I. GENERAL INFORMATION

The publications of the National Bureau of Standards for which prices are indicated may be purchased from the Superintendent of Documents, United States Government Printing Office, Washington, D. C. The prices quoted are for delivery to addresses in the United States, its territories and possessions, and in certain foreign countries which extend the franking privilege. In the case of all other countries, one-third the price of the publication should be added to cover postage. Remittances for publications (marked with a price) should not be made to the Department of Commerce or the National Bureau of Standards, but should be made directly to the Superintendent of Documents, United States Government Printing Office, Washington, D. C., by coupons (for sale by the Superintendent of Documents), postal money order, express order, or check. Currency may be sent at sender's risk. Foreign remittances should be made either by international money order or draft on an American bank. Foreign currency and foreign or domestic stamps will not be accepted.

"OP" in the column marked "Price" indicates that the publication is out of print, but may be consulted at depository libraries which have been designated by Congress to receive copies, as issued, of publications printed by the Government for public distribution.

"Outside publications" are not for distribution or sale by the Government. The National Bureau of Standards cannot supply copies of "outside" journals or reprints from them, and it is unable to furnish information as to their availability or price. These publications may be consulted at technical libraries or in some cases may be purchased directly from the publishers.

Series letters with serial numbers are used to designate publications of the National Bureau of Standards:

S = "Scientific Paper". S1 to S329 are "Reprints" from the "Bulletin of the Bureau of Standards". S330 to S572 were published as "Scientific Papers of the Bureau of Standards". This series was superseded by the "Bureau of Standards Journal of Research" in 1928.

T = "Technologic Paper". T1 to T370. This series was superseded by the "Bureau of Standards Journal of Research" in 1928.

RP = "Research Paper". RP1 to RP690 are reprints from the "Bureau of Standards Journal of Research". Research papers since July 1934 are reprints from the "Journal of Research of the National Bureau of Standards".

C = Circular.

Circular C24 and supplements give the complete list of the publications of the National Bureau of Standards (1901-1936), and may be purchased for 55 cents from the Superintendent of Documents, Government Printing Office, Washington, D. C. Announcement of new publications is made each month in the Technical News Bulletin of the National Bureau of Standards, which is obtainable from the Superintendent of Documents by subscription at 50 cents per year.

II. PUBLICATIONS OF THE NATIONAL BUREAU OF STANDARDS

The numbers assigned (for example, S352, T349, RP62) are the actual reprint numbers by which the National Bureau of Standards and the Government Printing Office lists and sells, respectively, the separate papers (reprints). In ordering Government publications from the Superintendent of Documents, Government Printing Office, Washington, D. C., please use the letter in connection with the number and title of the publication; for example, "S515, Thermal expansion of tungsten".
