PROMULGATION

of
COMMERCIAL STANDARD CS46-36

for
HOSIERY LENGTHS AND SIZES
(Second Edition)

On October 29, 1931, a general conference of representative manufacturers, distributors, and buyers of hosiery adopted a commercial standard for this commodity, which was subsequently accepted by the industry and promulgated as Hosiery Lengths, Commercial Standard CS46-33. On May 1, 1936, the Standing Committee recommended that "Method of Measuring—Size of Foot of" full-fashioned and circular knit (seamless) hosiery be added to the Commercial Standard, and that the title be changed to "Hosiery Lengths and Sizes, Commercial Standard CS46-36." This recommendation was later approved and accepted by the industry for promulgation by the United States Department of Commerce, through the National Bureau of Standards.

The standard became effective on July 20, 1936.

Promulgation recommended.

Promulgated.

Promulgation approved.

I. J. Fairchild,
Chief, Division of Trade Standards.

Lyman J. Briggs,
Director, National Bureau of Standards.

Daniel C. Roper,
Secretary of Commerce.
HOSIERY LENGTHS AND SIZES
(Second Edition)
COMMERCIAL STANDARD CS46-36

GENERAL

1. Purpose.—The purpose is to provide standard methods of measurement and standard measurements for the guidance of producers, distributors, and users, in order to eliminate confusion resulting from a diversity of measurements and methods and to provide a uniform basis for guaranteeing full-length and full-size hosiery.

2. Application.—The methods and measurements given herein are applicable to finished hosiery as delivered by the manufacturer.

3. Method of measuring.—The hosiery to be measured is laid out without tension on a smooth flat surface so that creases and wrinkles will not affect the measurements.

4. Accuracy. —Measurements are taken to the nearest one-eighth inch, unless otherwise specified.

METHOD OF MEASURING AND STANDARD LENGTHS

LADIES' HOSIERY

5. Method of measuring length.—The selected method for measuring the length of ladies' hosiery is shown diagrammatically in figure 1. It is as follows: Lay the stocking on a flat surface without tension. Place a ruler so that it touches the lower end of the heel gore and the curve formed at the ankle. The length is the distance from the bottom of the heel A to the top of the stocking B as located by this line. For full-fashioned hosiery this line of length shall be determined by laying the ruler so that it touches the curve at the ankle and is parallel to the front line of the stocking (fig. 1).

Figure 1.—Ladies' hosiery. 
6. Lengths of full-fashioned and circular knit (seamless).—The standard length of ladies' full-fashioned and circular-knit (seamless) hosiery is 30 inches in all sizes, and this length will be furnished when not otherwise specified. Other lengths are available as required. Tolerance for all lengths, plus or minus 1 inch.

7. Lengths of ribbed cotton.—The standard length of ladies' ribbed cotton hosiery is 28 inches in all sizes, and this length will be furnished when not otherwise specified. Other lengths are available as required. Tolerance for all lengths, plus or minus 1 inch.

8. Nonstandard lengths.—Ladies' hosiery in lengths other than standard carry a significant mark, generally on the container, to indicate the fact that they are either longer or shorter than standard.

Figure 2.—Men's and children's hosiery.
9. Method of measuring length of—
   (1) Men's hosiery.
   (2) Boys' golf hosiery.
   (3) Children's and misses' ribbed hosiery.
   (4) Children's \( \frac{3}{4} \) flat knit hosiery.
   (5) Children's \( \frac{3}{4} \) hosiery.
   (6) Infants' ribbed hosiery.
   (7) Infants' and children's socks.
   (8) Folded ribbed cuffs.

9a. Lay the stocking (or sock) on a flat surface without tension. Place a ruler so that it touches the lower end of the heel gore and is parallel to the ribs on the ribbed portion. If it has been boarded properly, the ruler will be parallel to the front line of the stocking. If this is not so, adjust the ruler so that it is parallel to the front line of the stocking. The length is the distance from the bottom of the heel to the top of the stocking as located by this line (fig. 2). The lengths of men's full-fashioned hosiery may be measured according to the method given for women's full-fashioned hosiery, paragraph 5.

9b. The length of the cuff on the stocking, folded as for packing, is determined by measuring the distance from the top to the bottom at the center in a line parallel with the front of the stocking.

10. Men's hosiery.—Standard lengths of men's hosiery are shown in table 1.

METHOD OF MEASURING SIZE OF FOOT

18. Size of full-fashioned hosiery.—The size of foot of full-fashioned hosiery is determined by laying the stocking out flat and measuring the distance from the tip of the toe to the back of the heel along a straight line from the tip of the toe through the uppermost fashion mark in heel, which is approximately 1 inch above the bottom of the heel. Measurements are made to the nearest one-half inch. Figure 3.

19. Size of circular knit (seamless) hosiery.—The size of foot of circular-knit (seamless) hosiery is determined by laying the stocking out flat and measuring the distance from the tip of the toe to the back of the heel along a straight line through the tip of the toe and
the bottom of the heel gore. Measurements are made to the nearest \( \frac{1}{2} \) inch. Figure 4.

![Figure 4](image)

**Figure 4.—Circular knit (Seamless) hosiery.**

**EFFECTIVE DATE**

The standard became effective from July 20, 1936.

**STANDING COMMITTEE**

The following comprises the membership of the standing committee which is to review, prior to circulation for acceptance, revisions proposed to keep the standard abreast of progress. Each association nominated its own representatives. Comment concerning the standard and suggestions for revision may be addressed to any member of the committee or to the Division of Trade Standards, National Bureau of Standards, which acts as Secretary for the committee.

**MANUFACTURERS**

**Men's:**
- J. W. Mettler (chairman), Interwoven Stocking Co., New Brunswick, N. J.
- Theodore Friedlander, Phoenix Hosiery Co., 320 East Buffalo Street, Milwaukee, Wis.
- W. F. Carr, Durham Hosiery Mills, Durham, N. C.

**Women's:**
- R. E. Tillis (chairman), Gotham Silk Hosiery Co., Inc., 200 Madison Avenue, New York, N. Y.
- Hugo Hemmerick, Berkshire Knitting Mills, Reading, Pa.

**Children's:**
- J. Lee Bausher (chairman), Infants' Socks, Inc., 210 Maple Street, Reading, Pa.
- Dan May, May Hosiery Mills, 436 Houston Street, Nashville, Tenn.

**DISTRIBUTORS AND USERS**

**All types of hosiery:**
- W. R. Wardle, Jacob Reed's Sons, 1424-26 Chestnut Street, Philadelphia, Pa., representing National Association of Retail Clothiers and Furnishers.

94261—36—2
HISTORY OF PROJECT

On September 9, 1931, the National Association of Hosiery and Underwear Manufacturers presented a specification for men’s, women’s, and children’s hosiery lengths and requested that it be given consideration by a general conference of manufacturers, distributors, and users of hosiery with a view to its adoption as a commercial standard. This specification was developed through the cooperation of the industry by E. M. Schenke, Research Associate of the National Association of Hosiery and Underwear Manufacturers.

A general conference was held in Philadelphia on October 29, 1931, at which time the tentative draft of the proposed commercial standard was revised and adopted, with the recommendation that it be circulated to the industry for written acceptance.

This conference named a standing committee to review periodically all comment and suggestions leading to the revision of the specification. It voted its approval of the certification plan and recommended its use by the industry.

The recommended commercial standard was circulated for acceptance on December 5, 1931, and received the endorsement of a large part of the industry. However, it later developed that there was not full agreement in regard to the measurements of children’s hosiery and on January 2, 1932, a questionnaire was circulated to manufacturers requesting measurements for the different sizes and types.

In the meantime the standing committee approved the request that the length of ladies’ ribbed cotton hosiery be included and that the standard length of such hosiery be specified as 28 inches.

In due course, the data relative to children’s hosiery were received and submitted to the standing committee for comment, with the result that on January 12, 1933, the length of children’s hosiery was approved by that committee and the revised recommended commercial standard was circulated for approval.

On April 1, 1933, the adoption of the standard was announced and became effective on July 1, 1933.

FIRST REVISION

On February 21, 1936, the National Association of Hosiery Manufacturers requested that the National Bureau of Standards canvass the standing committee to secure its reaction to a recommendation that “Methods of Measuring—Size of Foot of” full-fashioned and circular knit (seamless) hosiery be added to Hosiery Lengths, Commercial Standard CS46–33.

The standing committee immediately gave its endorsement and recommended that the commercial standard be revised accordingly and that the title be changed to “Hosiery Lengths and Sizes, Commercial Standard CS46–36.”

This recommendation was circulated for acceptance on May 1, 1936, and was approved by a satisfactory majority of those directly concerned. The success of the project was announced on July 20, 1936, and the standard became effective on that date.
ACCEPTANCE OF COMMERCIAL STANDARD

This sheet properly filled in, signed, and returned will provide for the recording of your organization as an acceptor of this commercial standard.

Date__________________________

Division of Trade Standards,
National Bureau of Standards,
Washington, D. C.

Gentlemen:

Having considered the statements on the reverse side of this sheet we accept the Commercial Standard CS46-36 as our standard of practice in the

Production
Distribution
Use

of hosiery lengths and sizes.

We will assist in securing its general recognition and use, and will cooperate with the standing committee to effect revisions of the standard when necessary.

Signature__________________________

(Kindly typewrite or print the following lines)

Name and title______________________________________

Company____________________________________________

Street address________________________________________

City and State________________________________________

1 Please designate which group you represent by drawing lines through the other two. In the case of related interests, trade papers, colleges, etc., desiring to record their general approval, the words "in principle" should be added after the signature.
TO THE ACCEPTOR

The following statements answer the usual questions arising in connection with the acceptance and its significance:

1. Enforcement.—Commercial standards are commodity specifications voluntarily established by mutual consent of the industry. They present a common basis of understanding between the producer, distributor, and consumer and should not be confused with any plan of governmental regulation or control. The United States Department of Commerce has no regulatory power in the enforcement of their provisions, but since they represent the will of the industry as a whole, their provisions through usage soon become established as trade customs, and are made effective through incorporation into sales contracts by means of labels, invoices, and the like.

2. The acceptor's responsibility.—The purpose of commercial standards is to establish for specific commodities, nationally recognized grades or consumer criteria and the benefits therefrom will be measurable in direct proportion to their general recognition and actual use. Instances will occur when it may be necessary to deviate from the standard and the signing of an acceptance does not preclude such departures; however, such signature indicates an intention to follow the commercial standard where practicable, in the production, distribution, or consumption of the article in question.

3. The Department's responsibility.—The major function performed by the Department of Commerce in the voluntary establishment of commercial standards on a Nation-wide basis is fourfold: first, to act as an unbiased coordinator to bring all branches of the industry together for the mutually satisfactory adjustment of trade standards; second, to supply such assistance and advice as past experience with similar programs may suggest; third, to canvass and record the extent of acceptance and adherence to the standard on the part of producers, distributors, and users; and fourth, after acceptance, to publish and promulgate the standard for the information and guidance of buyers and sellers of the commodity.

4. Announcement and promulgation.—When the standard has been endorsed by companies representing a satisfactory majority of production, the success of the project is announced. If, however, in the opinion of the standing committee of the industry or the Department of Commerce, the support of any standard is inadequate, the right is reserved to withhold promulgation and publication.
Individuals and organizations listed below have indicated, in writing, acceptance of this specification as their standard of practice in production, distribution, or use, but such endorsement does not signify that they may not find it necessary to deviate from the standard, nor does it signify that the producers so listed guarantee all of their products to conform with the requirements of this standard.
