1983

U.S. DEPARTMENT OF COMMERCE, Malcolm Baldrige, *Secretary*
NATIONAL BUREAU OF STANDARDS, Ernest Ambler, *Director*

Foreword

The Federal Information Processing Standards Publication Series of the National Bureau of Standards is the official publication relating to standards adopted and promulgated under the provisions of Public Law 89-306 (Brooks Act) and under Part 6 of Title 15, Code of Federal Regulations. These legislative and executive mandates have given the Secretary of Commerce important responsibilities for improving the utilization and management of computers and automatic data processing in the Federal Government. To carry out the Secretary's responsibilities, the NBS, through its Institute for Computer Sciences and Technology, provides the leadership, technical guidance, and coordination of Government efforts in the development of guidelines and standards in these areas.

Comments concerning Federal Information Processing Standards Publications are welcomed and should be addressed to the Director, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, DC 20234.

James H. Burrows, *Director*
Institute for Computer Sciences
and Technology

Abstract

This Standard provides a four-character identifier for each organization listed. The two leftmost characters form a component data element, called the Treasury Agency Symbol (TAS), which is identical to the two-digit numerical code used in the budgetary process to identify major Federal agencies. Organizations that are related by a common budgetary appropriation usually have the same TAS code. Organizations identified in this Standard include legislative, judicial, and executive branch agencies, as well as those Federal-State, interstate, and international organizations that receive budgetary support. Government-sponsored enterprises and certain Federally-aided organizations are included also. Provision is made for the inclusion of additional categories of organizations.

Key words: administration; codes; computers; data; element; Federal Information Processing Standard; information interchange; organization.

**Federal Information
Processing Standards Publication 95**

1982 December 23

Announcing the Standard for

**CODES FOR THE IDENTIFICATION OF FEDERAL
AND FEDERALLY-ASSISTED ORGANIZATIONS**

Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Bureau of Standards in accordance with section 111(f)(2) of the Federal Property and Administrative Services Act of 1949, as amended, Public Law 89-306 (79 Stat. 1127), Executive Order 11717 (38 FR 12315 dated May 11, 1973), and Part 6 of Title 15 Code of Federal Regulations.

1. Name of Standard: Codes for the Identification of Federal and Federally-Assisted Organizations, (FIPS PUB 95).

2. Category of Standard: Federal General Data Standard, Representations and Codes.

3. Explanation: This Standard provides a four-character identifier for each organization listed. The set of identifiers defines a standard data element. The two leftmost characters form a component data element which is identical with the two-digit numerical code used in the Federal budgetary process to identify major Federal organizations. This component, designated as the Treasury Agency Symbol (TAS), is maintained by the U.S. Department of the Treasury.

The purposes of data element standardization are to eliminate unnecessary duplications and incompatibilities in the collection, processing, and dissemination of data, and to maximize the usefulness of data resources. The use of data referenced to a standard set of representations or codes reduces collection costs by allowing previously collected data to be applied to new uses, and provides a potential for benefits derived from those additional applications. Standardization also reduces conversion costs for interchange of data between databases, and reduces costs of data element maintenance by the implementation of a single, maintained standard to replace separately maintained elements.

4. Approving Authority: The Secretary of Commerce.

5. Maintenance Agency: Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, DC 20234. Federal departments and independent agencies are invited to assist in the maintenance of this Standard by submitting copies of newly implemented tables of organization that affect any listing.

Change notices to this FIPS PUB will be issued by the National Bureau of Standards. Users who wish to receive such notices should complete the Change Request Form included in this FIPS PUB and return it to the address indicated.

6. Cross Index: None.

7. Applicability: This Federal general data element and representation Standard is made available for data interchange among executive departments and independent agencies and for Federal data interchange with the non-Federal sector including industry, State, local, and other Governments, and the public at large.

This standard data element may be used for the interchange of information on Federal operations when that information is identified by organization. Information interchanged may concern, for example: number of personnel employed, value of contracts and grants issued, value of services of an identical type received from a single source, inventoried quantity of a particular item, and value and identity of property managed or controlled. The data element need not be used to record information on Federal operations of unlisted, lower-level organizations. The data element may be used if lower-level data are aggregated to the level of organizations identified in this Standard.

This standard data element also may be used for interchange of identification codes assigned to a set of similar items, but only if an organizational indication is included as part of the coding structure. Examples of sets of items which could employ organizational-indicative identification codes are: the set of identities of Federal reports and computer programs that are available for public use or distribution, the set of identities of domestic assistance programs for which a prospective recipient might apply, and the set of identities of grants and contracts awarded. If organizational identification is used but is not fully appropriate below the first level, then only the two leftmost characters of the standard data element (the TAS) should be used. Agencies may wish to use the Standard in applications other than those suggested above. This Standard, however, is not intended for the replacement of U.S. Department of the Treasury agency location and appropriation fund account codes.

8. Implementation Schedule: This Standard became effective December 1, 1982. Use by Federal agencies is encouraged when such use contributes to operational benefits, efficiency, or economy.

9. Specifications: Federal Information Processing Standard 95 (FIPS PUB 95), Codes for the Identification of Federal and Federally-Assisted Organizations (affixed).

10. Where To Obtain Copies of the Standard: Copies of this publication are available for sale by the National Technical Information Service (NTIS), U.S. Department of Commerce, Springfield, VA 22161. When ordering, please refer to Federal Information Processing Standards Publication 95 (FIPS-PUB-95) and title. When microfiche is desired, this should be specified.

Inquiries concerning the FIPS data element standards program may be directed to the Program Manager, Data Element and Representation Standards, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, DC 20234; telephone: (301) 921-3491.

Federal Information Processing Standard 95

1982 December 23

Specifications for

CODES FOR THE IDENTIFICATION OF FEDERAL AND FEDERALLY-ASSISTED ORGANIZATIONS

1. **Name of Standard:** Codes for the Identification of Federal and Federally-Assisted Organizations.
2. **Category of Standard:** Federal General Data Standard, Representations and Codes.
3. **Explanation:** This Standard provides a four-character identifier for each organization listed. The set of identifiers defines a standard data element. The major set of categories used to distinguish groups of organizations in this Standard is the following:
 - * Legislative Branch,
 - * Judicial Branch,
 - * Executive Office and Departments (and their Associated Organizations),
 - * Other Independent Federal and Quasi-Federal Organizations (and their Associated Organizations),
 - * Independent Federal-State and Interstate Organizations, and
 - * International Organizations.

Organizational structure is described and encoded in this Standard in a manner consistent with the budgetary structure of the U.S. Government. Consistency with the budgetary structure has been maintained in order to permit the adoption, in every case, of the two-digit numerical code used in the budgetary process to identify most first-level, independent Federal organizations. This coding system is maintained by the U.S. Department of the Treasury. Designated as the Treasury Agency Symbol (TAS), it serves as the two leftmost characters of the organization code used in this Standard.

All first-level organizations in each of the above categories are listed in this Standard. A first-level organization is not subsumed hierarchically under any other organization. Second-level organizations are included with the Executive Office, executive departments, and certain other major agencies. Third and lower-level organizations are included only in the Department of Defense and in special situations in other departments. Second, third, and lower-level organizations are always subsumed hierarchically under a next-higher-level organization.

In this Standard, an "independent" organization is defined as having both hierarchical independence and budgetary independence, i.e., it is first-level (hierarchical independence) and has a budget which is not subsumed by or connected in a subsidiary manner with the budget of another organization (budgetary independence).

An "associated" organization is first-level, but has no budgetary independence. The five types of associated organizations are:

- * Associated Federal Organizations, which are Federal agencies or their ancillary units such as advisory committees; they are often included as part of the independent organizations to which they are related;
- * Associated Federal-State Organizations, which are associated organizations in which the Federal Government and one or more States participate jointly;
- * Government-Sponsored Enterprises, which are so identified in a separate section of the *Budget of the United States Government, Appendix* (referred to as *The Budget*);
- * Federally-Aided Organizations, which are domestic and non-Federal, and are identified in *The Budget* as receiving some form of financial support such as a direct payment, loan guarantee, line of credit, or stock purchase arrangement; and

* International Organizations, identified in *The Budget* or in the Department of State's annual report of *United States Contributions to International Organizations* as organizations in which the Federal Government serves as a financial contributor.

A "quasi-Federal" organization is an organization that is listed as "quasi-official" in the *U.S. Government Manual* and is also assigned its own unique TAS code by the U.S. Department of the Treasury. An "interstate" organization included in this Standard is Federally-assisted but differs from a Federal-State organization in that it involves no Federal participation.

Associated organizations and organizations below first level usually carry the same TAS as the independent, first-level organization with which they are connected. Organizations having the same TAS are distinguished from each other by the two rightmost characters of the identifier. These characters are alphanumeric although numeric characters are being used at this time in most cases. The system used for assignment of the two rightmost characters of the identifier is explained below in paragraph 6. *Special Information*.

4. Specifications: Table of Organizations and Codes:

4.1 Part A: Arrangement by Hierarchical and Budgetary Relationship

In this part, names of first-level organizations are presented immediately to the right of the assigned codes without any indentation.

Second-level organizations are listed immediately below the first-level organization to which they report and are indented further to the right. Second-level organizations which subdivide a first-level organization form a complete, non-duplicative set, i.e., each employee of the first-level organization can be assigned to one and only one second-level entry.

Third and lower-level organizations are indented further to the right than their respective next-higher-level entries; and they are listed immediately below the entry which they subdivide. Third and lower-level entries, similarly, form a complete, non-duplicative set.

At any level for which entries are provided, some subdivisions may not be individually identified. Those divisions not specifically listed are included by implication, as in "Office of the Assistant Secretary for Health except National Centers."

Each domestic, associated organization is listed with the independent organization with which its financial or administrative support is connected. International organizations are listed in a separate section.

4.2 Part B: Arrangement by Alphabetic Sequence of Organizations

4.3 Part C: Arrangement by Alphanumeric Sequence of Assigned Codes

5. Qualifications: Non-Federal organizations which receive no assistance identified in the Federal budget were excluded from the basic standard. Users desiring a compatible code assignment to an initially excluded organization have two alternatives. Users may assign their own four-character code, preferably with a letter as the leftmost character to avoid possible conflict with the numerical TAS, or they may forward a written request to NBS for a formal assignment of a code. Requests should include an explanation of the application requiring the assignment. An NBS concurrence with an assignment will result in a change notice issued to all subscribing users reporting the code assigned. Requests for special code assignments should be addressed to: Program Manager, Data Element and Representation Standards, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, DC 20234.

Special codes have been approved for certain groupings of organizations and for certain private organizations required to submit reports to the Congress. A list of these organizations and codes is given in Appendix I of this Standard.

Appendix II provides codes, compatible with the basic standard, for select and standing committees of the Congress of the United States. Each code consists of the TAS code for Congress (00) followed by a two-

character alphabetic code. The latter is identical to the code assigned to each committee by the House Information Systems group for Congressional data processing purposes.

6. Special Information: The coding structure in this Standard is based on the establishment of four active classes of TAS codes. The assignments of the two rightmost characters of the identifier differ in each of the classes, and are described below.

*** Defense TAS Codes**

The following TAS codes are used to identify component organizations of the Department of Defense:

- 17: Department of the Navy;
- 21: Department of the Army;
- 57: Department of the Air Force;
- 84: U.S. Soldiers' and Airmen's Home;
- 96: U.S. Corps of Engineers—(civil); and
- 97: Department of Defense as a whole and components, other than the military departments, reporting to the Secretary of Defense.

Values of the two rightmost characters of the identifier for all component organizations of the Department of Defense are received from the Directorate for Information Resources Management Systems, Office of the Assistant Secretary of Defense (Comptroller).

*** Joint-Use TAS Codes**

Several non-Defense, independent organizations share certain TAS codes. These organizations are fully distinguished at the first level by the third and fourth characters of the identifier. The TAS codes in this class, and their applications, are:

- 00: Senate and House of Representatives;
- 09: Smaller Legislative Agencies;
- 10: Judicial Agencies;
- 46: Independent Federal-State and Interstate Organizations (excepting Advisory Commission on Intergovernmental Relations);
- 48: Temporary Study Commissions;
- 76: Historical and Memorial Agencies; and
- 95: Other Independent Organizations Not Assigned Unique TAS Codes.

Values of the two rightmost characters for independent agencies in this TAS class are in the range 01 through 59. For values of the two rightmost characters for associated organizations in this TAS class, see below under "Single-Use TAS Codes."

*** TAS Code 11: Executive Office of the President/Funds Appropriated to the President**

The Executive Office of the President is assigned identifier 1100 and agencies within the Office are assigned identifiers in the range 1101 through 1129.

Agencies under "Funds Appropriated to the President" (also TAS code 11) are assigned identifiers with the two rightmost characters in the range 30 through 59. This budget grouping includes the International Development Cooperation Agency (IDCA) and the Peace Corps. IDCA is assigned identifier 1150 and its second-level organizations are assigned identifiers in the range 1151 through 1159. IDCA is related organizationally to the Overseas Private Investment Corporation (OPIC), but the latter retains TAS code 71 even though it is listed in *The Budget* under "Funds Appropriated to the President." Therefore, IDCA does not include OPIC in this Standard.

For values of the two rightmost characters of the identifier for associated organizations using TAS code 11, see below under "Single-Use TAS Codes."

* Single-Use TAS Codes

This class of TAS codes includes all codes that are active (i.e., in current use) and not identified above in another class. As implied in the class name, an independent organization using a TAS code in this class does not share that TAS code with any other independent organization. Second-level, third-level, and associated organizations may be included in this class and will use the same TAS codes as their respective independent organizations.

For each TAS code in this class, the two rightmost characters of the identifier are available to be assigned as follows, if an organization with the appropriate name is separately identified:

- 00: organization as a whole (always present);
- 01: office of the chief executive and any staff functions not separately identified;
- 02: office of the deputy chief executive;
- 03: office of the general counsel or equivalent;
- 04: office of the inspector general;
- 05: office of administration or management, if no "planning" or "policy" functions are included in the name;
- 06: office of policy, evaluation, or program analysis, including any "budget" functions not included in "administration" or "management";
- 07: office of Congressional and legislative affairs; may include public or intergovernmental affairs if not separately identified;
- 08: office of public affairs, if identified separately from Congressional and legislative affairs;
- 09: office of international affairs;
- 10 through 19: other staff offices;
- 20 through 59: programmatic or line organizations, and all of their separately identified, lower-level components;
- 60 through 69: Associated Federal Organizations;
- 70 through 79: Associated Federal-State Organizations;
- 80 through 89: Government-Sponsored Enterprises;
- 90 through 99: Federally-Aided Organizations; and
- AA through ZZ: International Organizations.

For the assignment of the two rightmost characters to international organizations, groupings of such organizations have been established. The third character of the identifier is the same for each organization in a group. This permits recognition of an identifier as pertaining to a particular group. For example, inter-American organizations have the two rightmost characters of their identifiers in the range AA through AZ; international fisheries organizations are assigned the range FA through FZ, while United Nations and affiliated agencies are assigned the range UA through UZ. This procedure for assigning the two rightmost characters of the identifier is used for each international organization, regardless of the TAS code assigned to the organization.

If expansion of the coding structure is required due to saturation, the fourth or rightmost character of the identifier will be converted to an alphanumeric for staff, line, and domestic associated organizations under Single-Use TAS Codes. Then, more identifiers for these types of organizations would be available. For example, in this expansion, the two rightmost characters of identifiers for line organizations under Single-Use TAS Codes could include codes 2A through 5Z as well as 20 through 59, while the two rightmost characters for associated Federal organizations could include codes 6A through 6Z as well as 60 through 69. This expansion could apply, in a similar fashion, to the coding structure for domestic organizations under TAS code 11 or the Joint-Use TAS Codes.

FIPS PUB 95**CODES FOR THE IDENTIFICATION OF FEDERAL
AND FEDERALLY-ASSISTED ORGANIZATIONS**

Standards Processing Coordinator (ADP)
Institute for Computer Sciences and Technology
National Bureau of Standards
Washington, D.C. 20234

Gentlemen:

Please add my name to your mailing list for the changes to FIPS PUB 95. I understand that I will receive information relating to changes in names of Federal organizations and their codes.

Name _____

Organization _____

Address _____

City _____ State _____ Zip Code _____

* U.S. GOVERNMENT PRINTING OFFICE: 1983-407-950

NBS TECHNICAL PUBLICATIONS

PERIODICALS

JOURNAL OF RESEARCH—The Journal of Research of the National Bureau of Standards reports NBS research and development in those disciplines of the physical and engineering sciences in which the Bureau is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Bureau's technical and scientific programs. As a special service to subscribers each issue contains complete citations to all recent Bureau publications in both NBS and non-NBS media. Issued six times a year. Annual subscription: domestic \$18; foreign \$22.50. Single copy: \$5.50 domestic; \$6.90 foreign.

NONPERIODICALS

Monographs—Major contributions to the technical literature on various subjects related to the Bureau's scientific and technical activities.

Handbooks—Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

Special Publications—Include proceedings of conferences sponsored by NBS, NBS annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

Applied Mathematics Series—Mathematical tables, manuals, and studies of special interest to physicists, engineers, chemists, biologists, mathematicians, computer programmers, and others engaged in scientific and technical work.

National Standard Reference Data Series—Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a worldwide program coordinated by NBS under the authority of the National Standard Data Act (Public Law 90-396).

NOTE: The principal publication outlet for the foregoing data is the Journal of Physical and Chemical Reference Data (JPCRD) published quarterly for NBS by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements available from ACS, 1155 Sixteenth St., NW, Washington, DC 20056.

Building Science Series—Disseminates technical information developed at the Bureau on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

Technical Notes—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NBS under the sponsorship of other government agencies.

Voluntary Product Standards—Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The standards establish nationally recognized requirements for products, and provide all concerned interests with a basis for common understanding of the characteristics of the products. NBS administers this program as a supplement to the activities of the private sector standardizing organizations.

Consumer Information Series—Practical information, based on NBS research and experience, covering areas of interest to the consumer. Easily understandable language and illustrations provide useful background knowledge for shopping in today's technological marketplace.

Order the above NBS publications from: Superintendent of Documents, Government Printing Office, Washington, DC 20402

Order the following NBS publications—FIPS and NBSIR's—from the National Technical Information Service, Springfield, VA 22161

Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. The Register serves as the official source of information in the Federal Government regarding standards issued by NBS pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

NBS Interagency Reports (NBSIR)—A special series of interim or final reports on work performed by NBS for outside sponsors (both government and non-government). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service, Springfield, VA 22161, in paper copy or microfiche form.

CHANGE ITEM(S)

Reissue of Table of Organizations and Codes
Part C
(Arrangement in Code Sequence)

The attached list replaces the original issue of Part C of Dec. 23, 1982. It explicitly includes all independent organizations, and each organization with TAS code 11 or 96 except international organizations. Organizations below first level and associated organizations, except in codes 11 or 96, are not included. To identify an excluded organization by name, given its code, find the independent organization in this list having the same TAS code, and then refer to the appropriate section in Part A. In the list below, change indicator markings refer to differences with the initial issue of Part C, but only for the organizations included in this revision.

Change markings are the same as those used previously, and include:

++ new entry -- delete entry without replacement
+ new name, no code change
* new code, no name change

Part B of the Table of Organizations and Codes is withdrawn, pending revision, as it is out of date.

TITLE OF PUBLICATION

Codes for the Identification of Federal and Federally-Assisted Organizations

This office has a record of your interest in receiving changes to the above FIPS PUB. The change(s) indicated below have been provided by the Maintenance Agency for this publication and will be included in the next published revision to this FIPS PUB. Questions or requests for additional information should be addressed to the Maintenance Agency:

Data Administration Group
Information Systems Engineering Division
A265, Technology Building
National Bureau of Standards
Gaithersburg, MD 20899

CHANGE ITEM(S)

Reissue of Table of Organizations and Codes
(Part A)

This Change Notice consists of a reissuance of the complete Table of Organizations and Codes - Part A. The Table is arranged in five subtables. Pagination is distinct within each subtable.

The five subtables are entitled Legislative Branch (LEG), Judicial Branch (JUD), Executive Office and Departments (EXC), Other Independent Federal, Quasi-Federal, and Federal-State Organizations (IND), and International Organizations (ITL). The former subtable of Federal-State and Interstate organizations has been combined with Other Independent Federal and Quasi-Federal Organizations to form IND.

Users may wish to insert the pages of the table into a loose-leaf notebook, as future updates will consist of a reissue of individual pages, as necessary. Each new page will include the date of its issue. Current pages show the date of the last change to information on that page, and include, without special note, all changes made through Change Notice No. 11, 1985 May 17.

New pages, as issued, will show changes from the previous issue of that page by the use of markings associated with each changed entry. The markings (which have been used previously) are as follows:

- | | |
|---------------------------------|---|
| ++ new entry | -- delete entry without replacement |
| + new name, no code change | - delete entry for relisting elsewhere with code change |
| * new code, no name change | |
| # new hierarchical relationship | |

(Contd.)

Change No. 12 to FIPS 95
Date of Change - 1985 June 17

This reissue includes the following new changes:

In the Department of Defense, the summary codes for the military departments have been changed to 5700 (Air Force), 2100 (Army) and 1700 (Navy), and these departments are now presented as if they were fully independent. However, the military departments continue to be alphabetized following the Defense agencies. In several individual cases, codes for groupings have not been provided, and the lack of a code is shown by ---- in the code columns. In these cases, a code on the next lower level should be used. Change markings have not been shown for the Department of the Army as this listing is a complete replacement.

The Federal Energy Regulatory Commission is moved so as to be located within the Department of Energy without any code change. President's Commission on Organized Crime is added in association with the Department of Justice. Minor hierarchical changes are made to the Department of Labor. National Council on the Arts and National Council on the Humanities continue to exist but are deleted as separate entities, as they are included within their respective Endowments. The Christopher Columbus Quincentenary Jubilee Commission and National Council on Public Works Improvement are added. The Advisory Council on Historic Preservation, inadvertently omitted in Change Notice No. 9, is readded. The Federal Home Loan Bank Board is now subdivided into its major components; the related Office of Finance is shown as a Government-Sponsored Enterprise.
