Aeronautic applications of radio:.....	22
Aeronautic radio beacon systems.....	23
Airplane landing aids.....	25
Aerological radio sounding.....	25
Broadcasting:.....	27
Standard frequency broadcasting.....	27

(over)

General Information

Some of the publications in this list have appeared in the regular series of publications of the Bureau, and others in various scientific and technical journals. Unless specifically stated, papers are not obtainable directly from the National Bureau of Standards.

Where the price is stated, the publications can be purchased from the Superintendent of Documents, Government Printing Office, Washington, D.C. The prices quoted are for delivery by mail to addresses in the United States and its territories and possessions and Canada and Mexico and certain other foreign countries which extend the franking privilege. In the case of all other countries, one-third the cost of the publication should be added to cover postage. Remittances should be made either by coupons (obtainable from the Superintendent of Documents in sets of 20 for \$1.00 and good until used), or by check or money order payable to the "Superintendent of Documents, Government Printing Office" and sent to him with order, or by cash at the sender's risk.

Publications marked "Free" are mimeographed pamphlets obtainable from the National Bureau of Standards without charge.

Publications marked "OP" are out of print, but, in general, may be consulted at technical libraries.

For papers in outside scientific or technical journals, the name of the journal or the organization publishing the article is given in abbreviated form, with the volume number (underscored), page, and year of publication, in the order named. The Bureau can not supply copies of these journals, or reprints from them, and it is unable to furnish information as to their availability or price. They, too, can usually be consulted at technical libraries. Inquiries for copies of such papers should be addressed directly to the publisher of the journal at the address given in list below.

This list includes all publications since Jan. 1, 1924, and also the publications earlier than 1924 issued by the Bureau itself of which copies are still available.

The Bureau does not maintain a mailing list for distribution of its radio publications as issued. Persons who wish to keep in touch with the radio publications of the Bureau as they are issued may subscribe to the "Technical News Bulletin", a monthly pamphlet giving news on the Bureau's scientific and engineering work and announcements of all new publications. Subscriptions should be sent to Superintendent of Documents, Government Printing Office, Washington, D.C. The price is 50 cents per year for subscribers in the United States.

The Journal of Research of the National Bureau of Standards is a monthly publication which contains the Bureau's Research Papers on all subjects. All subscriptions should be sent to Superintendent of Documents, Government Printing Office, Washington, D.C. The price is \$3.50 per year for subscribers in the United States.

All publications of the Bureau on all subjects, including those which are out of print, are listed in Circular C24, "Publications of the National Bureau of Standards", and the supplements thereto. The Circular and the set of supplements can be purchased for 55 cents, from Superintendent of Documents, Government Printing Office, Washington, D.C. Copies may be consulted at technical libraries in the larger cities.

Series letters with serial numbers are used to designate Bureau publications:

- S = "Scientific Paper". S1 to S329 are "Reprints" from the "Bulletin of the Bureau of Standards." S330 to S572 were published as "Scientific Papers of the Bureau of Standards". This series was superseded by the "Bureau of Standards Journal of Research" in 1928.
- T = "Technologic Paper". T1 to T370. This series was superseded by the "Bureau of Standards Journal of Research" in 1928.
- RP= "Research Paper". These are reprints of articles appearing in the "Bureau of Standards Journal of Research" and in the "Journal of Research of the National Bureau of Standards", the latter being the title of this periodical since July 1934 (Volume 13, number 1).
- C = "Circular".
- H = "Handbook".
- M = "Miscellaneous Publication".
- LC= "Letter Circular", a mimeographed pamphlet obtainable from the National Bureau of Standards without charge.

The underlined topics used as center-headings below are not the names of publications. They are general subjects given merely for convenience of classification of the various publications. The numbers under these topics are classification numbers according to the decimal classification system; and are not numbers by which any publications are known or ordered. A complete description of the classification system is given in Bureau Circular No. 385, "Classification of Radio Subjects; An Extension of the

Dewey Decimal System," now out of print, but available for consultation in technical libraries; it was reprinted in Proceedings of the Institute of Radio Engineers 18; 1433 (1930).

Addresses of Publishers of Journals

Aeronautical World, 1709 W. 8th St., Los Angeles, Calif.
The American Yearbook, The MacMillan Co., New York City.
Annals of the American Academy of Political and Social Science,
3457 Walnut St., Philadelphia, Pa.
Bulletin of the National Research Council, National Academy of
Sciences, Washington, D.C.
Bulletin of the American Meteorological Society, Blue Hills
Observatory, Harvard University, Milton, Mass.
Electrical World, 330 W. 42nd St., New York City.
Electronics, McGraw-Hill Bldg., 330 West 42nd St., New York City.
The Engineering Foundation, 29 West 39th St., New York City.
Engineers and Engineering, 124 W. Polk St., Chicago, Ill.
Jahrbuch d. drahtlosen Telegraphie, M. Krayn, Genthiner Strasse,
32, Berlin, Germany.
Journal of the Aeronautical Sciences, 5341 RCA Bldg., Rockefeller
Center, New York City.
Journal of the Franklin Institute, Franklin Institute of the
State of Pennsylvania, Philadelphia, Pa.
Journal of the Optical Society of America and Review of Scien-
tific Instruments, American Institute of Physics, 11 E. 38th
St., New York City.
Journal of the Washington Academy of Sciences, Washington
Academy of Sciences, Washington, D.C.
Journal of the Western Society of Engineers, 205 W. Wacker Drive,
Chicago, Ill.
Mechanical Engineering, 29 W. 39th St., New York City.
National Aeronautic Association Review, 1909 Mass. Ave., N.W.,
Washington, D.C.
Nature, MacMillan Co. Ltd., St. Martin St., London, W.C.2,
England.
L'Onde Electrique, La Société des Amis de la TSF, Paris, France.
Papers of the General Assembly held in Washington, International
Scientific Radio Union; International Scientific Radio Union,
Brussels, Belgium.
Papers of the International Civil Aeronautics Conference,
Superintendent of Documents, Government Printing Office,
Washington, D.C.
Papers of the Seventeenth Annual Safety Congress, National
Safety Council, Chicago, Ill.
Physical Review, American Institute of Physics, 11 E. 38th St.,
New York City.
Proceedings of the Institute of Radio Engineers, 330 West 42nd
St., New York City.

Proceedings of the National Academy of Sciences, National
 Academy of Sciences, Washington, D.C.
 Proceedings of the Third Pan-Pacific Science Congress,
 National Research Council of Japan, Tokyo, Japan.
 QST, American Radio Relay League, West Hartford, Conn.
 Radio, 1300 Kenwood, Santa Barbara, Calif.
 Radio Engineering, Bryant Publishing Co., 19 E. 47th St.,
 New York City.
 Radio News, Ziff-Davis Pub. Co., 608 So. Dearborn St.,
 Chicago, Ill.
 Science, The Science Press, Grand Central Terminal, New York City.
 Scientific American, 24 West 40th St., New York City.
 Terrestrial Magnetism and Atmospheric Electricity, Johns
 Hopkins Press, Baltimore, Md.
 Transactions American Geophysical Union, Twelfth Annual
 Meeting, National Academy of Sciences, Washington, D.C.

Radio (General)
 (R000)

<u>Title</u>	<u>Series</u>	<u>Price</u>
The principles underlying radio communication. 2nd ed., 1922. Signal Corps Radio Com- munication Pamphlet No. 40. (Textbook, 619 pages, with 300 illustrations, cover- ing radio principles and practice).		\$1.00
Classification of radio subjects, an extension of the Dewey Decimal System. (1930). Also published in Proc.I.R.E. <u>18</u> , 1433- 1456 (1930).	C385	OP
Electrical interference with radio reception. (1937).	LC491	Free
Sources of radio information. (1939).	LC578	Free
Radio communication, review for year. J. H. Dellinger. The American Yearbook, 1925, 1926, 1927, 1928, 1929.		

Laws; Regulations
 (R007)

Engineering aspects of the work of the Federal Radio Commission.
 J. H. Dellinger. Proc.I.R.E. 17, 1326-1333 (1929).
 Radio broadcasting regulation and legislation. J. H. Dellinger.
 Proc.I.R.E. 17, 2006-2010 (1929).

Radio Research
(R010)

<u>Title</u>	<u>Series</u> <u>Price</u>
Survey of current progress in radio engineering. J. H. Dellinger. J. Western Soc. Engineers <u>30</u> , 39-49 (1925).	
The International Union of Scientific Radio Telegraphy. J. H. Dellinger. Science <u>64</u> , 638-639 (1926).	
The International Union of Scientific Radio Telegraphy. J. H. Dellinger. Proc.I.R.E. <u>16</u> , 1107-1112 (1928).	
Some contributions of radio to other sciences. J. H. Dellinger. J. Franklin Institute <u>228</u> , 11-42 (1939).	

Radio Wave Transmission Phenomena (General)
(R113)

A statistical study of conditions affecting the distance range of radio telephone broadcasting stations. C. M. Jansky, Jr. Tech.Pap.BS <u>19</u> , 641-650 (1925)	T297 OP
Some studies of radio transmission over long paths made on the Byrd Antarctic Expedition. L. V. Berkner. BS J. Research <u>8</u> , 265-272 (1932).	RP412 10c
Bi-monthly reports, Receiving measurements and atmospheric disturbances at the Bureau of Standards. L. W. Austin. Proc.I.R.E. <u>10</u> , 239, 315, 421 (1922); <u>11</u> , 3, 83, 187, 333, 579 (1923); <u>12</u> , 3, 113, 227 (1924).	
Field intensity measurements in Washington on the Radio Corporation stations at New Brunswick and Tuckerton, N.J. L. W. Austin. Proc.I.R.E. <u>12</u> , 681-692 (1924).	
Some transpacific radio field intensity measurements. L. W. Austin. Proc.I.R.E. <u>13</u> , 151-157 (1925). J. Washington Acad. Sciences <u>15</u> , 139-143 (1925).	
Facts and fallacies of radio wave transmission. J. H. Dellinger. Radio News <u>7</u> , 1139, 1190, 1192, 1194 (1926).	
Application of radio transmission phenomena to the problems of atmospheric electricity. J. H. Dellinger. J. Wash. Acad. Sciences <u>16</u> , 162-167 (1926).	
Apparatus for recording radio phenomena. T. Parkinson. Bul. Nat. Research Council, No. 61, 183-191 (1927).	

Radio Wave Transmission Phenomena (General) (continued)TitleSeries Price

- Summary of symposium on correlations of various radio phenomena with solar and terrestrial magnetic and electric activities. J. H. Dellinger. Bul. Nat. Research Council, No. 61, 192-197 (1927).
- Report of the Chairman of the Commission of Radio Wave Propagation. International Union of Scientific Radio Telegraphy. L. W. Austin. Proc. I.R.E. 16, 348-358 (1928).
- Bibliography on radio wave phenomena and measurement of radio field intensity. Proc. I.R.E. 19, 1034-1089 (1931).
- Note on reception of radio broadcast stations at distances exceeding 12,000 km. L. V. Berkner. Proc. I.R.E. 20, 1324-1327 (1932).
- Report of Committee on Radio Wave Propagation. J. H. Dellinger (co-author). Proc. I.R.E. 26, 1193-1234 (1938).
- Report of Commission II - Radio wave propagation, International Scientific Radio Union. J. H. Dellinger. Proc. I.R.E. 27, 645-649 (1939).
- The role of the ionosphere in radio wave propagation. J. H. Dellinger. AIEE Trans. 58, 803-822 (1939).
- Radio progress during 1938 - Wave propagation. J. H. Dellinger. (Co-author). Proc. I.R.E. 27, 180-183 (1939).
- Radio progress during 1939 - Wave propagation. J. H. Dellinger. (Co-author). Proc. I.R.E. 28, 108-112 (1940).

Fading
(RI13.1)

- Cooperative measurements of radio fading in 1925. J. H. Dellinger, C. B. Jolliffe, and T. Parkinson. Sci. Pap. BS 22, 419-449 (1927). S561 OP
- Some observations of short-period radio fading. T. Parkinson. BS J. Research 2, 1057-1075 (1929). RP70 OP
Also published in Proc. I.R.E. 17, 1042-1061 (1929).
- A radio method for synchronizing recording apparatus. T. Parkinson and T. R. Gilliland. BS J. Research 6, 195-198 (1931). RP269 10c
Also published in Proc. I.R.E. 19, 335-340 (1931).

Fading (continued)

Radio signal fading phenomena. J. H. Dellinger and L. E. Whittemore. J. Wash. Acad. Sciences 2, 245-259 (1921). Jahrbuch d. drahtlosen Telegraphie 24, 66-70 (1924).

Concerning the nature of fading. J. H. Dellinger. Radio News 7, 270, 390 (1925).

Results of cooperative measurements of radio fading. J. H. Dellinger, C. B. Jolliffe, and T. Parkinson. Radio News 8, 146 (1926).

Daily and Seasonal Variations
(R113.2)

Long-distance radio receiving measurements at the Bureau of Standards in 1923. L. W. Austin. Proc.I.R.E. 12, 389-394 (1924).

Long-distance receiving measurements in 1924. L. W. Austin. Proc.I.R.E. 13, 283-290 (1925). J. Wash.Acad.Sciences 15, 227-234 (1925).

Long-distance radio receiving measurements and atmospheric disturbances at the Bureau of Standards in 1925. L. W. Austin. Proc.I.R.E. 14, 663-673 (1926).

Long wave radio measurements at the Bureau of Standards in 1926, with some comparisons of solar activity and radio phenomena. L. W. Austin. Proc.I.R.E. 15, 825-836 (1927).

Long wave radio receiving measurements at the Bureau of Standards in 1927. L. W. Austin. Proc.I.R.E. 16, 1252-1257 (1928).

Long wave radio receiving measurements at the Bureau of Standards in 1928. L. W. Austin. Proc.I.R.E. 18, 101-105 (1930).

Long wave radio receiving measurements at the Bureau of Standards in 1929. L. W. Austin. Proc.I.R.E. 18, 1481-1487 (1930).

Long wave radio receiving measurements at the Bureau of Standards in 1930. L. W. Austin. Proc.I.R.E. 19, 1767-1772 (1931).

A method of representing radio wave propagation conditions. L. W. Austin. Proc.I.R.E. 19, 1615-1617 (1931).

Daily and Seasonal Variations (continued)TitleSeries Price

Tables of North Atlantic radio transmission conditions for long wave length daylight signals for the years 1922 to 1930.

L. W. Austin. Proc.I.R.E. 20, 689-698 (1932).

Low-frequency radio receiving measurements at the Bureau of Standards in 1931 and 1932. E. B. Judson. Proc.I.R.E. 21, 1354-1363 (1933).

Direction Variations

(R113.3. See also R325.31, R526.1, and R526.2)

A suggestion for experiments on apparent radio direction variations.

L. W. Austin. Proc.I.R.E. 13, 3-4 (1925).

A new phenomenon in sunset radio direction variations. L. W. Austin.

J. Wash. Acad. Sciences 15, No. 14, 317-319 (1925).

Proc.I.R.E. 13, 409-412 (1925).

Apparent night variations with crossed-coil radio beacons.

H. Pratt. Proc.I.R.E. 16, 652-657 (1928).

Meteorological, Geophysical, and Cosmic Effects

(R113.5)

Comparison of data on the ionosphere, sunspots and terrestrial magnetism. E. B. Judson. J. Research NBS 17, 323-330 (1936).

RF913 5c

Also published in Proc.I.R.E. 25, 38-46 (1937).

Sudden disturbances of the ionosphere. J. H. Delinger.

J. Research NBS 19, 111-149 (1937).

RF1016 15c

Also published in Proc.I.R.E. 25, 1253-1290 (1937).

Radio signal strength and temperature. L. W. Austin and I. J.

Wymore. Proc.I.R.E. 14, 781-784 (1926).

The relations between radio and other natural phenomena. L. W.

Austin. Proc. of the Third Pan-Pacific Science Congress 2, 1257-1263 (1926).

On the influence of solar activity on radio transmission. L. W.

Austin and I.J.Wymore. Proc.I.R.E. 16, 166-173. (1928).

The relation of radio propagation to disturbances in terrestrial magnetism. I. J. Wymore. Proc.I.R.E. 17, 1206-1213 (1929).

Meteorological, Geophysical, and Cosmic Effects (continued)

Note on a comparison of sunspot numbers, terrestrial magnetic activity, and long wave radio signal strength. L. W. Austin. J. Wash.Acad.Sciences 20, 73-74 (1930).

Solar and magnetic activity and radio transmissions. L. W. Austin, E. B. Judson, and I. J. Wymore-Shiel. Proc.I.R.E. 18, 1997-2002 (1930).

Solar activity and radiotelegraphy. L. W. Austin. Proc.I.R.E. 20, 280-285 (1932).

Observations on long-delay radio echoes. J. H. Dellinger. QST 18, pp.42,88 of August (1934).

The ionosphere, sunspots and magnetic storms. S. S. Kirby, T. R. Gilliland, E.B.Judson, and N.Smith. Phys.Rev. 48, 849 (1935).

A new cosmic phenomenon. J.H.Dellinger. Science 82, 351 (1935).

A new radio transmission phenomenon. J.H.Dellinger. Phys.Rev. 48, 705 (1935).

A new radio transmission phenomena. J. H. Dellinger. QST 19, pp.21, 29 of Dec. 1935.

Confirmation of cosmic phenomenon. J. H. Dellinger. Science 82, 548-549 (1935).

The ionosphere, solar eclipses, and magnetic storms. S.S.Kirby, T.R.Gilliland, N.Smith, and S.E.Reymer. Phys.Rev. 50, 258-259 (1936).

A new solar radio disturbance. J.H.Dellinger. Electronics 9, pp.25, 34 of Jan. (1936).

New cosmic phenomena. J.H.Dellinger. QST 20, pp.8,79 of Jan.(1936)

High-frequency fadeouts continue. J.H.Dellinger. QST 20, p.37 of June (1936).

Direct effects of particular solar eruptions on terrestrial phenomena. J.H.Dellinger. Phys.Rev. 50, 1189 (1936).

Ionosphere and magnetic storms. S.S.Kirby, N.Smith, T.R.Gilliland, and S.E.Reymer. Phys.Rev. 51, 992-993 (1937).

Radio fadeouts through 1936. J.H.Dellinger. QST 21, pp.35, 86, 88 of Feb. (1937).

Meteorological, Geophysical, and Cosmic Effects (continued)

<u>Title</u>	<u>Series</u>	<u>Price</u>
Sudden ionospheric disturbances. J.H.Dellinger. Ter. Mag. & Atmos. Elec. <u>42</u> , 49-53 (1937).		
Sudden disturbances of the ionosphere. J.H.Dellinger. J.Applied Physics <u>8</u> , 732 (1937).		
Remark on S. Chapman's "Note on radio fadeouts and the associated magnetic disturbances". S.S.Kirby. Ter.Mag.& Atmos.Elec. <u>42</u> , 420 (1937).		
Discussion of S. Chapman's "Note on radio fadeouts and associated magnetic disturbances". J.H.Dellinger. Ter.Mag.& Atmos. Elec. <u>43</u> , 179 (1938).		
The nature of the ionosphere storm. S.S.Kirby, N.Smith, T.R. Gilliland. Phys.Rev. <u>54</u> , 234 (1938).		
The sun and the ionosphere. J.H.Dellinger. Fifth Report of Commission on Solar and Terrestrial Relationships, p.72 (1939).		

Eclipses
(RL13.55)

Radio observations of the Bureau of Standards during the solar eclipse of August 31, 1932. S.S.Kirby, L.V.Berkner, T.R.Gilliland, and K.A.Norton. BS J.Research <u>11</u> , 829-845 (1933). Also published in Proc.I.R.E. <u>22</u> , 247-264 (1934).	RP629	5c
Ionosphere studies during partial solar eclipse of Feb.3,1935. S.S.Kirby, T.R.Gilliland, and E.B. Judson. J.Research NBS <u>16</u> , 213-225 (1936). Also published in Proc.I.R.E. <u>24</u> , 1027-1040 (1936).	RP868	5c
Predictions of normal radio critical frequencies related to solar eclipses in 1940. N.Smith. J. Research NBS <u>24</u> , 225-228 (1940).	RP1279	5c
Observations radiotelegraphiques pendant l'eclipse du soleil du 10 septembre, 1923. (Radio observations during the eclipse of the sun, Sept. 10, 1923). L. W. Austin. L'Onde Electrique <u>3</u> , 591-594 (1924).		

Ionosphere
(R113.61)

<u>Title</u>	<u>Series</u>	<u>Price</u>
Kennelly-Heaviside layer height observations for 4045 and 8650 kc. T.R.Gilliland. BS J. Research 5, 1057-1061 (1930). Also published in Proc.I.R.E. <u>19</u> , 114-119 (1931).	RP246	10c
Preliminary note on an automatic recorder giving a continuous height record of the Kennelly-Heaviside layer. T.R.Gilliland and G.W. Kenrick. BS J. Research 7, 783-790 (1931). Also published in Proc.I.R.E. <u>20</u> , 540-547 (1932).	RP373	10c
Investigations of Kennelly-Heaviside layer heights for frequencies between 1600 and 8650 kc per second. T.R.Gilliland, G.W.Kenrick, and K.A. Norton. BS J. Research 7, 1083-1104 (1931). Also published in Proc.I.R.E. <u>20</u> , 286-309 (1932).	RP390	10c
Continuous measurements of the virtual heights of the ionosphere. T.R.Gilliland, BS J. Research <u>11</u> , 141-146 (1933). Also published in Proc.I.R.E. <u>21</u> , 1463-1475 (1933).	RP582	5c
Note on a multifrequency automatic recorder of ionosphere heights. T.R.Gilliland. BS J. Research <u>11</u> , 561-566 (1933). Also published in Proc.I.R.E. <u>22</u> , 236-246 (1934).	RP608	5c
Studies of the ionosphere and their application to radio transmission. S.S.Kirby, L.V.Berkner, and D.M.Stuart. BS J. Research <u>12</u> , 15-51 (1934). Also published in Proc.I.R.E. <u>22</u> , 481-521 (1934).	RP632	OP
Multifrequency ionosphere recording and its significance. T.R. Gilliland. J.Research NBS <u>14</u> , 283-303 (1935). Also published in Proc.I.R.E. <u>23</u> , 1076-1101 (1935).	RP769	5c
Recent studies of the ionosphere. S.S.Kirby and E.B. Judson. J.Research NBS <u>14</u> , 469-486 (1935). Also published in Proc.I.R.E. <u>23</u> , 733-751 (1935).	RP780	5c

Ionosphere (continued)

<u>Title</u>	<u>Series</u>	<u>Price</u>
Characteristics of the ionosphere and their application to radio transmission. T.R.Gilliland, S.S.Kirby, S.E.Reymer and N.Smith. J. Research NBS <u>18</u> , 645-667 (1937). Also published in Proc.I.R.E. <u>25</u> , 823-840 (1937).	RP1001	10c
Maximum usable frequencies for radio sky-wave transmission, 1933 to 1937. T.R.Gilliland, S.S.Kirby, N.Smith, and S.E.Reymer. J.Research NBS <u>20</u> , 627-639 (1938). Also published in Proc.I.R.E. <u>26</u> , 1347-1350 (1938).	RP1096	5c
Application of vertical-incidence ionosphere measurements to oblique-incidence radio transmissions. N.Smith. J.Research NBS <u>20</u> , 683-705 (1938).	RP1100	10c
Trends of characteristics of the ionosphere for half a sunspot cycle. N.Smith, T.R.Gilliland, and S.S.Kirby. J.Research NBS <u>21</u> , 835-845 (1938).	RP1159	5c
The ionosphere and radio transmission conditions, with special reference to the observing and reporting service of the National Bureau of Standards. (1939). Republished in QST <u>24</u> , p.32 of March (1940); and in T. & R.Bull. <u>16</u> , 4 (1940).	LC575	Free
Kennelly-Heaviside layer studies. P.A.DeMars, T.R.Gilliland, and G.W.Kenrick. Proc.I.R.E. <u>20</u> , 106-113 (1931).		
Ionospheric investigations. T.R.Gilliland. Nature (London) <u>134</u> , 379 (1934).		
Averages of critical frequencies and virtual heights of the ionosphere observed by the National Bureau of Standards, Washington, D.C., 1934-1936. T.R.Gilliland, S.S.Kirby, N.Smith, and S.E.Reymer. Ter.Mag. & Atmos.Elec. <u>41</u> , 379-388 (1936).		
Averages of critical frequencies and virtual heights of the ionosphere observed by the National Bureau of Standards, Washington, D.C. Published quarterly in Ter. Mag. & Atmos. Elec., starting with the March 1937 issue.		

Ionosphere (continued)

<u>Title</u>	<u>Series</u>	<u>Price</u>
Critical frequencies of low ionosphere layers. N.Smith and S.S. Kirby. Phys.Rev. <u>51</u> , 890-891 (1937).		
Characteristics of the ionosphere at Washington, D.C., Jan. to May 1937. T.R.Gilliland, S.S.Kirby, N.Smith, and S.E. Reymer. Proc.I.R.E. <u>25</u> , 1174-1184 (1937).		
Characteristics of the ionosphere at Washington, D.C.—— Published each month in Proc.I.R.E., starting with the Sept. 1937 issue.		
Averages of critical frequencies and virtual heights of the ionosphere observed by the National Bureau of Standards, Washington, D.C., Sept. and Oct., 1937. Ter.Mag. & Atmos. Elec. <u>42</u> , 408-411 (1937).		
Oblique-incidence ionosphere data and the Lorentz polarization term. N.Smith. Trans.Amer.Geophysical Union, 20th Annual Meeting, p.375 (1939).		
Predictions of useful distances for amateur communication. N.Smith and S.S.Kirby. QST <u>24</u> , pp.26-27 of Sept.(1940).		
<u>Transmission Formulas; Distance Range</u> (R113.7. See also R113, R120).		
Radio field intensity measurements at frequencies from 285 to 5400 kilocycles per second. S.S.Kirby and K.A.Norton. BS J. Research <u>8</u> , 463-479 (1932). Also published in Proc.I.R.E. <u>20</u> , 841-862 (1932).	RP429	5c
Distance ranges of radio waves. (1932).	LC317	Free
An analysis of continuous records of field intensity at broadcast frequencies. K.A.Norton, S.S.Kirby, and G.H.Lester. J.Research NBS <u>13</u> , 897-910 (1934). Also published in Proc.I.R.E. <u>23</u> , 1183-1200 (1935)	RP752	5c
Extension of normal-incidence ionosphere measurements to oblique-incidence radio transmission. N.Smith. J.Research NBS <u>19</u> , 89-94 (1937).	RP1013	5c

Transmission Formulas; Distance Range (continued)

<u>Title</u>	<u>Series</u>	<u>Price</u>
Application of graphs of maximum usable frequencies to communication problems. N.Smith, S.S.Kirby, T.R.Gilliland. J.Research NBS <u>22</u> , 81-92 (1939).	RP1167	5c
Preliminary note on proposed changes in the constants of the Austin-Cohen transmission formula. L.W.Austin. Proc.I.R.E. <u>14</u> , 377-380 (1926).		
Propagation of waves of 150 to 2000 kilocycles per second (2000 to 150 meters) at distances between 50 and 2000 kilometers. B. van der Pol, T.L.Eckersley, J.H.Dellinger, and P. LeCorbeiller. Proc.I.R.E. <u>21</u> , 996-1001 (1933).		
Report of Committee on Radio Propagation Data. J.H.Dellinger, S.S.Kirby, and others. Proc.I.R.E. <u>21</u> , 1419-1438 (1933).		
Skip distance calculation. N.Smith. QST <u>21</u> , 47-48 of May (1937).		
The relation of radio sky-wave transmission to ionosphere measurements. N.Smith. Proc.I.R.E. <u>27</u> , 332-347 (1939).		

Atmospheric Disturbances; Strays
(R114)

Our present knowledge concerning the atmospheric disturbances of radio telegraphy. L.W.Austin. Bul. Nat. Research Council, No.41, 127-130 (1924).		
The present status of radio atmospheric disturbances. L.W.Austin. Proc.I.R.E. <u>14</u> , 133-138 (1926).		
on the Isthmus of Panama.		
Direction determinations of atmospheric disturbances/ L.W.Austin. Proc.I.R.E. <u>14</u> , 373-376 (1926).		
Radio atmospheric disturbances and solar activity. L.W.Austin. Proc.I.R.E. <u>15</u> , 837-842 (1927).		

Antennas (General)
(R120. See also R325.31 and R525).

Methods, formulas and tables for the calculation of antenna capacity. F.W.Grover. Sci.Pap.BS <u>22</u> , 569-629 (1928).	S568	OF
Graphical determination of polar pattern of directional antenna systems. G.L.Davies and W.H. Orton. BS J. Research <u>8</u> , 555-569 (1932).	RP435	5c

Antennas (General) (continued)

<u>Title</u>	<u>Series</u>	<u>Price</u>
Radio field intensity and distance characteristics of a high vertical broadcast antenna. S.S. Kirby. J. Research NBS <u>16</u> , 289-300 (1936).	RF874	5c
The possibilities of directional radio transmission. J.H. Dellinger. J. Franklin Inst. <u>204</u> , 239-243 (1927).		

Radio Measurements and Standardization
(R200)

Radio instruments and measurements. 2nd ed. (1924, reprinted 1937).	C74	60c
---	-----	-----

Frequency Measurements and Standards (General)
(R210. See also R555)

Primary radio-frequency standardization by use of the cathode-ray oscillograph. Grace Hazen and Frieda Kenyon. Sci. Pap. BS <u>19</u> , 445-461 (1924).	S489	10c
Theory of determination of ultra-radio frequencies by standing waves on wires. A. Hund. Sci. Pap. BS <u>19</u> , 487-540 (1924).	S491	OP
An improved type of wavemeter resonance indicator. M.S. Strock. Sci. Pap. BS <u>20</u> , 111-118 (1925).	S502	OP
Establishment of radio standards of frequency by the use of a harmonic amplifier. C.B. Jolliffe and Grace Hazen. Sci. Pap. BS <u>21</u> , 179-189 (1926).	S530	OP
Method and apparatus used in testing piezo oscillators for broadcasting stations. E.L. Hall. BS J. Research <u>4</u> , 115-130 (1930). Also published in Proc. I.R.E. <u>18</u> , 490-509 (1930).	RF135	OP
A precise and rapid method of measuring frequencies from 5 to 200 cycles per second. N.F. Case. BS J. Research <u>5</u> , 237-242 (1930). Also published in Proc. I.R.E. <u>18</u> , 1586-1592 (1930).	RP195	OP
Accurate method of measuring transmitted wave frequencies at 5000 and 20,000 kilocycles per second. E.L. Hall. BS J. Research <u>5</u> , 647-652 (1930). Also published in Proc. I.R.E. <u>19</u> , 35-41 (1931).	RF220	OP

Frequency Measurements and Standards (General) (continued)

<u>Title</u>	<u>Series</u>	<u>Price</u>
The national primary standard of radio frequency. E.L.Hall, V.E.Heaton, and E.G.Lapham. J.Research NBS <u>14</u> , 85-98 (1935).	RF759	OP
Harmonic method of intercomparing the oscillators of the National Standard of Radio Frequency. E.G.Lapham. J.Research NBS <u>17</u> , 491-496 (1936).	RP925	5c
Production of accurate one-second time intervals. W.D.George. J.Research NBS <u>21</u> , 367-373 (1938).	RF1136	5c
Correction factor for the parallel wire system used in absolute radio-frequency standardization. A.Hund. Proc.I.R.E. <u>12</u> , 817-821 (1924).		
The standard wavemeters of the Bureau of Standards. E.L.Hall. Sibley Jour. of Engineering (Ithaca, N.Y.) <u>38</u> , 123-126 (1924).		
A method of measuring radio frequency by means of a harmonic generator. A.Hund. Proc.I.R.E. <u>13</u> , 207-213 (1925).		
International comparisons of frequency standards. J.H.Dellinger. Papers of General Assembly held in Washington, International Scientific Radio Union, part 1, 18-21 (1927).		
The status of frequency standardization. J.H.Dellinger. Proc.I.R.E. <u>16</u> , 579-592 (1928).		
A system for frequency measurements based on a single frequency. E.L.Hall. Proc.I.R.E. <u>17</u> , 272-282 (1929).		
The accuracy of the primary frequency standard of the Bureau of Standards. C.G.McIlwraith. Trans. Am. Geophysical Union. Twelfth Annual Meeting, p.29 (1931).		
The testing of frequency monitors for the Federal Radio Commission. W.D.George. Proc.I.R.E. <u>22</u> , 449-456 (1934).		

Piezoelectric Standards of Frequency
(R214)

Design of a portable temperature-controlled piezo oscillator. V.E.Heaton and W.H.Brattain. BS J.Research <u>4</u> , 345-350 (1930). Also published in Proc.I.R.E. <u>18</u> , 1239-1246 (1930).	RF153	OP
--	-------	----

Piezoelectric Standards of Frequency (continued)

<u>Title</u>	<u>Series</u>	<u>Price</u>
New piezo oscillations with quartz cylinders cut along the optical axis. A.Hund and R.B.Wright. BS J. Research <u>4</u> , 383-394 (1930). Also published in Proc.I.R.E. <u>18</u> , 741-761 (1930).	RP156	OF
Some experimental studies of the vibrations of quartz plates. R.B.Wright and D.M.Stuart. BS J. Research <u>7</u> , 519-553 (1931).	RP356	20c
Quartz plate mountings and temperature control for piezo oscillators. V.E.Heaton and E.G.Lapham. BS J. Research <u>7</u> , 683-690 (1931). Also published in Proc.I.R.E. <u>20</u> , 261-271 (1932).	RF366	OF
A 200-kilocycle piezo oscillator. E.G.Lapham. BS J. Research <u>11</u> , 59-64 (1933).	RF576	5c
Uses and possibilities of piezoelectric oscillators. A.Hund. Proc.I.R.E. <u>14</u> , 447-469 (1926).		
Notes on quartz plates, air gap effect, and audio-frequency generation. A. Hund. Proc. I.R.E. <u>16</u> , 1072-1076 (1928).		

Capacity Measurement
(R220)

Precision condenser calibration at radio frequencies. E.L.Hall and W.D.George. Electronics 7, 318-320 (1934).

Measurements of Resistance, Voltage, etc.
(R240)

Resistance of conductors of various types and sizes as windings of single-layer coils at 150 to 6000 kilocycles. E.L.Hall. Tech.Pap.BS 21, 109-119 (1926). T330 OF

Measurements at radio frequency (a differential transformer method). A Hund. Elec. World 34, 998-1000 (1924).

The use of the electron tube peak voltmeter for the measurement of modulation. C.B.Jolliffe. J.Optical Soc. Am. and Rev. Sci. Inst. 2, 701-704 (1924). Proc.I.R.E. 17, 660-663 (1929).

Electrical resistance and magnetic permeability of iron wire at radio frequencies. G.R.Waite, F.G.Brickwedde, and E.L.Hall. Phys.Rev. 32, 967-973 (1928).

Measurement of Field Intensity, Noise, etc.
(R270)

<u>Title</u>	<u>Series</u>	<u>Price</u>
A continuous recorder of radio field intensities. K.A.Norton and S.E.Reymer. BS J. Research <u>11</u> , 373-378 (1933).	RF597	OF
On the accuracy of radio field-intensity measure- ment at broadcast frequencies. H.Diamond, K.A.Norton and E.G.Lapham. J.Research NBS <u>21</u> , 795-818 (1938).	RF1156	10c
A method of measuring radio field intensities and atmospheric disturbances. L.W.Austin and E.B.Judson. Proc.I.R.E. <u>12</u> , 521-532 (1924).		
An automatic recorder for measuring the strength of radio signals and atmospheric disturbances. E.B.Judson. Proc.I.R.E. <u>16</u> , 666-670 (1928).		
Experiments in recording radio signal intensity. L.W.Austin. Proc.I.R.E. <u>17</u> , 1192-1205 (1929).		

Properties of Electrical Insulating Materials
(R281)

A study of the seasonal variation of radio-fre- quency phase difference of laminated phenolic insulating materials. J.L.Preston and E.L. Hall. Tech.Pap. BS <u>19</u> , 225-235 (1925).	T284	OF
Some electrical properties of foreign and domestic micas and the effect of elevated temperatures on micas. A.B.Lewis, E.L.Hall, and F.R.Caldwell. BS J.Research <u>7</u> , 403- 418 (1931).	RF347	OF
Radio-frequency properties of insulating mater- ials. J.L.Preston and E.L.Hall. QST <u>2</u> , pp.26-28 of Feb. (1925).		

Direction Finders
(R325.31. See also RL13.3 and R526.2).

The radio direction finder and its application to navigation. F.A.Kolster and F.W.Dunmore. Sci.Pap.BS <u>17</u> , 539-566 (1922).	S428	15c
---	------	-----

Direction Finders (continued)

<u>Title</u>	<u>Series</u>	<u>Price</u>
A unicontrol high-frequency radio direction finder. F.W.Dunmore. Sci.Pap.BS <u>21</u> , 25-35 (1926).	S525	OP
A portable radio direction finder for 90 to 7700 kilocycles. F.W.Dunmore. Sci.Pap. BS <u>21</u> , 409-430 (1926).	S536	OP

Radio Transmitters and Generators
(R350)

A generator for audio currents of adjustable fre- quency with piezoelectric stabilization. A.Hund. Sci.Pap. BS <u>22</u> , 631-637 (1928).	S569	10c
Note on a piezoelectric generator for audio fre- quencies. A.Hund. BS J. Research <u>2</u> , 355- 358 (1929).	RF40	OP
An improved audio-frequency generator. E.G. Lapham. BS J. Research <u>7</u> , 691-696 (1931). Also published in Proc.I.R.E. <u>20</u> , 272-279 (1932).	RF367	OP
The standard frequency set at WWV. H.J.Walls. QST <u>8</u> , pp.9-12 of Oct. (1924).		
Simultaneous production of a fundamental and a harmonic in a tube generator. H.J.Walls. Proc.I.R.E. <u>15</u> , 37-39 (1927).		
Note on piezoelectric generators with small back action. A.Hund. Proc.I.R.E. <u>15</u> , 725-726 (1927).		

Protective Devices.
(R358)

Safety rules for radio installations. National Bureau of Standards Handbook (1939).	H35	10c
Radio and safety. C.B.Jolliffe. Supplement, Annals of the American Academy of Political and Social Science <u>142</u> , 67 (1929).		

Receiving Apparatus (General)
(R360)

<u>Title</u>	<u>Series</u>	<u>Price</u>
A quantitative study of regeneration by inductive feedback. C.B.Jolliffe and J.A.Rodman. Sci. Pap. BS <u>19</u> , 419-428 (1924).	S487	OF
Some methods of testing radio receiving sets. J.L.Preston and L.C.F.Horle. Tech.Pap. BS <u>18</u> , 203-228 (1924).	T256	OF
Unicontrol radio receiver for ultra high frequencies using concentric lines as interstage couplers. F.W.Dunmore. J.Research NBS <u>15</u> , 609-618 (1935). Also published in QST <u>20</u> , 21-23 of Feb.(1936).	RP856	OF

Amplifiers
(R363)

A method of studying electrode potentials and polarization. (Use of electron tube amplifier). H.D.Holler. Sci.Pap.BS <u>20</u> , 153-166 (1925).	S504	OF
Notes on aperiodic amplification and applications to the study of atmospherics. A.Hund. Proc.I.R.E. <u>16</u> , 1077-1078 (1928).		
Note on radio-frequency transformer theory. H.Diamond and E.Z.Stowell. Proc.I.R.E. <u>16</u> , 1194-1202 (1928).		

Telephone Receivers
(R365)

Note on telephone receiver impedance. E.Z.Stowell. Proc.I.R.E. <u>13</u> , 245-249 (1925).		
--	--	--

Inductors
(R382)

Radio-frequency resistance and inductance of coils used in broadcast reception. A.Hund and H.B. DeGroot. Tech.Pap.BS <u>19</u> , 651-668 (1925).	T298	OF
--	------	----

Aeronautic Applications of Radio (General)
(R520)

<u>Title</u>	<u>Series</u>	<u>Price</u>
A directive type of radio beacon and its application to navigation. F.H.Engel and F.W.Dunmore. Sci.Pap. BS <u>19</u> , 281-295 (1924).	S480	5c
Uses of radio as an aid to air navigation. J.H.Dellinger. Papers of International Civil Aeronautics Conference (Government Printing Office, Washington, D.C.), pp.595-604, Dec. 12-14, 1928. Also published in J.Am.Inst.Electrical Engineers <u>48</u> , 105-109 (1929).	-	\$1.00
Receiving sets for aircraft beacon and telephony. H.Pratt and H.Diamond. BS J. Research <u>1</u> , 543-563 (1928). Also published in Proc.I.R.E. <u>17</u> , 283-305 (1929).	RP19	OP
Engine ignition shielding for radio reception in aircraft. H.Diamond and F.G.Gardner. BS J. Research <u>4</u> , 415-424 (1930). Also published in Proc.I.R.E. <u>18</u> , 840-861 (1930).	RP158	OP
Automatic volume control for aircraft radio receivers. W.S.Hinman,Jr. BS J. Research <u>7</u> , 37-46 (1931).	RP330	OP
Applications of radio in air navigation. J.H.Dellinger. Engineers and Engineering <u>43</u> , 301-306 (1926); Mech.Eng. <u>49</u> , 29-32 (1927).		
The place of radio in aeronautics. J.H.Dellinger. Nat.Aeronautic Assn. Rev. <u>5</u> , 3-4 (1927).		
Radio guidance of aircraft. H.Pratt. Radio <u>10</u> , pp.19-20 of Feb. (1928).		
Development of radio aids to air navigation. J.H.Dellinger and H.Pratt. Proc.I.R.E. <u>16</u> , 890-920 (1928).		
Bibliography on aircraft radio. C.B.Jolliffe and E.M.Zandonini. Proc.I.R.E. <u>16</u> , 985-999 (1928).		
Directional radio as an aid to safe flying. J.H.Dellinger. Papers of the Seventeenth Annual Safety Congress, National Safety Council, (Washington, D.C.), p.564, Oct.4, 1928. Aero. World <u>2</u> , 20 (1929).		

Aeronautic Applications of Radio (General) (continued)

<u>Title</u>	<u>Series</u>	<u>Price</u>
Radio developments applied to aircraft. J. H. Dellinger and H. Diamond. Mech. Eng. <u>51</u> , 509-514 (1929).		
<u>Airplane Antennas</u> (R525. See also R120)		
Characteristics of airplane antennas for radio range-beacon reception. H. Diamond and G.L. Davies. BS J. Research <u>6</u> , 901-916 (1931). Also published in Proc.I.R.E. <u>20</u> , 346-358 (1932).	RP313	OP
<u>Aeronautic Radio Beacon Systems</u> (R526.1. See also R520)		
A directive type of radio beacon and its application to navigation. F.H.Engel and F.W.Dunmore. Sci.Pap. BS <u>19</u> , 281-295 (1924).	S480	5c
Design of tuned reed course indicators for aircraft radio beacon. F.W.Dunmore. BS J. Research <u>1</u> , 751-769 (1928).	RP28	5c
Unidirectional radiobeacon for aircraft. E.Z. Stowell. BS J. Research <u>1</u> , 1011-1022 (1928).	RP35	OP
A course shift indicator for the double modulation type radio beacon. H.Diamond and F.W.Dunmore. BS J. Research <u>3</u> , 1-10 (1929).	RP77	5c
Applying the visual double-modulation type directive radio beacon to the airways. H.Diamond. BS J. Research <u>4</u> , 265-287 (1930). Also published in Proc.I.R.E. <u>17</u> , 2158-2184 (1929).	RP148	10c
A 12-course radio range for guiding aircraft with tuned reed visual indication. H.Diamond and F.G.Kear. BS J. Research <u>4</u> , 341-369 (1930). Also published in Proc.I.R.E. <u>18</u> , 939-962 (1930).	RP154	OP
Applying the radio range to the airways. F.G.Kear and W.E.Jackson. BS J. Research <u>4</u> , 371-381 (1930). Also published in Proc.I.R.E. <u>17</u> , 2268-2282 (1929).	RP155	OP

Aeronautic Radio Beacon Systems (Continued)

<u>Title</u>	<u>Series</u>	<u>Price</u>
Development of the visual type airway radio beacon system. J.H.Dellinger, H.Diamond, and F.W. Dunmore. BS J. Research <u>4</u> , 425-459 (1930). Also published in Proc.I.R.E. <u>18</u> , 796-839 (1930).	RP159	OP
A tuned reed course indicator for the 4 and 12-course aircraft radio range. F.W.Dunmore. BS J.Research <u>4</u> , 461-474 (1930). Also published in Proc.I.R.E. <u>18</u> , 963-982 (1930).	RP160	15c
A course indicator of pointer type for the visual radio range-beacon system. F.W.Dunmore. BS J. Research <u>7</u> , 147-170 (1931). Also published in Proc.I.R.E. <u>19</u> , 1579-1605 (1931).	RP336	OP
Theory of design and calibration of vibrating reed indicators for radio range-beacons. G.L.Davies. BS J. Research <u>7</u> , 195-213 (1931). Also published in Proc.I.R.E. <u>20</u> , 161-181 (1932).	RP338	10c
A simultaneous radiotelephone and visual radio range-beacon for the airways. F.G.Kear and G.H.Wintermute. BS J. Research <u>7</u> , 261-287 (1931). Also published in Proc.I.R.E. <u>20</u> , 478-515 (1932).	RP341	20c
The cause and elimination of night effects in radio range-beacon reception. H.Diamond. BS J.Re-search <u>10</u> , 7-34 (1933).	RP513	10c
Phase synchronization in directive antenna arrays with particular application to the radio range beacon. F.G.Kear. BS J.Research <u>11</u> , 123-139 (1933).	RP581	5c
A method of providing course and quadrant identification with the radio range-beacon system. F.W.Dunmore. BS J. Research <u>11</u> , 309-325 (1933)	RP593	5c
The aircraft radio beacon. Research Narrative No.141, The Engineering Foundation <u>8</u> , No. 8 (1928).		
Field intensity characteristics of double-modulation type directive radio beacon. H.Pratt. Proc.I.R.E. <u>17</u> , 873-878 (1929).		
On the solution of the problem of night effects with the radio range beacon system. H. Diamond. Proc.I.R.E. <u>21</u> , 808-832 (1933).		

Aeronautic Direction Finders
(R526.2)

<u>Title</u>	<u>Series</u>	<u>Price</u>
A radio direction finder for use on aircraft.		
W.S.Hinman Jr. BS J.Research <u>11</u> , 733-741 (1933).	RP621	OP

Airplane Landing Aids
(R526.3)

A radiobeacon and receiving system for blind landing of aircraft. H.Diamond and F.W.Dunmore. BS J.Research <u>5</u> , 897-931 (1930). Also published in Proc.I.R.E. <u>19</u> , 585-626 (1931).	RP238	OP
Performance tests of radio system of landing aids. H.Diamond. BS J.Research <u>11</u> , 463-490 (1933).	RP602	OP
Experiments with underground ultra-high-frequency antenna for airplane landing beam. H.Diamond and F.W.Dunmore. J.Research NBS <u>19</u> , 1-20 (1937).	RP1006	10c
A radio system for flying and landing aircraft in fog. H.Diamond. Proc.Nat.Acad.Sciences <u>16</u> , 678-685 (1930).		
Airplanes land blind-- Guided by radio. H.Diamond and F.W.Dunmore. Scientific American <u>145</u> , 20-23 (1931).		
Radio system for landing aircraft during fog. H.Diamond. Electronics <u>6</u> , 158-161 (1933).		

Aerological Radio Sounding
(R539.1)

A method for the investigation of upper-air phenomena and its application to radio meteorography. H.Diamond, W.S.Hinman, Jr., and F.W.Dunmore. J.Research NBS <u>20</u> , 369-392 (1938). Also published in Proc.I.R.E. <u>26</u> , 1235-1265 (1938).	RP1082	10c
An electric hygrometer and its application to radio meteorography. F.W.Dunmore. J.Research NBS <u>20</u> , 723-744 (1938). Also published in Bul.Am.Met.Soc. <u>19</u> , 225-243 (1938).	RP1102	15c

Aerological Radio Sounding (continued)

<u>Title</u>	<u>Series</u>	<u>Price</u>
Electrolytic resistors for direct-current applications in measuring temperatures. D.N.Craig. J.Research NBS <u>21</u> , 225-233 (1938).	RP1126	10c
An improved radio meteorograph on the Olland principle. L.F.Curtiss, A.V.Astin, L.L.Stockman, B.W.Brown. J.Research NBS <u>22</u> , 97-103 (1939).	RP1169	10c
An improved electric hygrometer. F.W.Dunmore. J.Research NBS <u>23</u> , 701-714 (1939). Also published in Bul.Am. Meteorol.Soc. <u>21</u> , 249-256 (1940).	RP1265	5c
An automatic weather station. H.Diamond and W.S.Hinman, Jr. J.Research NBS <u>25</u> , 133-148 (1940).	RP1318	10c
An improved radio sonde and its performance. H.Diamond, W.S.Hinman, Jr., F.W.Dunmore, and E.G.Lapham. J.Research NBS <u>25</u> , 327-367 (1940).	RP1329	10c
A practical system for radio meteorography. L.F.Curtiss and A.V.Astin. J.Inst.Aero.Sci. <u>3</u> , 35-39 (1935).		
An electric motor for radio meteorographs. L.F.Curtiss and A.V.Astin. Rev.Sci.Instruments <u>7</u> , 358-359 (1936).		
Development of a radio meteorograph system for the Navy Department. H.Diamond, W.S.Hinman, Jr., and F.W.Dunmore. Bul.Amer.Meteorol.Soc. <u>18</u> , 73-99 (1937).		
Simplified radio meteorograph for determining cloud height and thickness. H.Diamond, W.S.Hinman, Jr., and F.W.Dunmore. Bul.Am.Meteorol.Soc. <u>18</u> , 180-181 (1937).		
A radio meteorograph system with special aeronautical applications. H.Diamond, W.S.Hinman, Jr., and F.W.Dunmore. J.Inst.Aero.Sciences <u>4</u> , 241-248 (1937).		
Comparisons of soundings with radio meteorographs, aerographs, and meteorographs. H.Diamond, W.S.Hinman, Jr., and E.G.Lapham. Bul.Am.Met.Soc. <u>19</u> , 129-141 (1938).		
Performance tests of Navy radio meteorograph system. H.Diamond, W.S.Hinman, Jr., and E.G.Lapham. J.Aero.Sci. <u>5</u> , 484-490 (1938).		

Aerological Radio Sounding (continued)

<u>Title</u>	<u>Series</u>	<u>Price</u>
Improvements and experience in radio soundings. H.Diamond, W.S. Hinman, A.H.Mears, and C.Harmantas. J.Inst.Aero.Sci. <u>6</u> , 379-383 (1939).		
Upper-air weather soundings by radio. H.Diamond, W.S.Hinman, Jr., F.W.Dunmore, and E.G.Lapham. A.I.E.E.Trans. <u>59</u> , 321-328 (1940).		

Broadcasting
(R550)

Analysis of broadcasting station allocation. J.H.Dellinger. Proc.I.R.E. <u>16</u> , 1477-1485 (1928).		
Note on the synchronization of broadcast stations WJZ and WBAL. K.A.Norton. Proc.I.R.E. <u>22</u> , 1087-1089 (1934).		

Standard Frequency Broadcasting
(R555)

Development of standard frequency transmitting sets. L.Mickey and A.D.Martin, Jr. BS J.Research <u>12</u> , 1-12 (1934).	RF630	OF
Monitoring the standard radio frequency emissions. E.G.Lapham. J.Research NBS <u>14</u> , 227-238 (1935).	RF766	OF
Methods of using standard frequencies broadcast by radio. (1939).	LC567	Free
Standards of frequency and musical pitch broadcast by National Bureau of Standards. (1940).	LC591	Free
Standard frequency dissemination. M.S.Strock. Proc.I.R.E. <u>15</u> , 727-731 (1927).		
The service available from the standard frequency transmissions of the Bureau of Standards. J.H.Dellinger. Trans. Am.Geophysical Union, Twelfth Annual Meeting, 27-29, May 1, 1931.		
Radio dissemination of the National standard of frequency. J.H.Dellinger and E.L.Hall. Radio Engineering <u>12</u> , pp.23-24 of May (1932).		
Some data concerning the coverage of the five-megacycle standard frequency transmission. E.L.Hall. Proc.I.R.E. <u>23</u> , 448-453 (1935).
