PROMULGATION

of

COMMERCIAL STANDARD CS71–38

for

CRESYLIC DISINFECTANTS

On September 20, 1937, the National Association of Insecticide and Disinfectant Manufacturers, Inc., proposed the establishment of a Commercial Standard for Cresylic Disinfectants. Accordingly, after preliminary conferences with other interested organizations, including the Federal Food and Drug Administration, the proposal was submitted on March 23, 1938, to manufacturers, distributors, and users for the approval of all concerned. The industry has since accepted and approved for promulgation by the United States Department of Commerce, through the National Bureau of Standards, the standard as shown herein.

The standard became effective on June 10, 1938.

Promulgation recommended.

I. J. Fairchild,
Chief, Division of Trade Standards.

Promulgated.

Lyman J. Briggs,
Director, National Bureau of Standards.

Promulgation approved.

Daniel C. Roper,
Secretary of Commerce.
CRESYLIC DISINFECTANTS

COMMERCIAL STANDARD CS71-38

PURPOSE

1. The purpose of this commercial standard is to provide a minimum specification for quality, as a basis for understanding and voluntary guaranties between producers, distributors, and users in the purchase of this commodity, and as a foundation for confidence on the part of purchasers that the efficacy of the material is that which may be expected of cresylic disinfectants manufactured in conformity with a nationally recognized specification.

SCOPE

2. This standard covers materials, physical and chemical properties, and certification of quality of cresylic disinfectants.

GENERAL REQUIREMENTS

3. The product shall be made from that portion of coal tar known as "tar acids" and a soap derived from rosin acid and/or fat and/or oil of vegetable origin.

4. It shall contain not less than 50 percent of tar acids, as determined by the method described in U. S. Pharmacopoea XI for the assay of cresol in the saponated solution of cresol.

5. It shall contain not more than 25 percent of inert ingredients (water plus glycerine, if any).

6. The phenol coefficient shall be determined by the Federal Food and Drug Administration method using B. typhosus as the test-organism and shall be clearly stated on the label attached to each shipping container.

7. It shall contain less than 5 percent of benzophenol.

8. It shall make clear solution with water of zero hardness at 20° C (68° F.) within the concentration range of from 1 to 4 percent. Such solutions, when kept in closed containers, shall remain either practically clear or become only slightly opalescent when allowed to stand for 24 hours at 20° C (68° F) away from direct light.

9. It shall show no soap separation when cooled down to 0° C and held at this temperature for 3 hours.

CERTIFICATION AND LABELING

10. The following form of statement on labels, invoices, etc., is recommended:

The ______________________ Company certifies this cresylic disinfectant to conform to all requirements of the standard adopted by the NATIONAL ASSOCIATION OF INSECTICIDE AND DISINFECTANT MANUFACTURERS, INC., and recorded as Commercial Standard CS71-38 by the National Bureau of Standards of the United States Department of Commerce.

Phenol coefficient ________.

1 This type of disinfectant is readily available with phenol coefficients ranging from 2 to 5. Contract buyers should specify the phenol coefficient desired.

2 When used on labels this statement is in addition to, and not in lieu of, the ingredient statement required by the Insecticide Act of 1910.
EFFECTIVE DATE

The standard became effective on June 10, 1938.

STANDING COMMITTEE

The following comprises the membership of the standing committee, which is to review, prior to circulation for acceptance, revisions proposed to keep the standard abreast of progress. Comment concerning the standard and suggestions for revision may be addressed to any member of the committee or to the Division of Trade Standards, National Bureau of Standards, which acts as secretary for the committee.

Manufacturers:
Dr. E. G. Thomssen, The J. R. Watkins Co., Winona, Minn.

Distributors:
F. A. Hoyt, Frederick Disinfectant Co., Box 1556, Atlanta Ga.
Ellis Davidson, Ellis Davidson Co., Inc., 38 W. 21st St., New York, N. Y.

Users:
Dr. A. H. Johnson, Sealtest, Inc., 1403 Eutaw Place, Baltimore, Md.
Dr. C. C. McDonnell, Insecticide Division, Food and Drug Administration, U. S. Department of Agriculture, Washington, D. C.
Robert S. Fuqua, Johns Hopkins Hospital, Baltimore, Md.

General interest:
F. W. Reynolds (secretary), Division of Trade Standards, National Bureau of Standards, Washington, D. C.

HISTORY OF PROJECT

On September 20, 1937, the National Association of Insecticide and Disinfectant Manufacturers, Inc., requested the establishment of a commercial standard for cresylic disinfectants, and submitted as a basis for such a standard, a specification adopted officially by the Association and followed by a large proportion of the membership.

The Division of Trade Standards consulted other interested individuals and organizations, and led the discussion of the proposed commercial standard at a convention of the Association in New York City on December 6, 1937. After discussion, the convention voted to recommend establishment of a commercial standard through the regular procedure of the National Bureau of Standards.

In view of the large consumer and distributor participation during the Association convention and subsequent review of the proposed commercial standard by the Federal Food and Drug Administration, it appeared that the purpose of a public hearing had been accomplished and the situation did not warrant the calling of a general conference for further consideration of the specification.

Accordingly, on March 23, 1938, the recommended commercial standard was circulated to the industry for written acceptance by producers, distributors, and users. Following satisfactory acceptance and in the absence of active opposition, the establishment of the standard was announced June 10, 1938.
ACCEPTANCE OF COMMERCIAL STANDARD

This sheet properly filled in, signed, and returned will provide for the recording of your organization as an acceptor of this commercial standard.

Date

Division of Trade Standards,
National Bureau of Standards,
Washington, D. C.

Gentlemen:

Having considered the statements on the reverse side of this sheet, we accept the Commercial Standard CS71-38 as our standard of practice in the

Production

Distribution

Use

of cresylic disinfectants.

We will assist in securing its general recognition and use, and will cooperate with the standing committee to effect revisions of the standard when necessary.

Signature of individual officer

(In ink)

(Kindly typewrite or print the following lines)

Name and title of above officer

Company

(Fill in exactly as it should be listed in pamphlet)

Street address

City and State

1 Please designate which group you represent by drawing lines through the other two. Please file separate acceptances for all subsidiary companies and affiliates which should be listed separately as acceptors. In the case of related interests, trade papers, colleges, etc., desiring to record their general approval, the words “in principle” should be added after the signature.
TO THE ACCEPTOR

The following statements answer the usual questions arising in connection with the acceptance and its significance:

1. Enforcement.—Commercial standards are commodity specifications voluntarily established by mutual consent of the industry. They present a common basis of understanding between the producer, distributor, and consumer and should not be confused with any plan of governmental regulation or control. The United States Department of Commerce has no regulatory power in the enforcement of their provisions; but, since they represent the will of the industry as a whole, their provisions through usage soon become established as trade customs, and are made effective through incorporation into sales contracts, by means of labels, invoices, and the like.

2. The acceptor’s responsibility.—The purpose of commercial standards is to establish for specific commodities, nationally recognized grades or consumer criteria, and the benefits therefrom will be measurable in direct proportion to their general recognition and actual use. Instances will occur when it may be necessary to deviate from the standard and the signing of an acceptance does not preclude such departures; however, such signature indicates an intention to follow the commercial standard where practicable, in the production, distribution, or consumption of the article in question.

3. The Department’s responsibility.—The major function performed by the Department of Commerce in the voluntary establishment of commercial standards on a Nation-wide basis is fourfold: First, to act as an unbiased coordinator to bring all branches of the industry together for the mutually satisfactory adjustment of trade standards; second, to supply such assistance and advice as past experience with similar programs may suggest; third, to canvass and record the extent of acceptance and adherence to the standard on the part of producers, distributors, and users; and fourth, after acceptance, to publish and promulgate the standard for the information and guidance of buyers and sellers of the commodity.

4. Announcement and promulgation.—When the standard has been endorsed by companies representing a satisfactory majority of production, the success of the project is announced. If, however, in the opinion of the standing committee of the industry or the Department of Commerce, the support of any standard is inadequate, the right is reserved to withhold promulgation and publication.
ACCEPTORS

The organizations and individuals listed below have accepted this specification as their standard of practice in the production, distribution, and use of cresylic disinfectants. Such endorsement does not signify that they may not find it necessary to deviate from the standard nor that producers so listed guarantee all of their products to conform with the requirements of this standard. Therefore specific evidence of quality certification should be obtained where required.

COMMERCIAL STANDARDS

CS No. Item
0-30. The commercial standards service and its value to business.
2-30. Mopsticks.
4-26. Staple porcelain (all-clay) plumbing fixtures.
5-29. Steel pipe nipples.
7-20. Standard weight malleable iron or steel screwed unions.
10-23. Brass pipe nipples.
11-29. Regain of mercerized cotton yarns.
14-31. Boys' blouses, button-on waists, shirts, and junior shirts.
15-29. Men's pajamas.
16-29. Wall paper.
18-29. Hickory golf shafts.
22-30. Builders' hardware (montemplate).
23-30. Feltsepar.
25-30. Special screw threads.
26-30. Aromatic red cedar closet lining.
33-32. Knit underwear (exclusive of rayon).
35-31. Plywood (Hardwood and Eastern Red Cedar).
37-31. Steel bone plates and screws.
38-32. Hospital rubber sheeting.
40-32. Surgeons' rubber gloves.

CS No. Item
41-32. Surgeons' latex gloves.
44-32. Apple wraps.
47-34. Marking of gold-filled and rolled-gold-plate articles other than watch cases.
48-34. Domestic burners for Pennsylvania anthracite (underfired type).
49-34. Chip board, laminated chip board, and miscellaneous boards for bookbinding purposes.
50-34. Binders board for bookbinding and other purposes.
51-35. Marking articles made of silver in combination with gold.
52-35. Mohair pile fabrics (100-percent mohair plain velvet, 100-percent mohair plain frieze, and 50-percent mohair plain frieze).
53-35. Colors and finishes for cast stone.
54-35. Mattresses for hospitals.
55-35. Mattresses for institutions.
56-36. Oak Flooring.
57-36. Book cloths, buckrams, and impregnated fabrics for bookbinding purposes except library bindings.
59-36. Woven dress fabrics—testing and reporting.
60-36. Hardwood dimension lumber.
61-37. Wood-shut venetian blinds.
63-38. Colors for bathroom accessories.
64-37. Walnut veneers.
65-38. Wool and part-wool fabrics.
66-38. Marking of articles made wholly or in part of platinum.
67-38. Marking articles made of karat gold.
68-38. Liquid hypochlorite disinfectant, deodorant, and germicide.
70-38. Coal tar disinfectant (emulsifying type).
71-38. Creosyl disinfectants.
72-38. Household insecticide (liquid spray type).

Notice.—Those interested in commercial standards with a view toward accepting them as a basis of everyday practice in their industry may secure copies of the above standards, while the supply lasts, by addressing the Division of Trade Standards, National Bureau of Standards, Washington, D. C.
