Issued June 28, 1962

(Supersedes Miscellaneous Publication 203)

## FOREWORD

Over the past 55 years a great deal of information on a wide variety of weights and measures subjects has been published in the Reports of the National Conference on Weights and Measures. The present publication is designed to aid the users of these Reports in locating information on a specific subject or presented by a particular speaker. It comprises a subject index and an index by speaker for the proceedings of each Conference from the First, in 1905, through the Forty-fifth, in 1960. It thus supersedes National Bureau of Standards Miscellaneous Publication 203, which provided an index of the Conference Reports from the First through the Thirty-sixth.

A. V. ASTIN, *Director*

# Index to the Reports of the National Conference on Weights and Measures

From the First to the Forty-Fifth (1905 to 1960)

## Introduction

For ease of reference, the index is presented in two forms, first a subject index, and second an index by names of speakers. The subject index has been carefully cross-indexed, to enable those using it to locate the desired information under principal or associated words. In the name index, the names of the speakers are arranged alphabetically, and under each name appear, in chronological order, references to the papers or addresses presented to the Conference by that speaker; in those instances in which a speaker's official or business connection has changed during the period covered by the index listings, his name is entered once for each such connection, with appropriate listing of papers or addresses under each entry.

Citations to particular Conference Reports and to the pages in such Reports where the material in question begins are given in the following manner: The "number" of the Conference (that is, first, second, and so forth) is given first by means of figures printed in bold-faced italic type; immediately following, and printed in ordinary light-faced type there is given the number of the page on which the material begins. Thus the citation "**20**, 87" means that the material in question will be found beginning on page 87 of the Report of the Twentieth National Conference. When material carries over from one session of a Conference to a subsequent session, or when a presentation is interrupted and later resumed in the same session, a citation is given for the beginning of each portion of the material.

For information relative to the procurement or consultation of Conference Reports, and to the designation of the several Conference Reports according to the numeration followed in the series of Miscellaneous Publications of the National Bureau of Standards, see page 73.
