Accreditation Program

NISTIR 90-4280

MARCH 1990

U.S. DEPARTMENT OF COMMERCE
National Institute of Standards and Technology
Gaithersburg, Maryland 20899

PREFACE

The National Institute of Standards and Technology's National Voluntary Laboratory Accreditation Program (NVLAP) improves the competence of testing laboratories and the reliability of laboratory measurements. NVLAP determines laboratory ability to meet established criteria and technical requirements, for accreditation of specific test methods, through on-site assessments by technical experts and laboratory participation in proficiency testing programs. Publication of results of proficiency testing and participation in standards development contribute to improved test methods and laboratory performance.

The accredited laboratories have been found competent to perform the specific test methods shown. They have the skilled people, necessary facilities and equipment, and documentation and quality assurance systems to produce reliable test data. We recommend that consideration be given to the use of these laboratories whenever their accredited testing capabilities satisfy testing needs.

This Directory lists laboratories that have been accredited, as of March 1, 1990, under the NVLAP procedures. Indexes A, B, and C list the accredited laboratories (for all programs except Asbestos) alphabetically by name, by field of testing, and by state, respectively. Each laboratory's scope of accreditation, which lists the specific test methods for which it is accredited, is presented in Index D. Index E lists the accredited Asbestos laboratories alphabetically by city within state.

The period of accreditation is one year. A laboratory can be accredited until January 1, April 1, July 1, or October 1 of the following year; its accreditation will terminate on that date unless renewed by that date to remain in force. Users of this Directory who are considering selection of accredited laboratories should be aware of the renewal date and independently verify if the laboratory has retained its accreditation, for applicable test methods, at the time its services are to be provided. Current information on the accredited status of a laboratory can be obtained:

- (1) directly from the laboratory;
- (2) by writing to: Chief, Laboratory Accreditation Program
National Institute of Standards and Technology
Bldg. 411, Room A124
Gaithersburg, MD 20899
- (3) by computer-to-computer communication with the NVLAP
electronic bulletin board on 301-948-2058;
- (4) by FAX on 301-975-2128; or
- (5) by calling NVLAP on 301-975-4016.

PROGRAM SUMMARY STATEMENT

The National Institute of Standards and Technology (NIST) administers the National Voluntary Laboratory Accreditation Program (NVLAP). NVLAP accredits public and private testing laboratories based on evaluation of their technical qualifications and competence for conducting specific tests or types of tests in specified fields of testing. Accreditation is based on criteria published in the Code of Federal Regulations as part of the NVLAP procedures. Accreditation is granted following successful completion of a process which includes submission of an application and payment of fees by the laboratory, an on-site assessment, resolution of any deficiencies identified during the on-site assessment, participation in proficiency testing, technical evaluation, and administrative review. The accreditation is formalized through issuance of a Certificate of Accreditation and Scope of Accreditation and publicized by announcement in various government and private media.

NVLAP accreditation is available to commercial laboratories, manufacturer's in-house laboratories, university laboratories, and Federal, State, and local government laboratories. Foreign-based laboratories may also be accredited if they meet the same requirements as domestic laboratories and pay any additional fees required for travel expenses.

NVLAP provides an unbiased third party evaluation and recognition of performance, as well as expert technical assistance to upgrade laboratory performance. NVLAP accreditation means that the laboratory's quality system, staff, facilities and equipment, calibration procedures, test methods and procedures, records, and test reports have been evaluated and found to meet NVLAP criteria. NVLAP accreditation does not imply any guarantee (certification) of laboratory performance or product test data; it is solely a finding of laboratory competence.

A Directory of Accredited Laboratories is published once each year listing the name, address, phone number, accreditation renewal date and scope of accreditation for each accredited laboratory. Supplements to the Directory are published in the Federal Register quarterly to cover interim accreditation actions, including initial accreditations, renewals, suspensions, terminations, and revocations.

A laboratory may cite its accredited status and use NVLAP logos on reports, stationery, and in business and trade publications provided that this use does not imply product certification.

Technical Experts

NVLAP uses technical experts to assess and evaluate the laboratories as described below. These individuals, knowledgeable in the testing field being evaluated, may be engineers or scientists currently active in the field, consultants, college professors or retired persons. They are selected on the basis of their professional and academic achievements, experience in the field of testing, management experience, and tact in dealing with people. Their services are generally contracted as required; they are not NVLAP staff members.

Assessors are selected to conduct an on-site assessment of a particular laboratory on the basis of how well their individual experience matches the type of testing to be assessed, as well as absence of conflicts of interest. The laboratory has the right to appeal the assignment of an assessor and may request an alternate.

Evaluators are selected to review the record of the laboratory as a whole, including the application, assessment report, deficiencies, corrections to deficiencies, and proficiency test results and, based on this record, to recommend whether or not a laboratory should be accredited. The evaluators are matched to the type of testing being evaluated and are selected to avoid conflicts of interest.

On-Site Assessment

Before initial accreditation and periodically thereafter, an on-site assessment of each laboratory is conducted to determine compliance with the NVLAP criteria. Assessors use checklists developed by NVLAP so that each laboratory receives an assessment comparable to that received by others. However, assessors have considerable latitude to make judgments about a laboratory's compliance with the NVLAP criteria, based upon the assessor's experience and any unique characteristics of the laboratory.

The time needed to conduct an assessment varies, but two days is the norm. Assessments are conducted with as little disruption as possible to the normal operations of the laboratory. During the assessment the assessor carries out the following functions:

- meets with management and supervisory personnel responsible for the laboratory's activities to review the assessment process and to set the assessment agenda;
- examines the laboratory's quality assurance system, selects and traces the history of one or more samples from receipt to final issuance of test reports, conducts a thorough review of the laboratory's quality manual or equivalent, evaluates the training program, examines notebooks or records pertaining to the samples, checks sample identification and tracking procedures, determines whether the appropriate environmental conditions are maintained, and examines copies of completed test reports;

- reviews records of periodic internal audits, use of check samples or participation in round robin testing or other similar programs, personnel records including resumes and job descriptions of key personnel, competency evaluations for all staff members who routinely perform the testing for which accreditation is sought, calibration or verification records for apparatus used, test reports, and sample control records;
- observes demonstrations of testing techniques and discusses them with the technical personnel to assure their understanding of the procedures; and
- examines major equipment, apparatus, and facilities.

At the conclusion of the assessment, the assessor conducts an exit briefing to discuss observations with appropriate laboratory staff and to call attention to any deficiencies uncovered.

If the on-site inspection reveals deficiencies that pertain to the NVLAP requirements, either the assessor leaves written notification at the conclusion of the assessment, or NVLAP sends a letter to the laboratory describing the specific items requiring attention. The laboratory must provide NVLAP with documentation or certification by the authorized representative that the specified deficiencies have been corrected or that specific actions are being taken to correct the deficiencies.

Monitoring Visits

Monitoring visits may be conducted, at any time during the accreditation period, for cause or on a random selection basis. These visits serve to verify reported changes in the laboratory's personnel, facilities, and operations or to explore possible reasons for poor performance in proficiency testing. The scope of a monitoring visit may range from checking a few designated items to a complete review.

Proficiency Testing

Proficiency testing is an integral part of the NVLAP accreditation process. Demonstration of appropriate facilities, equipment, personnel, etc. is essential, but may not be sufficient for the evaluation of laboratory competence. The production of test data using special proficiency testing samples or artifacts provides NVLAP with a way to determine the overall competence of the laboratory.

Each program area has unique proficiency testing requirements. Data submitted by the laboratories in response to specific NVLAP requirements is analyzed and summary reports of the results of inter-laboratory comparisons are sent back to the participants.

Proficiency testing helps to identify problems in a laboratory which NVLAP staff members work with the laboratory staff to solve. NVLAP provides results of proficiency testing to appropriate standards-writing bodies to assist them in improving test procedures.

NVLAP requires satisfactory proficiency testing as a condition of initial and continuing accreditation. Satisfactory participation is based on the nature of specific test methods. Some test methods define pass/fail criteria. In other cases, individual laboratory test data must fall within statistically acceptable limits of overall group performance.

Technical Evaluation

A final technical evaluation is performed by the technical experts. Their recommendations are based on:

- information provided on the application;
- on-site assessment reports;
- actions taken by the laboratory to correct deficiencies;
- results of proficiency testing; and
- information from any monitoring visits of the laboratory.

If the technical evaluation reveals additional deficiencies, written descriptive notifications are made to the laboratory. The laboratory must provide documentation or certification by its authorized representative that the specified deficiencies have been corrected. Clarification of some issues may be requested by telephone. All deficiencies must be corrected before accreditation can be granted or renewed.

Administrative Review

After the technical evaluation has been completed, NVLAP staff prepares an administrative recommendation that the laboratory either be granted or denied accreditation. This recommendation is based on a review of the technical evaluation and other records to ensure that all NVLAP technical, financial and administrative obligations have been satisfied.

Accreditation Actions

Accreditation - if all accreditation requirements are satisfied.

Denial - if the laboratory does not meet NVLAP criteria and cannot do so in an appropriate time period, it is notified of a proposal to deny accreditation and the reason(s) therefor.

Suspension - if the terms of its accreditation are in temporary non-compliance, but deficiencies can be corrected in an acceptable time period, the laboratory will be notified of the reasons for and conditions of the suspension and the action(s) that the laboratory must take to have accreditation reinstated.

Revocation - if the terms of its accreditation have been violated and deficiencies cannot or will not be corrected, the laboratory is notified of a proposal to revoke accreditation and the reasons therefor and may be given the option of voluntarily terminating accreditation. If accreditation is revoked, the laboratory must return its Certificate of Accreditation and cease use of the NVLAP logo on any of its reports, other correspondence, or advertising.

If denial or revocation has been proposed, the laboratory may request a hearing, under United States Code 5 U.S.C. 556, within 30 days of the date of receipt of the notification. If a hearing is not requested, the action becomes final upon the expiration of that 30-day period.

LABORATORY PARTICIPATION SUMMARY

The following table summarizes NVLAP accreditation as of March 1, 1990. Since some laboratories are accredited in more than one field of testing, the number of accredited laboratories listed by field (see Index B) is greater than the number of laboratories in the system (see Index A). The NVLAP Code prefix is used in Index D to identify individual test methods. A directory of accredited Asbestos Fiber Analysis laboratories is presented in Index E.

<u>Field of Testing (NVLAP Code Prefix)</u>	<u>Accredited Laboratories as of March 1, 1990</u>
Acoustical Testing Services (08/)	11
Asbestos Fiber Analysis (18/)	643
Carpet Testing (03/)	20
Commercial Products Testing

Accreditation Renewal Date: October 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A and Panasonic Manual reader UD702E.

Panasonic TLD model UD802 for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

The following sites are included in the accreditation as sub-facilities of the above listed main facility. These sub-facilities are accredited by virtue of using identical equipment and procedures as indicated above.

Robinson Nuclear Plant, Hartsville, South Carolina
Brunswick Nuclear Plant, Southport, North Carolina
Harris Nuclear Project, New Hill, North Carolina

TECH/OPS LANDAUER
2 Science Road
Glenwood, IL 60425
R. Craig Yoder Phone: 312-755-7000

Accreditation Renewal Date: October 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeters listed below through employing (1) automatic film reader Tech/Ops Model 1; (2) Harshaw Atlas Hotgas reader/modified Atlas reader with Apollo Systems CO₂ laser; (3) Harshaw 2271 reader; (4) NTA/Polycarbonate /CR-39 manual optical readers; (5) manual densitometers X-Rite, Tech/Ops Model 301, Macbeth Model TD504 or (6) ALNOR Dosacus reader.

Landauer designation:

Film	Process	ANSI N13.11 Category
G - Film "GARDRAY"	1,5	I thru VII
P - G badge plus NTA	1,4,5	VIII
A - G badge plus polycarbonate	1,4	VIII
R - G badge plus ER	1,3,4,5	VIII
TLD		
L - 4 chip "GARDRAY"	2	I thru VII
D - 3 700 chip Harshaw card	3	II, IV, V, VII
K - Modified ALNOR	6	I thru VII
W modified - 2 chip Escort with x-ray filtration	2	I, II

The facility is accredited to process the following dosimeters which have been deemed functionally acceptable by virtue of using identical techniques and equipment to process combinations of elements demonstrated above.

Landauer designation:

Film	Process	ANSI N13.11 Category
B - G badge plus CR-39	1,4,5	I thru VIII
C - G badge plus CR-39 and Cadmium	1,4,5	I thru VIII
P - G badge plus NTA	1,4,5	I thru VIII
H - G badge plus NTA and Cadmium	1,4,5	I thru VIII
A - G badge plus polycarbonate	1,4,5	I thru VIII
J - G badge plus polycarbonate and Cadmium	1,4,5	I thru VII
Y - G badge plus Cadmium	1,4,5	I, III
R - G badge plus ER	1,3,4,5	I thru VIII
Q - DEX-RAY	1,4,5	I, III
TLD		
F - L badge plus CR-39	2,4	I thru VIII
- L badge plus polycarbonate	2,4	I thru VIII
- L badge plus ER	2,3,4	I thru VIII
T - 2 chip	2	II, IV, V, VII

The following sites are included in the accreditation as sub-facilities of the above listed main facility.

R.S. Landauer, Jr. & Company Nuclear Station System (NSS) sites at:

The following sub-facilities are accredited to perform limited volume, emergency response processing employing either a Harshaw 3000 manual reader or manual film processing techniques for the following badges:

	ANSI N13.11 Categories
G - Film "GARDRAY"	I thru VII
L - TLD 4 chip "GARDRAY"	I thru VII
T - TLD 2 chip	II, IV, V, VII

Zion Station
LaSalle Station

These facilities listed have been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A.

Panasonic TLD model UD802 for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0543

NEW HAMPSHIRE YANKEE
SEABROOK STATION
P.O. Box 300, Route 1, Seabrook, NH 03874
Eric L. Darois Phone: 603-474-9574

Accreditation Renewal Date: January 1, 1991

This facility has been evaluated and deemed competent to process the radiation dosimeters listed below through employing a Panasonic Automatic reader model UD710A.

Panasonic TLD model UD813 in a clamshell holder (3) 3, 200, 200 mg/cm²) for ANSI-N13.11 categories I, II, III, IV, V, VI, VII.

Panasonic TLD combination UD809 and UD813 in a Panasonic UD887A-T (809-cd shields, 200 mg/cm² all elements 813- 3, 3, 200, 200 mg/cm²) holder for ANSI-N13.11 category VIII.

The following is included as a subfacility for emergency conditions only, using a Panasonic manual processor model SD-7025:

New Hampshire Yankee Emergency Operations Facility
Gosling Road
Newington, NH

NVLAP LAB CODE 0544

FLORIDA POWER & LIGHT COMPANY
700 Universe Blvd, Juno Beach, FL 33408
Roger Baker Phone: 407-694-4172

Accreditation Renewal Date: July 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Harshaw Automatic reader model 8000.

Harshaw TLD model LG-7777 for ANSI-N13.11 categories I, II, III, IV, V, VI, VII.

Harshaw TLD model L-NG7677 for ANSI-N13.11 category VIII.

NVLAP LAB CODE 0545

WASHINGTON PUBLIC POWER SUPPLY SYSTEM
P.O. Box 968, 3000 George Washington Way
Richland, WA 99352
Ronald L. Wardlow Phone: 509-377-8043

Accreditation Renewal Date: July 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeters listed below through employing Teledyne Automatic reader model 9150, and Teledyne Manual reader model 8300.

Teledyne TLD model PB3 with CaSO_4 Beta/gamma card and 6LiF/CaSO_4 Neutron card both primary and back up areas for ANSI-N13.11 categories II, IV, V, VII, VIII.

NVLAP LAB CODE 0546

SYSTEM ENERGY RESOURCES, INC.
GRAND GULF NUCLEAR STATION
P.O. Box 756, Port Gibson, MS 39150
John W. Cotton Phone: 601-437-2187

Accreditation Renewal Date: July 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A and Panasonic Manual reader UD702A.

Panasonic TLD model UD802 for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0547

SOUTH CAROLINA ELECTRIC & GAS COMPANY
P.O. Box 764, Columbia, SC 29218
James G. Dinkins Phone: 803-345-1915

Accreditation Renewal Date: July 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A.

Panasonic TLD model UD802 for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0548

USAF OCCUPATIONAL & ENVIRONMENTAL HEALTH
LABORATORY
Radiation Dosimetry Branch (RZD)
Brooks AFB, TX 78235-5501
Dennis R. Armstrong Phone: 512-536-2378

Accreditation Renewal Date: April 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Harshaw Automatic reader model 2276.

Harshaw 2 Element TLD model BG (2 TLD-100 chips) for ANSI-N13.11 categories III, IV, V, VI, VII.

NVLAP LAB CODE 0550

PORTLAND GENERAL ELECTRIC COMPANY
121 SW Salmon Street, Portland, OR 97204
Norman C. Dyer Phone: 503-556-3713

Accreditation Renewal Date: July 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Harshaw Automatic reader model 2271 and a manual reader model 2000.

Harshaw TLD model 80BG for ANSI-N13.11 categories I, II, III, IV, V, VI, VII.

NVLAP LAB CODE 0551

GEORGIA POWER COMPANY/ENVIRONMENTAL LAB
ENVIRONMENTAL AFFAIRS - DOSIMETRY
5131 Maner Road, Smyrna, GA 30080
Michael C. Nichols Phone: 404-799-2112

Accreditation Renewal Date: April 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710.

Panasonic TLD model UD802 for ANSI-N13.11-1983 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0553

NIAGARA MOHAWK POWER CORPORATION
Nine Mile Point, P.O. Box 32, Lycoming, NY 13093
Edward C. Gordon Phone: 315-349-1312

Accreditation Renewal Date: April 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A and Panasonic Manual reader model UD702E.

Panasonic TLD model UD802 for ANSI-N13.11-1983 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0554

Pennsylvania Power and Light Company
Two North Ninth Street, Allentown, PA 18101-1179
Stephen Ingram Phone: 215-770-7892

Accreditation Renewal Date: April 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A and Panasonic Manual reader UD702A.

Panasonic TLD model UD802 for ANSI-N13.11 categories II, III, IV, V, VI, VII.

NVLAP LAB CODE 0555

ICN DOSIMETRY SERVICE
DIVISION OF ICN BIOMEDICALS, INC.
3300 Hyland Avenue, ICN Plaza
Costa Mesa, CA 92626
S. Nemecek Phone: 714-545-0100

Accreditation Renewal Date: July 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeters listed below through employing a Panasonic Automatic reader model UD710A for TLD processing and manual developing techniques and a Macbeth densitometer for film processing.

TLD model ICN 802 for ANSI-N13.11 categories I, II, III, IV, V, VI, VII.

TLD Model ICN 802N for ANSI-N13.11 category VIII

ICN Model T2 (Kodak type II film) for ANSI-N13.11 categories I, II, III, IV, V, VI, VII

ICN Model T2X (Kodak type II film) for ANSI-N13.11 categories I, III

ICN Model T6 (Kodak type II film) for ANSI N13.11 categories, I, II, III, IV, V, VI, VII

NVLAP LAB CODE 0556

ATOMIC ENERGY INDUSTRIAL LABORATORY
OF THE SOUTHWEST, INC.
6421 South Main Street, Houston, TX 77030
Steven H. Allen Phone: 713-790-9719

Accreditation Renewal Date: April 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing Manual film processing using a custom densitometer.

Film Badge (Kodak Type 3/Type A) for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0557

UNITED STATES DOSIMETRY TECHNOLOGY, INC.
2800 George Washington Way, Richland WA 99352
Neil Hembree Phone: 509-375-3131

Accreditation Renewal Date: October 1, 1990

This facility has been evaluated and deemed competent to process the film dosimeters listed below through employing Manual film processing using a Bar Ray Processor, and Mini/UST-rD densitometer, and the TLD dosimeter using a UST/RD card reader.

UST 3 Film Badge (Kodak Type 2) for ANSI-N13.11 categories II, III, IV, V, VI, VII.

UST-C Film Badge (Kodak Type 2, NTA) for ANSI-N13.11 category VIII.

UST TLD F for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0558

LONG ISLAND LIGHTING COMPANY
SHOREHAM NUCLEAR POWER STATION
P.O. Box 628, Wading River, NY 11792
Roger Thompson Phone: 516-929-8300

Accreditation Renewal Date: January 1, 1991

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A.

Panasonic TLD model UD802 for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0559

TROXLER RADIATION MONITORING SERVICES
A Division of Troxler Electronic Laboratories, Inc.
P.O. Box 12057, 3008 Cornwallis Rd.
Research Triangle Park, NC 27709
Elizabeth M. Franklin Phone: 919-549-8661

Accreditation Renewal Date: July 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A.

Panasonic TLD model UD802 with model UD854 hanger for ANSI-N13.11 category I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0560

GENERAL DYNAMICS
Electric Boat Division/Radiological Control Dept.
75 Eastern Point Road, Groton, CT 06340-4909
Robert R. Lavimoniere Phone: 203-433-2371

Accreditation Renewal Date: April 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Harshaw Manual reader model 4000.

CaF₂ Bulb Dosimeter for ANSI-N13.11 category IV.

The following site is included in the accreditation as a subfacility of the above listed main facility, to perform processing with the same equipment for the same dosimeter in the same category.

Knolls Atomic Power Laboratory, West Milton, NY

NVLAP LAB CODE 0561

NEWPORT NEWS SHIPBUILDING
Radiological Control Dept. (E85)
4101 Washington Avenue, Newport News, VA 23607
C. T. Hill Phone: 804-380-2369

Accreditation Renewal Date: April 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Harshaw Automatic reader model 8000C.

Harshaw TLD model BG (2 TLD 700, 1 TLD 600) for ANSI-N13.11 category IV.

NVLAP LAB CODE 0562

TAIWAN POWER COMPANY
RADIATION LABORATORY
P.O. Box 7, Shinmen, Taipei
Taiwan, 25302 Republic of China
C. T. Shen Phone: 02-638-1391

Accreditation Renewal Date: October 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeters listed below through employing either a Panasonic Automatic reader model UD710A or a Harshaw 2276 reader.

KP-802-Panasonic TLD model UD802 for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

HG-777-Harshaw 3 chip card (3 TLD 700) for ANSI-N13.11 categories I, II, III, IV, V, VI, VII.

HN-67-Harshaw 2 chip card (1 TLD 600, 1 TLD 700) for ANSI-N13.11 category VIII.

MG-7777-Harshaw 3 chip card (3 TLD 700) for ANSI-N13.11 category IV.

NVLAP LAB CODE 0563

COMBUSTION ENGINEERING, INC.
Dept. 9459-0202, 1000 Prospect Hill Road
Windsor, CT 06095-0500
Stephen M. Sorensen Phone: 203-285-5285

Accreditation Renewal Date: October 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A and Panasonic Manual reader UD702A.

Panasonic TLD model UD802 for ANSI-N13.11 category VII.

NVLAP LAB CODE 0564

D.C. COOK PLANT LABORATORY
One Cook Place, Bridgman, MI 49106
Jeff Ambrose Phone: 616-465-5901

Accreditation Renewal Date: July 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A.

Panasonic TLD model UD802 with model UD854A hanger for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

NVLAP LAB CODE 0565

NAVAL NUCLEAR PROPULSION PROGRAM DIRECTORATE
Department of the Navy
Washington, DC 20362-5101
D. A. Corey Phone: 206-476-3596

Accreditation Renewal Date: April 1, 1990

The facility listed has been evaluated as a representative site and deemed competent to process the radiation dosimeter listed below through employing a Radiac Computer-Indicator Model No. CF-1112/PD TLD reader.

Puget Sound Naval Shipyard
Radiation Health Division (Code 105.5). Bremerton, WA 98314-5000

CaF₂ Bulb Dosimeter (DT-526/PD) for ANSI-N13.11 categories II, IV.

The accreditation is also extended to include all processing performed by other facilities in the Naval Nuclear Propulsion Program which use identical equipment and procedures as listed above.

NVLAP LAB CODE 0567

HEALTH PHYSICS NORTHWEST, INC.
11535 S.W. 67th
Tigard, OR 97223
Carol Hall Phone: 503-620-6617

Accreditation Renewal Date: October 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Harshaw Manual reader, model 2000.

Eberline TLD holder with 10mg/cm² and 295 mg/cm² filter and 2 Harshaw TLD 100 chips for ANSI-N13.11 categories IV, V.

NVLAP LAB CODE 0568

PHILADELPHIA ELECTRIC COMPANY
2301 Market Street, M.S. N4-4
Philadelphia, PA 19101
John R. McFadden 215-841-6199

Accreditation Renewal Date: January 1, 1991

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A.

Panasonic TLD model UD802 AT2 in a ISA style 831 holder for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

WESTINGHOUSE ELECTRIC CORPORATION
NUCLEAR SERVICES DIVISION - TLD LABORATORY
Interstate 70, Madison Exit, Madison, PA 15663
Barbara Baker Lim Phone: 412-722-5937

Accreditation Renewal Date: April 1, 1990

This facility has been evaluated and deemed competent to process the radiation dosimeters listed below through employing a Harshaw Automatic reader model 2271.

Type 3 TLD Card in a Harshaw model 80 Holder for ANSI-N13.11 categories II, IV, V, and VII.

The following site is included in the accreditation as a sub-facility of the above listed main facility. This sub-facility is accredited by virtue of using identical equipment and procedures as indicated above.

Westinghouse Electric Corporation
Nuclear Services Division
Interstate 26 and New Cut Road
Spartanburg, SC 29303

INDEX E. LABORATORIES ACCREDITED FOR BULK ASBESTOS ANALYSIS
listed alphabetically by city within state

The Scope of Accreditation for all Bulk Asbestos Analysis laboratories is:

NVLAP Code Test Method Designation

18/A01 40 Code of Federal Regulations Chapter I (1-1-87 edition) Part 763, Subpart F,
Appendix A, pages 293-299 or the current U.S. Environmental Protection Agency method
for the analysis of asbestos in building material by polarized light microscopy.

8. TYPE OF REPORT AND PERIOD COVERED

9. SPONSORING ORGANIZATION NAME AND COMPLETE ADDRESS (STREET, CITY, STATE, ZIP)

10. SUPPLEMENTARY NOTES

DOCUMENT DESCRIBES A COMPUTER PROGRAM; SF-185, FIPS SOFTWARE SUMMARY, IS ATTACHED.

11. ABSTRACT (A 200-WORD OR LESS FACTUAL SUMMARY OF MOST SIGNIFICANT INFORMATION. IF DOCUMENT INCLUDES A SIGNIFICANT BIBLIOGRAPHY OR LITERATURE SURVEY, MENTION IT HERE.)

This 1990 Directory of NVLAP Accredited Laboratories provides information on the activities of the National Institute of Standards and Technology in administering the National Voluntary Laboratory Accreditation Program (NVLAP) during calendar year 1990. The status of current programs is briefly described and a summary of laboratory participation is provided. Indexes cross reference the laboratories by name, NVLAP Lab Code Number, accreditation program, and geographic location. The scope of accreditation of each laboratory, listing the test methods for which it is accredited, is provided.

12. KEY WORDS (6 TO 12 ENTRIES; ALPHABETICAL ORDER; CAPITALIZE ONLY PROPER NAMES; AND SEPARATE KEY WORDS BY SEMICOLONS)
accreditation; acoustics; asbestos; carpet; computer applications; computer networks; concrete; directory; dosimetry; electromagnetic compatibility; laboratory; paint; paper; radiation; sealants; seals; stoves; telecommunications; thermal insulation
