Recommended Reading for Scientists and Engineers...

JOURNAL
OF RESEARCH

JOURNAL
OF RESEARCH
of the National Bureau of Standards

The revised

JOURNAL OF RESEARCH

of the National Bureau of Standards

Expanded Coverage

Scientists are discovering some new facts about the revised ***NBS Journal of Research***:

Expanded coverage now represents *all* NBS research. Two more fields—engineering and computer sciences—have been added to the previous three of physics, chemistry, and mathematics.

A one-volume format helps supply the new, broader view of NBS research and development. It replaces the two-section format, “Physics and Chemistry” and “Mathematical Sciences.”

You Still Get . . .

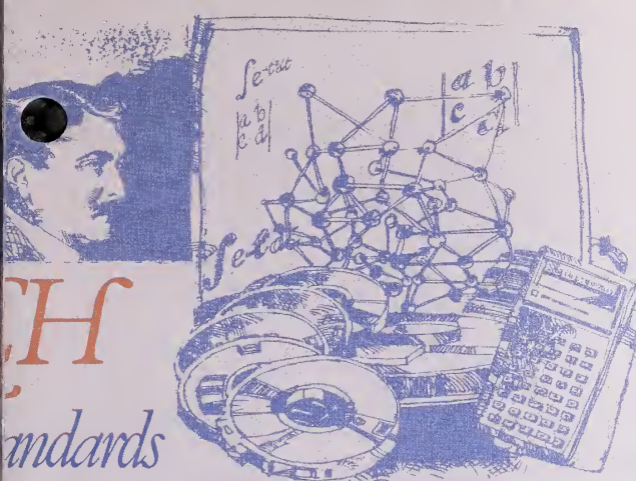

Six issues a year of the expanded Journal.

And regular readers are verifying some satisfying familiar facts about the ***Journal of Research***:

Emphasis continues on two NBS specialties—measurement methodology and the basic technology which underlies standardization.

Traditional and New Research

Indepth articles supply significant detail on recent work in traditional NBS fields such as

H Standards

atomic spectroscopy, calorimetry, physical chemistry, and pure and applied mathematics. Exciting new research in such fields as electronics, energy production and conservation, fire prevention and control, building technology, and environmental studies are also reported in similar detail.

Abstracts of all recent NBS publications in both NBS and non-NBS media are included in each issue.

Unique Variety

Put the *Journal* on your primary reading list. It is written by experts in their fields and its contents are more broadly based than the usual research journal. The *Journal's* expanded subject matter reflects the variety of important research at NBS, the Nation's largest physical sciences and measurement laboratory.

Read the *Journal* to stay current with this growing world of research. To get your subscription, fill in the attached order form.

Subscription Order Form

Enter my subscription to NBS Journal of Research at \$17.00. Add \$4.25 for foreign mailing. No additional postage is required for mailing within the United States or its possessions.

The

JOURNAL OF RESEARCH

of the National Bureau of Standards

**Now offers reports on five major NBS
research disciplines:**

Physics

Chemistry

Mathematics

Engineering

**Computer
Sciences**
