Ernest Ambler, Director

INTRODUCTION

The National Bureau of Standards was founded in 1901 by an Act of Congress to serve as the nation's physical measurement laboratory. Because currency of information is critical to ongoing research, it is essential that there be a solid technical information support facility. The NBS Research Information Center (RIC) exists to provide this technical information base by serving as a source for both current and retrospective literature in the fields of activity at NBS.

The areas of research at NBS are constantly changing and the scope of the Research Information Center's collections shift to accommodate these changes. While the core of the collections remains chemistry, computer technology, engineering, mathematics, materials science and physics, other interdisciplinary areas of technology are included.

This edition NBS Serials Holdings contains not only journals currently received, but also other serials retained in the RIC collections. The majority of the titles listed are held in the RIC collections; however, holdings of the Fire Research Information Services (FRIS) are also included and these are identified by FRIS on the line above the holdings statement.

We urge you to read "Guidelines for Use" and note especially the diagrams of the physical layout of the RIC illustrated on pages iv and v. You are invited to send your comments, suggestions, and corrections to Mary Lynn Kingston, Serials Librarian. Mrs. Kingston can be reached at (301) 975-2809.

GUIDELINES FOR USE

Contents and Arrangement

This NBS Serial Holdings includes periodicals, journals, annuals, memoirs, proceedings and transactions of societies, "advances in," "progresses in," and selected conferences and monographs in the collections of the NBS Research Information Center (RIC) and the Fire Research Information Services (FRIS).

Lines below the titles indicate what years and volumes are held and the assigned call number for each title.

The list is alphabetically arranged. Titles are as they appear on each serial except for:

1. Articles such as THE, DiE, or LA at the beginning of a title. These are omitted.
2. Initialisms and acronyms (such as IEEE for the Institute of Electrical and Electronics Engineers) are grouped at the beginning of the appropriate letter of the alphabet.

3. Proceedings, symposia, transactions, reports, etc., of associations and societies may be listed under the sponsoring agency, for example:

AMERICAN SOCIETY FOR TESTING MATERIALS. PROCEEDINGS OF THE ANNUAL MEETING

4. Letters are substituted for diacritical marks, such as the German umlat (¨). Thus, FÜR becomes FUER.

Location of Material

Diagrams of the main and mezzanine floors of the RIC will be found on pages iv and v. The locations for both bound and unbound journals and special collections are indicated. Consult the Table on page vi for interpretation of location information given in the list.

Generally, the most recent years of a journal are unbound and shelved alphabetically by title. These unbound journals are located:

1. In the unbound journal section along the main reading area on the first floor.
2. In one of the RIC's special collections, such as Intergovernmental Affairs. Location codes for these journals are given in the list.
3. In the Selected Periodical section. This section, located near the photocopy room on the first floor, houses approximately 80 journals that are of high interest to many NBS staff members. Science is one such title. Only the current year of each title will be found here; earlier years are shelved with the bound volumes. These titles are indicated in the list by SEL PER.

Location information for all journals currently received is posted at the south end of each of the unbound journal stacks.

Earlier years of journals are usually bound and shelved by call number; all years of serials are shelved by call number with the bound volumes. The majority of bound journals and serials are located on the main and mezzanine floors. However, some earlier and less used volumes are located in the basement in the Non-Current Collection (NCC). Location codes for these are given in the list.

Should you experience any difficulty in locating what you need, please ask an Information Specialist. Also inquire for any journals or serials which may have been added to the collection since publication of this edition of NBS Serial Holdings. Most recent additions can be found on the New Title Shelf near the Photocopy Room on the first floor.

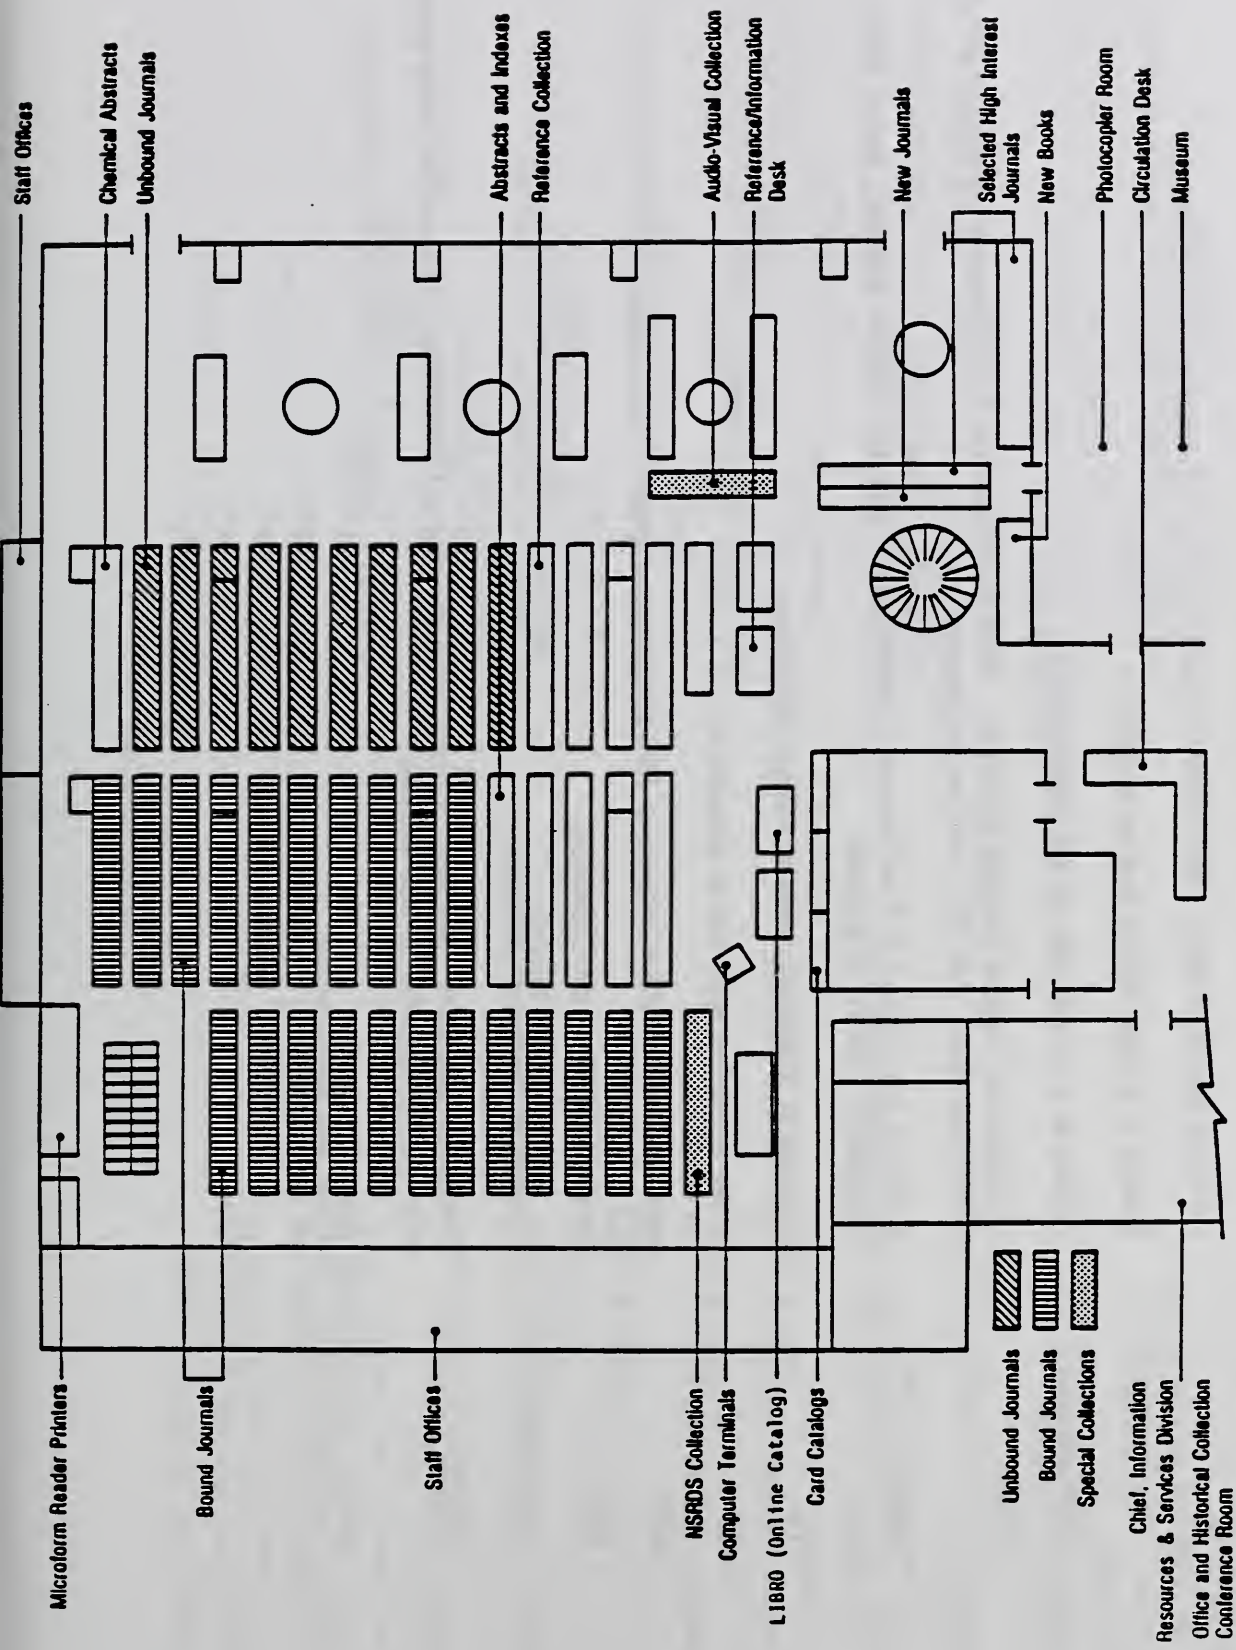

INTERGOVERNMENTAL AFFAIRS COLLECTION

The Intergovernmental Affairs Collection (IGA) provides information about the work of Congress, the Executive agencies and regulatory and administrative actions relevant to NBS activities. It is located in the NBS Research Information Center adjacent to the study area on the mezzanine (see diagram on page vi). IGA holdings include the following:

Annotated Code of Maryland	Federal Register
Budget of the United States	Montgomery County Code
Congressional Information Service Federal Register Index	NBS Administrative Manual
Congressional Information Service Index/Annual	NBS Appropriations Hearings
Code of Federal Regulations	OMB Bulletins
Congress in Print	OMB Circulars
Congressional Monitor	U.S. Code
Congressional Quarterly	U.S. Code Annotated
Congressional Record	U.S. Code Congressional & Administrative News
Decisions of the Comptroller General	U.S. Congress Legislative Calendars
Dept. of Commerce Administrative Orders (DAO's)	U.S. Congress Proceedings, Hearings, Bills, etc. (Microfiche)
Dept. of Commerce Organization Orders (DOO's)	U.S. Statutes at Large
Executive Orders, Presidential Proclamations	Weekly Compilation of Presidential Documents

Mezzanine

Main Floor

ABBREVIATIONS, SYMBOLS, AND LOCATION CODES USED

• Holdings are incomplete. See LIBRO or card catalog to determine missing items.

CONTINUED BY:

Refers to a later title of the publication.

CONTINUES:

Refers to a former title of the publication.

CPM

Available on Current Physics Microfilm. Filed alphabetically in cabinets at the rear of the RIC on the first floor. Ask RIC staff for assistance.

FRIS

Holdings are located in Fire Research Information Services; Polymer Building, Room A252; telephone: (301) 975-6860

IGA

Located in Intergovernmental Affairs Collection.

M

Some or all holdings are in microform.

NOC

Non-Current Collection located in RIC basement; shelved by call number.

REF

Located in Reference Collection.

REF/ABSTRACTS

Located in Abstracts Collection.

SEL PER

Selected Periodicals collection. Current year in Selected Periodicals area; earlier years shelved with bound volumes, by call number.
