FOREWORD

This edition of the NBS Library Serial Holdings revises and replaces the edition published in 1982. The database used to prepare it resides on a new computer. As a result, there are changes in both the form and the content of the publication. The citations are printed in a smaller font; therefore, we have formatted the pages vertically instead of horizontally. In addition, we are using a spiral binding to facilitate updates and to assure that the pages of the volume lie flat when being photocopied. We hope these changes will make the list more useful.

The content of this edition also differs from earlier ones. Since we last published, one NBS Information Center, which formerly listed its holdings, has decided it can no longer lend its library materials to outside institutions. For this reason the Center has elected not to include their citations in our list. Only the Fire Research Information Services holdings continue to be included; however, they have been revised extensively to reflect a substantial decrease in the number of titles they now receive.

As always, we are anxious to hear your comments and criticisms. Please address them to me or to Mr. Marvin Bond. I can be reached at (301) 921-3403.

INTRODUCTION

The National Bureau of Standards was founded in 1901 by an Act of Congress to serve as the nation's physical measurement laboratory. Because currency of information is critical to ongoing research, it is essential that there be a solid technical information support facility. The NBS Library exists to provide this technical information base by serving as a source for both current and retrospective literature in the fields of activity at NBS.

The areas of research at NBS are constantly changing and the scope of the Library collection shifts to accommodate these changes. While the core of the collection remains chemistry, engineering, mathematics and physics, other interdisciplinary areas of technology are being developed.

Currently, the Library contains over 170,000 books and bound journals. Over 2,000 journals are currently being received.

The NBS Library Serial Holdings which follows contains not only the journals currently received by the Library, but also other serials retained in its collection. Although the majority of the titles listed are held by the Library, holdings of the Fire Research Information Services (FRIS) have also been included.

To make the best use of the NBS Library Serial Holdings, we urge you to read the "Guidelines for Use" that are given on the following pages. Note especially the diagrams of the physical layout of the Library illustrated on page v. You are invited to send your comments, suggestions, criticisms, and corrections to Mr. Marvin A. Bond, Chief of Library Resources Development. Mr. Bond can be reached at (301) 921-3401.

GUIDELINES FOR USE

Contents and Arrangement

This NBS Library Serial Holdings includes periodicals, journals, annuals, memoirs, proceedings and transactions of societies, "advances in," "progresses in," and selected conferences and monographs in the collections of the NBS Library and FRIS.

The line(s) below the title indicate what years and/or volumes are held by the Library.

The arrangement of the list is alphabetical. Titles are listed according to the word format used in the publication itself, with the following exceptions:

1. Articles (such as The, Die, or La) at the beginning of a title are omitted.
Gesellschaft der Wissenschaften... NOT
Die Gesellschaft der Wissenschaften...

2. Initialisms and acronyms (such as IEEE for the Institute of Electrical and Electronics Engineers) are filed as a group at the beginning of each letter of the alphabet.
3. Abbreviations for some frequently used words, such as AMER for American and JOUR for Journal, have been used throughout the list in order to conserve space. A complete list of these abbreviations is given on page iv. Keep in mind that in some instances these abbreviations have caused a journal title to appear out of what would be its normal alphabetical order if written out. For example, the word Association has been abbreviated to ASSN, causing titles beginning with that word to appear before such unabbreviated words as Associacio.
4. Proceedings, symposia, transactions, reports, etc. of associations and societies may be listed under the sponsoring agency:

AMER SOC FOR TESTING AND MATERIALS BOOK OF ASTM STANDARDS

Location of Materials

Diagrams of the main and mezzanine floors of the Library follow on page v. The locations for both bound and unbound journals and special collections are indicated. Consult the Table on page iv for interpretation of location information given in the list.

Generally, the most recent years of a journal are unbound and shelved alphabetically by title. These unbound journals are located:

1. In the unbound journal section along the main reading area on the first floor.
2. In the Selected Periodical section. This section, located near the photocopy room on the first floor, houses approximately 80 journals that are of high interest to many NBS staff members. Science is such a title. Only the current year of each title will be found here; earlier years are shelved with the bound volumes. These titles are indicated in the list by SEL.
3. In one of the Library's special collections, such as Intergovernmental Affairs. Location codes for these journals are given in the list.

Location information for all journals currently received is posted at the south end (away from windows) of each of the unbound journal stacks.

Earlier years of journals are usually bound and shelved by call number; all years of serials are shelved by call number with the bound volumes. The majority of bound journals and serials are located on the main and mezzanine floors of the Library. However, some earlier and less used volumes are located in the basement in the Non-Current Collection (NCC). Location codes for these are given in the list.

Should you experience any difficulty in locating what you need, please ask an Information Services Librarian. Also inquire for any journals or serials that may have been added to the collection since publication of this edition of NBS Library Serial Holdings. Most recent additions can be found on the New Title Shelf near the Photocopy Room on the first floor.

INTERGOVERNMENTAL AFFAIRS COLLECTION

Purpose

The Intergovernmental Affairs Collection (IGA) serves as a source of legal authority for the work of the NBS Legal Advisor as well as other programs and offices in NBS requiring access to the law. The collection also provides information about the work of Congress and regulatory and administrative actions relevant to NBS activities.

History

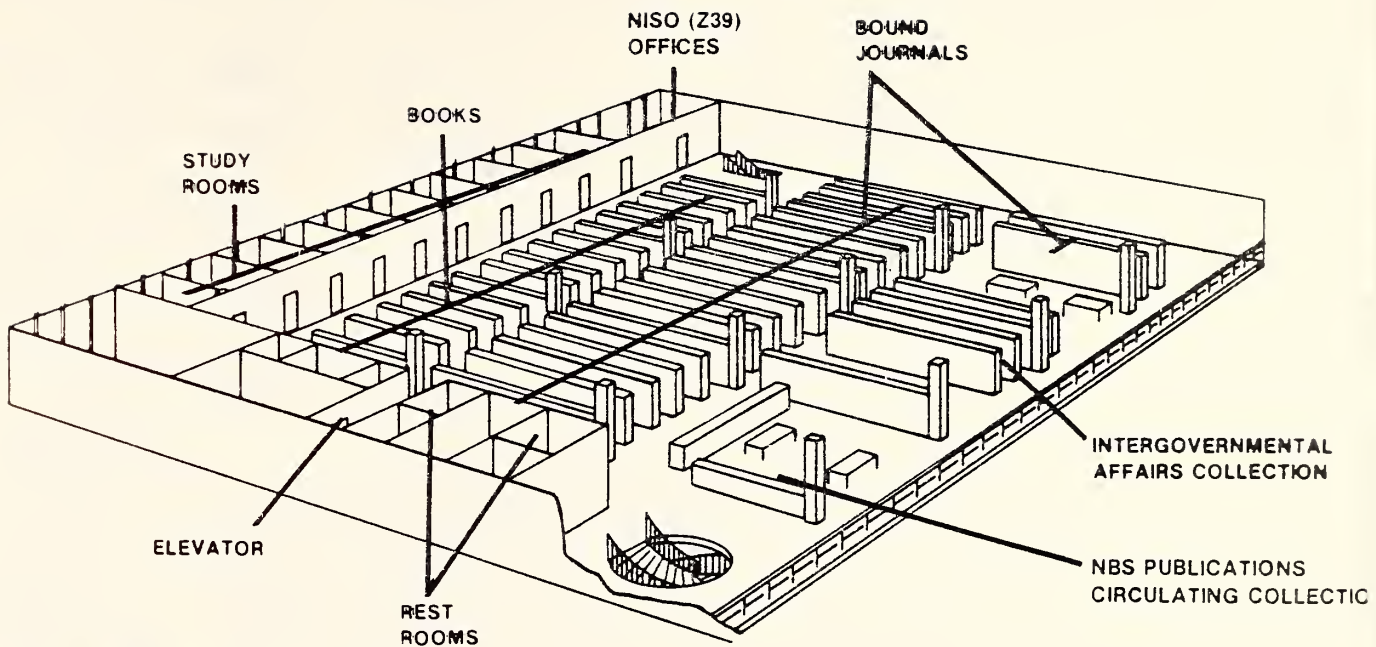

Originally, the Legislative Reference Service in the NBS Library was designed to furnish NBS management current or proposed legislation and regulations which might affect NBS operations. In 1977, the scope was expanded to include legal source materials, as well as information concerning state and local governments. To reflect this expansion, the collection was renamed the Intergovernmental Affairs Collection.

Location

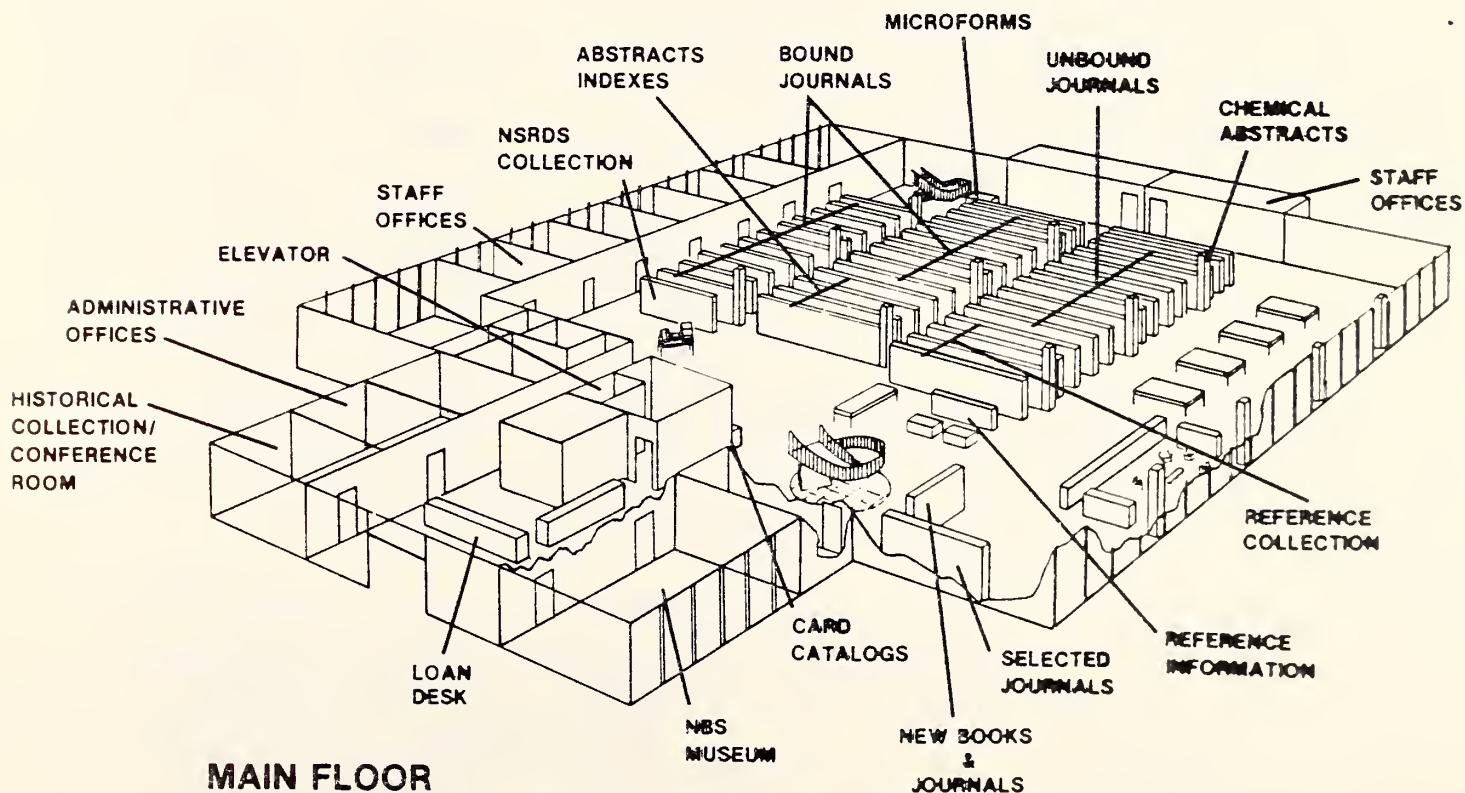

The IGA collection is located in the NBS Library adjacent to the study area on the mezzanine (see diagram).
