## INTRODUCTION

The following report supersedes and is a revised edition of NBSIR 82-2594, October 1982 entitled Data Bases Available at the National Bureau of Standards Library. This revision features new bibliographic data bases since the last update.

The list is alphabetical by either the acronym or the full title of the data base, whichever is most commonly used. This section includes such information as name of data base, dates of coverage, brief description of the data base, the principal sources employed in forming the data base information. or kind of information contained in the data base, the producer(s) of the data base, the corresponding hard copy, and the vendor(s) who distribute the various data bases. A list of vendors with addresses and telephone numbers precedes the data base list.

The General Subject Index, which follows the list of data bases, is arranged alphabetically by broad subject categories with references to the corresponding data bases.

The Cross Reference Index lists variant forms of the names of the data bases in the left column with cross references to the name of the data base used in this report on the right.

Data bases listed are available for searching for NBS employees only. The first search, up to 30 minutes, performed by the Library for an NBS employee is at no cost to his or her division. Thereafter, however, a cost center number will be requested for appropriate charges for each search. An average computer search on Chemical Abstracts through Dialog Information Retrieval Services, Inc. for example, would cost approximately \$23.00 connect-time charge for 20 minutes of searching plus a charge for typing citations on line.

If you are interested in a literature search, contact the NBS Library at x3451 or x3452 or see a Reference Librarian. Also, for additions or changes that have occurred since the publication date of this report, please contact a Reference Librarian.

I would also like to thank Julie Bliss for her assistance in preparation of this report.
