NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY Arati Prabhakar, Director

PREFACE

The Energy-Related Inventions Program was established in 1975. Since its inception over 30,000 inventions have been evaluated. As of the printing of this report 604 inventions have been recommended to the Department of Energy. The Department of Energy has funded 418 of these inventions for a total of \$31.7 million. This report supersedes NISTIR 4898 and summarizes the status of recommended inventions 1 through 350. A companion report (NISTIR 5259) summarizes recommended inventions 351 through 604.

Section 1 Introduction

1.0 BACKGROUND

The Federal Nonnuclear Energy Research and Development Act of 1974 (Public Law 93-577) established a comprehensive national program, called the Energy-Related Inventions Program (ERIP), for research and development of all potentially useful energy sources and energy use technologies. The U.S. Department of Energy (DOE) conducts this program.

An important part of ERIP is to encourage innovation in the development of energy technology. To help DOE carry out this responsibility, the Act directs the National Institute of Standards and Technology (NIST) to evaluate all promising nonnuclear energy-related inventions. NIST is to give particular attention to those submitted by independent inventors and small companies. NIST has established the Office of Technology Evaluation and Assessment (OTEA) (formerly the Office of Energy Related Inventions (OERI)) to evaluate energy source and energy use technologies.

1.1 OVERVIEW OF PROGRAM OPERATION

OTEA reviews and processes all evaluation requests. Evaluation is based on three general criteria: technical feasibility, potential energy-conservation or energy-supply impact, and commercial feasibility. All inventors are informed of the results of the evaluation of their submitted inventions. An invention which meets the NIST criteria for recommendation is forwarded to DOE for possible support action.

Inventions forwarded by the OTEA to DOE are recommended as "technically valid and worthy of consideration for Government support" under the ERIP Program. OTEA furnishes a report with the recommendation to explain in detail the advantages of the technology, as well as any qualifications of the recommendations, such as required testing. OTEA also provides guidance to DOE and the inventor for deciding on the nature and extent of support to be given.

Inventions may be recommended by OTEA at any stage of their development, whether conceptual, at the laboratory testing stage, or even in production or the process of being marketed. The level of support to be furnished depends largely on the amount required to move invention development forward or to resolve the question of whether development should continue. The latter question is of particular interest if the NIST evaluation is based on data furnished by the inventor and the recommendation is qualified by an expressed need for data validation under controlled testing conditions.

DOE generally accepts the NIST recommendation and provides appropriate support. However, there have been and will continue to be cases in which DOE cannot or will not provide support. DOE attempts to reach agreement with the inventor on

DATE: 30 JUNE 1993 PAGE 1-1

the nature and extent of support within constraints. Constraints include the capabilities of the inventor and/or the company involved, possible duplication of prior or on-going DOE-funded efforts, availability of private sector support, and DOE funding limitations.

It should be noted that DOE performs no technical evaluation beyond that done by NIST. DOE does reserve the right to question and reject the NIST recommendation and to restrict support due to policy and/or funding considerations.

Each case is decided on the basis of its own merit and need. If DOE decides to support the invention, support can include: a grant, a contract, or direct assistance of a technical or business nature. DOE's objective is that, as a result of this support, the inventor should be in a position to do one or more of the following:

- Compete effectively in obtaining contracts from other sources (including existing government programs) to permit further development of the invention.
- Assemble, with confidence of success, the people and capital necessary to produce and market products derived from the invention through a business enterprise in which the inventor is a major participant.
- Negotiate arrangements with an existing company that will develop the inventor's product for commercialization.

1.2 EVALUATION PROCEDURES (NIST)

There are three principal steps in the evaluation process used by the NIST Office of Technology Evaluation and Assessment. In the first step, Disclosure Review and Analysis, invention disclosures are either accepted or rejected for evaluation, depending upon whether or not the invention is within program scope and is a sufficiently well-prepared disclosure to enable evaluation. If accepted, a formal evaluation is initiated.

The second step, First-Stage Evaluation, is a technical screening in which brief opinions are obtained from OTEA staff evaluators, other government scientists or engineers, or consultants or contractors. If the invention is rated as "promising" in this First-Stage, Second-Stage Evaluation is initiated. ("Promising" means the invention seems to be technically feasible, has significant energy conservation or supply potential, and is deemed to be economically and commercially practical.)

In Second-Stage Evaluation, an analysis is conducted in greater depth, resulting in a formal report. If Second-Stage Evaluation confirms the finding of "promising," the disclosure and evaluation results are forwarded to DOE with a recommendation for Government support.

Throughout the process, the inventor is kept informed of the status of the evaluation. The inventor is sent a letter notifying him of the results of First-

PAGE 1-2 DATE: 31 MARCH 1993

or Second-Stage evaluations as they are completed. If Second-Stage Evaluation has been conducted, a copy of the Second-Stage invention review is also sent to the inventor.

1.3 SUPPORT PROCEDURES (DOE)

Upon receipt of a recommendation from NIST, DOE contacts the inventor, provides details of the support procedures, and requests a statement as to the nature and extent of support desired, generally in the form of a proposal or grant application. The DOE invention coordinator works with the inventor in proposal preparation to ensure effective review of support options and to develop a satisfactory statement of work and support plan. DOE then decides whether or not to provide support as well as the nature and extent of support.

If financial support is to be provided, DOE initiates procurement action, monitors progress of the procurement action, and helps to expedite processing of the paperwork until the award is made. As of June, 1993 DOE has awarded a total of \$34.7 to 469 of the inventions recommended by NIST. During the period that financial or other support is provided, the DOE invention coordinator monitors and assists the inventor's efforts, maintaining a status report for use by both DOE and NIST.

1.4 <u>SUPPLEMENTARY ACTIVITIES</u>

1.4.1 National Innovation Workshops (NIW)

This project was initiated in early 1980 as a means of informing inventors about the Program and increasing the percentage of higher-quality inventions submitted to OTEA. Another objective of the Workshop series is to assist inventors (thus to stimulate innovation in general) by putting them in touch with their community resources and by providing practical instruction in the various elements of the innovation process.

Workshops are conducted in a standard format as two-day seminars. On each day a plenary session and a luncheon session feature national-level speakers on invention and innovation. Three 1-1/2 hour periods each day then are designated for the conduct of 8 to 10 concurrent Workshop sessions.

The Workshops are organized as regional activities by a committee composed of representatives from such regional organizations as universities, venture or other financing groups, private sector institutions concerned with technological innovation, state and local government agencies, patent law associations, etc. Federal involvement is restricted to providing guidance and financial support. The federal role is catalytic in nature in that Workshop feasibility is demonstrated with an expectation that the regional committee will continue to hold Workshops and similar activities in the future without federal involvement.

Seventy-four NIWs have been held to through June, 1993. Three additional NIWs are scheduled for calendar year 1993. Attendance has averaged about 150 inventors and small businesses.

DATE: 30 JUNE 1993 PAGE 1-3

1.4.2 Commercialization Planning Workshops (CPW)

This series of workshops, managed entirely by DOE, was initiated in June 1984 as a mechanism for providing direct and immediate assistance to inventors whose inventions have been recommended by NIST. Each workshop brings together a group of 10-14 such inventors for a three-day meeting with a "faculty" of six workshop leaders who are selected by DOE on the basis of their expertise in at least one aspect of innovation (business planning, marketing, finance, licensing, etc.). Workshop attendance is limited to inventors invited by DOE and the faculty.

The three-day meeting is devised to provide a concentrated educational/informative experience for each recommended inventor; travel and other meeting expenses are paid for by the Government. The objective in each case is for the recommended inventor to develop, with the aid of the faculty, a detailed plan for commercialization of his invention. The plan then serves as the principal basis for the DOE office to conduct its initial review of the recommendation (Analysis).

1.5 NATURE OF THIS REPORT

This report comprises an introductory section (Section 1) and a report section (Section 2).

Section 2 is the main body of the report and contains a brief description of each invention, a summary of its status, the identity of the DOE staff coordinator for that invention, the date the invention was submitted to NIST and the date recommended to DOE. The name and address of the person to contact regarding the invention is also included whenever they are available, as are the patent numbers and DOE grant numbers. The inventions are presented in chronological order of their recommendation by NIST.

PAGE 1-4 DATE: 31 MARCH 1993

SECTION 2

STATUS OF RECOMMENDED INVENTIONS

2.0 Introduction

This section contains an index and brief descriptions of those inventions recommended by the Office of Technology Evaluation and Assessment at NIST to the Energy Related Inventions Program office at DOE. Each description includes a brief description of the invention, a summary of the invention status, significant dates, status, and summary of development. The name of the inventor, primary contact for information, and DOE staff coordinator are also provided. The address of the contact is provided if an award has been made. At the time of receipt, DOE assigns a number (DOE No.) to each recommended invention. These numbers are used for tracking purposes and are also the key for sequencing the descriptions presented in this section.

2.1 Index to Recommended Inventions

The following is an index to the recommended inventions showing invention DOE No., invention status and title. Status is described in terms of the following steps in the DOE support process.

Analysis	DOE review of recommendation.	

Decision Phase	Statement o	f Work Rece	eived	. Inventor	requested	to submit
	supporting		for	procurement	action.	Prepare

purchase request.

Other Assistance Federal Laboratory testing, or business planning assistance, often leading to a grant award outside of ERIP.

<u>Procurement</u> Request for grant or contract in the procurement process.

Award Inventor awarded grant or contract. Work commences. Final report due at end of work period.

No request Received No request for assistance was received from the inventor.

No DOE Support

Sources of support within DOE have been investigated, but recommendation will not be supported, e.g., no area of DOE support could be identified, conflict with other DOE awardees being supported.

<u>Complete</u>

Inventor has complied with all the requirements of the Statement of Work or ERIP assistance is terminated.

DATE: 30 JUNE 1993 PAGE 2-1

INDEX TO RECOMMENDED INVENTIONS

DOE		
No.	STATUS	TITLE
0001		
0001	No DOE Support	Demand Metering System for Electric Energy
0002		Fuel Miser
0003	Complete	Hydrogen Generation from Producer Gas by Oxidation-Reduction of Tin
0004	Complete	Power Conversion of Energy Fluctuations
0005	_	Diesel Engine Conversion System for Gasoline Engines
0006	•	Micro-Carburetor
0007	•	Hydraulically Powered Waste Disposal Device
0008	•	Inertial Storage Transmission
0009	•	Heat/Electric Power Conversion via Charged Aerosols
0010	_	Scrap Metal Preheating Method and Apparatus
0011	•	Solar Collector
0012		High Frequency Energy Saving Device
0013		Anti-Pollution System
0014		Aerodynamic Lift Translator
0015	Complete	Estacron
0016	Complete	Method and Apparatus for Vacuum Drying of Commodities
0017	Complete	Osmotic-Hydro Power Generation
0018	Complete	The Control of the Analysis of Low Carbon Aluminum Steels Using
		Oxygen Sensors and Iron-Aluminum Alloy
0019	-	Phenol Methylene Foam Rigid Board Insulation
0020	-	Thermal Shade
0021	-	Waste Oil Utilization System
0022		Fuel Burner Attachment
0023	* *	Microgas Dispersions
0024	-	Can and Bottle Crushing Apparatus
0025	-	Sulfur Removal from Producer Gas-High Temperature
0026	-	Compact Energy Reservoir
0027	-	Waste Heat Utilization for Commercial Cooking Equipment
0028		
0029	-	Tuned Sphere Stable Ocean Platforms
0030	•	Method of Removing Sulfur Dioxide from Flue Gases
0031	•	Ceramic Rotors and Vanes
0032	Complete	Wood Gas Reactor
0033	Complete	Temperature Indicating Device
0034	•	Delphic Thermogenic Paint (Heat Film)
0035	No DOE Support	Utilization of Solar Energy by Solar Pond System
0036 0037	-	Computerstat
0037		Hotwater Engine Reduction Volatilizations
0038	_	Lawler Steam Generator and Lawler System of Thermal Oil Recovery
0039	* *	Improved Equipment and Process for Production of Blue Water Gas
0041	No DOE Support	Fabrication of Photovoltaic Devices by Solid Phase Growth of
0041	Don bupport	Semi-conductors from Metal Layers
0042	Complete	Flue Baffle Assembly
0043	Complete	Thermal Gradient Utilization Cycle
	•	

PAGE 2-2 DATE: 30 JUNE 1993

0044	Complete	New Working Fluids for Increasing the Cycle Efficiencies of
		Thermal
0045	Complete	Bulk Cure Tobacco Barn with Improvements
0046		Thexon Dehydration
0047		Wastewater Aeration Power Control Device
0048	No DOE Support	Howald Combustor
0049	No DOE Support	Automatic Control System for Water Heaters
0050	Complete	Scotsman Fuel Energizer
0051	No DOE Support	Thermal Efficiency Construction
0052	No DOE Support	Air Wedge
0053	Complete	High Efficiency Water Heater
0054	Complete	Optimizer
0055	No DOE Support	Electrically Heated Sucker-Rod
0056	Complete	Flexaflo-The Wet Fuel Dryer
0057	Complete	X-5 Smoke Eliminator
0058		A Multiple Spark System Using Inductive Storage
0059	No DOE Support	The Volumetric Gas Turbine
0060	Complete	Electric Transport Refrigerator
0061	Complete	Fuel Preparation Process
0062	Complete	Tapered Plate Annular Matrix
0063	Complete	Fluorobulb
0064	Complete	The Mahalla ProcessA Hydrometallurgical Method for Extracting
		Copper
0065	Complete	WattVendor
0066	Complete	Heat Extractor
0067	Complete	Windmill Using Hydraulic System for Energy Transfer and Speed
		Control
0068	Other Assistance	Under Compression and Over Compression Free Helical Screw Rotary
		Compressor
0069	Complete	Ionic Fuel Control System for the Internal Combustion Engine
0070	Complete	Air Cooled Compressor Heat Recovery and Heat Circulation System
		plus Ambient Air Filter and Air Cleaner
0071	No DOE Support	Knight Guard
0072	No DOE Support	Utilization of Waste Gas for Boilers and Furnaces in Refineries
		and Petrochemical Plants
0073	Complete	INTECH
0074	Complete	A Solid Electrolyte Galvanic Solar Energy Conversion Cell
0075	Complete	Coke Quenching Steam Generator
0076	_	The Ross Furnace
0077	-	Variable Heat Refrigeration System
0078	No DOE Support	System for High Efficiency Power Generation from Low Temperature
		Sources
0079	Complete	Oil Well Bit Insert (Tooth), Cutting Article, Ablative
0800	No DOE Support	Improved Unfired Refractory Brick
0081	Complete	Flash Polymerization
0082	Complete	Cool Air Induction
0083	Complete	Vertical Solar Louvers
0084	No DOE Support	Kinetic Energy Type Pumping System
0085	Complete	Dielectric Windowshade
0086	Complete	Coke Desulfurization
0087	Complete	Recovering Uranium From Coal in Situ

DATE: 30 JUNE 1993 PAGE 2-3

0088	Complete	System-100
	Complete	Continuous Casting Process and Apparatus
0090	No DOE Support	Grain Dryer
	Complete	Mine Brattice
0092	_	Tri-Water, A Combination Air Conditioning and Fire Protection
	one deal coppered	System for a Building.
0093	Complete	Shelander-Burrows Process for Recovery of Metallic Values from
		Smelter Emissions
0094	Complete	Lantz Converter
	No DOE Support	Omni-Horizontal Axis-Wind Turbine
0096		Leavell, Vibrationless, Low Noise, High Efficiency, Pneumatic
	r -	Percussion Tools and Air Compressor Systems
0097	Complete	Water Drying System
	Complete	Process Development to Conserve Energy and Material (in the
		manufacture of)Bearings
0099	Complete	Light Weight Composite Trailer Tubes
	Complete	Solaroll
	Complete	Controlled Combustion Engine
	Complete	Method of Burning Residual Fuel Oil in Distillate Fuel Oil
	•	Burners
0103	Complete	Low Voltage Ionic Fluorescent Light Bulb
	Complete	Low Continuous Energy Mass Separation System
	Complete	High Frequency Furnace
	No DOE Support	Deep Shaft Hydro-Electric Power
	Complete	Waste Products Reclamation Process
	Complete	Processing Recovery of Aluminum
	Complete	Hydrostatic Meat Tenderizer
	Complete	Improved Windpower Generating System
0111	Complete	Haspert Mining System
0112	Complete	Pump
0113	Complete	Wallace Mold Additive System
0114	No DOE Support	New Energy-Saving Tire for Motor Vehicles
	Complete	Refrigeration System
0116	No DOE Support	Model 5000 ASEPAK System
0117	Complete	"Solarspan" Prism Trap
0118	Complete	Energy Adaptive Control of Precision Grinding
0119	No DOE Support	Air Ratio Controller (AERTROL)
0120	Complete	Vapor Heat Transfer Commercial Griddle
0121	No DOE Support	Solar Space Heating for both Retrofit and New Construction
0122	Complete	Lean Limit Controller
0123	Complete	Comminution of Ores by a Low-Energy Process
0124	No DOE Support	Solar Collector
0125	Complete	The Turbulator Burner System
0126	Complete	Vaclaim
0127	Complete	Process and Apparatus to Produce Crude Oil from Tar Sands
0128	Complete	Continuous Distillation Apparatus and Method
	Complete	Super U System - Snap Strap
	No DOE Support	Furnace Input Capacity Trimming Switch
0131	Complete	Valve Deactuator for Internal Combustion Engines
0132	No DOE Support	Process for Reclaiming and Upgrading Thin-Walled Malleable Waste
		Material

PAGE 2-6 DATE: 30 JUNE 1993

0217	Complete	Jointless Advanced Composite Material Tape for Operating Lift
	- L	Pumps in Oil Wells
0218	Other Assistance	Behemoth
0219	Complete	Method for Making Acetaldehyde from Ethanol
0220		Deep Throat Resistance Welder
0221		Strainercycle
0222	Other Assistance	Louver Trombe Solar Storage Unit
0223		Minimizing Subsidence Effects during Production of Coal In Situ
0224		Haile Alternate Fuel Grain Dryer
0225	•	ROVAC High Efficiency Low Pressure Air Conditioning System
0226	•	An Electronic Anemometer System for Locating Air- Infiltration
		Heat Leaks in Buildings
0227	Complete	CRM Pipe
0228	•	EGD Fog Dispersal System
0229	-	Contoured Finger Follower Variable Valve-Timing Mechanism for
		Internal Combustion Engines
0230	Complete	Absorption Heat Pump Augmented Separation Process
0231	-	Natural Gas from Deep-Brine Solutions
0232		Method of Separating Lignin and Making Epoxide- Lignin
0233	•	Mounted Steerable Ripper for Deep Soil Ripping and Subsoil
		Operations
0234	Complete	Geodesic Solar Paraboloid
0235		Single Stage Anaerobic Digestion Process
0236	Complete	Steam Turbine Packing Ring
0237	Complete	Hicks Alter-Brake System/Electric Charging Apparatus for Ground
	•	Vehicles
0238	Complete	Industrial and Residential Clothes Dryer Automatic Shut-Off at
	•	Dryness
0239	Complete	Electrochemical Separation and Concentration of Sulfur-Containing
		Gases from Gas Mixtures
0240	No DOE Support	All Steam Heated Sadiron for Commercial Use
0241	Complete	Polysulfide Oil Field Corrosion Control System
0242	Complete	New Petersburg Beam Trawl
0243	Complete	An Electronic/Pneumatic Ejector System for Producing an Aluminum
		Rich Concentrate from Municipal Waste
0244	Complete	CHARLIE - Trademark - Federally Registered #1123957
0245	Complete	Improved Oil Well Pumping Unit
0246	No DOE Support	Maximum Cruise Performance
0247	Complete	Energy Conservation by Improved Control of Bulk Power Transfers
		on Interconnected Systems
0248	Complete	Dyna-Bite Traction Intensifier, Model Agri, for Agricultural
	•	Tractors or the Like
0249	Complete	Subsurface Flow Control (Gas Wells) and High Gas- Oil-Ratio Oil
		Wells
0250	Complete	A System to Adapt Diesel Engines to the Use of Crude Oils
0251	Complete	Process and Apparatus for Reducing the Energy Required to
		Separate Liquids by Distillation
0252	Complete	Thermal Bank
0253	Complete	High Performance Heat Pump
0254	Complete	"Turbo-Glo" Immersion Furnace
0255	No DOE Support	Method and Apparatus for Scrubbing Gas - Scrubbing Apparatus
	_	

DATE: 30 JUNE 1993 PAGE 2-7

0256	Other Assistance	Method and Apparatus for Irrigating Container Grown Plants
	Complete	Method and Apparatus for Melting Snow
	Complete	Corrosion Protection Process for Bore Hole Tool
	Complete	Hydrostatic Support Sleeve and Rod - Gas Release Probe
	Complete	Method and Apparatus for Handling and Dry Quenching Coke
0261		•••
	Complete	Energy Saving Pump and Pumping System
	No DOE Support	Method for Reconditioning Rivetless Chain Links
	Complete	Desulfurization of Coal
0265	Complete	Flozone method and Apparatus for Direct Application of Treatment
		Liquid to Growing Vegetation
	Other Assistance	0 3
0267	Complete	Integrated Gasification of Coal, Municipal Solid Wastes and Sludge
0268	Complete	Apparatus for Enhancing Chemical Reactions
0269	No DOE Support	Refrigerant Accumulator and Charging Apparatus
	Complete	Method of Energy Recovery for Wastewater Treatment
	Complete	Hydrogen Storage System
	Complete	V-Plus System
	No DOE Support	Open Cycle Latent Heat Engine
0274	Complete	Flexible Lighting - Fluorescent Lighting Operating at Radio
	_	Frequency
	Complete	Low Head - High Volume Pump
0276	Complete	Gas Concentration Cells as Converters of Heat into Electrical
		Energy
	No DOE Support	Electronic Conveyor Control Apparatus
	Complete	Complete System for Large Solar Water Heating and Storage
	Complete	Method and Means for Preventing Frost Damage to Crops
0280	Complete	Down Hole and Above Ground Resistance Heating for Paraffin Elimination
	Complete	Sun Synchronous Solar Powered Refrigerator
	Complete	Insulated Siding
	Complete	Aluminum Roofing Chips
	Complete	Atomized Oil-Injected Rotary Screw Compressors
0285	Award	Novel Fluid Ring (F/R) Seal Systems for Railroad Axle Bearing
		Systems
0286	No DOE Support	Use of Pulse-Jet for Atomization of Coal/Water Mixture
0287	Complete	Automatic Variable Pitch Marine Propeller
0288	No DOE Support	Dickinson Pure Air Combustion (DIPAC) and Modified DIPAC (MODIPAC)
0289	Complete	An Earthquake Barrier
0290	Complete	Low Energy Ice Making Apparatus
0291	Complete	Selective Zone Isolation for HVAC System
	Complete	Roof Construction Having Membrane and Photo Cells
	Complete	"Therm-A-Valve" - Insulated Valve Coverings
	Complete	Highway Power Patcher
0295	Complete	Improved Method of Electroplating Aluminum for Corrosion
		Resistance
0296	Complete	Shower Bath Economizer
0297	Complete	Series (Two-Wire) V-Controller
0298	Complete	Three Tenths Degree Kelvin Closed Cycle Refrigeration System

PAGE 2-8 DATE: 30 JUNE 1993

0299	Complete	Process for Using Cocurrent Contacting Distillation Column
0300	Complete	Casing Stabbing Apparatus
0301	Complete	Pump Control System for Windmills
0302	Complete	Carri-Cel Impact Breaker and Counterflow Impact Rock Breakers
0303	Complete	Battery Heating Device
0304	Complete	Exfoliated Graphite Fibers
0305	Complete	Automatic Filter Network Protection, Failure Detection and
	•	Correction System and Method
0306	Complete	An Efficiency Computer for Heated or Air Conditioned Buildings
0307	Complete	Vortex Generators for Aft Regions of Aircraft Fuselages
0308	Complete	Binary Azeotropic, Hot Gas, Fat Extraction Process
0309	No DOE Support	Process of Smelting with Submerged Burner
0310	Complete	Portable Wastewater Flow Metering Device
0311	Complete	Auxiliary Truck Heater
0312	Complete	The "Jones AWT", a Micro-Computer-Based Automatic Well Tester for
	•	Use of Producing Oil Wells
0313	Complete	Process Controller for Stripper Oil Well Pumping Units
0314	Complete	Rolling Filter Apparatus
0315	Complete	Method of Processing Biodegradable Organic Material
0316	Complete	Thrust Impact Rock Splitter
0317	Complete	Edge-Illuminated Multi-Junction (VMJ) Solar Cell
0318	Complete	Bi-Polar Electrode for Hall-Heroult Electrolysis
0319		Removal of Hydrogen Sulfide from a Gas Stream
0320		Coal Gasification with Carbon Dioxide and Lime Recycling
0321	No DOE Support	Process for Recovery of Oil from Oil Shale Simultaneously
	• •	Producing Hydrogen
0322	Complete	Electrical Resistance Cooking Apparatus with Automatic Circuit
	•	Control
0323	Complete	Rolling Mill for Reduction of Moisture Content in Waste Material
0324	Complete	Method and Composition for Enhancement of Mycorrhizal Development
	-	by Foliar Fertilization
0325	Complete	Low Cost, Low Energy Machine and Method for Continuous Casting
	•	Non-Ferrous Strip and Composites
0326	Complete	A Mechanical Stemming Device for Use in Explosive Loaded Blast
	•	Holes
0327	Complete	Square Pattern Irrigation Sprinkler
0328	Complete	Multi-Directional Pre and Post-Heating Device for Thermal
	-	Flamecutting
0329	No DOE Support	Modularized Pneumatic Tractor with Debris Liquifier
0330	Complete	Vacuum Heat Treating Furnace and Quench System with Drop Transfer
0331	Complete	Cyclic Char Combustion for Engines, Boilers and Gasifiers
0332	-	Volk Pistachio Huller
0333	Complete	Laser Based Machine for Die and Prototype Manufacturing
0334		So-Luminaire Natural Daylighting Unit
0335	No DOE Support	Robotic Bridge Observation and Information System
0336	Complete	A Carbonaceous Selective Absorber for Solar Thermal Energy
		Collection and Process for Its Formation
0337	Complete	An Air Operated Hydraulic Power Unit
0338	Complete	Downhole Pneumatic Turbine Motor for Geothermal Energy
0339	Complete	Recycoil II
	-

ENERGY RELATED INVENTIONS PROGRAM - BRIEF STATUS REPORT

0340	Complete	Separation of Adsorbed Components by Variable Temperature
		Desorption
0341	Complete	High Pressure Liquid Jets as a Tool for Disintegrating Organic
		and Non-Organic Materials
0342	Complete	Raw Fines Medium Coal Washing System
0343	No Request Recvd	Electronic Octane
0344	Complete	Machine for Separating Concrete from Steel
0345	Complete	Tulleners Wave Piercer
0346	Complete	Ultra-Pure Water System for Hospitals
0347	Complete	Oxide Dispersion Strengthened Aluminum Alloys
0348	Complete	Hydrogen Sulfide Removal for Natural Gas
0349	No Request Recvd	Three Roll Tension Stand
0350	Complete	Method and Apparatus for Testing Soil
0351	Complete	Flash Gate Board

PAGE 2-10 DATE: 30 JUNE 1993

2.2 Brief Descriptions of Recommended Inventions

The following presents brief descriptions of each of the inventions recommended by the Office technology Evaluation and Assessment at NIST to the Energy Related Inventions Program office at DOE. Each description includes a brief description of the invention, a summary of the invention status, significant dates, status, and summary of development. The name of the inventor, primary contact for information, and DOE staff coordinator are also provided. The address of the contact is provided if an award has been made. The descriptions are presented in DOE number sequence. Section 3 presents four cross reference lists for locating specific invention descriptions. These lists provide cross reference between DOE No. and Inventor name, DOE No. and Contact name, DOE No. and Inventor state, and Doe No. and invention classification.

DATE: 30 SEPTEMBER 1989 PAGE 2-11

DOE No: 0001

DOE Coord: G. K. Ellis

Title: Demand Metering System for Electric Energy

Description:

The invention provides a means whereby a consumer's electric meter can be adjusted by the electric company to run at a faster rate at times of

greater loads upon the utility system -- load leveling.

Willard Graves Inventor:

State MD Contact:

Murray G Lowenthal

Status: No DOE Support

Status Date: 07/07/77

OERI No.: 000019

Patent Status Development Stage :

Patent # - 3683343 Concept Development

Development Stage : Concept Devel Technical Category: Miscellaneous

Recv by NIST : 05/23/75 Recom. by NIST : 02/12/76

Summary:

No area of appropriate DOE support could be identified.

DOE No: 0002

DOE Coord: G. K. Ellis

Title: Fuel Miser

Description:

The device is an attachment which can be used to retrofit a room thermostat with a synchronous motor- driven clock timer and an auxiliary heating

Contact:

element to enable it to have a temperature set-back cycle.

Inventor: Rita Paleschuck

State : NY

Rita Paleschuck

Status: Other Assistance

Status Date: 07/15/76

OERI No.: 000100

Patent Status

Not Applied For

Development Stage: Production & Marketing

Technical Category: Buildings, Structures & Components

Recv by NIST : 07/14/75 Recom. by NIST : 02/19/76 Recv by NIST

Summary:

No research and development required, since the device is on the market. A generic brochure was written and published on the "need for automatic temperature setback." Extensive distribution was accomplished through DOE's Office of Public Articles "supermarket handout" program and General

Services Administration's Consumer Information Center.

PAGE 2-12 DATE: 30 JUNE 1993

DOE Coord: J.Aellen DOE No: 0003

Title: Hydrogen Generation from Producer Gas by Oxidation- Reduction of Tin

Description:

A new approach to the generation of tonnage hydrogen from carbonaceous fuels. Two reactions:/ steam with tin, whereby hydrogen is produced, and the reduction of the tin oxide produced in the first reaction back to tin.

Inventor: Donald C Erickson

State :

Contact: Donald C Erickson Director of Research Energy Concepts Co. 1704 South Harbor Lane Annapolis MD 21401 301-266-6521

Status Date: 03/18/81 OERI No.: 000003 Status: Complete

Patent Applied For Patent Status Development Stage : Laboratory Test Technical Category: Other Natural Sources

: 05/07/75 Recv by NIST

Award Amount: \$ 80,820 Grant No: FG01-78IR10103

Recom. by NIST: 05/21/76 Award Date: 07/12/78 Contract Period: 07/12/78 - 03/18/81

A grant was awarded and completed for the grantee to identify the optimum operating conditions, and to do an economic study. Results showed efficiency less than predicted - which in turn, leads to marginal economics. There is a possibility for improvement with more R & D. Inventor $\frac{1}{2}$ Summary:

seeking licensee.

DOE No: 0004 DOE Coord: G.K.Ellis

Title: Power Conversion of Energy Fluctuations

A solid state device is claimed that can transfer thermal energy into Description:

usable electrical power with high efficiency, by cascading large numbers of

such circuits.

Joseph C Yater Inventor:

State MA Contact:

Joseph C Yater

Autumn Lane

Lincoln MA 01773

617-259-8544

Status Date: 06/15/77 Status: Complete OERI No.: 000230

Patent Status Patent Applied For Concept Development Development Stage :

Technical Category: Direct Solar

: 09/18/75 Recv by NIST Recom. by NIST: 06/04/76

Award Date : 06/04/76 Award Amount Contract Period: 06/04/76 - 06/15/77 Award Amount: \$ 40,400 Grant No:

A grant was awarded to define an adequate development plan. The plan was Summary: received and reviewed. Subsequent review indicated the scheme to be

incompatible with present state-of-art of micro- device manufacturing.

DATE: 30 JUNE 1993 PAGE 2-13 DOE No: 0005 DOE Coord: G. K. Ellis

Title: Diesel Engine Conversion System for Gasoline Engines

Description: The system is proposed for converting a standard gasoline auto engine into

a diesel engine

Inventor: George C Austin

State : CA Contact: George C Austin Austin Tool Company

2239 North Loma Ave. South El Monte CA 91605 213-442-7338

Status: Complete Status Date: 11/20/78 OERI No.: 000088

Patent Status Not Applied For Development Stage : Engineering Design

Technical Category: Combustion Engines & Components

Recv by NIST : 06/30/75 Recom. by NIST : 08/12/76 Award Date : 11/20/77

Award Amount: \$ 18,000 Grant No: EM78-G-01-4263

Contract Period: 11/20/77 - 11/20/78

Summary: A grant was awarded for a marketing study was awarded, and completed.

Significant interest by those surveyed was expressed in the Austin diesel

conversion, if they were having their engine rebuilt.

DOE No: 0006 DOE Coord: D. G. Mello

Title: Micro-Carburetor

Description: A new kind of carburetor which is claimed to be fuel-saving and

pollution-reducing.

Inventor: Albert B Csonka

State NY

Contact: Albert B Csonka

FERRO Techincal Co. 109 Larchmont Road Buffalo NY 14214 716-833-3122

Status: Complete Status Date: 02/13/80 OERI No.: 000225

Patent Status Patent Applied For Development Stage : Engineering Design

Technical Category: Combustion Engines & Components

Recv by NIST : 09/15/75

Recom. by NIST : 08/17/76 Award Date : 09/15/77

Award Amount: \$193,500 Grant No:

Contract Period: 09/15/77 - 12/17/80

Summary:

A fixed price development contract of \$193,500 was awarded to build a working micro-carburetor, sized to fit a late model, standard 350 cubic inch V-8 engine. Contract is being administered by Office of Transportation Programs, DOE. Carburetor was tested by NASA's Jet Propulsion Lab and report #JPL 81-75, August, 1981 shows improvements ranging from 9 to 18%

over standard carburetor.

DOE No: 0007 DOE Coord: G. K. Ellis

Title: Hydraulically Powered Waste Disposal Device

The device is to replace conventional food waste disposal units which are Description:

powered by electric motors.

Inventor: David Virley

State : CA Contact: Len Spelber

Wastemate Corporation 4830 Viewridge Avenue San Diego CA 92123

619-292-3122

OERI No.: 000387 Status: Complete Status Date: 08/20/79

Patent Status Patent # - 3700178 Development Stage : Production & Marketing

Technical Category: Miscellaneous

Recv by NIST : 11/10/75 Recom. by NIST : 08/26/76 Award Date : 08/20/78 Award Amou Contract Period: 08/20/78 - 08/20/79 Award Amount: \$ 28,000 Grant No: EM78-G-01-5034

A grant was awarded to prepare a qualified business plan to assist in Summary:

acquiring the necessary capital funding. The company went public and raised \$1.5 million which was used mainly to buy production tools. The company is now in production. Follow-on financing desired by grantee.

DOE No: 0008 DOE Coord: D.G.Mello

Title: Inertial Storage Transmission

Description:

The device is a system for improving the efficiency and reducing the fuel consumption of a motor vehicle, utilizing a regenerative hydraulic system to store the kinetic energy from deceleration for use in accelerating the

vehicle.

Inventor: Vincent E Carman Contact:

State : OR Fred Tunmore

Advanced Energy Systems Unit #3, 595 Taylor Way Belmont CA 94002 503-256-1111

OERI No.: 000423 Status Date: 08/31/82 Status: Complete

Patent # - 3903696 Patent Status Prototype Test Development Stage :

Transportation Systems, Vehicles & Components Technical Category:

Recv by NIST : 11/12/75 Recom. by NIST : 09/03/76 Award Date : 07/21/81 Contract Period: 07/21/81

Award Amount: \$ 49,541 Grant No: FG01-81CS15069

- 08/31/82

A grant of \$49,541 was awarded for final preparation of vehicle to present Summary:

to EPA for testing. Olsen Corporation has tested the device. Ownership changed recently and financing is at a reputed level of \$3.2 million with 7

employees. Product is available for distribution. Engineering details

available from company.

DATE: 30 JUNE 1993 PAGE 2-15 DOE No: 0009 DOE Coord: D. G. Mello

Title: Heat/Electric Power Conversion via Charged Aerosols

Description: This device is to convert thermal energy to electric energy without the use

of moving parts.

Inventor: Alvin M Marks

State :

NY

Contact:

Alvin M Marks

Marks Polarized Corp. 153-16 Tenth Avenue Whitestone NY 11358

Recv by NIST : 08/04//5 Recom. by NIST : 09/13/76 : 03/01/78

Award Amount: \$ 50,000 Grant No: EU78-G016225

Contract Period: 03/01/78 - 08/31/78

A grant was awarded to construct and test an Electro Gas Dynamics Summary:

DOE No: 0010 DOE Coord: G. K. Ellis

Title: Scrap Metal Preheating Method and Apparatus

Description: The device provides a means of extracting waste heat from hot ingots and

billets and utilizing this waste heat to preheat scrap steel prior to

placing it in an electric-arc furnace.

Inventor: Harrison Robert Woolworth

State : WA

Contact:

Harrison Robert Woolworth International Preheater

P.O. Box #88218

Tukwila Branch Seattle WA 98188

Recom. by NIST: 09/29/76 Award Date: 12/23/77 Award Amount: \$170,000 Grant No: EM78-G-01-1797

Contract Period: 12/23/77 - 12/23/78

A grant was awarded to design and fabricate hardware; and to operate a system, Summary: utilizing waste heat for preheating scrap steel, in a working specialty steel mill. A 20% energy saving was demonstrated. Steel company interest has developed. Inventor

obtained an SBA guaranteed loan, has built an operating unit at a steel pant in Knoxville, Tennessee, and has several additional \$500,000 units on order. The company

employs three people.

DOE No: 0011 DOE Coord: D. G. Mello

Title: Solar Collector

This is a composite extruded aluminum section -- incorporating a Description:

cylindrical absorption tube that carries the working fluid. The collector surface is in the form of an Archimedes Spiral and a parabolic curve to maximize the collection angle and eliminate the need to reposition the

collector.

Ronald H Smith Inventor:

State : CA

Contact:

Ronald H Smith 150 Green Street

San Francisco CA 94111

Direct Solar Technical Category:

Recv by NIST : 09/09/75 Recom. by NIST : 09/29/76

Award Date : 05/17/78 Contract Period: 05/17/78 Award Amount: \$ 46,884 Grant No: EM78-G019214

- 11/19/80

A grant of \$46,884 was awarded to Solergy, Inc., to initiate a series of marketing studies to determine the attitudes of Western U.S. manufacturers, Summary:

distributors and designers, regarding prospects for successful installation of passive solar systems in new buildings. Survey results were used by Solergy to aid their marketing and manufacturing plans. Company is now out

of business.

DOE No: 0012 DOE Coord: G.K.Ellis

Title: High Frequency Energy Saving Device

This invention consists of a high-frequency generator, to excite one of Description:

several fluorescent lights, replacing the normal ballast transformer, and

allowing the system to operate at substantially higher efficiency.

Status: No DOE Support Status Date: 10/31/77 OERI No.: 000565

Patent Status Patent Applied For Development Stage : Concept Development

Technical Category: Miscellaneous

Recv by NIST : 01/02/76 Recom. by NIST: 08/05/77

The DOE program office recommended that the inventor be assisted by providing a specialized, highly sophisticated computer analysis of his Summary:

device. ERIP requested a proposal to this effect, in October, 1977. To date there has been no response from the inventor indicating the type of device

he would like tested, nor giving any specification or goals for the

development.

DOE No: 0038 DOE Coord: D. G. Mello

Title: Reduction Volatilizations

The purpose of this invention is to produce volatile gases, liquids, and Description:

combustible coke, by passing pulverized coal through a eutectic molten

metal bath of lead and sodium.

Inventor: John McCallum

Contact: State : OH John McCallum

OERI No.: 000558 Status Date: 07/01/79 Status: Complete

Patent Status Not Applied For

Development Stage : Prototype Development Technical Category: Industrial Processes

Recv by NIST : 01/02/76

Recom. by NIST: 08/11/77 Award Date: 08/28/78 Award Amount: \$ 49,740 Grant No: EU78-G016594

Contract Period: 08/28/78 - 04/20/79

A grant of \$49,740 was awarded and completed for a 5 month experiment Summary:

program to study chemical reactions of the process, measure all variables, outline plan for design of prototype plant and examine economic feasibility or large scale production. Ohio State University was the sub-contractor. Final report suggests that process is not economically feasible at this

time.

DOE No: 0039 DOE Coord: G. K. Ellis

Title: Lawler Steam Generator and Lawler System of Thermal Oil Recovery

A small, high pressure, high temperature, mobile steam generator which can Description:

be economically operated at an oil well installation.

Inventor: James H Lawler

James H Lawler State CA

Status Date: 02/01/79 Status: No DOE Support OERI No.: 000219

Patent # - 3543732 Patent Status Development Stage: Engineering Design Technical Category: Fossil Fuels

Recv by NIST : 08/29/75 Recom. by NIST: 08/18/77

On Feb. 1, 1979, the inventor was advised that DOE would not support his invention as it represented no advance in the state-of-the-art, and because having sold his equipment, he no longer had it available for test. Summary:

DOE No: 0040 DOE Coord: G. K. Ellis

Title: Improved Equipment and Process for Production of Blue Water Gas

The main features of the invention are to use automatic valves for Description:

controlling the blue gas process, a square reactor bed with a rotating grate which will give positive ash removal -- all of which permits a faster cycling between the "run" and the "blow" of the process.

Roland P Soule Contact: Inventor:

Roland P Soule NY State

Status Date: 06/12/81 OERI No.: 000734 Status: No DOE Support

: Not Applied For Patent Status Development Stage: Concept Development Technical Category: Other Natural Sources

Recv by NIST : 03/08/76 Recom. by NIST: 08/18/77

Summary:

No feasible method of DOE support could be identified. Various options were considered, and several tentative expressions of interest from others were made known to the inventor. He declined each of them. In his mid-eighties, he was not interested in personally pursuing the development. Nor was he interested in dealing with a small company. Also, he disagreed upon the need for establishing economic and technical feasibility.

Inventor failed to respond to repeated requests for a proposal.

DOE No: 0042

DOE Coord: P.M. Hayes

Title: Flue Baffle Assembly

Description:

The invention is a baffle device to be inserted in hot air passage of old, solid fuel-burning furnaces that have been converted to oil. The device increases heat transfer and reduces fuel gas temperature, thereby saving

fuel.

Inventor:

Everett Millard

State : IL Contact: Everett Millard

4030 Irving Park Road Chicago IL 60641 312-777-4030

Status: Complete

Status Date: 09/08/80

OERI No.: 000347

Patent Status : Not Applied For Development Stage : Limited Production/Marketing Technical Category: Buildings, Structures & Components

: 09/03/75 Recv by NIST

Recom. by NIST: 09/23/77 Award Date: 06/29/79

Award Amount: \$ 30,000 Grant No: FG01-79IR10277

Contract Period: 06/29/79 - 09/08/80

Summary:

A grant of \$30,000 was awarded and completed, to perform a six-task study and survey of existing coal fired heating systems that have been converted to oil and which may be modified profitably to accept the inventor's energy-saving flue baffle device. The survey failed to show a sufficient number of heating systems to warrant commercialization of the baffle. However, a secondary business developed as a result of the survey, in which the inventor measures flue gases that form the basis for optimizing

air/fuel ratio to save energy.

DOE No: 0043 DOE Coord: J. Aellen

Title: Thermal Gradient Utilization Cycle

The invention describes a new kind of power plant cycle using low grade, low temperature energy which does not need copious amounts of water for its Description:

Title: Oil Well Pump Jack

Description:

A new design for a pump that would replace the conventional beam pumps in pumping oil wells. It utilizes longer strokes than generally used by the beam pumps and has slower rates of acceleration/deceleration, reducing the power required to overcome the inertia of the sucker rods and other moving parts.

Summary: A grant of \$90,000 was awarded to laboratory and field test the unit, and

to document savings and find optimum application. The test results showed 17% of the energy used for water heating could be saved by using this invention. Mr. Haws sold his invention to Metlund Enterprises of Stockton, CA in exchange for royalties. Methlund Enterprises had sold about 400 units as of April, 1986.

DOE Coord: P.M. Hayes

Title: MIRAFOUNT

Description:

A cattle waterer which is functional in the coldest climate without the use of an immersed electric or gas heater. It consists of a heavily insulated

tank with a floating, insulated cover and a float valve assembly.

Mervin W Martin Contact: Inventor:

State MO Carter Thompson

Status: No DOE Support

Summary:

A one-year, \$56,325 grant was issued to design and demonstrate a low-head, high-volume pump. The County of Maui in Hawaii is cost-sharing. See recommendation #301 for related work. First season test proved concept. Winter 1986, tested 2nd generation product. Present throughput rate uneconomical in urban test. Device installed and working successfully on U.S. Fish and Wildlife bait pond in Hawaii. Grant work not completed. No

final report available.

DOE No: 0276

Award Amount: \$ 80,000 Grant No: FG01-86CE15282

Recv by NIST : 07/31/84 Recom. by NIST : 05/31/85 Award Date : 09/30/86 Contract Period: 09/30/86 - 05/03/88

Summary:

A grant awarded to fabricate and test the fiber composite material. The results showed a four-fold increase in loss factor compared to the plain fiber composite. It thus appears highly significant in various damping applications that are important in both military and civilian sector products. Spaulding Composites Company has licensed the technology and intends to market it widely. Use of such advanced composites, they estimate, in aircraft alone will more than quadruple in just three years.
