HOUSEHOLD INSECTICIDE

(LIQUID SPRAY TYPE)

COMMERCIAL STANDARDS CS72-38

Effective Date, June 10, 1938

A RECORDED STANDARD OF THE INDUSTRY

UNITED STATES  
GOVERNMENT PRINTING OFFICE  
WASHINGTON : 1938

PROMULGATION  
of  
COMMERCIAL STANDARD CS72-38  
for  
HOUSEHOLD INSECTICIDE  
(LIQUID SPRAY TYPE)

---

On September 20, 1937, the National Association of Insecticide and Disinfectant Manufacturers, Inc., proposed the establishment of a Commercial Standard for Household Insecticide (Liquid Spray Type). Accordingly, after preliminary conferences with other interested organizations, including the Federal Food and Drug Administration, the proposal was submitted on March 23, 1938, to manufacturers, distributors, and users for the approval of all concerned. The industry has since accepted and approved for promulgation by the United States Department of Commerce, through the National Bureau of Standards, the standard as shown herein.

The standard became effective on June 10, 1938.

Promulgation recommended.

I. J. Fairchild,  
*Chief, Division of Trade Standards.*

Promulgated.

Lyman J. Briggs,  
*Director, National Bureau of Standards.*

Promulgation approved.

Daniel C. Roper,  
*Secretary of Commerce.*

# HOUSEHOLD INSECTICIDE (LIQUID SPRAY TYPE)

## COMMERCIAL STANDARD CS72-38

### PURPOSE

1. The purpose of this commercial standard is to provide a specification for quality, as a basis for understanding and voluntary guaranties between producers, distributors, and users in the purchase of this commodity, and as a foundation for confidence on the part of purchasers that the efficacy of the material is that which may be expected of liquid spray type household insecticide manufactured in conformity with a nationally recognized specification.

### SCOPE

2. This standard covers the methods of test, biological, physical, and chemical properties, and certification of quality of liquid spray type household insecticide.

### GENERAL REQUIREMENTS

3. The killing power of the liquid spray type household insecticide shall be determined by the Official Peet-Grady Method in conjunction with the Official Test Insecticide of the National Association of Insecticide and Disinfectant Manufacturers, Inc.

4. The killing power of the insecticide shall be designated by letter and shall be in accordance with the following grading system:

Grade	Difference between 24-hour "percentage kill" of insecticide and that of the OTI
AA.....	+ 16 or greater.
A.....	+ 6 to + 15.
B.....	- 5 to + 5.

5. This insecticide shall be harmless to man and warm-blooded household animals when used as directed.

6. When sprayed as directed, it shall not stain fabrics, wall paper, and general household furnishings that are not stained by dry-cleaning fluids.

7. When used in the customary manner, it shall not contaminate closed packages of food materials commonly found in homes.

8. It shall not corrode metals.

9. It shall have no objectionable odor, and no particular odor shall be specified.

10. It shall have a flash point not less than 125° F when tested in the Tagliabue closed cup.

## METHODS OF TEST

11. *Peet-Grady method.*—The Peet-Grady method of determining efficiency of contact liquid insecticides is subject to variations that necessitate close attention to details of equipment and procedure to obtain comparable results. Refinements that result in higher precision are being developed by constant research and are incorporated in the official method from time to time. A copy of the official method setting forth the necessary details is available from the National Association of Insecticide and Disinfectant Manufacturers, Inc., 110 East 42d Street, New York, N. Y., or from the distributor of the "Official Test Insecticide." The following resumé is intended for general information of those not actively engaged in conducting the test:

11a. *Official Test Insecticide.*—To equalize variables not otherwise controlled, such as varying resistance of insects, grading is based on the killing power of the "Official Test Insecticide" prepared by the National Association of Insecticide and Disinfectant Manufacturers, Inc., and made available to all laboratories.

11b. *Test insect.*—House flies (*Musca domestica*, L.) are used. Healthy individuals are reared under prescribed conditions and used when not less than 3 nor more than 5 days old. Such insects are in general more resistant than wild house flies to insecticides.

11c. *Peet-Grady test chamber.*—The test chamber is a 6-foot (inside) cube, constructed of wood or metal and lined so the inner surface is smooth, relatively nonporous, and free of cracks, projections, ledges, etc. One wall is provided with a tight fitting door large enough for a man to enter conveniently, with the interior side flush with the wall when closed. The other walls and ceiling are provided with glass windows for observation and lighting; various openings are provided for admitting insects and the insecticide, and for ventilation after test.

11d. *Test procedure.*—Approximately 100 flies are transferred to the thoroughly cleaned Peet-Grady chamber. All ports and entrances are closed and 12 ml of the insecticide are introduced by means of a special type atomizer. The chamber is kept closed for 10 minutes beginning from the time the spray is started. At the end of this time, the ventilating ports are opened and the exhaust fan turned on. The number of flies clinging to the ceiling and walls, together with any still flying, are counted and considered unaffected by the insecticide. The flies which have fallen to the floor are carefully transferred to observation cages. At the end of 24 hours, the insects are counted and the number dead, plus those that have revived, are added to the number unaffected, to obtain the total number of flies used. The number of flies dead in the observation cage after 24 hours multiplied by 100 and divided by the total number used gives the "percentage kill." To be counted as dead, an insect must show no signs of life upon being disturbed.

11e. *Grading.*—The insecticide tested is graded by comparing the percentage kill with that obtained on flies of the same culture by the Official Test Insecticide. (See paragraph 4.)

12. *Corrosion test.*—Test for Detection of Free Sulfur and Corrosive Sulfur Compounds in Gasoline. ASTM <sup>1</sup> Method D 130-30.

<sup>1</sup> American Society for Testing Materials, 260 South Broad Street, Philadelphia, Pa.

13. *Flash test*.—ASTM Method D 56-36.

14. The following form of statement on labels, invoices, etc., is recommended:

The ----- Company certifies this household insecticide (liquid spray type) to conform to all requirements of the standard adopted by the NATIONAL ASSOCIATION OF INSECTICIDE AND DISINFECTANT MANUFACTURERS, Inc., and recorded as Commercial Standard CS72-38 by the National Bureau of Standards of the United States Department of Commerce.

Grade -----

### EFFECTIVE DATE

The standard became effective on June 10, 1938.

### STANDING COMMITTEE

The following comprises the membership of the Standing Committee, which is to review, prior to circulation for acceptance, revisions proposed to keep the standard abreast of progress. Comment concerning the standard and suggestions for revision may be addressed to any member of the committee or to the Division of Trade Standards, National Bureau of Standards, which acts as secretary for the committee.

#### *Manufacturers:*

JOHN N. CURLETT (chairman), McCormick & Co. Inc., McCormick Bldg., Baltimore, Md.

L. D. BENEDICT, Midway Chemical Co., 5235 W. 65th St., Chicago, Ill.

WALLACE THOMAS, Gulf Oil Corporation, Gulf Bldg., Pittsburgh, Pa.

#### *Distributors:*

J. W. SCHIFFER, The Federal Sanitation Co., Inc., 2340 Euclid Ave., Cleveland, Ohio.

F. A. HOYT, Frederick Disinfectant Co., Box 1556, Atlanta, Ga.

ELLIS DAVIDSON, Ellis Davidson Co., Inc., 38 West 21st St., New York, N. Y.

#### *Users:*

Dr. STROUD JORDAN, Department of Purchase, City of New York, New York, N. Y.

M. M. DONOHUE, Bureau of Standards, Department of Property and Supplies, Commonwealth of Pennsylvania, Harrisburg, Pa.

Dr. C. C. McDONNELL, Insecticide Division, Food and Drug Administration, U. S. Department of Agriculture, Washington, D. C.

#### *General interest:*

F. W. REYNOLDS (secretary), Division of Trade Standards, National Bureau of Standards, Washington, D. C.

### HISTORY OF PROJECT

On September 20, 1937, the National Association of Insecticide and Disinfectant Manufacturers, Inc., requested the establishment of a commercial standard for household insecticide (liquid spray type), and submitted as a basis for such a standard, a specification adopted officially by the Association and followed by a large proportion of the membership.

The Division of Trade Standards consulted other interested individuals and organizations, and led the discussion of the proposed commercial standard at a convention of the Association in New York City on December 6, 1937. After discussion, the convention voted to recommend establishment of a commercial standard through the regular procedure of the National Bureau of Standards.

In view of the large consumer and distributor participation during the Association convention and subsequent review of the proposed commercial standard by the Federal Food and Drug Administration, it appeared that the purpose of a public hearing had been accomplished and the situation did not warrant the calling of a general conference for further consideration of the specification.

Accordingly, on March 23, 1938, the recommended commercial standard was circulated to the industry for written acceptance by producers, distributors, and users. Following satisfactory acceptance and in the absence of active opposition, the establishment of the standard was announced June 10, 1938.

## ACCEPTANCE OF COMMERCIAL STANDARD

This sheet properly filled in, signed, and returned will provide for the recording of your organization as an acceptor of this commercial standard.

Date \_\_\_\_\_

Division of Trade Standards,  
National Bureau of Standards,  
Washington, D. C.

Gentlemen:

Having considered the statements on the reverse side of this sheet, we accept the Commercial Standard CS72-38 as our standard of practice in the

Production <sup>1</sup>

Distribution <sup>1</sup>

Use <sup>1</sup>

of household insecticide (liquid spray type).

We will assist in securing its general recognition and use, and will cooperate with the standing committee to effect revisions of the standard when necessary.

Signature of individual officer \_\_\_\_\_

(In ink)

(Kindly typewrite or print the following lines)

Name and title of above officer \_\_\_\_\_

Company \_\_\_\_\_

(Fill in exactly as it should be listed in pamphlet)

Street address \_\_\_\_\_

City and State \_\_\_\_\_

<sup>1</sup> Please designate which group you represent by drawing lines through the other two. Please file separate acceptances for all subsidiary companies and affiliates which should be listed separately as acceptors. In the case of related interests, trade papers, colleges, etc., desiring to record their general approval, the words "in principle" should be added after the signature.

## TO THE ACCEPTOR

The following statements answer the usual questions arising in connection with the acceptance and its significance:

1. *Enforcement.*—Commercial standards are commodity specifications voluntarily established by mutual consent of the industry. They present a common basis of understanding between the producer, distributor, and consumer and should not be confused with any plan of governmental regulation or control. The United States Department of Commerce has no regulatory power in the enforcement of their provisions, but since they represent the will of the industry as a whole, their provisions through usage soon become established as trade customs, and are made effective through incorporation into sales contracts by means of labels, invoices, and the like.

2. *The acceptor's responsibility.*—The purpose of commercial standards is to establish for specific commodities, nationally recognized grades or consumer criteria and the benefits therefrom will be measurable in direct proportion to their general recognition and actual use. Instances will occur when it may be necessary to deviate from the standard and the signing of an acceptance does not preclude such departures; however, such signature indicates an intention to follow the commercial standard where practicable, in the production, distribution, or consumption of the article in question.

3. *The Department's responsibility.*—The major function performed by the Department of Commerce in the voluntary establishment of commercial standards on a Nation-wide basis is fourfold: first, to act as an unbiased coordinator to bring all branches of the industry together for the mutually satisfactory adjustment of trade standards; second, to supply such assistance and advice as past experience with similar programs may suggest; third, to canvass and record the extent of acceptance and adherence to the standard on the part of producers, distributors, and users; and fourth, after acceptance, to publish and promulgate the standard for the information and guidance of buyers and sellers of the commodity.

4. *Announcement and promulgation.*—When the standard has been endorsed by companies representing a satisfactory majority of production, the success of the project is announced. If, however, in the opinion of the standing committee of the industry or the Department of Commerce, the support of any standard is inadequate, the right is reserved to withhold promulgation and publication.

# SUPPLEMENTARY LIST OF ACCEPTORS TO ACCOMPANY COMMERCIAL STANDARD CS72-38

(June 28, 1940)

The manufacturers, distributors, and consumers listed below indicated in writing their acceptance of Commercial Standard for Household Insecticide (Liquid Spray Type), CS72-38, during the interval between the first and second printing of this publication.

## ACCEPTORS

The organizations and individuals listed below have accepted this specification as their standard of practice in the production, distribution, and use of liquid spray type household insecticide. Such endorsement does not signify that they may not find it necessary to deviate from the standard, nor that producers so listed guarantee all of their products to conform with the requirements of this standard. Therefore specific evidence of quality certification should be obtained where required.
