

LC No. 2/2

PUBLICATIONS OF THE POLARIMETRY SECTION
BUREAU OF STANDARDS

Publications may be secured from the Superintendent of Documents, Government Printing Office, Washington, D.C., for price specified.

Those publications marked with a cross (+) are not available for distribution by this Bureau nor for sale by the Superintendent of Documents. They may be consulted at any Government Depository Library.

Scientific Papers

- + S 34 Spectrum Lines as Light Sources in Polariscopic Measurements. Frederick Bates. (1906).
- + S 52 The Influence of Basic Lead Acetate on the Optical Rotation of Sucrose in Water Solution. Frederick Bates and J.C. Blake. (1907). J. Amer. Chem. Soc., Vol. 29, p. 286 (1907).
- + S 86 A Quartz Compensating Polariscopes with Adjustable Sensibility. Frederick Bates. (1907). Zeit. des Ver. der Deut. Zuckerind., Vol. 58, p. 105 (1908); Int. Sugar Jour., Vol. 9, p. 588 (1907); Amer. Sugar Ind., Vol. 13, p. 254 (1911).
- S 98 Remarks on the Quartz Compensating Polariscopes with Adjustable Sensibility. Frederick Bates. (1908). Price 5 cents.
- S 221 Influence of Atmospheric Conditions in the Testing of Sugars. Frederick Bates and Francis P. Phelps. (1914). Price 10 cents. Int. Sugar Jour., Vol. 16, p. 265 (1914); Zeit. des Ver. der Deut. Zuckerind., Vol. 64, p. 579 (1914); Sugar, Vol. 16, p. 40 (1914).
- + S 232 Equilibrium in the System; Lead Acetate, Lead Oxide, Water at 25°. Richard F. Jackson. (1914). J. Amer. Chem. Soc., Vol. 36, p. 2346 (1914).
- S 268 Constants of the Quartz-Wedge Saccharimeter and the Specific Rotation of Sucrose. 1. The Constants of the 26-Gram Normal Weight. Frederick Bates and Richard F. Jackson. (1916). Price 15 cents. Zeit. des Ver. der Deut. Zuckerind., Vol. 67, p. 347 (1917); Sugar, Vol. 18, pp. 242, 305, 365, 419 (1916); Sugar (Spanish), Vol. 18, pp. 279, 343, 456, 507, 552 (1916); Record of Hawaiian Chemists Ass'n., 1917.
- S 293 The Saccharimetric Normal Weight and Specific Rotation of Dextrose. Richard F. Jackson. (1916). Price 10 cents.

PUBLICATIONS OF THE BUREAU OF THE BUREAU OF
BUREAU OF THE BUREAU OF

Publications may be ordered from the Superintendent of Documents, Government Printing Office, Washington, D.C. For price specifications.

These publications are available in microfilm and microfiche editions for distribution by the Superintendent of Documents. They may be ordered from the Superintendent of Documents, Government Printing Office, Washington, D.C. For price specifications.

Publications

- 2-24 Specimen lines as light sources in photomicrographic research. (1967)
- 2-25 The influence of certain lead isotopes on the optical properties of lead in glass. Technical Paper 1000. (1967)
- 2-26 A study of the properties of lead isotopes in glass. Technical Paper 1001. (1967)
- 2-27 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1002. (1967)
- 2-28 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1003. (1967)
- 2-29 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1004. (1967)
- 2-30 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1005. (1967)
- 2-31 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1006. (1967)
- 2-32 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1007. (1967)
- 2-33 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1008. (1967)
- 2-34 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1009. (1967)
- 2-35 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1010. (1967)
- 2-36 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1011. (1967)
- 2-37 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1012. (1967)
- 2-38 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1013. (1967)
- 2-39 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1014. (1967)
- 2-40 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1015. (1967)
- 2-41 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1016. (1967)
- 2-42 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1017. (1967)
- 2-43 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1018. (1967)
- 2-44 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1019. (1967)
- 2-45 The influence of lead isotopes on the optical properties of lead in glass. Technical Paper 1020. (1967)

- S 298 Standard Substances for the Calibration of Viscometers. Eugene C. Bingham and Richard F. Jackson. (1917). Price 5 cents.
- + S 358 Concerning the Annealing and Characteristics of Glass. A.Q. Tool and J. Valasek. (1920). Price 10 cents.
- S 371 A New Cadmium-Vapor Arc Lamp. Frederick Bates. (1920). Price 5 cents. Phil. Mag., Vol. 39, p. 353 (1920).
- + S 375 The Double Polarization Method for Estimation of Sucrose and the Evaluation of the Clerget Divisor. Richard F. Jackson and Clara L. Gillis. (1920). Price 10 cents. Zeit. des Ver. der Deutschen Zuckerind., Vol. 70, p. 521 (1920); Int. Sugar Jour., Vol. 22, pp. 509, 570, 638 (1920); abridged in Sugar, Vol. 22, pp. 604, 643 (1920).
- S 416 Preparation of Galactose. E.P. Clark (1921). Price 5 cents. J. Biol. Chem., Vol. 47, p. 1 (1921).
- S 429 Note on the Preparation of Mannose. E.P. Clark. (1922). Price 5 cents. J. Biol. Chem., Vol. 51, p. 1 (1922).
- S 432 An Improved Method for Preparing Raffinose. E.P. Clark. (1922). Price 5 cents. J. Amer. Chem. Soc., Vol. 44, p. 210 (1922).
- S 437 The Solubility of Dextrose in Water. Richard F. Jackson and Clara Gillis Silsbee. (1922). Price 5 cents.
- S 459 The Structure of Fucose. E.P. Clark. (1922). Price 5 cents. J. Biol. Chem., Vol. 54, p. 65 (1922).
- S 519 Preparation of Levulose. Richard F. Jackson, Clara Gillis Silsbee and Max J. Proffitt. (1926). Price 10 cents. Planter & Sugar Manuf., Vol. 76, pp. 230-2, 248-50, 268-70, 289-90 (1926); Facts About Sugar, Vol. 21, p. 326 (1926) (a review by O.W. Willcox); Sugar, Vol. 28, pp. 170-172, 222-224, 326-329, 380-381 (1926); Jour. des Fabricants de Sucre, May 15, 1926 (translation of review taken from Facts About Sugar, Vol. 21, p. 326 (1926)).
- S 533 Relations Between Rotatory Power and Structure in the Sugar Group. Part I. (1 to 10). C.S. Hudson. (1926). Price 35 cents.
- S 557 A Suggested New Base Point on the Thermometric Scale and the $\alpha \rightleftharpoons \beta$ Inversion of Quartz. Frederick Bates and Francis P. Phelps. (1927). Price 5 cents.
- S 572 Cause and Removal of Certain Heterogeneities in Glass. L.W. Tilton, A.N. Finn, and A.Q. Tool. (1928). Price 10 cents.

2 526 Standard Substances for the Calibration of Viscometers.
 Bureau of Mines and Standard V. Jackson (1937).
 Price 5 cents.

2 527 Concerning the Amalgam and Oxidation of Glass.
 A. G. Toll and J. Volz (1930) Price 10 cents.

2 571 A New Calcium-Fluoride and Lead. Friedrich Ester. (1930).
 Price 5 cents. Zeit. Naturf., Vol. 39, p. 234 (1930).

2 572 The Double Polarization Method for Estimation of Sugars
 and the Evaluation of the German Division. Richard F.
 Jackson and Maria L. Miller (1930) Price 10 cents.
 Zeit. Naturf. für Lebensmittel-Untersuchung, Vol. 39, p.
 231 (1930); Int. Sugar Jour., Vol. 52, pp. 509, 510,
 538 (1930); Abstr. in Sugar, Vol. 52, pp. 604, 643
 (1930).

2 418 Preparation of Gelatose. E. F. Clark (1931) Price 5 cents.
 J. Biol. Chem., Vol. 47, p. 1 (1931).

2 439 Note on the Preparation of Mannose. E. F. Clark (1932).
 Price 5 cents. J. Biol. Chem., Vol. 51, p. 1 (1932).

2 432 An Improved Method for Preparing Cellulose. E. F. Clark
 (1932). Price 5 cents. J. Amer. Chem. Soc., Vol. 54,
 p. 310 (1932).

2 437 The Solubility of Lactose in Water. Richard F. Jackson
 and Clara Gillis Blalock (1932). Price 5 cents.

2 459 The Structure of Fructose. E. F. Clark (1932). Price 5
 cents. J. Biol. Chem., Vol. 54, p. 55 (1932).

2 518 Preparation of Levulose. Richard F. Jackson, Clara Gillis
 Blalock and Max L. Proffitt (1932). Price 10 cents.
 Plant & Sugar Matter, Vol. 78, pp. 242-50,
 252-70, 269-90 (1932); Facts About Sugar, Vol. 21, p.
 236 (1932) (a review by G. W. Wilcox); Sugar, Vol. 33,
 pp. 170-172, 225-234, 235-236, 280-281 (1932); Jour. Agr.
 Experiment. Sta. Div., May 19, 1932 (a summary of review
 taken from Facts About Sugar, Vol. 21, p. 236 (1932)).

2 523 Relations Between Rotatory Power and Refractive in the
 Sugar Group. Part I. (1 to 10). C. E. Hudson. (1932).
 Price 50 cents.

2 527 A Suggested New Base Point on the Thermometric Scale and
 the Invention of Quartz. Frederick Bates and
 Francis P. Phelps (1927). Price 5 cents.

2 575 Gases and Removal of Certain Heterogeneous in Glass.
 L. W. Tilton, A. H. Finn, and A. G. Toll (1932). Price
 10 cents.

Technologic Papers

- + T 115 New Baumé Scale for Sugar Solutions. Frederick Bates and H.W. Bearce. (1918). Price 5 cents. Sugar, Vol. 20, p. 226 (1918).
- T 161 A Picnometer for the Determination of Density of Molasses. W.B. Newkirk. (1920). Price 5 cents. Int. Sugar Jour., Vol. 22, p. 708 (1920); Sugar, Vol. 22, p. 508 (1920).
- T 259 Saturation Relations in Mixtures of Sucrose, Dextrose, and Levulose. Richard F. Jackson and Clara Gillis Silsbee. (1924). Price 10 cents.
- T 338 Color in the Sugar Industry. I. Color Nomenclature in the Sugar Industry. II. Colorimetric Clarification of Turbid Sugar Solutions. H.H. Peters and F.P. Phelps. Price 20 cents. (1927). Part I published in Facts About Sugar, Vol. 20, p. 353 (1925); Planter and Sugar Manuf., Vol. 74, p. 288 (1925); Sugar, Vol. 27, p. 223 (1925); Zeit. des Ver. der Deut. Zuckerind., Vol. 75, p. 448 (1925).
- T 345 Determination of Weight Per Gallon of Blackstrap Molasses. Carl F. Snyder and L.D. Hammond. (1927). Price 5 cents. Planter & Sugar Manuf., Vol. 79, p. 268 (1927); Sugar, Vol. 31, p. 69 (1929).

Circulars

- C 44 Polarimetry (1918). Price 25 cents.
- C 145 Summary of Technical Methods for the Utilization of Molasses. Collated from Patent Literature. (1924). Price 15 cents.
- C 207 Recommended Specifications for Limestone, Quicklime, Lime Powder, and Hydrated Lime for Use in the Manufacture of Sugar. (1925). Price 5 cents.
- C 295 Temperature Corrections to Readings of Baumé Hydrometers, Bureau of Standards Baumé Scale for Sugar Solutions (Standard at 20°C.). (1926). Price 5 cents. Sugar, Vol. 29, p. 170 (1927); Chem. News, Vol. 132, p. 290 (1926); Planter and Sugar Manuf., Vol. 76, p. 331 (1926).
- C 375 Weights Per United States Gallon and Weights Per Cubic Foot of Sugar Solutions. Carl F. Snyder and Lester D. Hammond. (1929). Price 5 cents. Planter and Sugar Manuf., Vol. 82, p. 501 (1929); Facts About Sugar, Vol. 24, p. 714 (1929).

Technical papers

- 7 112 New Base Beale for Sugar Solutions. Technical Paper No. H.W. Beale, (1918). Price 5 cents. Sugar, Vol. 20, p. 226 (1918).
- 7 151 A Handbook for the Determination of Density of Mixtures. W.E. Kewler, (1920). Price 5 cents. Ind. Sugar Jour., Vol. 22, p. 708 (1920); Sugar, Vol. 22, p. 208 (1920).
- 7 202 Separation Relations in Mixtures of Sucrose, Lactose, and Lactulose. Richard T. Jackson and Clara Millie Jackson, (1924). Price 10 cents.
- 7 238 Color in the Sugar Industry. F. Walter Knechtling in the Sugar Industry. II. Colorimetric Determination of Sugar Solutions. H.W. Beale and L.E. Shuman. Price 20 cents. (1927). Part I published in Ind. Sugar Jour., Vol. 20, p. 226 (1927); Sugar and Sugar Jour., Vol. 21, p. 208 (1927); Sugar, Vol. 21, p. 221 (1927); Ind. Sugar Jour., Vol. 21, p. 419 (1927).
- 7 242 Determination of Weight per Gallon of Dissolving Solutions. Carl F. Snyder and L.D. Hammond, (1927). Price 5 cents. Printer & Sugar Jour., Vol. 21, p. 228 (1927). Sugar, Vol. 21, p. 22 (1927).

Circulars

- 0 12 Potentiometry (1918). Price 25 cents.
- 0 148 Summary of Technical Methods for the Determination of Moisture. Collected from various laboratories. (1921). Price 10 cents.
- 0 207 Recommended Specifications for Mixtures of Sucrose, Lactose, Powder, and Hydrated Lime for Use in the Manufacture of Sugar. (1922). Price 5 cents.
- 0 208 Temperature Corrections to Readings of Glass Hydrometers. Bureau of Standards Beale Beale for Sugar Solutions (Standard at 50°C.). (1926). Price 5 cents. Sugar, Vol. 28, p. 170 (1927); Chem. News, Vol. 132, p. 200 (1926); Printer and Sugar Jour., Vol. 28, p. 231 (1926).
- 0 235 Weights for United States Gallon and Weight for Metric Foot of Sugar Solutions. Carl F. Snyder and Lester D. Hammond, (1929). Price 5 cents. Printer and Sugar Jour., Vol. 28, p. 201 (1929); Ind. Sugar Jour., Vol. 28, p. 174 (1929).

BUREAU OF STANDARDS JOURNAL OF RESEARCH

Research PapersNo.

- 38 A Technical Method of Using the Mercury Arc to Obtain Data at Wave length 560 mu in the Spectrophotometric Analysis of Sugar Products. H.H. Peters and F.F. Phelps. Price 5 cents. B.S.J.R., Vol. 2, p. 335, February, 1929.
- 79 A Crystalline Difructose Anhydride from Hydrolyzed Inulin. Richard F. Jackson and Sylvia M. Goergen. Price 5 cents. B.S.J.R., Vol. 3, p. 27, July, 1929.
- 82 Improvements in the Preparation of Aldonic Acids. C.S. Hudson and H.S. Isbell. Price 5 cents. B.S.J.R., Vol. 3, p. 57, July, 1929.
- 93 The Structure of Alpha-Methylxyloside. F.P. Phelps and C.B. Purves. Price 5 cents. B.S.J.R., Vol. 3, p. 247, August, 1929.
- 106 Two Isomeric Crystalline Compounds of d-Mannose with Calcium Chloride. J.K. Dale. Price 5 cents. B.S.J.R., Vol. 3, p. 459, September, 1929.

BUREAU OF STATISTICS JOURNAL OF RESEARCH

Research Papers

No.

- 86 A Technical Method of Measuring the Velocity and its Directional Change at Various Points in the Spectroscopic Analysis of Paper Products. M. H. Tolson and T. L. Swales. Price 5 cents. N.S.P. Vol. 2, p. 325, February, 1932.
- 87 A Graphical Distortion Analysis of the Spectroscopic Analysis. Richard F. Jackson and Edwin M. Seaman. Price 5 cents. N.S.P. Vol. 2, p. 57, July, 1932.
- 88 Experiments in the Preparation of Alkyl Halides. G. S. Hudson and G. S. Jaccob. Price 5 cents. N.S.P. Vol. 2, p. 57, July, 1932.
- 89 The Structure of Alkoxy-Substituted Alkyl Halides and Alkyl Halides. G. S. Jaccob. Price 5 cents. N.S.P. Vol. 2, p. 57, August, 1932.
- 90 Two Isomeric Crystalline Compounds of a-Phenyl-2-methyl-3-butenyl Chloride. G. S. Jaccob. Price 5 cents. N.S.P. Vol. 2, p. 57, September, 1932.

PUBLISHED IN OUTSIDE JOURNALS ONLY

- The Application of the Clerget Method to Dilute Sucrose Solutions. R.F. Jackson and C.L. Gillis. Louisiana Planter and Sugar Manuf., Vol. 66, p. 141 (1921); Facts About Sugar, Vol. 12, p. 190 (1921); Int. Sugar Jour., Vol. 23, p. 217 (1921).
- The Complete Applicability of the Modified Clerget Method. R.F. Jackson and C.L. Gillis. Louisiana Planter and Sugar Manuf., Vol. 66, p. 390 (1921); Facts About Sugar, Vol. 13, p. 10 (1921); Int. Sugar Jour., Vol. 23, p. 448 (1921).
- Note on the Evaluation of the Clerget Divisor. R.F. Jackson and C.L. Gillis. Int. Sugar Jour., Vol. 24, p. 313 (1922).
- Densimetric and Polariscopic Standardization. R.F. Jackson and F.J. Bates. Jour. Assoc. Off. Agric. Chem., Vol. 4, p. 330 (1921).
- Shall America Adopt a New Normal Sugar Weight? Frederick Bates. Sugar, Vol. 21, p. 187 (1919); El Mundo Asucarero, p. 305 (1919); Louisiana Planter and Sugar Manuf., Vol. 62, p. 217 (1919).
- The Absorption of Heat in Glass. A.Q. Tool. J.O.S.A., Vol. 4, p. 340 (1920); Am. Inst. Min. & Met. Eng. (1919).
- Certain Effects Produced by Chilling Glass. A.Q. Tool. J.O.S.A. & R.S.I., Vol. 8, p. 419 (1924).
- Variations in Glass Caused by Heat Treatment. A.Q. Tool. Jour. Amer. Ceramic Soc., Vol. 8, p. 1 (1925).
- On the Constitution and Density of Glass. A.Q. Tool and E.E. Hill. Jour. Soc. Glass Tech., Vol. 9, p. 185 (1925).
- Some Effects of Carefully Annealing Optical Glass. L.W. Tilton, A.N. Finn, and A.Q. Tool. Jour. Amer. Ceram. Soc., Vol. 11, May, 1928.
- Possibilities of Beet Molasses. W.J. Geldard. Chem. & Met. Eng., Vol. 30, p. 394 (1924).
- A Lesson In Waste Recovery. W.J. Geldard and W.D. Chase. Chem. & Met. Eng., Vol. 32, Feb. 2, 1925; Louisiana Planter and Sugar Manuf., Vol. 74, p. 208 (1925).
- A Method for the Manufacture of Levulose. R.F. Jackson, C.G. Silsbee and M.J. Proffitt. Ind. Eng. Chem., Vol. 16, p. 1250 (1924); Facts About Sugar, Vol. 19, p. 586 (1924); Sugar, Vol. 27, p. 9 (1925); Planter and Sugar Manuf., Vol. 73, p. 469 (1924).

 Hydrolysis of Corn Starch. *Journal of Physical and Colloid Chemistry*, Vol. 33, p. 102 (1929).

RELATIONS BETWEEN ROTATORY POWER AND STRUCTURE IN THE SUGAR GROUP:

- Part 1. The Halogen-acyl and Nitro-acyl Derivatives of the Aldose Sugars. C.S. Hudson. J. Amer. Chem. Soc., Vol. 46, p. 462 (1924).
- Part 2. The Halogen-acetyl Derivatives of a Ketose Sugar (d-Fructose). C.S. Hudson. J. Amer. Chem. Soc., Vol. 46, p. 477 (1924).
- Part 3. The Biase of Amygdalin (Gentiobiose) and Its Configuration. C.S. Hudson. J. Amer. Chem. Soc., Vol. 46, p. 483 (1924).
- Part 4. Two Isomeric Crystalline Hexa-Acetates of Dextro-Alpha Mannoheptose. C.S. Hudson and K.P. Monroe. J. Amer. Chem. Soc., Vol. 46, p. 979 (1924). (This work was done in 1918 in the Bureau of Chemistry but is reported here as a part of this series).
- Part 5. The Chloro- and Bromo-acetyl Derivatives of Arabinose. The Nomenclature of Alpha and Beta Forms in the Sugar Group. Some Derivatives of 1,6-Bromo-acetyl Glucose, Gentiobiose and Maltose. C.S. Hudson and F.F. Phelps. J. Amer. Chem. Soc., Vol. 46, p. 2591 (1924).
- Part 6. The Rotatory Powers of the Alpha and Beta Forms of Methyl d-Xyloside and of Methyl l-Arabinoside. C.S. Hudson. J. Amer. Chem. Soc., Vol. 47, p. 265 (1925).
- Part 7. The Methyl Glycosidic Derivatives of the Sugars. C.S. Hudson. J. Amer. Chem. Soc., Vol. 47, p. 268 (1925).
- Part 8. Some Terpene Alcohol Glycosides of Glucose, Glucuronic Acid, Maltose and Lactose. C.S. Hudson. J. Amer. Chem. Soc., Vol. 47, p. 537 (1925).
- Part 9. The Rotation of the Alpha Form of Methyl Gentiobioside Recently Synthesized by Helferich and Becker. C.S. Hudson. J. Amer. Chem. Soc., Vol. 47, p. 872 (1925).
- Part 10. The Chloro-, Bromo-, and Iodo-Acetyl Derivatives of Lactose. C.S. Hudson and Alfons Kunz. J. Amer. Chem. Soc., Vol. 47, p. 2052 (1925).
- Part 11. The Related Rotations of Amylobiose, Amylotriose and Glucose. C.S. Hudson, H. Fringsheim, and J. Leibowitz. J. Amer. Chem. Soc., Vol. 48, p. 288 (1926).
- Part 12. The Preparation and Properties of Pure Alpha Methyl d-Lyxoside. F.F. Phelps and C.S. Hudson. J. Amer. Chem. Soc., Vol. 48, p. 503 (1926).

RELATIONS BETWEEN ROTATORY POWER AND STRUCTURE IN THE SUGAR GROUP:

Part 1. The Methyl- and Methyl-ethyl Derivatives of the Aldose Sugars. G.S. Hudson. J. Amer. Chem. Soc., Vol. 46, p. 462 (1924).

Part 2. The Methyl- and Methyl-ethyl Derivatives of a Ketose Sugar (2-Fructose). G.S. Hudson. J. Amer. Chem. Soc., Vol. 46, p. 477 (1924).

Part 3. The Methyl- and Methyl-ethyl Derivatives of the Glyceric Acid. G.S. Hudson. J. Amer. Chem. Soc., Vol. 46, p. 487 (1924).

Part 4. Two Isomeric Crystalline Hexamethylenes of Dextro-Alginate. G.S. Hudson and K.I. Wilson. J. Amer. Chem. Soc., Vol. 46, p. 378 (1924). (This work was done in 1918 in the Bureau of Chemistry but its reported date as a part of this series).

Part 5. The Methyl- and Methyl-ethyl Derivatives of Arabinose. The Homologues of Alpha and Beta Forms in the Sugar Group. Some Derivatives of 1,3-Di-O-methyl Glucose, Galactose and Mannose. G.S. Hudson and F.I. Phelps. J. Amer. Chem. Soc., Vol. 46, p. 352 (1924).

Part 6. The Rotatory Powers of the Alpha and Beta Forms of Methyl-D-Glucoside and of Methyl-D-Arabinoside. G.S. Hudson. J. Amer. Chem. Soc., Vol. 47, p. 335 (1925).

Part 7. The Methyl Glycoside Derivatives of the Sugars. G.S. Hudson. J. Amer. Chem. Soc., Vol. 47, p. 338 (1925).

Part 8. Some Tertiary Alcohol Glycosides of Glucose, Mannose, Galactose and Inositol. G.S. Hudson. J. Amer. Chem. Soc., Vol. 47, p. 337 (1925).

Part 9. The Rotation of the Alpha Form of Methyl-D-Glucoside. G.S. Hudson. J. Amer. Chem. Soc., Vol. 47, p. 378 (1925).

Part 10. The Methyl-, Ethyl-, and Methyl-ethyl Derivatives of the Sugars. G.S. Hudson and Alfons Kuntz. J. Amer. Chem. Soc., Vol. 47, p. 3023 (1925).

Part 11. The Related Rotations of Acylglucosides, Acylmannosides and Acylgalactosides. G.S. Hudson, H. Traub, and J. Leinhardt. J. Amer. Chem. Soc., Vol. 48, p. 322 (1926).

Part 12. The Preparation and Properties of Pure Alpha Methyl-D-Glucoside. F.I. Phelps and G.S. Hudson. J. Amer. Chem. Soc., Vol. 48, p. 303 (1926).

- Part 13. A Classification of Various Substances of the Mannose and Rhamnose Series According to Ring Types. C.S. Hudson. J. Amer. Chem. Soc., Vol. 48, p. 1424 (1926).
- Part 14. The Determination of Ring Structure in the Glucose, Mannose, and Rhamnose Series. C.S. Hudson. J. Amer. Chem. Soc., Vol. 48, p. 1434 (1926).
- Part 15. Conversion of Lactose to Another Disaccharide, Neolactose, The Chloro-Hepta-Acetate and Two Octa-Acetates of Neolactose. Alfons Kunz and C.S. Hudson. J. Amer. Chem. Soc., Vol. 48, p. 1978 (1926).
- Part 16. Conversion of Cellobiose to Another Disaccharide, Celtrobiose, by the Aluminum Chloride Reaction. Chloro-Acetyl Celtrobiose. C.S. Hudson. J. Amer. Chem. Soc., Vol. 48, p. 2002 (1926).
- Part 17. The Structure of Neolactose. Alfons Kunz and C.S. Hudson. J. Amer. Chem. Soc., Vol. 48, p. 2435 (1926).
- Part 18. Alpha-Methyl d-Lyxosida Triacetate. F.F. Phelps and C.S. Hudson. J. Amer. Chem. Soc., Vol. 50, p. 2049 (1928).
- Part 19. Improvements in the Preparation of Aldonic Acids. C.S. Hudson and H.S. Isbell, J. Amer. Chem. Soc., Vol. 51, p. 2225 (1929); B.S.J.R., Vol. 3, p. 57, July, 1929. R.F. 82.
- Part 20. Two Isomeric Crystalline Compounds of d-Mannose with Calcium Chloride. J.K. Dale. J. Amer. Chem. Soc., Vol. 51, p. 2788 (1929). B.S.J.R., Vol. 3, p. 459, Sept., 1929. R.F. No. 106.

Part 13. A Classification of Various Substances of the Mannose and Ribonose Series According to Ring Types. O.S. Hudson. J. Amer. Chem. Soc., Vol. 48, p. 1434 (1926).

Part 14. The Determination of Ring Structure in the Mannose, Ribonose, and Ribonose Series. O.S. Hudson. J. Amer. Chem. Soc., Vol. 48, p. 1434 (1926).

Part 15. Conversion of Lactose to Another Disaccharide, Maltose, The Chloro-Hydrate and Two Glycerol-Phosphate Molecules. Alfred King and O.S. Hudson. J. Amer. Chem. Soc., Vol. 48, p. 1478 (1926).

Part 16. Conversion of Cellulose to Another Disaccharide, Maltose, by the Aluminum Chloride Reaction. O.S. Hudson. J. Amer. Chem. Soc., Vol. 48, p. 1502 (1926).

Part 17. The Structure of Maltose. Alfred King and O.S. Hudson. J. Amer. Chem. Soc., Vol. 48, p. 1458 (1926).

Part 18. Alpha-Methyl D-Glucoside Trisacetate. W.I. Fisher and O.S. Hudson. J. Amer. Chem. Soc., Vol. 50, p. 2042 (1928).

Part 19. Improvements in the Preparation of Albinoid Amides. O.S. Hudson and H.S. Isbell. J. Amer. Chem. Soc., Vol. 51, p. 2222 (1929); B.S.J.S., Vol. 3, p. 57, July, 1929. B.S. 22

Part 20. Two Isomeric Crystalline Compounds of D-Mannose with Calcium Chloride. L.E. King. J. Amer. Chem. Soc., Vol. 51, p. 2724 (1929). B.S.J.S., Vol. 3, p. 458, Sept., 1929. B.S. 27
