## ABSTRACT

This report describes the GATT Standards Code activities conducted by the Standards Code and Information Program, National Institute of Standards and Technology (NIST), for calendar year 1991. NIST responsibilities include operating the U.S. GATT inquiry point for information on standards and certification activities; notifying the GATT Secretariat of proposed U.S. Federal Government standards-based rules that might significantly affect trade; assisting U.S. industry with standards-related trade problems; and responding to inquiries about proposed foreign and U.S. regulations.

**Key Words:** certification information; GATT Standards Code; notifications; proposed foreign regulations; standards information; technical assistance

## INTRODUCTION

The Agreement on Technical Barriers to Trade (popularly known as the Standards Code) was negotiated and accepted during the Tokyo Round of Multilateral Trade Negotiations in the 1970's. The Standards Code is designed to eliminate the use of standards, technical regulations, and conformity assessment (certification) procedures as unnecessary barriers to trade. The trade negotiations are held under the auspices of the General Agreement on Tariffs and Trade (GATT). As this report goes to press the Contracting Parties participating in the current Uruguay Round are still discussing various issues and hope to conclude the negotiations, which will result in a revised Standards Code, some time this year.

There are currently 40 signatories to the Standards Code. Thirty of the signatories have actively implemented the Code in their countries. The other 10 signatories have either not: 1) ratified the Agreement; 2) established an inquiry point for standards information; 3) reported any proposed government mandatory regulations (see Table I); or 4) some combination of the foregoing. The Code is administered by the GATT Secretariat in Geneva, Switzerland.

After the conclusion of the Tokyo Round, the Trade Agreements Act of 1979 ratified the United States' accession to the GATT Standards Code. The NIST Office of Standards Services (OSS) is responsible for several provisions which relate to the establishment of a U.S. inquiry point,<sup>1</sup> a standards information center, and a technical office for non-agricultural products.

This report summarizes Standards Code activities conducted by the Standards Code and Information (SCI) Program for calendar year 1991.

---

<sup>1</sup> The Standards Code requires that each signatory provide an inquiry point to answer all requests for information about technical regulations, standards, and rules of conformity assessment.

## INQUIRY POINT

### Notifications

Signatories of the Standards Code must notify the GATT Secretariat of all proposed government regulations and conformity assessment procedures that might significantly affect international trade. The Secretariat, in turn, disseminates the notifications to all other signatories. As the official U.S. GATT inquiry point for information on standards and certification activities, SCI notifies the Secretariat of proposed U.S. Federal Government rules that might significantly affect trade. SCI also receives foreign notifications through the GATT Secretariat and disseminates them, along with supplementary information, to appropriate U.S. companies and industry groups. SCI responds to inquiries about foreign and U.S. notifications, provides copies of the proposed regulations, and arranges for translations of foreign standards. SCI also assists in developing comments on the impact on U.S. industry of proposed foreign regulations and transmits them to the foreign government concerned.

In 1991 the GATT Secretariat issued 358 notifications. Twenty-six signatories reported at least one proposed regulation. (See Table II.) Japan had the most notifications (49). Fourteen other signatories - Austria, Belgium, Canada, Czechoslovakia, Denmark, EC, Finland, New Zealand, Norway, Philippines, Sweden, Switzerland, the United States and Yugoslavia - each reported 10 or more proposed regulations.

An official in the Office of the U.S. Trade Representative (USTR), based in Geneva, receives notifications from the GATT Secretariat and cables them to the United States. The notifications, all of which are available in English, include the name of the country proposing the regulation; the assigned TBT/Notification number; a brief description of the regulation; and the final date for comments. In order to provide wide access to this information in the United States, all foreign notifications are published in the Commerce Business Daily and several other U.S. publications. SCI maintains a computerized database on all GATT notifications and a telephone GATT hotline where up-to-date notification information can be obtained. The hotline number is (301) 975-4041 (not toll free).

### Proposed U.S. Regulations

All proposed U.S. Government rules (mandatory standards or conformity assessment systems), including proposed revisions, are published in the Federal Register by the responsible Federal agency. SCI staff regularly review the Register to identify those proposed regulations that should be notified to the GATT Secretariat and send notices directly to the GATT Secretariat via telefax.

In 1991, 45 proposed U.S. regulations, covering such subjects as food labeling, motor vehicles, drugs and distilled spirits were reported. The originating agencies are shown below. (See Table III for listing of specific products by agency.)

<u>Agency</u>	<u>No. of 1991 Notifs.</u>
Bureau of Alcohol, Tobacco & Firearms (BATF)	5
Consumer Product Safety Commission (CPSC)	4
Dept. of Commerce (DOC)	1
Dept. of Treasury (DOT)	1
Environmental Protection Agency (EPA)	1
Food & Drug Administration (FDA)	9
National Highway Traffic Safety Admin. (NHTSA)	20
U.S. Dept. of Agriculture (USDA)	<u>4</u>
Total	45

### Proposed Foreign Regulations

The GATT Secretariat in 1991 issued 313 notifications from countries other than the United States. (See Table IV.) The foreign regulations covered a wide variety of products, including household appliances, food, ozone-depleting substances, plants, breath testing apparatus, and gondolas. SCI maintains a Key-Word-Out-of-Context (KWOC) index for all products that are the subject of foreign notifications. (See Appendix A for the 1991 index.) (KWOC is an indexing method in which keywords, in this instance product names, appear as headings on a separate line.) The KWOC index is used to identify regulations that may be of interest to individuals who have expressed interest in specific products.

SCI regularly sends foreign notifications to members of the Industry Functional Advisory Committee on Standards (IFAC)<sup>2</sup> and several other groups and specific individuals to serve their information needs and to allow them to disseminate this information to others. SCI sends copies of all foreign notifications to the American National Standards Institute for subsequent publication in its biweekly ANSI Reporter.

---

<sup>2</sup> The IFAC is comprised of Government-appointed individuals from private industry engaged in standards-related activities. It advises the Department of Commerce and USTR on trade matters, the operation of any adopted trade agreements, and other subjects related to U.S. trade policy.

## Inquiries

SCI responded to 400 domestic and foreign letter and telephone requests for GATT notification information (277 U.S., 123 foreign) in 1991. Many requestors asked for copies of more than one regulation. In addition a number of requestors asked for general information on the Standards Code. SCI responds to such requests by sending an information package consisting of the latest issue of: its newsletter, TBT News; a list of recent foreign notifications; brochures describing the Standards Code; and ordering information for the Commerce Business Daily.

In 1991, the most often requested regulations concerned medical devices, terminal equipment, accreditation systems, chemicals which may harm the environment, and timber/lumber. In addition, 501 individuals called the GATT hotline for up-to-date information on foreign notifications.

## Translations

SCI requests the text of all proposed foreign regulations which are notified. Signatory countries are required to supply copies of the regulations through their inquiry points. Of the 297 regulations received in 1991, 107 were in languages other than English. SCI coordinates a service to obtain, on request, an English translation of any proposed regulation in a foreign language. The cost of translation is paid by the requestor; if more than one request is received for the same translation, the cost is divided equally among requestors. In 1991, SCI received five requests for translation of five regulations and standards-related documents. The cost of a translation is determined by the number of words contained in the document and the price per 1,000 words charged by the contractor.

## STANDARDS INFORMATION

The National Center for Standards and Certification Information (NCSCI) is the national focal point for standards-related information. NCSCI supports GATT inquiry point activities by supplying information concerning both domestic and foreign standards. The information center, established in 1965, provides government, industry, and the public with information on standards, regulations, certification programs, and related activities that affect trade and commerce.

NCSCI maintains a microform and/or hard copy collection of engineering standards and specifications, test methods, regulations, certification rules, directories, reference books, and special publications. In 1991, NCSCI staff responded to more than 6,500 requests from all over the world on the existence, source, and availability of standards and related documents. Thirty of the 40 signatories contacted the Center for

information. (See Appendix B.) NCSCI also responds to trade-related queries regarding regulations or other requirements imposed by foreign countries that affect the export of U.S. manufactured products.

In 1991, SCI published and NCSCI distributed the following reports:

- o Laboratory Accreditation in the United States (NISTIR 4576);
- o Questions and Answers on Quality, the ISO 9000 Standard Series, Quality System Registration and Related Issues (NISTIR 4721);
- o Standards Activities of Organizations in the United States (NIST SP 806);
- o Directory of Federal Government Laboratory Accreditation Designation Programs (NIST SP 808); and
- o Directory of State and Local Government Laboratory Accreditation/Designation Programs (NIST SP 815).

In a related area - the EC 1992 Single Internal Market - NCSCI maintains an EC hotline to report on draft CEN and CENELEC standards and EC directives related to standards which may affect trade. The recorded hotline - (301) 921-4164 (not toll-free) - is updated weekly and provides the subject/product areas, document number, and final date for comments. A total of 2,087 calls were received on the hotline during 1991.

NCSCI staff also review the Official Journal of the European Communities to identify proposed standards-related directives. Copies of the directives are sent to the appropriate trade or professional associations for dissemination to and review by their members.

#### TECHNICAL OFFICE

The Technical Office, established by the Trade Agreements Act of 1979, is responsible for providing technical support related to non-agricultural products. Office functions include:

- a) participation in standards-related conferences;
- b) technical assistance to the International Trade Administration of the Department of Commerce and the Office of the U.S. Trade Representative in developing proposals to enhance the Standards Code;
- c) preparation of special reports on standards issues; and
- d) coordination of comments on proposed foreign regulations.

1991 Technical Office activities included:

- o Continued participation by office staff in tri-lateral negotiations with Mexican and Canadian officials to establish the terms of the standards obligations of the North America Free Trade Agreement.

o Continued work with other Government agencies to inform U.S. industry of EC 1992 standards-related activities. These activities included participating in the EC 1992 Work Group on Standards, Testing, and Certification and the U.S./EC Study Group concerning the Joint Communique signed by former Commerce Secretary Robert A. Mosbacher and EC Vice President Martin Bangemann, and making presentations on EC 1992 standards development activities to interested U.S. industry groups.

### Comment Handling

A major objective of the Standards Code is to allow exporters, government agencies, and other interested parties to comment on proposed foreign regulations which they believe would unjustifiably impede exports. SCI provides the text of proposed foreign regulations on request and encourages the submission of comments if a regulation appears to create unnecessary trade barriers. SCI transmits comments to the appropriate foreign government and coordinates any follow-up activity. In 1991, SCI received and processed formal comments from U.S. industry on three foreign regulations: Sweden (91.86) - products containing mercury; Denmark (91.205) - nickel containing products; and Sweden (90.317) - cosmetics.

Additional informal comments are frequently made by industry representatives who become aware of proposed regulations, often even before they are officially notified through the GATT. The notification system can often serve as a back-up mechanism to ensure awareness of foreign developments.

### Comment Periods

So that signatories will have adequate time to receive the text of a regulation (and to have it translated if necessary), review it, and prepare comments, the Standards Code recommends a comment period of at least 60 days. If the comment period is insufficient (e.g., due to late receipt of an English version or complicated technical issues), the SCI staff will request that the issuing country extend the comment period. In 1991, six such requests were made by the United States to the notifying Parties. Four of the extension requests were granted. Many extensions are requested so that individuals can translate and study the regulation without necessarily indicating an intention to comment. SCI staff also received seven requests from other signatories requesting extensions of the comment period for proposed U.S. technical regulations. The comment period for two of the regulations were officially extended.

The average length of the comment period<sup>3</sup> in 1991 was 46 days for U.S. regulations and 43 days for foreign regulations. The average length of the comment period, by U.S. agency, is shown below:

BATF	49 days
CPSC	52 days
DOC	34 days
DOT	18 days
EPA	34 days
FDA	39 days
NHTSA	43 days
USDA	59 days

Comment periods for foreign regulations ranged from none at all to 215 days. In instances where there was no comment period provided, the average length is "0". The average length of comment period by country was:

Austria	82 days	Ireland	0 days
Belgium	0 days	Japan	63 days
Brazil	0 days	Korea	43 days
Canada	23 days	Netherlands	49 days
Czechoslovakia	22 days	New Zealand	54 days
Denmark	26 days	Norway	69 days
EC	49 days	Philippines	9 days
Finland	71 days	Singapore	48 days
France	0 days	Sweden	35 days
Germany	17 days	Switzerland	53 days
Hong Kong	33 days	United Kingdom	33 days
Hungary	14 days	Yugoslavia	58 days
India	10 days		

---

<sup>3</sup> Number of calendar days between the date the notification was issued by the GATT Secretariat and the closing date for comments.

## CONCLUSION

SCI continues to work with U.S. industry to address standards-related trade problems and to assure wide distribution of relevant notifications of proposed foreign regulations which might affect trade. Requests for further information, suggestions on how the service might be made more useful, or comments on subjects covered in this report should be directed to:

Standards Code and Information Program  
National Institute of Standards and Technology  
TRF Building, Room A163  
Gaithersburg, MD 20899  
(301) 975-4037  
FAX: (301) 926-1559

For specific standards-related information from NCSCI, call (301) 975-4040, -4038, or -4036.

For up-to-date information on proposed foreign regulations, call the GATT Hotline (301) 975-4041.

For up-to-date information on draft CEN/CENELEC documents, call the EC Hotline (301) 921-4164.

TABLE I

Standards Code Signatories

Argentina (a)	Japan
Austria	Korea
Belgium	Luxembourg (b)
Brazil	Mexico (b)
Canada	Netherlands
Chile (b)	New Zealand
Czechoslovakia	Norway
Denmark	Pakistan (b)
Egypt (b)	Philippines

APPENDIX B

Thirty of the 40 signatories to the Standards Code contacted the National Center for Standards and Certification Information for information on proposed or existing U.S. standards and regulations. The number in parentheses ( ) indicates the number of inquiries which came from the GATT inquiry points. Many requests come from private companies or individuals.

11. ABSTRACT (A 200-WORD OR LESS FACTUAL SUMMARY OF MOST SIGNIFICANT INFORMATION. IF DOCUMENT INCLUDES A SIGNIFICANT BIBLIOGRAPHY OR LITERATURE SURVEY, MENTION IT HERE.)

This report describes the GATT Standards Code activities conducted by the Standards Code and Information Program, National Institute of Standards and Technology (NIST), for calendar year 1991. NIST responsibilities include operating the U.S. GATT inquiry point for information on standards and certification activities; notifying the GATT Secretariat of proposed U.S. Federal Government standards-based rules that might significantly affect trade; assisting U.S. industry with standards-related trade problems; and responding to inquiries about proposed foreign and U.S. regulations.

12. KEY WORDS (6 TO 12 ENTRIES; ALPHABETICAL ORDER; CAPITALIZE ONLY PROPER NAMES; AND SEPARATE KEY WORDS BY SEMICOLONS)

certification information; GATT Standards Code; notifications; proposed foreign regulations; standards information; technical assistance
