Abstract

Pertinent fire detection and extinguishment references have been identified to further the knowledge of spacecraft fire safety. To broaden the scope of the bibliography, other unusual environments, e.g., aircraft, submarine, ship, have been included. In addition, for a more comprehensive view of the spacecraft fire safety problem, selected subjects are included, e.g, materials flammability, smoke, human behavior. The references will provide the research worker with access to state-of-the-art works and to historic works. Selected references from the 1960s have been included, but the emphasis is on references published from 1975 to 1987. The references are arranged by very broad categories. Often a paper will cover more than one topic, but for the purposes of this bibliography it will be cited only once.

1. Introduction

A NASA Lewis Spacecraft Fire Safety Workshop, held in Cleveland, Ohio, on August 20 and 21, 1986, reviewed the state of the art and assessed the needs for spacecraft fire safety. In addition, one of the suggestions was to develop bibliographic resources to aid an on-going study on fire safety technology development experiments for the Space Station.

This bibliography is an outgrowth of that Workshop. It is a compilation of references to assist the researcher in resolving the problem of fire detection and extinguishment in a spacecraft environment and other environments that might be related to it. To develop a more comprehensive view of the spacecraft fire safety problem, additional subjects are included, e.g., materials flammability, smoke, human behavior. As these subjects are interrelated, references will be cited in the most appropriate category although they may ideally be cited on several categories. Cited references are from the 1960s, but the emphasis is on works published from 1975 to 1987.

The following automated bibliographic databases were searched, using a broad array of keywords to include not only the spacecraft environment, but other unusual environments, e.g., submarines, aircraft, ships, to identify potential references for this bibliography. In turn, references cited within the selected references were reviewed. When appropriate, these references also were included. Center for Fire Research (CFR) experts made valuable contributions, as well as several other experts in the fire research field. The combination of machine and human input data made this bibliography a reality.

The databases queried on Dialog Information Services, Inc. were:

- Aerospace
- Chemical Abstracts
- Engineering Index
- Ei Engineering Meetings
- Inspec
- National Technical Information Service
- Textile Technology Digest
- World Textiles

Other data systems queried were:

- Defense Technical Information Service
- FIREDOC (a National Bureau of Standards fire research database)
- NASA/RECON

Pertinent references were incorporated into the FIREDOC database. Each record contains the full bibliographic reference, keywords, and abstract. To assist the user, in-depth indexing was instituted to compensate for short abstracts. An identifier was assigned to each record for the purpose of developing the bibliography and it corresponds to those sections noted in the Table of Contents. The identifiers are intentionally broad, e.g., Microgravity and Zero Gravity, Extinguishing Agents. Each reference only appears once in the bibliography, in the most appropriate identifier category. However, to access a reference in FIREDOC any combination of keywords and/or identifiers may be used.

FIREDOC is the automated database of the National Bureau of Standards, Fire Research Information Services (FRIS) bibliographic collection. The collection, started in 1971, reflects the programmatic interests of the CFR. It contains national and international fire research reports, books, journal articles and conference proceedings. FIREDOC contains the complete bibliographic reference (e.g., author, title, corporate source, journal name, volume number, pagination, date of publication) and, if appropriate, abstract, keyword(s) and identifier(s). The full text of the document is not included in the database. FIREDOC is growing daily; it currently contains information on 9000 of the 30,000 documents in the FRIS collection. Documents added to the FRIS collection since 1983 are included, as well as some older CFR documents. If you are interested in accessing FIREDOC, please contact Nora H. Jason; the telephone number is (301)975-6862 during normal work hours, Eastern Time.

U. S. Government reports, e.g., NASA CP-2476, may be purchased directly from the National Technical Information Service, Port Royal Road, Springfield, VA 22161. Conference proceedings, if not published in a U. S. Government report series, may be obtain from the sponsoring organization. Complete citations are provided for the journal articles and they may be obtained from the journal, the author, or a library.

ACKNOWLEDGEMENTS

Special thanks go to Robert S. Levine and Richard W. Bukowski for reviewing this document and sharing their expertise. Other colleagues in the fire research field have been most generous with their time in offering their contributions to this bibliography.

Two Man Space Environment Simulator Accident.
Aerospace Medical Div., Brooks AFB, TX
Aerospace Medical Div. Fire Hazards and Extinguishment
Conference. May 23, 1967, Brooks AFB, TX. AMD-TR-67-2,
4-38 pp., 1967.

Velupillai, D.

Europe Creates a Workplace in Space.
Flight International, Vol. 121, No. 3810, 1211-1216,
May 15, 1982.

2.12 STANDARDS

American Society for Testing and Materials.

Annual Book of ASTM Standards. Section 4. Volume 04.07.
Building Seals and Sealants; Fire Standards; Building
Constructions. ASTM, Philadelphia, PA, 1987.

American Society for Testing and Materials

Proposed Test Method for Heat and Visible Smoke Release
Rates for Materials and Products Using an
Oxygen Consumption Calorimeter.
ASTM E-5 Proposal P 190.
ASTM, Philadelphia, PA, 1986.

American Society for Testing and Materials

Standard Method for Measuring the Minimum Oxygen
Concentration to Support Candle-Like Combustion of Plastics
Combustion of Plastics (Oxygen Index). ASTM D2863.
ASTM, Philadelphia, PA, 1987.

American Society for Testing and Materials

Standard Test Method for Heat and Visible Smoke Release
Rates for Materials and Products. ASTM E906.
ASTM, Philadelphia, PA, 1986.

American Society for Testing and Materials

Standard Test Method for Resistance of Electrical Wire
Insulation Materials to Flame at 60 deg. ASTM F777.
ASTM, Philadelphia, PA, 1982.

American Society for Testing and Materials

Standard Test Method for Resistance of Materials to
Horizontal Flame Propagation (For Aerospace Vehicles,
Standard Conditions). ASTM F776.
ASTM, Philadelphia, PA, 1982.

American Society for Testing and Materials

Standard Test Method for Specific Optical Density of Smoke
Generated by Solid Materials. ASTM E662.
ASTM, Philadelphia, PA, 1986.

European Space Agency

Flammability Testing for the Screening of Space Materials.
ESA PSS-01-721 Issue 1, 42 P. October 1982.
European Space Agency, Noordwijk, The Netherlands

2.12 Standards (cont.)

International Maritime Organization

Revised Recommendation on Fire Test Procedures for Surface Flammability of Bulkhead and Deck Finish Materials. Assembly Resolution. Annex 13. A.564(14) and MSC 51/21, 37 P. 1986.
International Maritime Organization, London, England

National Aeronautics and Space Administration

Flammability, Odor, and Offgassing Requirements and Test Procedures for Materials in Environments that Support Combustion. National Aeronautics and Space Admin., Washington, DC. NHB 8060.1B, 141 P. 1981.

National Fire Protection Association

Standard for Portable Fire Extinguishers. National Fire Protection Assoc., Quincy, MA
NFPA 10. 51 P. 1986.

National Fire Protection Association

Standard on Halon 1301 Fire Extinguishing Systems. National Fire Protection Assoc., Quincy, MA
NFPA 12A. 52 P. 1985.

National Fire Protection Association

Standard on Carbon Dioxide Extinguishing Systems. National Fire Protection Assoc., Quincy, MA
NFPA 12. 46 P. 1985.

Underwriters Laboratories Inc.

Single and Multiple Station Smoke Detectors. Standard for Safety. Third edition. Underwriters Labs., Inc., Northbrook, IL
UL 217. 80+ P. October 8, 1985.

Underwriters Laboratories Inc.

Smoke Detectors for Fire Protective Signaling Systems. Standard for Safety. Second Edition. Underwriters Labs., Inc., Northbrook, IL
UL 268. 63+ P. June 9, 1981.

2.13 SUPPRESSION

Alpert, R. L.

Calculated Spray Water-Droplet Flows in a Fire Environment.
Factory Mutual Research, Norwood, MA
FMRC J.I. OJOJ1.BU and RC86-BT-6, 56 P. October 1986.

Ault, W. E. and Carter, D. I.

Influence of Hyperbaric Chamber Pressure on Water-Spray
Patterns.
Automatic Sprinkler Corporation of America
Fire Journal, Vol. 61, No. 6, 48-49, November 1967.

Beaudry, J. P., Trujillo, T. M., Zallen, D. M., Campbell, P.
and Walker, J. L.

Selective Automatic Extinguisher for Computer Cabinets Class
A, B, or C With Notification (SAFECOMP).
Final Report. October 1984-February 1986.
New Mexico Univ., Albuquerque
ESL-TR-86-14 and NMERI-WA3-5-(3.01), 148 P. July 1986.

Blake, D. R.

Suppression and Control of Class C Cargo and Compartment
Fires. Final Report. August 1983-June 1984.
Federal Aviation Administration, Atlantic City, NJ
DOT/FAA/CT-84/21, 31 P. February 1985.

Cole, M. B.

Space Station Internal Environmental and Safety Concerns.
NASA Lyndon B. Johnson Space Center, Houston, TX
National Aeronautics and Space Administration. Spacecraft
Fire Safety. August 20-21, 1986, Cleveland, OH.
NASA CP-2476, 73-87 pp., 1987.

Davies, D.

Naval Fire Protection for the 1990's.
Graviner, Ltd., United Kingdom
Fire International, No. 105, 39,42-43, June/July 1987.

2.13 Suppression (cont.)

Dressler, D. P., Robinson, R. S., Gann, R. G., Stone, J. P., Williams, F. W. and Carhart, H. W.
Biological Effect of Fire Suppression by Nitrogen Pressurization in Enclosed Environments.
Harvard Medical School, Cambridge, MA
Naval Research Lab., Washington, DC
Journal of Combustion Toxicology, Vol. 4, No. 3, 314-324, August 1977.

Fiala, R.
Contribution to the Selection of Fire Extinguishing Systems and Agents for Aircraft Fires.
Deutsche Dorschungs- und Versuchsanstalt fur Luft- und Raumfahrt E. V., Institut fur Luftstrahlantriebe, Germany
Advisory Group for Aerospace Research and Development (AGARD). Aircraft Fuels, Lubricants, and Fire Safety. May 10-14, 1971, The Hague, Netherlands. AGARD CP-84-71, 18/1-10 pp., 1971.

Fiala, R., Dussa, K. and Winterfeld, G.
On the Applicability of Reticulated Foams for the Suppression of Fuel Tank Explosions.
Advisory Group for Aerospace Research and Development (AGARD). Aircraft Fire Safety. April 11, 1975, Rome, Italy. AGARD CP-166, 16/1-12 pp., 1975.

Fish, R. H.
Performance of Lightweight Plastic Foams Developed for Fire Safety.
National Aeronautics and Space Admin., Houston, TX
National Aerospace and Space Administration. NASA Conference on Materials for Improved Fire Safety. May 6-7, 1970, Houston, TX. NASA CR TM X-14330, 11/1-3 pp., 1970.

Gann, R. G., Stone, J. P., Tatem, P. A., Williams, F. W. and Carhart, H. W.
Suppression of Fires in Confined Spaces by Nitrogen Pressurization. Part 3. Extinction Limits for Liquid Pool Fires.
Naval Research Lab., Washington, DC
Combustion Science and Technology, Vol. 18, No. 5&6, 155-163, 1978.

2.13 Suppression (cont.)

Kimzey, J. H.

Fire Extinguishment in Hypobaric and Hyperbaric Environments.

National Aeronautics and Space Admin., Houston, TX
National Aerospace and Space Administration. NASA
Conference on Materials for Improved Fire Safety,
May 6-7, 1970, Houston, TX. NASA CR TM X-14330,
19/1-4 pp., 1970.

Krasner, L. M.

Study of Hand-Held Fire Extinguishers Aboard Civil Aviation
Aircraft. Final Report. February 1981 to December 1981.
Factory Mutual Research Corp., Norwood, MA
FMRC J.I. OGON9.RG, 66 P. June 1982.

Kuchta, J. M., Cato, R. J., Martindill, G. H. and Spolan, I.

Ignition and Fire Suppression in Aerospace Vehicles.
Technical Report. January 1, 1970-November 30, 1971.
Bureau of Mines, Pittsburg, PA
AFAPL-TR-71-93 and PMSRC Report 4164, 49 P. December 1971.

Kung, H. C.

Cooling of Room Fires by Sprinkler Spray.
Factory Mutual Research Corp., Norwood, MA
Journal of Heat Transfer, Vol. 99, No. 3, 353-359, August
1977.

Martindill, G. H., Spolan, I. and Kuchta, J. M.

Fire Suppression for Aerospace Vehicles. Technical Report.
Bureau of Mines, Pittsburgh, PA
AFAPL-TR-70-39 and SRC Report S4137, 35 P. July 1970.

Sarkos, C. P.

Characteristics of Halon 1301 Dispensing Systems for
Aircraft Cabin Fire Protection.
Federal Aviation Admin., Atlantic City, NJ
Advisory Group for Aerospace Research and Development
(AGARD). Aircraft Fire Safety. April 11, 1975,
Rome, Italy. AGARD CP-166, 23/1-16 pp., 1975.

Slusher, G. R., Wright, J. and Demaree, J.

Halon Extinguisher Agent Behavior in a Ventilated Small
Aircraft. Final Report.
Federal Aviation Admin., Atlantic City Airport, NJ
DOT/FAA/CT-86/5, 58 P. June 1986.

2.13 Suppression (cont.)

- Slusher, G. R., Wright, J. A. and Speitel, L. C.
Halon Extinguishment of Small Aircraft Instrument Panel
Fires. Final Report.
Federal Aviation Admin., Atlantic City Airport, NJ

Space Administration

Report Documentation Page

1. Report No. NASA CR-180880		2. Government Accession No.		3. Recipient's Catalog No.	
4. Title and Subtitle SPACECRAFT FIRE DETECTION AND EXTINGUISHMENT: A BIBLIOGRAPHY				5. Report Date February 1988	
7. Author(s) NORA H. JASON				8. Performing Organization Report No. NBSIR 88-3712	
9. Performing Organization Name and Address U. S. Department of Commerce National Bureau of Standards Gaithersburg, MD 20899				10. Work Unit No. 480-52-02	
12. Sponsoring Agency Name and Address National Aeronautics and Space Administration Lewis Research Center Cleveland, Ohio 44135-3191				11. Contract or Grant No. C-32000-J	
				13. Type of Report and Period Covered Final	
				14. Sponsoring Agency Code	
15. Supplementary Notes Project Manager, Robert Friedman, Space Experiments Division, NASA Lewis Research Center					
16. Abstract Pertinent fire detection and extinguishment references have been identified to further the knowledge of spacecraft fire safety. To broaden the scope of the bibliography, other unusual environments, e.g., aircraft, submarine, ship, have been included. In addition, for a more comprehensive view of the spacecraft fire safety problem, selected subjects are included, e.g., materials flammability, smoke, human behavior. The references will provide the researcher with access to state-of-the-art works and historic works. Selected references from the 1960s have been included, but the emphasis is on references published from 1975 to 1987. The references are arranged by very broad categories. Often a paper will cover more than one topic, but for the purposes of this bibliography it will be cited only once.					
17. Key Words (Suggested by Author(s)) spacecraft; fires; bibliographies; fire detection; fire suppression; fire extinguishment; aircraft; ships; submarines; fabric flammability				18. Distribution Statement Unclassified-Unlimited, STAR Category 18	
19. Security Classif. (of this report)		20. Security Classif. (of this page)		21. No of pages	22. Price*
