# NATIONAL TYPE EVALUATION PROGRAM

## NIST Indices of NTEP Device Evaluations

The indices in this edition replace those in all previous editions and supplements of NCWM Publication 5. The indices list all ACTIVE, EFFECTIVE, AND INACTIVE Certificate of Conformance numbers issued since January 1, 1986. In the index under "Pub 5 Edition" column, the number indicates the edition of Publication 5 in which the facsimile certificate may be found. An "I" in that column indicates that the certificate may be found on the Internet at [www.nist.gov/ntep](http://www.nist.gov/ntep).

# Introduction to NIST Indices of NTEP Device Evaluations

## 1. General

At the request of the States and in the interest of serving industry, the NIST Office of Weights and Measures initiated a policy in January 1998 of making all newly-issued National Type Evaluation Program (NTEP) Certificates of Conformance (CCs) available on the Internet. This policy was enthusiastically received and accepted. Thus, at the July 1998 Annual Meeting of the National Conference on Weights and Measures (NCWM), the NTEP Committee decided to discontinue the formal publication of NCWM Publication 5 in lieu of certificates being available on the Internet. CCs on the Internet may be accessed at [www.nist.gov/ntep](http://www.nist.gov/ntep). All NTEP CCs are now available on the Internet. The Fifth through Tenth Editions of NCWM Publication 5 are presently available for purchase from the NCWM. Hard copies of CCs can also be obtained from the manufacturer or from your local weights and measures jurisdiction.

Many States and manufacturers, however, still find the need to have a "hard" copy of indices of NTEP CCs. The listings in the indices that follow include all CCs that have been issued from January 1, 1986 through August 3, 1999. The last column in the indices of Sections 3, 4, and 5 lists the edition of NCWM Publication 5 where a hard copy of the certificate can be found. All CCs issued after January 1, 1998 will have an "I" in that column to indicate that the certificate may be found on the Internet. The indices also list EFFECTIVE CCs. EFFECTIVE CCs will not be placed on the Internet until they are signed by the Chief of the Office of Weights and Measures and become ACTIVE.

**The policy of the National Institute of Standards and Technology is to use metric units of measurement in all of its publications. Since this publication is an index of devices evaluated by the National Type Evaluation Program, and many devices listed here are not offered by the manufacturer in a metric version, the information is listed as submitted by the manufacturer and may contain references only to inch-pound units.**

## 2. Guide to Certificate Numbers and Letters

CCs are assigned numbers which identify the year the CC was issued followed by a sequential three digit number. For example, CC number 91-083 was the 83rd CC number assigned in 1991.

CC numbers may also be followed by one or more of the following identifications:

- A Addendum
- P Provisional
- PN Pre-NTEP
- Amended Amendment

A Identifies an addendum to a CC when changes are made to the CC's contents. A number following the letter "A" designates the number of times an addendum has been issued for the CC. Inconsistencies within the CC format may exist in CCs generated in previous years before firm NTEP policy was established. Standard practice now dictates the addendum sequence shown in the following examples: 91-083, 91-083A1, 91-083A2, 91-083A3, etc.

P Identifies a provisional CC. A provisional CC is issued based on the manufacturer's data when an NTEP participating laboratory performing type evaluation cannot fully test the device. The addenda sequence for provisional CCs is as follows: 91-083P, 91-083PA1, 91-083PA2, 91-083PA3, etc. When a provisional CC is upgraded to a full CC the P suffix is dropped and the standard addendum sequence begins as follows: 91-083, 91-083A1, 91-083A2, 91-083A3, etc.

Provisional and full CCs are equivalent in stature; provisional CCs do not reflect substandard devices. Provisional CCs indicate an inability on the part of NTEP to conduct the complete list of tests specified for the device.

- PN Identifies a provisional Pre-NTEP CC which has been issued based on the NTEP policy of accepting results of device type evaluations conducted by State jurisdictions before the NTEP program was established.
- Amended Identifies an amended CC. In previous years, changes were made to CCs to correct errors or for editorial purposes. In these cases the CC was identified as 91-083 Amended, and, if superseded, the "Amended" was dropped in favor of "A" for an addendum. The use of the term "Amended" has been dropped and replaced by the "A"; however, older CCs may still be identified as "Amended". In the "Index of Device Evaluation" listings in this publication, "Am" is used in place of "Amended".

### 3. Certificate Status

The status of Certificates of Conformance (including pre-NTEP and provisional certificates) listed in Publication 5 is identified with one of the following designations:

- **ACTIVE** In force with a hard copy of the CC issued and distributed.
- **EFFECTIVE** Equivalent to ACTIVE, but a hard copy of the CC has not yet been issued and distributed. Therefore, a hard copy cannot be included on the Internet.
- **INACTIVE** A CC which was previously ACTIVE but the manufacturer has chosen to no longer manufacture the device for commercial use (applications where Handbook 44 applies) or pay the annual maintenance fee. Devices already manufactured, installed or in inventory, but not yet sold, may be used, sold, repaired, and resold, under an Inactive Certificate of Conformance. **An inactive CC does not invalidate those devices already installed or in the distribution pipeline as does a "Withdrawn" CC.** As of May, 1993 this also identifies the status of provisional load cell CCs for which full CCs were not pursued by the manufacturer. If the status of a certificate is identified as INACTIVE in the listings, the status will be followed by the date the manufacturer declared the certificate was INACTIVE. This means that no devices covered by the certificate will be manufactured for commercial use after that date.
- **MULTI CC** These certificates are ACTIVE CCs which have been issued to recognize an optional feature(s) for equipment listed on a number of different CCs. For example, a MULTI CC might be issued to recognize the use of a cash acceptor option on multiple different models of retail motor fuel dispensers, each of which is covered by an existing CC. MULTI CC addenda are issued as a cost-effective alternative to revising many separate CCs to recognize a single option.  
  
A maintenance fee is not assessed for MULTI CC certificates; however the manufacturer must pay a maintenance fee on the CC issued to the basic device in order to maintain it as an ACTIVE CC.
- **WITHDRAWN** A certificate that has been found to have deficiencies in the type or when production of devices does not meet type. **The certificate is no longer valid**, and devices covered under the certificate may no longer be manufactured or remanufactured for commercial applications. A Withdrawn CC invalidates those devices already installed and/or in the distribution pipeline.

#### 4. Copies of Certificates

Copies of all ACTIVE Certificates of Conformance issued from January 1, 1986 through December 31, 1997 are included in the Fifth through Tenth Editions of Publication 5. Beginning January 1998, all ACTIVE CCs may be accessed on the Internet at [www.nist.gov/ntep](http://www.nist.gov/ntep). When an EFFECTIVE CC is an addendum, a hard copy of its previous CC is included in one of the previous editions or may be found on the Internet as indicated in the last column of the indices.

#### 5. Guidelines for When Certificates are Required

Each State determines which devices require an NTEP CC. However, based upon the Handbook 44 requirement G-A.6. of the General Code and the policies established through NTEP, the following guidelines are usually applicable after the date the State requires devices to have NTEP CCs. In general, NTEP conducts evaluations only on those types of devices for which type evaluation criteria have been established. If NTEP CCs are not available for some types of devices or for "one-of-a-kind" devices, the field enforcement official should conduct a more extensive initial inspection of these devices and apply all applicable Handbook 44 requirements during the field inspection.

- Devices (1) purchased or loaned for commercial use, (2) noncommercial devices subsequently placed into commercial use, and (3) devices used for enforcement of highway weight enforcement laws are generally required to have an NTEP CC. "One-of-a-kind" devices must have prior approval by the State Director of Weights and Measures. Devices installed before the State required devices to have NTEP CCs may have been "grandfathered" by a State prior to its adoption of NTEP requirements; check with the State Weights and Measures Director.
- Main elements added to an existing device, such as the replacement of a weighbeam with a load cell and digital indicator, must have an NTEP CC, unless there are no NTEP CCs for the type of replacement elements installed.
- An NTEP CC applies only to the specific design (model, type, series, or family) of a specific manufacturer. The parameters for a particular family of devices are defined on the CC.
- A CC does not apply to a similar device made by another manufacturer even if the design is copied from a device with a CC because the quality control aspects and any specialized manufacturing techniques may not be a part of the process of the other manufacturer. That device must be submitted for a type evaluation.
- A company that is marketing a device (e.g., scale, indicator, load cell, etc.) from a manufacturer and relabeling the device under its own name must submit a separate request for a CC. The request must include a statement that, except for the change in proprietary markings, the device is not changed from the original design. The original manufacturer must also send an authorization letter.
- If a company or individual buys NTEP load cells and an NTEP indicating element and then manufactures a scale from the parts, the complete scale must be submitted for type evaluation to assess its performance characteristics for compliance with Handbook 44. A fully electronic scale system consists of three main elements: an indicating element, load cell or cells, and a weighing/load-receiving element.
- If a company or individual makes changes to a device to the extent that the metrological characteristics are changed, that specific device is no longer traceable to the NTEP CC.

- If companies or individuals repair or remanufacture a device, they are obligated to repair or remanufacture it consistent with the manufacturer's original design; otherwise, that specific device is no longer traceable to the NTEP CC.
- Load cells from the same or a different manufacturer may be substituted into a scale provided that the load cells used in the scale originally were covered under a separate CC and the load cells to be substituted: (1) have been evaluated separately and have a CC; (2) have as many or more verification scale divisions for the same application as the load cells previously used in the scale; (3) have a minimum verification scale division that is suitable for the application; (4) are the same basic type as the load cells being replaced; (5) can be placed in the scale without modification to the basic design of the load cell mounting assembly; and (6) have a capacity that is greater than or not less than 85 percent of the capacity of the original cell.
- If a company modifies the device by replacing a lever system with load cells, complete NTEP evaluation on the modified type is required in order for the device to be covered by an NTEP CC.
- If a company converts a device from mechanical to electro-mechanical (i.e., installing a load cell into a steelyard rod), the change is considered a modification of type and is covered by the CC without additional testing.
- If a company wants to convert a vehicle scale to include an optional application for use as a livestock scale, the application as a livestock scale must be listed on the CC. The request must be on the application when it is submitted for testing, or an application must be submitted to add the livestock scale option to an existing vehicle scale CC. For the evaluation of a *new* vehicle scale with a livestock scale option or an addition of the livestock scale option to an *existing* CC, evaluation of the livestock scale must be performed.

## Company Names and Addresses

A&D Engineering  
1555 McCandless Drive  
Milpitas, CA 95035  
Mr. Jerry Wang  
(408) 263-5333 FAX (408) 263-0119

Abacus Scales

# Last Serial Numbers for Models on Inactive Certificates of Conformance as of December 31, 1998

*(This section is a list of the last serial number of a device manufactured before the CC became INACTIVE)*

Company Name	CC Number	Model Number	Serial Number	Serial Number Description
Airway Scale and Mfg Co., Inc.	90-142	AW900B	AW9534	No information provided.
	90-141	AW600B	AW9557	
	90-140PN	XX XL YY	AW9535	
	93-101	MTS	AW9500	
Alkon Corporation	86-033	LCI-1	58099	No information provided.
Analogic Corporation	87-075	AN5322	Not on file	No information provided.
	87-073	AN5315	Not on file	
	91-083	AN3050	Not on file	
Ascom Hasler Mailing Systems, Inc.	90-019A2	MPS100RN	RN 0991	No encoding information provided.
	90-019A2	MPS100N	MN 0996	
	90-019A2	3000N	N 01928	
	90-019A2	3100N	NR 02499	
AT&T Global Information Solutions	87-032	2522	No longer on file	No information provided.
	88-006	2157-30XX	No longer on file	
	88-005	2061-54XX	21-18926181	
	88-244	4522	None manufactured	
	88-245	4526-0102	None manufactured	
	87-024	2157	No longer on file	
	88-257	2126-1400	21-20549542	
	90-011	4000-XX1X	30-20036825	
Avery Weighing Technology	87-071A1	3359	w/o tower: 90809100	No information provided
	87-071A1	3359	w tower: 90813100	
Bennett Pump Company	88-083	100	Not on file	Bob Fonger of Bennett states they have no serial number records but gives assurance that no models are in the distribution chain.
	89-072	OMNI-OT	Not on file	
	90-036PN	81	Not on file	
Berkel Incorporated	88-171	688LS	88035030	No information provided.
	88-181	680 MKII	Unknown	
	90-095	RS300	5SW0050	
	90-095	RS150	5S890050	
	90-154	623LS	C1300796	
	88-179A1	1770	K0428040	
	92-037	A100E	93158038	
	92-038	A600/15	59061425	
	92-038	A600/30	59069042	
	92-193	CX15	92078050	
	92-193	CX12	59071255	
	87-009	522	15790	

Company Name	CC Number	Model Number	Serial Number	Serial Number Description
Bizerba United States, Inc.	89-009A1	Pro 6000	1024050	No information provided.
	86-023	PRO 7000	1239500	
	86-028A	PRO 7400/7500	1239500	
	90-053	PRO 9000	1239500	
	91-073	MCI-W	1241200	
Business Technologies, Inc.	93-055	VP 4	1040	No information provided.
Canmax Retail Systems, Inc.	87-025	FULL-Serve	Not on file	No serial numbers provided. Last product shipped 2/93.
Cardinal/Detecto Scale Mfr. Co.	88-276	740 & 750	Not on file	89-005: Last device produced in 1996; serial number should have prefix no no higher than "96" (the year of manufacture). 88-276: Prefix should be no higher than 9712 (year and month of manufacture). 88-061A1: This CC was a duplication of 95-162 which remains active. 95-014: No devices ever sold.
	89-005	738-CBW	Not on file	
	88-061A1	PRC-H & SRC-1	Not on file	
	95-014	MS-950 & MS-850	Not on file	
CASIO, INC.	92-041	CE-4600	6209260	No information provided.
	92-048	TK-2600	6206550	
Cedarapids, Inc.	92-072	HMS 3006	11052201	No information provided.
Centrodyne Corporation of America	86-029	630	1020	No information provided.
Control Logic Corporation	88-234	CLC 1100	1550	Serial Nos. are not encoded with date of manufacture.
	88-234	CLC 1200	2019	
Daniel Industries, Inc.	90-060	1405-15-SP	96-520XXX	The first two digits indicate the year of manufacture. The two digits following the dash indicate the week of the year in which the item was manufactured.
	90-122A1	PT	96-500019	
	90-028A1	LR	96-500305	
Exact Equipment Corporation	88-184A1	951	9W3959	1st no. is last digit of year, 2nd character is bi-weekly code of year, A=1st two weeks, B=2nd two, etc. Rest of digits is serial number.
	89-107	921, 921R	2K035182	
General Electronic Systems, Inc.	88-087	4535	908185	88-087: Last date of mfg:8/89 88-088: Last date of mfg:5/90 88-254: Last date of mfg:10/90 89-025A2: Last date of mfg.:8/91
	88-088	531	905160	
	88-254	Freedom II	010294	
	89-025A2	Econo-Weigh	108011	

Company Name	CC Number	Model Number	Serial Number	Serial Number Description
Graco, Inc.	90-164	(P/N) 222-560	No S/N available	No encoding information available.
	93-020A1	222-433	1 6525	
	93-020A1	222-431	A 11528	
	93-020A1	222-432	A 677	
Hardy Instruments, Inc.	90-075	HI2150WC-(XX)	2699	This product is no longer being manufactured as of 10/96.
Hobart Corporation	88-051	1841	UR	All Equipment has a manf. Date field "MD" as follows: First Letter = Month A-Jan, E-Feb, R-Mar, P-Apr, Y-May, U-Jun, L-Jul, G-Aug, T-Sep, C-Oct, N-Nov, M-Dec. Second Letter = Year: A-1980, B-1981, C-1982, D-1983, E-1984, F-1985, G-1986, H-1987, J-1988, K-1989, L-1990, M-1991, N-1992, P-1993, R-1994, S-1995, T-1996, U-1997, V-1998, W-1999, X-2000, Y-2001, Z-2002, A-2003 (The cycle repeats). 92-062: Month/date code (MD) of last model mfg'd. on data plate.
	88-052	1865	UR	
	89-091A2	GT6000	MP	
	92-062	1800	MF	
	92-062	1840	TF	
	88-053A1		NM	
Howe Scale Company	88-044	9000	A038156	No information provided. 94-007: First 2 digits (90) = year, Second 2 digits (08) = month, Remaining digits 100558 = Sequential order number
	89-087A1	HR-50DK	45047	
	89-087A1	HR-50WK	45044	
	88-178A1	34	3450093	
	94-007	E6970	90 08-100558	
IBM Corporation	89-148	4687-2	23-V4689	No encoding information provided.
	91-067	4684-xxx	00-46049	
	92-132	469601	41-21252	
	92-133	**96ORD	SC5728020	
Indiana Scale Company Inc.	92-060	IN-20	90634-610	Not date coded, but shipped 11/92
Industrial Data Systems, Inc.	90-059	Matrix 500	6870	Last shipment date was 10/28/93.
Interface, Inc.	88-038P	SSB	Not on file	These are "not-for-legal-trade" devices.
	88-040P	MB	Not on file	
International Weighing Systems, Inc.	88-231	NCD 1400	9707.14493	97 (year); 07 (month). 14493 (serial no.)
Interquip	97-107	COMPUREG 1L	IQ10971646	No information provided
InterSystems, Inc.	88-294	Masterweigh IV-A	06931002273	No coding information given.
	90-021	Masterweigh IV	078848CT009	
	92-043	Masterweigh V	05961006083	

Company Name	CC Number	Model Number	Serial Number	Serial Number Description
Ishida Co. Ltd.	90-031	MG-2500	0011743	1st no. is last digit of year, 2&3 are month, rest are the serial number.
	89-143	MG-2500	0011743	
Livingston Seed Company	92-046	A & B	B=B-2670	No coding information provided
	92-046	A & B	A = A-2822	
Marcum Fuel Systems, Inc.	95-108	APEX MXX-XXXXXX	960020	No encoding info provided.
Mettler-Toledo, Inc	87-004A5	PJxxxG	P36086	No coding information given.
Mettler-Toledo, Inc.	89-080	8806	Not on file	xxxxxx-x XX (first 6 digits = serial number; next digit is manufacturing plant code; last two digits = date of manufacturing).
	90-085	XX96	Not on file	
	87-105A1	M8141/8141	Not on file
