VIII-O

U. S. DEPARTMENT OF COMMERCE  
NATIONAL BUREAU OF STANDARDS  
WASHINGTON

Letter  
Circular  
LC601

June 15, 1940

SOURCES OF INFORMATION ON THE PROPERTIES OF METALS AND ALLOYS (BOOKS)

The National Bureau of Standards receives frequent requests for general information on the properties of metals and alloys, which are often so comprehensive in scope that reference to sources of information is the only reply practicable. This Letter Circular has been prepared for that purpose. The list of references is by no means complete. The attempt has been made to give only a working bibliography. Many references, particularly foreign ones, have been intentionally excluded from the list together with books intended for specialists' use. Articles appearing in technical periodicals have not been listed except for several series of special metallurgical lectures, symposia, and general discussions. The indexes and abstracts listed in this Letter Circular will be helpful in locating articles on special subjects in the technical literature. The National Bureau of Standards has prepared a number of information circulars dealing with individual metals and alloys. These are included in the lists of references. Those no longer available for purchase are available for consultation in technical and Government depository libraries. Information on mechanical properties of specific alloys and metals is often included in specifications for such materials.

The various sources contained herein have been arranged topically, the reference books and periodicals are generally available in any large technical or scientific library. Addresses of publishers of most of the books are listed on page 22, only the name being given after that of the book, except in the case of unusual or less common addresses, which are given together with the title of the book.

Letter Circular 522 of the National Bureau of Standards lists all the metallurgical publications which have originated in work carried out at the Bureau. A copy of that Letter Circular will be sent on request.

The Bureau of Mines, Department of the Interior, Washington, D. C. has issued a considerable number of pamphlets on the occurrence, refining, and properties of metals and other materials. A list of these publications will be sent on application to the Bureau of Mines, and copies of the papers themselves may be consulted at Government depository libraries in the larger cities.

## Contents

- A. Lists of alloys
- B. Abstracts and indexes
- C. Handbooks
- D. Statistics
- E. Nonferrous metals and alloys (general)
- F. Iron and steel
- G. Foundry, cast iron and nonferrous metals
- H. Individual metals
  - a. Aluminum
  - b. Antimony
  - c. Arsenic
  - d. Beryllium
  - e. Bismuth
  - f. Cadmium
  - g. Calcium, barium, lithium, etc.
  - h. Chromium
  - i. Cobalt
  - j. Copper
  - k. Gold
  - l. Lead
  - m. Magnesium
  - n. Manganese
  - o. Mercury
  - p. Molybdenum
  - q. Nickel
  - r. Platinum and related metals
  - s. Silicon
  - t. Silver
  - u. Tin
  - v. Titanium
  - w. Tungsten
  - x. Uranium, vanadium
  - y. Zinc
  - z. Zirconium
  - zz. Rare metals
- I. General metallurgical subjects
- J. Metallography (general)
- K. Crystal structure of metals; X-ray study
- L. Mechanical properties
- M. Specifications
- N. Special sources, metallurgical lectures, symposia, etc.
- O. Publishers of books listed

- 58 Metallurgy of steel. F. W. Harbord and J. W. Hall. J. B. Lippincott Co. (1922).
- 59 Aircraft steels and materials. L. Hitchison. Constable & Co., London (1922).
- 60 Engineering steels. L. Hitchison. L. VanNostrand (1921).
- 61 Heat treatment of soft and medium steels. P. Giolitti. McGraw-Hill Book Co. (1921).
- Also references. 37, 316, Nbl-17, Ndl-14, Ngl-1.

The names of steel manufacturers and the type of product they manufacture are listed in the Iron and Steel Works Directory of the United States and Canada, American Iron and Steel Institute, 150 Fifth Avenue, New York, N. Y. Useful pamphlets describing their products have been issued by many companies. The following are typical:-

- 1 Allegheny-Ludlum Steel Company, Brackenridge, Pa.
- 2 American Rolling Mill Company, Middletown, Ohio
- 3 Bethlehem Steel Company, Bethlehem, Pennsylvania
- 4 Carnegie-Illinois Steel Company, Pittsburgh, Pa.
- 5 Climax Molybdenum Company, 500 Fifth Avenue, New York, N. Y.
- 6 Crucible Steel Company of America, 17 East 42nd Street, New York, N.Y.
- 7 Cyclops Steel Company, Titusville, Pennsylvania
- 8 Donner Steel Company, Buffalo, New York
- 9 Firth-Sterling Steel Company, McKeesport, Pa.
- 10 InlandSteel Company, 38 So. Dearborn Street, Chicago, Ill.
- 11 Interstate Iron and Steel Company, 104 So. Michigan Ave., Chicago, Ill.
- 12 Latrobe Electric Steel Company, Latrobe, Pennsylvania
- 13 Republic Steel Corporation, Cleveland, Ohio
- 14 Simonds Saw and Steel Company, Lockport, New York
- 15 Tacony Steel Company, Tacony, Philadelphia, Pa.
- 16 The Carpenter Steel Company, Reading, Pennsylvania
- 17 The International Nickel Company, 67 Wall Street, New York, N. Y.
- 18 The Midvale Company, Nicetown, Philadelphia, Pennsylvania
- 19 Timken Steel and Tube Company, Canton, Ohio
- 20 Titanium Alloys Manufacturing Company, Niagara Falls, New York
- 21 Universal Steel Company, Bridgeville, Pennsylvania
- 22 Vanadium Alloys Steel Company, Latrobe, Pennsylvania
- 23 Vanadium Corporation of America, 420 Lexington Avenue, New York, N.Y.

HI - Lead

Ref.

- 1 Useful information about lead. Lead Industries Assn., 420 Lexington Ave., New York (1931).
- 2 Lead, the precious metal. O. C. Harn. The Century Co. (1924).
- 3 Lead, its occurrence in nature, the modes of its extraction, its properties and uses. J. A. Smythe. Longmans, Green & Co. (1923).

Also references: C3, E7, E24.

Lead Industries Association also issues "Lead", a quarterly publication, and some other technical pamphlets.

Hm - Magnesium

Ref.

- 1 Magnesium. American Magnesium Corporation, Cleveland, Ohio (1935). Also references: C3, E7, E24, H17.

The Dow Chemical Company, Midland, Michigan has issued several pamphlets on the subject. Two outstanding ones are "Dowmetal" and "Dowmetal Laboratory Methods".

Hn - Manganese

Ref.

- 1 Manganese. its uses, preparation, mining, costs and production of ferro-alloys. J. M. Weld and others. Bureau of Mines Bul. 173. Superintendent of Documents (1920).

Also references: E4, E7.

Ho - Mercury

Ref.

- Hol Metallurgy of quicksilver. L. H. Duschak and J. N. Schuette.  
Bureau of Mine's Bul. 222. Superintendent of Documents (1925).  
Also references: E7, E24.

Hp - Molybdenum

Ref.

- Hpl Molybdenum in steel. Climax Molybdenum Corporation (1938).  
2 Molybdenum in cast iron. Climax Molybdenum Corporation (1937).  
3 Molybdenum. V. L. Hardley-Wilmot. Canada Department of Mines,  
Ottawa (1925).

Also references: E7, F40, F64.

The Climax Molybdenum Corporation, 500 Fifth Avenue, New York, N. Y.  
issues a pamphlet monthly entitled "Moly-Matrix". The Molybdenum Corpora-  
tion of America, Pittsburgh, also issues pamphlets.

Ho - Nickel

Ref.

- Hql Nickel. Circular, National Bureau of Standards C160. Superintendent  
of Documents (1924).  
2 Nickel: the mining, refining and applications of nickel. F.B.H.White.  
Sir I. Pitman & Sons (1923).

Also references: C3, E7, E24, F57.

The International Nickel Company, 67 Wall Street, New York, N. Y. dis-  
tributes several series of pamphlets dealing with nickel and nickel alloys.

Hr - Platinum and related metals

Ref.

- Hrl Platinum metals. E. A. Smith. Sir I. Pitman & Sons (1925).

Also references: C3, E7.

The various platinum manufacturers have issued technical pamphlets on  
platinum:- Baker & Co. Platinum Works, Newark, N. J.; Sigmund John, 44 Gold  
Street, New York; J. Bishop & Co., Malvern, Pa.

Hs - Silicon

Ref.

- Hsl Reference Ha7.

Also references: E24, F30.

Ht - Silver

Ref.

- Htl Silver in industry. Edited by Lawrence Addicks.  
Reinhold Publ. Co. (1940).

- 2 Working in precious metals. E. A. Smith. And ed. N.A.G. Press,  
London (1937).  
3 The book of old silver - English, American, foreign. S. B. Wyler.  
Crown Publishers, New York (1937).

Ht - Silver (continued)

Ref.

- Ht4 Silver: its properties and industrial uses. B. A. Rogers, I.C.Schoonover and L. Jordan. Circular, National Bureau of Standards C412. Superintendent of Documents (1936). 10 cents.  
5 The Hanoy book for jewelers. Handy & Harman (1935).  
6 The making of mirrors by the deposition of metal on glass. Circular, National Bureau of Standards C389. Superintendent of Documents (1931). 5 cents.  
7 Silver, its history and romance. Benjamin White. 3rd ed. Waterlow and Sons, Ltd., London (1920).

Also references: E7.

Hu - Tin

Ref.

- Hu1 Tin. C. L. Mantell. Reinhold Publ. Corp. (1929).  
2 Tin and the tin industry, the metal, history, character and application. A. H. Mundey. Sir I. Pitman & Sons (1925).

Also references: C3, E7, E24, F46.

The International Tin Research and Development Council, Battelle Memorial Institute, 505 King Avenue, Columbus, Ohio, from time to time, issues pamphlets dealing with tin and its various uses, sent usually on request. A quarterly journal, "Tin and Its Uses", is issued by this organization.

Hv - Titanium

Ref.

- Hv1 Titanium, with special reference to the analysis of titaniferous substances. W. H. Thornton. Reinhold Publ. Corp. (1927).

Also references: E7.

Hw - Tungsten

Ref.

- Hw1 Tungsten. J. J. Smithells. D. VanNostrand (1927).

Also references: C3, E7, F38, J26.

The Fansteel Company, North Chicago, Ill. has issued pamphlets on tungsten, columbium, tantalum and other uncommon metals.

Hx - Uranium, Vanadium

Ref.

- Hx1 Vanadium steels and irons. Vanadium Corporation of America, 420 Lexington Avenue, New York (1937).

Also reference: E7.

Pamphlets on vanadium are available for distribution by the above company (reference Hx1).

Hy - Zinc

Ref.

- Hy1 Galvanizing. H. Bablik. Trans. A. Juers-Ludicky. E. & F. N. Spon, London (1936).

2 Zinc and its alloys. Circular, National Bureau of Standards C595. Superintendent of Documents (1931). 25 cents.

Hy - Zinc (continued)

Ref.

Hy5 Zinc and its corrosion resistance. Am. Zinc Inst., 60 East 42nd St., New York (1928).

Also references: C3, E7, I7, I-18.

The American Zinc Institute issues a monthly bulletin entitled "Make It of Zinc". Address is given above. The New Jersey Zinc Company, 160 Front Street, New York also issues periodicals on zinc and its alloys.

Hx - Zirconium

Ref.

Hx1 Zirconium and its compounds. F. P. Venable. Reinhold Publ. Corp. (1922).

2 Investigations of zirconium. J. W. Marden and M. N. Piele. Bu. Mines Bul. 186. Superintendent of Documents (1921).

Also references: E7, F54.

Hzz - Rare metals

See references: E7, E8, E20, I8.

Nc - Institute of Metals (British) May Lectures

(All are published in Journal of Institute of Metals)

Ref.

- 1 Nel The hard and soft states in metals. G. T. Beilby. 6, 5 (1911).
- 2 The inner structure of simple metals. Sir J. Alfred Ewing. 8, 8 (1912).
- 3 No lecture in 1913.
- 4 Internal strains in cold-wrought metals and some troubles caused thereby. E. Heyn. 12, 3 (1914).
- 5 Conduction of electricity through metals. Sir J. J. Thompson. 14, 3 (1915).
- 6 X-rays and crystal structure, with special reference to certain metals. W. H. Bragg. 16, 2 (1916).
- 7 Researches made possible by the autographic load-extension optical indicator. W. E. Dalby. 18, 5 (1917).
- 8 The formation of diamond. Sir Charles Parsons. 20, 5 (1918).
- 9 Radio activity. Frederick Soddy. 22, 5 (1919).
- 10 Recent progress in thermo-electricity. J. A. F. Benedicks. 24, 7 (1920).
- 11 The casting of metals. Thomas Turner. 26, 5 (1921).
- 12 The relation of the elements. Sir Ernest Rutherford. 28, 5 (1922).
- 13 The inner structure of alloys. W. Rosenhain. 30, 5 (1923).
- 14 Atoms and isotopes. F. W. Aston. 32, 3 (1924).
- 15 The motion of electricity in metals. H. A. Lorentz. 33, 257 (1925).
- 16 The production of single crystals of metals and some of their properties. H. C. H. Carpenter. 35, 403 (1926).
- 17 The growth of crystals in supersaturated liquids. Sir Henry A. Miers. 37, 331 (1927).
- 18 The chemical properties of crystals. J. H. Desch. 39, 411 (1928).
- 19 States of mind which make or miss discoveries, with some ideas about metals. Sir Oliver Lodge. 41, 545 (1929).
- 20 The influence of technique on research. F. A. Freeth. 43, 369 (1930).
- 21 The progress of power production. W. B. Woodhouse. 45, 395 (1931).
- 22 The plastic deformation of metals. F. Körber. 48, 317 (1932).
- 23 The phenomena of quenching and tempering in alloys. Albert Portevin. 51, 315 (1935).
- 24 Gases and metal surfaces. E. K. Rideal. 54, 287 (1934).
- 25 Atomic arrangement in metals and alloys. W. L. Bragg. 56, 275 (1935).
- 26 The escape of electricity from metals: its practical consequences. J. C. Paterson. 58, 313 (1936).
- 27 The flow of metals. B. N. da C. Andrade. 60, 427 (1937).
- 28 Plastic strain in metals. G. I. Taylor. 62, 307 (1938).
- 29 The photographic emulsion and its contribution to science and industry. O. Bloch. 64, 35 (1939).

Nf - Institute of Metals (British) Autumn Lectures

(All are published in Journal of Institute of Metals)

Ref.

- 1 Nfl The science of human effort (motion body and vocational training). R. S. Hutton. 28, 469 (1922).
- 2 The use of nonferrous metals in engineering. Sir Henry Fowler. 51, 3 (1925).

Nf - Institute of Metals (British) Autumn Lectures (continued)

Ref.

- Nf3 Recent developments in nonferrous metallurgy in the United States.  
W. M. Corse. 32, 455 (1924).
- 4 Education, research and standardization. Sir John Dewrance. 34, 9 (1925).
- 5 Modern metallurgy and ancient industries. W. Rosenhain. 36, 7 (1926).
- 6 Nonferrous metals in modern transport. L. Aitchison. 36, 7 (1927).
- 7 Nonferrous metals in the shipping industry. F. G. Martin. 40, 7 (1928).
- 8 Aluminum and its alloys. A. G. C. Gwyer. 42, 11 (1929).
- 9 The use of nonferrous metals in the aeronautical industry. D. Hanson. 44, 5 (1930).
- 10 Thin films in relation to corrosion problems. U. R. Evans. 46, 7 (1931).
- 11 Corrosion fatigue of metals. H. J. Gough. 49, 17 (1932).
- 12 Twenty-five years' progress in metallurgical plant. W. R. Barclay. 52, 19 (1933).
- 13 The work of Walter Rosenhain. J. L. Haughton. 55, 17 (1934).
- 14 Metal melting, its effect on quality. H. W. Brownsden. 57, 17 (1935).
- 15 The scientific organization of works. P. Chevenard. 59, 19 (1936).
- 16 Metallurgy and the aero-engine. D. R. Pye. 61, 19 (1937).
- 17 No 1938 lecture.
- 18 Aluminium and highland water power. W. M. Morrison. 65, 17 (1939).

Ng - American Society for Testing Materials Symposia  
(For sale by Society)

Ref.

- Ngl Aircraft materials. Proc. 30, Pt. II, 26 (1930).
- 2 Corrosion- and heat-resistant alloys. (1930).
- 3 Pearlitic malleable iron castings. Proc. 31, Pt. II, 317 (1931).  
(Jointly with Am. Foundrymen's Assn.)
- 4 The effect of temperature on the properties of metals. (1931).  
(Jointly with Am. Soc. Mech. Engrs.)
- 5 Welding (1931).
- 6 Steel castings. Proc. 32, Pt. II, 43 (1932). (Jointly with Am. Foundrymen's Assn.).
- 7 Cast iron. Proc. 33, Pt. II, 115 (1933). (Jointly with Am. Foundrymen's Assn.)
- 8 The outdoor weathering of metals and metallic coatings. (1934).
- 9 Spectrographic analysis. Proc. 35, Pt. II, 47 (1935).
- 10 High-strength constructional metals (nickel, aluminum, copper, low-alloy steels). (1936).
- 11 Radiography and X-ray diffraction methods. (1936).
- 12 Impact testing. (1938).
- 13 Protecting metals against corrosion. (1938).

Nh - American Society for Metals Symposia  
(For sale by Society)

Ref.

- Nhl Nitriding symposium. Trans. 16, 1 (1929).
- 2 Grain-size symposium. Trans. 22, 861 (1934).
- 3 The plastic working of metals (1936).
- 4 Carburizing (1937).

Ni - Iron and Steel Institute (British)

Ref.

- Nil Symposium on welding of iron and steel (1936).  
1. Present-day practice and problems.  
2. Welding technique and metallurgy of welding.  
3. Symposium on steel making (1938).

Nj - The Faraday Society, General Discussions

(For sale by Faraday Society, 13 South Square, Gray's Inn, London, W.C.1, England; also in Transactions)

Ref.

- Njl Failure of metals under internal and prolonged stress. (1921).  
2 1st, 2nd, and 3rd reports, atmospheric corrosion. (1924, 1927, 1929).  
3 Physical chemistry of steel-making processes. (1925).  
4 The structure of metallic coatings, films and surfaces. (1935).

Nk - Alloys of Iron monograph Series

(For sale by McGraw-Hill Book Co.)

Ref.

- Nkl Alloys of iron and molybdenum. J. L. Gregg. (1932).  
2 Alloys of iron and silicon. E. S. Greiner, J. S. Marsh and Bradley Stoughton. (1933).  
3 Alloys of iron and tungsten. J. L. Gregg. (1934).  
4 Alloys of iron and copper. J. L. Gregg and B. N. Daniloff (1934).  
5 Principles of phase diagrams. J. S. Marsh. (1935).  
6 The metal - iron. H. E. Clevens and J. G. Thompson. (1935).  
7 Alloys of iron and carbon: Vol. 1 - Constitution, S. Epstein. (1936).  
" 2 - Properties, F. P. Sisco. (1937).  
8 Alloys of iron and chromium: Vol. 1 - Low chromium alloys.  
A. B. Kinzel and L. Crafts. (1937).  
Vol. 2 - High chromium alloys.  
A. B. Kinzel and R. Franks. (1940).  
9 Alloys of iron and nickel. J. S. Marsh. (1938).

Nl - American Foundrymen's Association Symposia

(For sale by Society)

Ref.

- Nl 1 Symposium on malleable iron castings (1931).  
2 Symposium on steel melting practice (1939).
