BLOWN, DRAWN, AND DROPPED LENSES FOR SUN GLASSES

COMMERCIAL STANDARD CS79–39

Effective Date for New Production from October 10, 1939

A RECORDED STANDARD OF THE INDUSTRY
PROMULGATION
of
COMMERCIAL STANDARD CS79–39
for
BLOWN, DRAWN, AND DROPPED LENSES
FOR SUN GLASSES

On June 16, 1939, at the instance of the Sun Glass Institute, Inc., a general conference of representative manufacturers, distributors, and users of blown, drawn, and dropped lenses for sun glasses adopted a recommended commercial standard for this commodity. Those concerned have since accepted and approved for promulgation by the United States Department of Commerce, through the National Bureau of Standards, the standard as shown herein.

The standard is effective for new production from October 10, 1939.

Promulgation recommended.

I. J. Fairchild,
Chief, Division of Trade Standards.

Promulgated.

Lyman J. Briggs,
Director, National Bureau of Standards.

Promulgation approved.

Harry L. Hopkins,
Secretary of Commerce.
BLOWN, DRAWN, AND DROPPED LENSES FOR SUN GLASSES

COMMERCIAL STANDARD CS79-39

PURPOSE

1. The purpose of this commercial standard is to provide a nationally recognized specification for blown, drawn, and dropped sun-glass lenses to serve as an assurance and protection to purchasers, to promote fair competition between manufacturers, and to serve as a basis for certification of quality.

SCOPE

2. This commercial standard covers workmanship, dimensional precision, and freedom from defects that impair serviceability of blown, drawn, and dropped sun-glass lenses. The lenses covered by this commercial standard are eye-protective (not eye-corrective) devices. They are not a substitute for prescription lenses but may be worn therewith.

TYPES

3. This specification covers blown-glass lenses of the micoquille type, drawn-glass lenses of the flat type, and blown or dropped lenses of the coquille type.

GENERAL REQUIREMENTS

4. The lenses shall be reasonably free from striae, waves, flaws, or defects that are detectable with the unaided eye upon examination by means of transmitted light that is normally incident on the lenses.
5. Prismatic effect shall not exceed 1/4 prism diopter.
6. Lenses shall be essentially without focal power. A negative power not to exceed 1/8 diopter is permitted for micoquille and flat types and 1/4 diopter for the coquille type.
7. The lenses shall transmit not more than 67 percent of the total visible light rays from a high-powered gas-filled tungsten lamp operated at its rated voltage.

TESTING EQUIPMENT

8. Lenses shall be tested for prismatic effect and focal power by any recognized optical method which provides the degree of accuracy indicated by these specifications.
9. The visible radiation shall be determined photometrically by an observer having normal color vision, as determined by the Holmgren

1 Defined as lenses having shallow curved surfaces (1 to 3 diopters).
2 Defined as lenses having deep curved surfaces (4 to 6 diopters).
test for color vision, or with a physical photometer consisting of a thermopile (or other radiometer) and a luminosity solution having a spectral-transmission curve which coincides closely with the visibility curve of the average eye.

CERTIFICATION OF QUALITY

10. It is recommended that the following form of certification be used on labels, tags, invoices, etc.:

The ___________________________ Company certifies these sun-glass lenses to comply with all requirements of Commercial Standard CS79-39 for Blown, Drawn, and Dropped Lenses for Sun Glasses, as issued by the National Bureau of Standards.

11. An abbreviated form of certification is incorporated in the label shown as figure 1.

![Figure 1](image)

**Figure 1.**—Enlarged reproduction (X2) of label adopted by a national association of manufacturers to certify conformance with the commercial standard.

Colors, blue and silver. On the reverse side is shown the name or trade-mark of the manufacturer or a serial number identifying the manufacturer in the records of the association.

EFFECTIVE DATE

The standard is effective for new production from October 10, 1939.

STANDING COMMITTEE

The following individuals comprise the membership of the standing committee, which is to review, prior to circulation for acceptance, revisions proposed to keep the standard abreast of progress. Each association nominated its own representatives. Comment concerning the standard and suggestions for revision may be addressed to any member of the committee or to the Division of Trade Standards, National Bureau of Standards, which acts as secretary for the committee.

Manufacturers:

Distributors:
Limited Price Variety Stores Association, Inc.:
Representative to be appointed.

Optical Wholesalers' National Association, Inc.:
Invited to name representative.

National Wholesale Druggists' Association:

Users:
National Conservation Bureau:
Edward R. Granniss, 60 John Street, New York, N. Y.
Philip Drinker, School of Public Health, Harvard University, 55 Shattuck Street, Boston, Mass.
M. G. Lloyd, National Bureau of Standards, Washington, D. C.
F. W. Reynolds (secretary), National Bureau of Standards, Washington, D. C.

HISTORY OF PROJECT

On May 16, 1939, the Sun Glass Institute, Inc., requested the establishment of a commercial standard for blown, drawn, and dropped lenses for sun glasses and submitted a proposed commercial standard that had been developed by a committee of that Institute. Accordingly, invitations to a general conference scheduled for June 16, 1939, at Atlantic City, N. J., were mailed to all known producers, distributor and user organizations interested in sun-glass lenses.

This general conference reviewed the proposed commercial standard and, after voting certain changes, recommended its circulation to the entire industry for approval. Minutes of the conference and the recommended commercial standard were accordingly mailed to all known interested organizations on July 10, 1939, for written acceptance. Following satisfactory acceptance and in the absence of active opposition, the establishment of the standard was announced September 27, 1939.
ACCEPTANCE OF COMMERCIAL STANDARD

This sheet properly filled in, signed, and returned will provide for the recording of your organization as an acceptor of this commercial standard.

Date ____________________________

Division of Trade Standards,
National Bureau of Standards,
Washington, D. C.

Gentlemen:

Having considered the statements on the reverse side of this sheet, we accept the Commercial Standard CS79–39 as our standard of practice in the

Production 1 Distribution 1 Use 1

of blown, drawn, and dropped lenses for sun glasses.

We will assist in securing its general recognition and use and will cooperate with the standing committee to effect revisions of the standard when necessary.

Signature of individual officer ____________________________ (in ink)

(Kindly typewrite or print the following lines)

Name and title of above officer ____________________________

Company ____________________________ (Fill in exactly as it should be listed)

Street address ____________________________

City and State ____________________________

1 Please designate which group you represent by drawing lines through the other two. Please file separate acceptances for all subsidiary companies and affiliates which should be listed separately as acceptors. In the case of related interests, trade papers, colleges, etc., desiring to record their general approval, the words "in principle" should be added after the signature.
TO THE ACCEPTOR

The following statements answer the usual questions arising in connection with the acceptance and its significance:

1. Enforcement.—Commercial standards are commodity specifications voluntarily established by mutual consent of those concerned. They present a common basis of understanding between the producer, distributor, and consumer and should not be confused with any plan of governmental regulation or control. The United States Department of Commerce has no regulatory power in the enforcement of their provisions, but since they represent the will of the interested groups as a whole, their provisions through usage soon become established as trade customs, and are made effective through incorporation into sales contracts by means of labels, invoices, and the like.

2. The acceptor's responsibility.—The purpose of commercial standards is to establish for specific commodities, nationally recognized grades or consumer criteria and the benefits therefrom will be measurable in direct proportion to their general recognition and actual use. Instances will occur when it may be necessary to deviate from the standard and the signing of an acceptance does not preclude such departures; however, such signature indicates an intention to follow the commercial standard where practicable, in the production, distribution, or consumption of the article in question.

3. The Department's responsibility.—The major function performed by the Department of Commerce in the voluntary establishment of commercial standards on a Nation-wide basis is fourfold: first, to act as an unbiased coordinator to bring all interested parties together for the mutually satisfactory adjustment of trade standards; second, to supply such assistance and advice as past experience with similar programs may suggest; third, to canvass and record the extent of acceptance and adherence to the standard on the part of producers, distributors, and users; and fourth, after acceptance, to publish and promulgate the standard for the information and guidance of buyers and sellers of the commodity.

4. Announcement and promulgation.—When the standard has been endorsed by a satisfactory majority of production or consumption in the absence of active, valid opposition, the success of the project is announced. If, however, in the opinion of the standing committee or the Department of Commerce, the support of any standard is inadequate, the right is reserved to withhold promulgation and publication.
ACCEPTORS

The organizations and individuals listed below have accepted this specification as their standard of practice in the production, distribution, and use of blown, drawn, and dropped lenses for sun glasses. Such endorsement does not signify that they may not find it necessary to deviate from the standard, nor that producers so listed guarantee all of their products in this field to conform with the requirements of this standard. Therefore, specific evidence of quality certification should be obtained where required.
