SURGEONS' LATEX GLOVES

COMMERCIAL STANDARD CS41-32

[Issued September 8, 1932]

Effective date for New Production, July 6, 1932

A RECORDED STANDARD OF THE INDUSTRY

UNITED STATES
GOVERNMENT PRINTING OFFICE
WASHINGTON: 1932

For sale by the Superintendent of Documents, Washington, D. C. - - Price 5 cents
PROMULGATION STATEMENT FOR SURGEONS' LATEX GLOVES

Pursuant to a request from the American Hospital Association, in cooperation with the Rubber Manufacturers Association, the Department of Commerce submitted to the industry on April 26, 1932, a recommended commercial standard for surgeons' rubber gloves. The industry has since accepted and approved for promulgation by the Department of Commerce, through the Bureau of Standards, the standard as shown herein.

This recommendation became effective for new production on July 6, 1932.

Promulgation recommended.

I. J. Fairchild,
Chief, Division of Trade Standards.

Promulgated.

Lyman J. Briggs,
Acting Director, Bureau of Standards.

Promulgation approved.

Roy D. Chapin,
Secretary of Commerce.
SURGEONS' LATEX GLOVES
COMMERCIAL STANDARD

SCOPE
1. This specification covers minimum requirements for material and workmanship of surgeons' latex gloves.

WEIGHT AND SIZES
2. Surgeons' latex gloves shall be supplied in medium weight only and in sizes 6 to 91/2, inclusive. (See Table 1.)

MATERIAL AND WORKMANSHIP
3. Gloves shall be made directly from liquid latex. The surface shall be smooth and free from ingrained particles, thin spots, or other imperfections.

GENERAL REQUIREMENTS
4. Gloves shall have a rolled edge at the wrist.
5. Tensile strength.—The tensile strength of fresh gloves shall be at least 3,500 pounds per square inch. Upon exposure in the standard Geer oven at 70° C, the gloves shall have a tensile strength of at least 3,000 pounds after 7 days, 2,500 pounds after 14 days, and 2,000 pounds after 21 days.
6. Elongation.—The ultimate elongation of fresh gloves shall be at least 520 per cent (1 to 9.2 inches). After 7 days in the standard Geer oven aging test the elongation shall be 800 per cent, and it shall remain so at the end of the 14 and 21 day periods in the Geer oven.
7. Resistance to sterilization.—A sample shall be wrapped in gauze and subjected to 5 successive sterilizations in steam at 15 pounds’ pressure for periods of 15 minutes each, with intervals of 20 minutes between sterilizations. Test strips shall remain at room temperature for 24 hours before being tested. The tensile strength after this test shall be not less than 2,500 pounds per square inch. After 10 sterilizations the tensile shall be not less than 2,000 pounds per square inch.

DETAIL REQUIREMENTS
8. The length, width, and weight of gloves shall conform to Table 1.
Table 1.—Measurements and weights of surgeons' latex gloves

MARKING

9. Each glove shall be marked with the actual manufacturer's name or trade name.

10. Each package containing gloves conforming to this commercial standard shall carry a label which may read as follows:

These gloves are certified to conform to all requirements of the Commercial Standard for Surgeons' Latex Gloves CS41-32.

(Signed)

11. In lieu of the above certification the words "Conforms to CS41-32," or other identification which may later be approved by the industry, may be substituted to conserve space. The use of this inscription shall indicate that the manufacturer subscribes to the above guarantee.

HISTORY OF PROJECT

Under date of February 23, 1931, the American Hospital Association, represented by John M. Smith, requested the cooperation of the Bureau of Standards in the establishment of a commercial standard for surgeons' rubber gloves.

At a meeting of manufacturers of rubber gloves called by the Rubber Manufacturers Association and held at Akron, Ohio, on February 17, 1932, the manufacturers voted unanimously that, due to differences in physical and chemical characteristics and method of manufacture, a standard for surgeons' latex gloves should be established as distinct from the usual so-called brown-type glove.

Accordingly, upon representation to the committee on simplification and standardization of the American Hospital Association, the establishment of this standard was requested.

The above meeting of manufacturers supplied data for the formulation of this standard, which was circulated to the industry for acceptance.

STANDING COMMITTEE

To represent the industry in the consideration of any suggested revisions and in other ways to promote adherence and enhance the value of the standard, the American Hospital Association and the
Rubber Manufacturers Association have appointed a standing committee composed of representative users, distributors, and producers. The membership of this committee is given below.

Asa S. Bacon (chairman), superintendent Presbyterian Hospital, Chicago, Ill.
Dr. George O’Hanlon, director, Jersey City Hospital, Jersey City, N. J.
John M. Smith, director, Hahnemann Hospital, Philadelphia, Pa.
H. P. Croxton, Massillon Rubber Co., Massillon, Ohio.
F. T. Wilson, Wilson Rubber Co., Canton, Ohio.
R. C. Dabney, Miller Rubber Co., Akron, Ohio.
F. W. Reynolds, ex officio secretary, Bureau of Standards.

EFFECTIVE DATE

The effective date for new production was set for July 6, 1932.
ACCEPTANCE OF COMMERCIAL STANDARD

(Please sign and return this sheet to division of trade standards, Bureau of Standards, Washington, D. C.)

DIVISION OF TRADE STANDARDS,
BUREAU OF STANDARDS,
Washington, D. C.

GENTLEMEN: We, the undersigned, do hereby accept the original draft of the commercial standard as our standard, practice in the distribution of surgeons' latex gloves beginning___________, and will use our best effort in securing its general adoption.

To permit intelligent review of the effectiveness of the commercial standard every year by an accredited committee of all interests, working in cooperation with the Department of Commerce, we plan to supply all data, upon request, which may be necessary for the development of constructive revisions. It is understood that any suggested modifications will be submitted as soon as formulated, and shall not be promulgated until accepted in form similar to this recommendation.

Signature __________________________________________
(Above signature should be in ink)

(Kindly typewrite or print the following lines:)

Title________________________________________________

Company____________________________________________

Street address________________________________________

City and State________________________________________

We are members of the following associations or other organizations interested in the production, sale, or use of surgeons' latex gloves:

____________________________________________________________________________________

____________________________________________________________________________________

1 Please designate which group you represent by drawing lines through the other two. In the case of related interests, trade papers, colleges, etc., desiring to record their general approval, the words "in principle" should be added after the signature.
In signing the acceptance blank, please bear the following points clearly in mind:

1. **Adherence.**—The Department of Commerce has no regulatory powers to enforce adherence to the commercial standards. Instead, this program is based on voluntary cooperation and self-government in industry. To make this specific standardization operate as a satisfactory example of self-government it is highly desirable that it be kept distinct from any plan or method of governmental regulation or control. It will be successful according to the degree to which manufacturers, distributors, and purchasers adhere to its terms and conditions.

2. **The industry's responsibility.**—The department cooperates only on the request of the industry, and assumes no responsibility for industrial acceptance or adherence. This program was developed by the industry on its own initiative. Its success depends wholly on the active cooperation of those concerned.

3. **The acceptor's responsibility.**—You are entering into an entirely voluntary arrangement, whereby the members of the industry—the distributors and consumers of the product, and others concerned—hope to secure the benefits inherent in commercial standardization. Those responsible for this standard realize that instances may occur in which it will be necessary to supply or purchase items not included therein. The purpose is, however, to secure wider support for nationally recognized standards covering grade, quality, and other characteristics of products. Consumers can make the program a success if in their purchasing they will make a definite and conscientious effort to specify in terms of this commercial standard.

4. **The department's responsibility.**—The function performed by the Department of Commerce is fourfold: First, to act as a coordinator to insure adequate consideration of the needs of all interests; second, to supply such assistance and advice in the development of this program as past experience with similar programs may suggest; third, to solicit and record the extent of adoption and adherence to the standard; and fourth, to add all possible prestige to this standardization movement by publication and promulgation if and when it is adopted and accepted by all elements directly concerned.

COMMERCIAL STANDARDS

CS No.

0-30. The commercial standards service and its value to business.

1-32. Clinical thermometers. (First revision.)

2-30. Mopsticks.

4-29. Staple porcelain (all-clay) plumbing fixtures.

5-29. Steel pipe nipples.

6-31. Wrought-iron pipe nipples. (First revision.)

7-29. Standard weight malleable iron or steel screwed unions.

8-30. Plain and thread plug and ring gage blanks.

9-29. Builders' template hardware.

10-29. Brass pipe nipples.

11-29. Regain of mercerized cotton yarns.

12-29. Domestic and industrial fuel oils.

14-31. Boys' blouses, button-on waists, shirts, and junior shirts.

15-29. Men's pajamas.

16-29. Wall paper.

17-32. Diamond core drill fittings. (First revision.)

18-29. Hickory golf shafts.

19-32. Foundry patterns of wood.

CS No.

20-30. Staple vitreous china plumbing fixtures.

21-30. Interchangeable ground glass joints.

22-30. Builders' hardware (non-template).

23-30. Feldspar.

25-30. Special screw threads.

26-30. Aromatic red cedar closet lining.

27-30. Plate glass mirrors.

32-31. Cotton cloth for rubber and pyroxyline coating.

33-32. Knit underwear (exclusive of rayon).

35-31. Plywood (hardwood and eastern red cedar).

36-31. Fourdrinier wire cloth.

37-31. Steel bone plates and screws.

38-32. Hospital rubber sheeting.

39-32. Wool and part wool blankets. (In preparation.)

40-32. Surgeons' rubber gloves.

41-32. Surgeons' latex gloves.

Notice.—Those interested in commercial standards with a view toward accepting them as a basis of every-day practice in their industry, may secure copies of the above standards, while the supply lasts, by addressing the Division of Trade Standards, Bureau of Standards, Washington, D. C.
