Letter Circula: LO 40

(November 25, 1922)

RADIO PUBLICATIONS OF THE BUREAU OF STANDARDS

The radio publications of the Bureau of Standards printed at the Government Printing Office can be secured by purchase from the Superintendent of Documents, Government Printing Office, Washington, D.C., at the prices stated in the following list. This list also includes references to articles emanating from this Bureau which have been published in outside periodicals. The Bureau can not supply copies of papers published in outside periodicals; inquiries for copies of such papers should be addressed directly to the periodical concerned. A list of Letter Circulars on radio subjects is also given herein; see section of that title below.

Persons who wish to keep in touch with the radio publications of the Bureau as they are issued should subscribe to the "Radio Service Bulletin," published monthly by the Bureau of Navigation, Department of Commerce. Besides notices regarding new Government radio publications, the "Radio Service Bulletin" contains brief news items concerning Government radio work, additions and changes to the lists of radio calls and radio regulations, and other useful information. Subscriptions should be sent to the Superintendent of Documents. The price is 25 cents per year for subscribers in the United States and its possessions, Canada, Cuba and Mexico. To other countries the subscription price is 40 cents per year. The Bureau does not send individual notices of its publications as they appear.

The publications of the Bureau of Standards printed by the Government Printing Office are divided into five series: Scientific Papers, Technologic Papers, Circulars, Miscellaneous Publications, and Handbooks.

The Scientific Papers are published separately, and also in cloth-bound volumes. Scientific Papers Nos.1 to 329 are included in volumes 1 to 14, which were called "Bulletin of the Bureau of Standards." Volumes 15, 16, and 17, and subsequent volumes are called "Scientific Papers of the Bureau of Standards." Volume 15 includes Nos.330-368, volume 16 includes Nos.369-404, and volume 17 includes Nos.405-438. The bound volumes can be procured only by purchase from the Superintendent of Documents. Volumes 1 to 14 cost \$1.50 per volume, and later volumes cost \$2.00 per volume. Subscriptions in advance for the separate unbound Scientific Papers constituting a volume, to be sent promptly as issued, may be placed with the Superintendent of Documents at the rate of \$1.25 per volume. Advance subscriptions for unbound copies of the Technologic

*

Papers may also be placed at the same rate. The earlier volumes (from vol.1 to vol.14) were published in four paper-bound "Numbers" each, as well as in a complete cloth-bound volume, and "vol.10, No.4" means that the paper in question will be found in the paper-bound part of vol.10 marked "No.4." These separate raper-bound numbers can be purchased separately.

The prices stated for publications printed at the Government Printing Office, include rostage in the United States and its rossessions, Canada, Cuba, and Mexico. On shipments to be sent to other countries the actual cost of the rostage is charged, which is at the rate of eight cents per pound. In general, an allowance should be made for foreign rostage equal to about 25% of the amount of the order.

The following abbreviations are used to indicate the several classes of publications:

S = Scientific Paper

T = Technologic Paper

C = Circular

M = Miscellaneous rublications

H = Handbook

• = Not printed at the Government Printing Office

* = Publications of the Naval Radio Research Laboratory, which is located at the Bureau of Standards.

For example, S189 means Scientific Paper No. 189.

Papers designated by the mark o are not printed by the Government Printing Office, but are publications in an outside reriodical by a member of the staff of the Bureau. They should be consulted at libraries which maintain files of the particular periodicals referred to.

General

- The Principles Underlying Radio Communication. Signal Corps Radio Communication Pamphlet No.40. Second edition, issued March 23, 1922. Textbook of 619 pages, with 300 illustrations, covering radio principles and practice. Price \$1.00. Foreign postage 15 cents extra. (See note above regarding foreign postage.)
- Sources of elementary radio information. Cl32. June, 1922. 5¢ (Information regarding radio publications, including those of the Government, and radio periodicals, radio laws, and call letters. Answers various questions of the beginner.)
- OBureau of Standards Radio Work. J.H.Dellinger. The Federal Employee, 4, p.531, September; p.590, Oct., 1919. Reprinted in Radio Amateur News, 1, p.400, Feb., 1920, as "The Radio Compass" (6 pages).

Applications of Radio.

- The radio direction finder and its application to navigation. F.A. Kolster and F.W. Dunmore. S428. 38 pages. 1922. 15 ¢
- A simple type of radio direction finder for use on shipboard. F.W.Dunmore. Radio Service Bulletin, No.54, pp.10-12; Oct.1, 1921. Reprinted in Radio News, 3, p.588, Jan., 1922, as "The radio direction finder: its application, construction and operation."
- OBlindfold Navigation, by radio: Department of Commerce radio fog signaling and radio compass system. F.A.Kolster. Shipping, 13, pp.13-18; Feb. 25, 1921.
- ORadio communication with postal airplanes. J.L.Bernard and L.E. Whittemore. Aerial Age Weekly, 13, p.105; April 11, 1921.
- Some physical problems of aircraft radio. (Brief note.) L.E. Whittemore. Physical Review, 18, p.149; August, 1921.
- OThe development of radio telephone communication between life-boats and shore stations. F.W.Dunmore. Radio News, 3, p.894; February, 1922.

Electron Tubes

- Dependence of the input impedance of a three-electrode vacuum tube upon the load in the plate circuit. J.M.Miller. S351. 18 pages. 1919. 56 (B.S.Scientific Papers 15, 367-335.)
- Determination of the output characteristics of electron tube generators. L.M.Hull. S355. 20 pages. 1919. 5 ¢ (B.S. Scientific Papers 15, 497-517.)

- An electron tube transmitter of completely modulated waves. L.M.Hull. S381. 13 pages. June 18, 1920. (B.S.Scientific Papers 16, 259-271.) 5 &
- Operation of the modulator tube in radio telephone sets. E.S. Purington. S423. 29 pages. 1921. (B.S.Scientific Papers 17, 377-406.) 10 &
- Radio-frequency amplifiers. P.D.Lowell. S449. 7 pages. 1922. 5 6 (B.S.Scientific Papers 18, 335-343.)
- An electron tube amplifier using 60-cycle alternating current to supply power for the filaments and plates. P.D.Lowell. S450. 7 pages. 1922. 5 (B.S.Scientific Papers 18, 345-352.)
- OA dynamic method of determining the characteristics of threeelectrode vacuum tubes. J.M.Miller. Proceedings of the Institute of Radio Engineers, 6, p.141. 8 pages. 1918.
- oThe dependence of the amplification constant and internal plate circuit resistance of a three-electrode vacuum tube upon the structural dimensions. J.M.Miller. Proceedings of the Institute of Radio Engineers, 8, p.64. 10 pages. Feb., 1920.
- Operation of an electron tube as an amplifying rectifier (Brief note.) L.M.Hull. Physical Review 15, p. 557, June, 1920.
- Cong-distance radio telephony now practicable. J.H.Dellinger. Electrical World, 77, p.142; January 15, 1921.
- OA high-voltage storage battery for use with electron tube generators of radio-frequency currents. E.L.Hall and J.L.Preston. Journal Optical Society of America and Review of Scientific Instruments, 6, p.177-182; March, 1922.
- OMeasurements on audio-frequency amplifiers. L.M.Hull. Wireless Age, 8, pp.12-16; June, 1921.
- *Notation for electron tube circuits. J.H.Dellinger. Radio Review 2, pp.454-459; December, 1921.
- °Input resistance of thermionic valve. J.M.Miller. Journal American Institute of Electrical Engineers, 40, p.200; March, 1921.
- OAn electron tube amplifier for amplifying direct current. H.A. Snow. Journal Optical Society of America and Review of Scientific Instruments, 6, pp.186-192; March, 1922.

Letter Circulars

The following documents are not available in printed form. They have been prepared in mimeographed form only, like this pamphlet, and can be consulted at the Bureau of Standards. The Bureau has only a small number of copies of these, but where a person can show special need for the information, a copy may be furnished without charge.

- Letter Circular No.40, Radio publications of the Bureau of Standards.
- Letter Circular No.41, Extension of the Dewey decimal classification applied to radio.
- Letter Circular No.45, Construction and operation of a simple radiotelegraphic code practice set.
- Letter Circular No.46, Description of fixed condensers used with simple radio receiving sets.
- Letter Circular No.47, Description of a loading coil used with simple radio receiving sets.
- Letter Circular No.48, Description and operation of an electron tube detector unit.
- Letter Circular No.49, Description and operation of an audiofrequency amplifier unit for simple radio receiving outfits.
- Letter Circular No.56, Methods of radio direction finding as an aid to navigation: The relative advantages of locating the direction finder on shore and on shipboard.
- Letter Circular No.62, Proposed revision of Rule 86 of the "National Electrical Code" on Radio Equipment.
- Letter Circular No.73, Fees for testing radio apparatus.
- Letter Circular No.75, The secondary standardization of radio wavemeters.
- Letter Circular No.76, The standardization of inductors at radio frequencies.
- Letter Circular No.77, The comparison of condensers at radio frequencies.
- Letter Circular No.78, Design of a portable short-wave radio wavemeter.
