
singly or in quantities at a nominal price from the Government
Printing Office. Prices will be furnished upon request.

The acceptance of a commercial standard is an entirely voluntary
action and applies to the production, sale, and use of stock items. It
is not meant to interfere with the introduction, manufacture, or sale
of special sizes and types sometimes required.

Trade associations and individual companies often distribute large
numbers of the printed standard for the information and guidance of
their members or customers. In such cases it is possible to extend
the scope and degree of adherence by urging each recipient to send
in an acceptance, bearing in mind that the practical value of any
standardization is measured by the observance it receives.

An acceptance form for the commercial standard herein covered
is included on page 9.
ACCEPTANCE OF COMMERCIAL STANDARD

Please sign and return this sheet to Division of Trade Standards, Bureau of Standards, Washington, D. C.

Date ______________________________

DIVISION OF TRADE STANDARDS,
BUREAU OF STANDARDS,
Washington, D. C.

GENTLEMEN: We, the undersigned, do hereby accept the original draft of the Commercial Standard, as our standard practice in the Production \( ^1 \) Distribution \( ^1 \) of bag, case, and strap leather beginning ________,
Use \( ^1 \) Date

and will use our best effort in securing its general adoption.

To permit intelligent review of the effectiveness of the commercial standard every year by an accredited committee of all interests, working in cooperation with the Department of Commerce, we plan to supply all data, upon request, which may be necessary for the development of constructive revisions. It is understood that any suggested modifications will be submitted as soon as formulated, and shall not be promulgated until accepted in form similar to this recommendation.

Signature ____________________________________________

(Kindly typewrite or print the following lines)

Title ________________________________________________

Company ____________________________________________

Street address _________________________________________

City and State _________________________________________

We are members of the following associations or other organizations interested in the production, sale, or use of bag, case, and strap leather:

_____________________________________________________

_____________________________________________________

_____________________________________________________

^1 Please designate which group you represent by drawing lines through the other two. In the case of related interests, trade papers, colleges, etc., desiring to record their general approval, the words "In principle" should be added after the signature.
TO THE ACCEPTOR

In signing the acceptance blank, please bear the following points clearly in mind:

1. Adherence.—The Department of Commerce has no regulatory powers to enforce adherence to the commercial standards. Instead, this waste-elimination program is based on voluntary cooperation and self-government in industry. To make this specific standardization operate as a satisfactory example of self-government, it is highly desirable that it be kept distinct from any plan or method of governmental regulation or control. It will be successful according to the degree to which manufacturers, distributors, and purchasers adhere to its terms and conditions.

2. The industry’s responsibility.—The department cooperates only on the request of the industry, and assumes no responsibility for industrial acceptance or adherence. This program was developed by the industry on its own initiative. Its success depends wholly on the active cooperation of those concerned.

3. The acceptor’s responsibility.—You are entering into an entirely voluntary arrangement, whereby the members of the industry—the distributors and consumers of the product, and others concerned—hope to secure the benefits inherent in commercial standardization. Those responsible for this standard realize that instances may occur in which it will be necessary to supply or purchase items not included therein. The purpose is, however, to secure wider support for nationally recognized standards covering grade, quality, and other characteristics of products. Consumers can make the program a success if, in their purchasing, they will make a definite and conscientious effort to specify in terms of this commercial standard.

4. The department’s responsibility.—The function performed by the Department of Commerce is fourfold: First, to act as a referee to insure adequate consideration of the needs of all interests; second, to supply such assistance and advice in the development of this program as past experience with similar programs may suggest; third, to solicit and record the extent of adoption and adherence to the standard; and fourth, to add all possible prestige to this standardization movement by publication and promulgation if and when it is adopted and accepted by all elements directly concerned.
