The National Institute of Standards and Technology (NIST) assists the private sector and other government agencies through research and development of better methods of measurement, determination of physical constants and properties of materials, and design of practical test procedures. Standards are an important medium for disseminating the results of Institute research, and the work of the national standards bodies is of vital concern to NIST. This directory identifies and describes U.S. public and private sector organizations which develop, publish, and revise standards, participate in this process, identify standards, or make standards available through information centers or distribution channels. These organizations have grown steadily in number since the first volume in this series was issued in 1941.

I believe that this directory, which covers mandatory and voluntary U.S. standards activities, will be a useful reference for all who need and use standards. An updated companion volume was issued in May 1989 as NIST Special Publication 767, "Directory of International and Regional Organizations Conducting Standards-Related Activities." Both these and similar reference documents are maintained by the Institute's Office of Standards Services (OSS). OSS invites your comments and inquiries regarding its other publications.
ACKNOWLEDGMENTS

Every entry in this directory was carefully prepared by representatives of the participating organizations. Obviously, this directory could not have been issued without the contributions and cooperation of hundreds of staff persons in the trade associations, professional societies, government agencies, and other organizations that constitute the "standardization community." They deserve the thanks of those who worked on this project and all who use the directory.

John Donaldson, Don Mackay, and Maureen Breitenberg ably coordinated and monitored this project for NIST's Office of Standards Services. Considerable data was provided by Steve Lowell of the Department of Defense and Bernice Durbin of Information Handling Services. Their authoritative statistics constitute a major portion of the data which help define our standards resources.

Special thanks are due the staff of R. B. Toth Associates, who compiled this directory under contract to NIST, in particular, Kellie Tassone and Megan Fogarty who managed all aspects of information gathering and processing.
ABSTRACT

This directory is a guide to mandatory and voluntary standards activities in the United States at the national level - both governmental and nongovernmental (trade associations, technical and other professional societies). It excludes proprietary (company standards) and state and local levels of government (i.e., county and municipal). It supersedes the 1984 edition (NBS SP 681), "Standards Activities of Organizations in the United States". It includes standards distributors, libraries, and information centers, and union lists of standards repositories by regional areas. It also lists organizations that no longer develop standards or have become defunct since the previous directory was issued.

Over 750 current descriptive commentaries are formatted, with subject headings to facilitate access to specific information. The main sections cover nongovernment; federal government; sources of standards documents and information; a subject index and related listings covering acronyms and initials, defunct bodies, and those organizations with name changes. Organizations have been included if they develop standards or contribute to the standardization process, whether voluntary or mandatory, or are sources of standards documents or information. An introductory section provides general information on federal (including military) standards activities, a list of 20 major nongovernment standards developers, some historical notes, and an overview of U.S. (national) standardization activities.

Keywords: codes; government standardization activities; nongovernment standardization activities; overview of U.S. standardization activities; recommended practices; sources of standards; specifications; standardization; standards; test methods;

1. INTRODUCTION

Standardization activities in the United States are broad, complex, and decentralized. This directory is intended to provide perspective and to serve as a source of information about the standardization system; the inputs are based on material provided by the principals.

This Directory is the sixth in a series started in 1941. The first edition, NBS Miscellaneous Publication (MP) 169, "Standardization Activities of National Technical and Trade Organizations," was edited by Robert A. Martino and covered 450 organizations. The second edition, NBS MP 230, was edited by Sherman Booth and issued in 1960. The third edition, "Directory of United States Standardization Activities," NBS MP 288, was edited by Joan Hartman and issued in 1967, and the 1975 edition, NBS Special Publication 417 was edited by Sophie Chumas. This publication supersedes the 1984 edition, NBS Special Publication 681 which was also edited by Robert B. Toth.

1.1 SCOPE AND CRITERIA

This edition summarizes standardization activities of over 750 organizations which, in the aggregate, comprise the U.S. standardization system. In the broadest sense, "standards" includes specifications, codes, guidelines, recommended practices, grading rules, and similar documents. This directory also refers to regulatory standards developed by government agencies, but not to laws or regulations per se. However, many federal, state, and local regulations and codes are based on the voluntary standards of organizations listed in this directory.

The directory includes organizations that develop standards and also those that work with others to develop and use standards or that regularly comment on draft standards. It is considered to be inappropriate to include activities that only develop ethical/professional standards, or that set standards for judging animals, or are concerned exclusively with standards for services or training.

The directory lists sources of U.S. standards outside the United States and U.S. sources of foreign and international standards in response to increasing interest and application of standards throughout the world. Self-designated regional and international organizations are covered separately in NIST Special Publication 767, "Directory of International and Regional Organizations Conducting Standards-Related Activities," which has 338 entries, and NIST SP 795, "Directory of European Regional Standards-Related Organizations," which has 154 entries.
1.2 AN OVERVIEW

At the national level the U.S. standardization community currently maintains more than 94,000 standards in an active status. Figure 1 shows the various categories of standards developers and their output. The private sector has prepared about 45 percent of the total. In the private sector about 275 standards developers have ongoing standardization programs. Another 150 have prepared a few standards in the past, occasionally update them, but are not actively engaged in standardization work. Many other organizations, of course, review standards when their interests are affected, but they are not in the mainstream of standards development.

The standards of the 20 major private sector standards developers (Figure 2) constitute more than 75 percent of the nongovernment standards database.

Private sector organizations that are active in standards development can be categorized into three groups:

1. Scientific and Professional Societies. Some of these groups, in addition to their professional and educational roles, also develop standards. Some examples include the American Society of Mechanical Engineers, American Association of Cereal Chemists, and Society of Photographic Scientists and Engineers.

2. Trade Associations. These associations deal with the mutual business interests of their members drawn from a particular industry and promote the industry and its products. To address these objectives, many trade associations develop standards for the products manufactured by their members, although a few concentrate on developing standards for products used by the industry and its customers. The Aerospace Industries Association and the American Petroleum Institute are two trade associations that develop standards for items used by their members.

3. Standards-Developing Organizations. Organizations founded specifically to develop standards are often designated "standards-developing organizations" (SDOs). Some confusion occurs when the three types of organizations are collectively called SDOs. The oldest SDO in the United States is the U.S. Pharmacopoeial Convention. It published standards for 219 drugs in 1820. The American Society for Testing and Materials can be classified as an SDO, as can many of the organizations that serve as secretariats for ANSI accredited committees (e.g., Exchange Carriers Standards Association) or that operate as ANSI accredited organizations. In recent years, users of equipment and systems have gathered into loosely organized groups to define their functional requirements. Usually these requirements are specified in standards. Probably the most
prominent is the Manufacturing Automation Protocol &

The number of published standards is not necessarily an absolute
indicator of overall activity level or significance. Though
counted as single standards, the American Bureau of Shipping's
Rules for Building and Classing Steel Vessels, or any of the model
building codes are not comparable to 95 percent of the standards
published in the United States. The ASME Boiler and Pressure
Vessel Code exceeds 11,000 pages. The Code, together with the
other 750 ASME codes and standards, constitutes a collection of
more than 48,000 pages. The 8,500 American Society for Testing and
Materials standards total 46,000 pages.

The number of available standards may not be indicative of their
value to industry and commerce. The real value of standards is
realized only when they are used. Methods have yet to be developed
to measure how often, or how widely, individual standards are
implemented. Standards developers tell us that 80 percent of the
orders for individual standards are for 15 or 20 percent of the
total number published. Many standards are seldom used. We also
know that, in spite of 5-year reviews, a good portion of our
standards document obsolescent technology that, while appropriate
for spares and maintenance of older equipment, is not appropriate
for new designs. Some believe 25 to 30 percent of our national
standards - both government and industry - fall into this category.
Finally, some U.S. standards are redundant or overlapping. In a
few areas, particularly building and construction, we often find
five or six standards, that while not identical, define the
functional requirements for the same type of product or material.
More than 11,000 (12%) standards are applicable to building and
construction. As shown in Figure 3, more than 200 government and
private sector organizations develop standards in this sector.

Figure 1 indicates that the Department of Defense (DoD) is, by far,
the largest developer of standards in the United States. The
General Services Administration's (GSA) federal specifications and
standards are widely used by federal and state agencies to procure
many common products, and federal test methods are used in many
industries. It is estimated that there are another 8,500 standards
developed by such federal agencies as the Occupational Safety and
Health Administration (OSHA), the Environmental Protection Agency
(EPA), the Food and Drug Administration (FDA), Postal Service, and
others. A significant portion of these are in a gray area where it is
difficult to differentiate between standards and regulations.

The rate of standards development by DoD and GSA has slowed to the
point where more standards are being cancelled than are created.
In the period 1981 to 1990, DoD cancelled 7,600 of its
specifications and standards, created 3,000 new ones, and adopted
2,000 industry standards. Currently, more than 4,900 industry
standards have been adopted by DoD and efforts continue to increase
that number. The decrease in the number of DoD's standards would
be even more significant had it not prepared nearly 3,000
Commercial Item Descriptions which serve as procurement
specifications for off-the-shelf products.

U.S. standards used in building and construction
1.3 CHANGES SINCE 1984

Thirty-five private sector organizations listed in the 1984 edition of the directory no longer participate in standardization activities or have ceased operations. The most notable are the Fragrance Materials Association which no longer maintains its 300 standards and Mill Mutual Fire Prevention Bureau which had developed standards for agri-processing plants since 1911. Major organizations indicating that they no longer participate in standardization activities include the Scientific Apparatus Makers Association and the Society of Manufacturing Engineers.

Forty additional organizations have been newly identified as standards developers. Many of these are in fields of new technology where market acceptance is often directly related to the availability of standards. Organizations in this category include:

- Automated Imaging Association
- Corporation for Open Systems International
- Home Automation Association
- Laser Institute of America
- MUMPS Development Committee
- National Computer Graphics Association
- Robotic Industries Association
- SPARC International

In 1983 when the fifth edition of this directory was compiled, it was estimated that the private sector published 32,000 standards as active documents. Seven years later that figure is estimated to be 41,500 which represents an average rate of increase of about 4 percent per year. Some of the increase can be attributed to better reporting. Another factor, as noted previously, is that standards developers seldom inactivate standards once they have been published.

1.4 COMPILATION OF INFORMATION

More than 1,200 nongovernment organizations were invited to provide entries for the current directory. These included all those cited in the previous edition; organizational members of ANSI; those represented in on-line databases of standards; and organizations listed in directories of trade associations and professional societies. More than 100 federal agencies were solicited for information on their standards-related activities. Follow-up mailings and telephone calls were made primarily to confirm information. However, corrections were sought only in the event of obviously erroneous entries.

The major sections on nongovernment, federal organizations and agencies are each preceded by a short description of mechanisms for policy development and coordination. Entries are organized in the various sections of the directory under subheadings to permit information to be found easily. Naturally, organizations with limited standards activities have fewer subheadings.
Each responding organization has determined for itself whether or not it is a "Standards Developer." A few organizations (less than thirty) self-identify as Standards Developer, although they neither develop nor publish standards, but in fact work within the structure of another organization. Similarly, a few organizations, many of which are the focus for standards activities in their field, insist that they not be cited as Standards Developers, but as working with other organizations to develop standards. A perusal of the information included in the Standardization Activities subheading will usually clarify the actual role.

Although extensive efforts were made to be comprehensive, some organizations that conduct standardization activities may be missing. Information for the entries was voluntarily provided by the submitting organizations, but it was sometimes necessary to reformat or edit for uniformity. Wherever possible, information or secretariats, designations, quantities, and the availability of standards was verified by consulting ISO, IEC, and ANSI publications, indexes, and distributors' catalogs.

Organizations that are not included in this directory are invited to send pertinent information to:

   National Center for Standards and Certification
   Information
   Office of Standards Services
   National Institute of Standards and Technology
   Administration Bldg., Room A629
   U.S. Department of Commerce
   Gaithersburg, Maryland 20899

Listed organizations are encouraged to keep NIST informed of changes in organizational name or address.

All others interested in receiving updated information are also invited to add their names and addresses to our mailing list.
2. NONGOVERNMENT

2.1 NONGOVERNMENT ORGANIZATIONS

This section lists in alphabetical order 637 entries for trade associations, professional and technical societies, and other U.S. private sector organizations that develop standards or work with other organizations to develop standards. The information presented is intended to provide basic data, not only on the type of standards that are prepared, but some indications of the level of activity. Organizations were asked to provide information on the number of members involved in standardization, the number of staff personnel devoted to standardization programs, and secretariats that they sponsor. The individual named is directly responsible for the organization's standardization activities and should be contacted if additional information is required.

Organizations were asked whether or not they had any certification, qualification, or accreditation programs for products, laboratories, or services. In many cases it was considered just as important to indicate when there was no qualification program. Many standards developers provided information on the prefixes or other designations which identify their publications. Those which prepare ANSI standards usually indicate the basic prefix, i.e., S3.x designates ANSI bioacoustics standards, developed by the Acoustical Society of America, ranging from ANSI S3.1 through S3.39.

The keywords were provided by the listed organization, supplemented by the editor. These keywords provide the capability for simple on-line search at some time in the future, and for that reason are separated by semicolons - the convention that is utilized in most search software. Keywords synopsize the areas in which the organization's standardization activities are directed and, as such, assist the directory user to find more quickly pertinent, responsible organizations.

**ACCREDITING BUREAU OF HEALTH EDUCATION SCHOOLS**

Ms. Martha J. Glanbler, Acting Administrator

Oak Manor Offices
29089 U.S. 20 West
Elkhart, Indiana 46514
(219) 293-0124

Founded: 1964 Standards Staff: 9

**Type of Organization**

Accrediting Agency
Works through other organizations to develop standards

**Certification**

Accredited program graduates are eligible for professional registration with American Medical Technologists Registry as medical laboratory technician (MLT) and registered medical assistants (RMA).

**Scope**

Recognized by U.S. Department of Education to accredit medical laboratory technician education programs in the private and public sector through junior college level and medical assistant programs in the private sector and allied health institutions in the private sector. Recognized by Council on Postsecondary Accreditation to accredit medical laboratory technician and medical assistant education programs in the private sector and institutions of allied health in the private sector.
| Standardization Activities | Establishes criteria and standards for the administration and operation of health education institutions and specialized programs for medical laboratory technician and medical assistant education; enhances the profession through the improvement of schools, programs, and quality of graduates; provides sound business and ethical standards in the fields of health education; maintains standards and procedures consistent with the philosophies and best-known practices of other educational accrediting agencies. |

**ACOUSTICAL SOCIETY OF AMERICA**

Avril Brenig, Standards Manager

500 Sunnyside Blvd.  
Woodberry, New York 11797  
(212) 661-9404

Founded: 1929  
Standards Staff: 3

**Type of Organization**  
Technical Society  
Standards Developer

**Standards Development**  
Standards development since 1932  
Organizer of 85 working groups and 700 participants active in standards development  
65 active standards  
Processed through ANSI  
Draft standards available for review

**Standards Designation**  
ANSI SX.x, ASA Catalog Numbers

**Government Adoption**  
Some referenced by FDA

**Secretariats**  
ANSI S1, Acoustics  
ANSI S2, Mechanical Shock and Vibration  
ANSI S3, Bioacoustics  
ANSI S12, Noise  
ISO/TC 108, Mechanical Vibration and Shock
### Scope
A national society of physicists and engineers involved in the fields of electroacoustics, ultrasonics, architectural acoustics, psychological and physiological acoustics, music, noise and vibration control.

### Standardization Activities
Maintains a standards program to publish standards, specifications, methods of measurement and test, and terminology in the fields of physical acoustics, including architectural acoustics, electroacoustics, sonics and ultrasonics, underwater sound, mechanical shock and vibration, psychological and physiological acoustics, including aspects of general acoustics, shock and vibration which pertain to biological safety, tolerance and comfort; and acoustical, environmental, and occupational noise. Cooperates with ANSI, ISO, and the U.S. National Committee of the International Electrotechnical Commission. Involves the government, industry, and the general public in voluntary standardization.

### Availability
Sold directly and through ANSI

### Keywords
noise control; mechanical shock; vibration; bioacoustics; environment; acoustics;

---

**ADHESIVES MANUFACTURERS ASSOCIATION**

J. Dollard Carey, Executive Director

111 East Wacker Drive
Chicago, Illinois 60601
(312) 644-6610

Founded: 1933

**Type of Organization**
Trade Association

**Representation**
ANSI

**Scope**
Twenty-five member companies representing the major packaging adhesive manufacturing firms in the United States and twenty associate members representing supplier companies. Provides a forum for members to meet and exchange ideas for the advancement of the industry and its members, including research and development of better adhesives and applications. Sales and marketing techniques, employee health and safety, statistical analyses, and regular updates on the economic climate are other important functions.
### Standardization Activities

The Adhesives Manufacturing Association is not a standards developing organization; it works within the voluntary standards system to coordinate adhesive standards activities and act as the industry voice. Also monitors proposed regulations and standards at the federal, state, and local levels.

**Keywords**

adhesives; packaging; solvents; manufacturing;

### ADVANCED TELEVISION SYSTEMS COMMITTEE

Robert Hopkins, Executive Director

1776 K Street, NW
Suite 300
Washington, DC 20007
(202) 828-3130

**Founded:** 1982

**Type of Organization**

Professional Society
Standards Developer

**Scope**

Created by the Joint Committee for Inter-Society Coordination (JCIC). Coordinates the development of voluntary national technical standards for advanced television. Makes recommendations to the United States Department of State for its use in developing U.S. positions on various standards issues that are considered by international standards organizations. Membership includes television equipment manufacturers, broadcasters, cable companies, and associated trade and professional societies.

**Standardization Activities**

Develops voluntary national standards for advanced television systems in the United States including generation, distribution, reception, and display of improved NTSC television systems, enhanced television systems, and high definition television (HDTV) systems. The secretariat for the ATSC is the National Association of Broadcasters (NAB).

**Formerly**

National Television System Committee (NTSC)

**Keywords**

electronics; communications; HDTV; high definition television; television;
**ADVISORY COMMISSION ON TEXTBOOK SPECIFICATIONS**

Martin Blumberg, Technical Director

111 Prospect Street

| Standards Development | 180 Form, Fit, and Function (performance) standards describe airborne electronic equipment for transport aircraft  
Draft standard and related reports available upon request  
None processed through ANSI |
| Standards Designations | ARINC Equipment Characteristics (specific equipment)  
| | ARINC Standards (basic system elements)  
| | ARINC Reports (guidance material) |
| Certification | No certification, qualification, or accreditation programs |
| Secretariats | Airlines Electronic Engineering Committee (AESEC) |
| Scope | A wholly owned subsidiary of ARINC Incorporated which is an ordinary stock corporation owned by major air transport operators. Operates on behalf of the users on a "not-for-profit" basis. Provides telecommunications services without discrimination to all users of the airspace within the United States. The cost of each service is directly recovered from the users of that service without "cross subsidy" from other users. Provides planning and coordination of user telecommunications needs with participation by all elements of aviation. |
| Standardization Activities | ARINC's voluntary standardization activities are conducted by the AESEC chaired by D.A. Martinec, Director of ARINC Avionics Engineering DEpartment. AESEC comprises user specialists from U.S., European and Pacific basin airlines, general aviation, U.S. Air Force and airline associations. The voluntary standards generally are drafted by a subcommittee comprised of users, equipment and airframe manufacturers, regulatory agencies and other interested parties. AESEC supervises the subcommittee work and adopts completed documents when appropriate. |

**AEROSPACE INDUSTRIES ASSOCIATION OF AMERICA**

Barbara Boykin, Director Standardization Programs

1250 Eye Street, NW  
Washington, DC  20005  
(202) 371-8460  
FAX: (202) 371-8470

Founded: 1919  
Standards Staff: 4

**Type of Organization**  
Trade Association  
Standards Developer
Standards Development
Standards developer since 1938
130 members participating in standards activities
2020 active standards, including 140 metric

None processed through ANSI
Draft standards available for review

Standards Designation
NAS, National Aerospace Standard
NA, Metric NAS

Government Adoption
The Department of Defense has adopted nearly 700
National Aerospace Standards (NAS's).

Certification
No certification, qualification, or accreditation programs

Secretariats
ISO/TC 20 Aircraft and Space Vehicles
International Coordinating Council of Aerospace Industries Associations, industry interface with the
International Civil Aviation Organization
American National Metric Council, Aerospace Sector Committee

Scope
A national trade association representing U.S.
companies engaged in research, development, and
manufacture of such aerospace systems as aircraft,
missiles, spacecraft, and space launch vehicles;
propulsion, guidance, and control systems for flight
vehicles; and a variety of airborne and ground-based
equipment essential to the operation of flight
vehicles. Functions on national and international
levels, representing its membership in a wide range of
technological and other relationships with government
agencies and the public.

Standardization Activities
Standardization activities are directed toward
fulfilling user-defined requirements of the industry
and its customers. A close working alliance exists
with the Department of Defense, National Aeronautics
and Space Administration, and other agencies and
industry organizations. This liaison involves direct
participation of government representatives in meetings
and activities of the association's primary standards
developing body, the National Aerospace Standards
Committee. Technical input is solicited from all
affected interests. Committees also review and make
recommendations on government standards documents and
participate in standards programs of ANSI, SAE, ASME,
DoD, DoC, and FAA.

NAS's are used worldwide in high stress environments.
They are applied on all types of aerospace and other
high-technology systems, as well as critical non-
aerospace applications such as rapid transit rail cars,
amusement park rides, high speed diesel engines, and racing cars. The NAS series is best known for its high strength, precision fasteners, which include bolts, screws, nuts, and rivets of all types in inch (NAS) and metric (NA) series. Other NAS's define high pressure hose, electrical connectors, splices and terminations, rod end bearings, and many other types of hardware and components.

Nearly 100 of NAS's specify requirements for manufacturing equipment used by aerospace and other industries, including numerically controlled (NC) and computer aided manufacturing (CAM) machine tools, NC welding and fabrication equipment. One of the first standards for an industrial robot was released as an NAS in 1982. NAS's have also been developed for airport planning, airworthiness requirements of cargo containers, flight testing, propellants, packaging, and other needs of the aerospace community.

AIR AND WASTE MANAGEMENT ASSOCIATION

Martin E. Rivers, Executive Vice President

P.O. Box 2861
Pittsburgh, Pennsylvania 15230
(412) 232-3444

Founded: 1907

Type of Organization
Technical Society
Works through other organizations to develop standards

Representation
ANSI Committee Z-21, Subcommittee on Standards for Domestic Gas-Fired Incinerators; ANSI Z-105, Air Cleaning Equipment Committee; ANSI Z-91, Committee of Installation Standards for Oil Burners and Oil Burning Equipment; ANSI Z-228, Incinerator Committee; International Organization for Standardization; Technical Committee ISO/TC 146; and Air Purity Intersociety Committee (Manual of Methods of Ambient Air Sampling Analysis).
Scope
A voluntary, cooperative, nonprofit, technical organization devoted to air pollution control and waste management. Membership of 9500 is composed of engineers, scientists, enforcement officials, industrial organizations, manufacturers of control equipment and instrumentation, scientific and educational institutions, and consultants.

Standardization Activities
Contributes to standards development through representation on various committees of standards-setting organizations.

Keywords
air pollution; environment; waste management;

AIR CONDITIONING AND REFRIGERATION INSTITUTE
Herbert Phillips, Vice President of Engineering
1501 Wilson Blvd, 6th Floor
Arlington, Virginia 22209

Standards Developer

Standards Development
Standards developer since its formation in 1953
150 members participate in standards activities
Over 50 active standards processed through ANSI
Draft standards available for review; interested parties are invited to participate in standards development

Standards Designation
ARI prefix

Government Adoption
Certain government agencies recommend purchase of products tested according to specific ARI Standards and/or ARI certified products.

Certification
Seventeen certification programs. Product performance certified by manufacturer, verified by ARI through an independent laboratory.

Secretariats
Chairmanship U.S. TAG ISO/TC 86, Refrigeration;
Chairman, IEC/TC 61D

Scope
Trade association of manufacturers of air conditioning, heating, commercial and industrial refrigeration, excluding room air conditioners, household refrigerators and freezers, portable humidifiers and dehumidifiers.
Standardization Activities

Activities of ARI include: Equipment standards pertaining to physical and operating characteristics of items and equipment; Testing standards procedures for testing equipment in order to determine performance and operating characteristics; Rating standards containing provisions for converting data into general statements of capacity and performance which can be applied to a series of production items; Application standards specifying acceptable installation criteria, including initial selection of equipment.

Standards issued cover: unitary air-conditioning equipment and heat pumps, air-cooling and air-heating coils, forced circulation, free-delivery air-coolers for refrigeration, central station air-handling units, room air-induction units, centrifugal liquid-chilling packages, reciprocation chilling packages, liquid line driers, self-contained mechanically-refrigerated drinking water coolers, transport refrigeration units, and sound rating and application standards. ARI also has an International Standards Engineer to handle international standards activities.

Standards Development
Participated in the development and updating of Simplified Practice Recommendation R207 since 1947.

Scope
A national trade association representing U.S. companies engaged in research, development, and manufacture of air distribution equipment, as pipe, duct, and fittings for warm air heating and air conditioning, for use in residential single and multi-family dwellings.
**Standardization Activities**

Develops production distribution and use standards for pipe, duct, and fitting for warm-air heating and air conditioning. Produces a numerical data system for identification of products as manufactured by its members, in concert with North American Heating and Air Conditioning Wholesalers. Currently updating simplified practices and recommendations.

ISO/TC 117 Industrial Fans SC2 (Sound Ratings);
ANSI/TAG for ISO/TC 117 since 1988

**Scope**

An international trade association of manufacturers of fans, louver, and dampers used in industrial, commercial, residential, and institutional air handling systems. Includes more than 100 manufacturers in the USA and Canada and some 20 countries overseas. Promotes and furthers the interests of the public and
Standardization Activities

Aims at the development of accurate and reliable testing procedures which are adopted as standards and used as a basis for rating the industry's products. Adopts standards to measure the performance of all air moving devices and the sound power of this equipment, in addition to air curtains and industrial ceiling fans. These include relating pressure drop and/or water penetration to the air flow rate of louvers, dampers, and shutters; leakage rate of dampers at a given pressure difference. Other technical standards cover a wide variety of subjects including nomenclature, drive arrangements, sizes, classification for spark resistant construction, operating limits for centrifugal fans, and inlet box positions for centrifugal fans.

Availability

Sold directly. Joint ASHRAE standards also available through ASHRAE.

(312) 490-8500

Founded: 1922  Standards Staff: 1

Type of Organization
Trade Association
Works through other organizations to develop standards

Representation
80 Representatives serving on 100 standards committees of ANSI, NFPA, ASTM, and ASME.

Scope
A membership organization of 160 property/casualty insurers addressing the spectrum of insurance related issues.

Standardization Activities
Financially supports, through ANSI and NFPA, the consensus development of safety and health standards, as well as provides technical representatives to assist in formulating standards. To maximize the usefulness of the standards alliance, representatives urge performance standards where practicable. Standards are used in training seminars and in evaluating hazards and risks.

**Secretariats**  
ANSI Standards Committee H35 on Aluminum and Aluminum Alloys

**Scope**  
Serves the public as a source of noncommercial, industry-wide information on aluminum and the aluminum industry. Membership embraces producers of primary ingot, sheet, and plate; and leading extruders, foundries, secondary smelters, forging firms, and producers of aluminum electrical conductors. Represents virtually all U.S. primary aluminum production and 85 percent of semi-fabricated aluminum product shipments.

Functions include developing, publishing, and distributing technical data, collecting and publishing industry statistics, and conducting school programs and industry seminars.

**Standardization Activities**  
Activities of the association are the basis for the majority of government, American Society for Testing and Materials, company, and other specifications for aluminum and aluminum alloy products. Specific publications include: Aluminum Standards and Data (published biennially), Drafting Standards - Aluminum Extruded and Tubular Products, Designation System for Aluminum Finishes, Specifications for aluminum Structures, and Standards for Aluminum Standard Permanent Mold Castings. The association also publishes, in cooperation with the American Society for Metals, the European Aluminum Association, the Japan Light Metals Association, and the Aluminum Development Council (Australia), a monthly abstract journal of the world's technical literature on aluminum.

Elk Grove Village, Illinois 60009  
(312) 228-5005

Founded: 1930

**Type of Organization**  
Professional Society  
Health Care Guidelines Development
The Academy unites 37,000 member pediatricians throughout the Americas to ensure for all young people the attainment of their full potential for physical, emotional, and social health. To this end, the AAP dedicates its resources to professional education, advocacy for children, representation of pediatricians, public education, access to health care and service to children.

The AAP publishes statements and manuals to help health professionals in their treatment of children. These recommendations have been used by regulatory agencies to establish guidelines for pediatric care. These pertain to perinatal care, pediatric nutrition, out-of-home day care, and treatment of infectious diseases, guidelines for health supervision, accident and poison prevention, school health, sports medicine, drug therapies and toxicities, and environmental hazards.

On request (order) from Publications Department

AMERICAN ALLIANCE FOR HEALTH, PHYSICAL EDUCATION, RECREATION AND DANCE

Charlie Hartman, Executive Vice President

1900 Association Drive
Reston, Virginia 22091
(703) 476-3400

Founded: 1885

Professional Society
Standards developer

Certification programs are implemented at the state level through activities of AAHPERD members. Professional preparation programs in colleges are developed using AAHPERD standards.

A voluntary professional organization for education in the field of recreation and dance. Promotes the improvement of education through such professional services as consultation, periodicals and special publications, leadership development, determination of standards, public information, and research.

Standards are national in scope and are promoted through the education of teachers and professionals in allied fields. Publishes over 30 books and pamphlets
containing guidelines and standards. With funding from the Department of Health, Education and Welfare, prepared Guideline for Professional Preparation for Personnel Involved in Physical Education and Recreation for the Handicapped. Cooperates with other organizations such as the Association for the Advancement of Health Education, National Association for Sport and Physical Education, and the American Association for Leisure and Recreation.

Standards Developer

**Standards Development**

Standards developer since 1936
Processed through ANSI

**Standards Designations**

ANSI/AAMA prefix

**Government Adoption**

Standards are referenced by HUD in the M.P.S., and are accepted by the Department of Defense.

**Certification**

Sponsors certification program for aluminum and vinyl windows and doors; also sponsors a program for manufactured housing to comply with FMH CSS/HUD requirements.

**Scope**

A trade association of approximately 260 firms engaged in the manufacture and sale of architectural building components and related products.

**Standardization**

ANSI/AAMA Voluntary Standards currently exist for aluminum prime windows and doors, and sliding glass doors covering characteristics, such as air infiltration, water resistance, windload, structural strength, component requirements, and other quality requirements.
Other Voluntary Standards cover energy balance calculating procedures, recommended test methods, and coatings and finishes for storm windows and doors, aluminum siding, hardware, and sealants.

Standards undergo constant review and are updated to reflect technical advances in the industry.

AMERICAN ASSOCIATION FOR CLINICAL CHEMISTRY

Ronald E. Whorton, M.P.H., Executive Vice President

2029 K Street, NW
Washington, DC  20006
(202) 857-0717

Founded: 1948

Type of Organization
Scientific/Professional Society
Works through other organizations to develop standards

Scope
A nonprofit organization of professional chemists who specialize in clinical chemistry.

Standardization Activities
The Standards Committee carries out background development of standard methodology and materials, and collaborates closely with the International Federation of Clinical Chemistry and the National Committee on Clinical Laboratory Standards, particularly in programs on nomenclature, proteins, and enzymes. Maintains close alliance with the clinical laboratory programs of the U.S. National Institute of Standards and Technology in developing specifications for new standard reference materials, and with the Center for Disease Control and the Food and Drug Administration in evaluating methods and performance in the field. Methods and recommendations are published in the journal, Clinical Chemistry, or in the book series, Standard Methods in Clinical Chemistry.

Formerly
The American Association of Clinical Chemists (1975)

AMERICAN ASSOCIATION FOR LABORATORY ACCREDITATION

John W. Locke, President
656 Quince Orchard Road, Suite 704
Gaithersburg, Maryland 20878-1409
(301) 670-1377 FAX: (301) 869-1495

Founded: 1978

Type of Organization
Scientific Organization
Standards Developer

Standards Developments
260 active members
190 accreditation actions in 34 states, Guam and Canada
11 fields of testing

Certification
Accredits laboratories on a voluntary basis.
Accreditation is renewed on a two year interval with
annual review documentation.

Scope
Accreditation for testing laboratories and/or
inspection agencies on the basis of technical
competence. Membership available to individuals,
educational, scientific, engineering or technical
society, governmental, corporations or trade
associations. Fields of testing include acoustical,
biological, chemical, construction materials,
electrical, environmental, geotechnical, mechanical,
metrology, nondestructive, and thermal. Special
programs include asbestos, automotive, coal, metals,
metal fasteners, paint, radon, thermal (insulation
materials), thermal (wood heaters), and windows and
doors.

Standardization Activities
Employs ISO Guide 25 for general criteria. Specific
criteria for each field of testing are developed with
the use of national standards. Participates in U.S.
delegation to the International Laboratory
Accreditation Conferences.

Keywords
testing; accreditation; laboratory;

(703) 528-8200  FAX: (703) 527-8036

Founded: 1947

**Type of Organization**
Professional Society

**Standards Development**
Standards developer since 1958
600 members participating in standards activities
279 active standards
None processed through ANSI

**Standards Designation**
AABB prefix

**Government Adoption**
Department of Health and Human Services, Food and Drug Administration has adopted AABB Standards in the CFR Title 21. The Department of Defense has adopted AABB Standards and stocks them in their hospital and blood collecting facilities. Several state health departments have adopted AABB Standards as basis for regulation.

**Certification**
Inspection and Accreditation Program which, through inspecting and accrediting facilities, strives to improve the quality and safety of transfusions, and assists the medical director of a blood bank or transfusion service in determining whether methods,
procedures, and personnel meet established AABB standards. Several states accept AABB inspections as equivalent to their state inspections for licensing requirements.

Scope
A professional, nonprofit scientific and administrative association for those individuals and institutions engaged in the many facets of blood banking. Membership includes physicians, scientists, medical technologists, administrators, and blood bankers. Serves as the focus for the advancement of the professional practice of blood procurement, transfusion therapy, and related fields.

Standardization Activities
Maintains Committee on Standards which develops and publishes standards of minimal acceptance practice applicable to relevant aspects of blood banking; maintains liaison with other organizations including CAP; Health Care Finance Administration (HCFA), and the Food and Drug Administration (FDA); reviews and approves methods which deviate from standards, and reviews the applications of those institutions requesting such approval; and reviews histocompatibility studies for inclusion in standards.

Availability
Distributed directly and through the DoD Military Blood Catalogue

32 technical committees assist in standards work
350 standard methods and procedures

Standards Designations
AACC Approved Methods 00-00

Government Adoption
Largely used by the Federal Grain Inspection Service of the USDA and FDA in the area of cereals.
| Certification | Provides certification program for "Sanitation Analyst." Specialized area for quantitative and qualitative analysis of food products for possible contamination by insects, rodents, or other foreign matter of animal origin. |
| Scope | An international society which develops and standardizes analytical methods used in the milling and baking industries. Expanded in latter years to cover entire cereal processing industry and to advance and encourage research on all cereal grains and related materials. Methodology is related to all needs of the cereal scientist, from sampling, inorganic and organic ingredients, and microbiology, to chemical residues, additives, and sanitation. |
| Standardization Activities | Develops methodology rather than standards per se. Cooperates with the Association of Official Analytical Chemists, American Oil Chemists Society and ASTM. Subjects include analytical methods and apparatus for flours and dough, flour specifications, and sanitation methods. |
| Availability | Sold directly or through bookstores |
| Keywords | cereals; cereal chemistry; grain; grain storage; nutrition; food; agriculture; sanitation; |

**AMERICAN ASSOCIATION OF MOTOR VEHICLE ADMINISTRATORS**

John Strandquist, CAE, Executive Director

4200 Wilson Boulevard  
Suite 600  
Arlington, VA 22203  
(703) 522-4200

Founded: 1933  
Program Staff: 5

**Type of Organization**  
Voluntary Nonprofit Association of State and Provincial Officials  
Works through other organizations to develop standards

**Representation**  
Members and staff representatives active in standards setting committees of SAE, ANSI, ASTM, Canadian Standards Association, National Highway Traffic Safety Administration (NHTSA), CPSC, Economic Commission for Europe (ECE), and Federal Highway Administration (FHWA).
### Scope
An organization responsible for the administration and enforcement of motor vehicle and traffic laws in the United States and Canada. Provides the principal forum where state and provincial officials exchange information on developments in the industry and maintain liaison between industry and federal government.

### Standardization Activities
Activities are directed toward promoting uniform laws and regulations for motor vehicle administration, traffic law enforcement, highway safety, and the standardization and uniform enforcement of these laws. Principal functions are in the areas of: model program development in disciplined relating to motor vehicle administration, police traffic services, and highway safety; an information clearinghouse; and the industry spokesman.

Services include advice and counsel in various facets of driver services, vehicle services, safety equipment services, commercial motor carrier activities, including interstate and provincial reciprocity, and program planning and systems development.

With the dissolution of the Vehicle Equipment Safety Commission, AAMVA serves as the repository for the series of standard performance requirements and test procedures for motor vehicles and equipment developed by the commission.

### Keywords
motor vehicle; automobile; safety; traffic laws; transportation; government officials;

**AMERICAN ASSOCIATION OF NURSERYMEN**

Lawrence E. Scovototto, Executive Vice President

1250 Eye Street, NW
Washington, DC 20005
(202) 789-2900

Founded: 1876

**Type of Organization**
Trade Association

**Standards Designation**
American Standards for Nursery Stock ANSI-Z60.1 - 1989
### Scope
Enables nurserymen to work on those projects and activities which foster the general welfare of the industry and their customers.

### Standardization Activities
Develops grades and standards for the use of nurserymen, landscape architects, landscape contractors, governmental agencies, and others preparing lists and specifications for trading in trees, shrubs, roses, vines, fruit trees, small fruit, bulbs, tubers, and forest tree seedlings through its Horticulture Standards Committee. Standards contain height, caliper, root size, root ball, container size and various other standardized means of describing nursery plants.

### Availability
Distributed directly and through ANSI

### Keywords
horticulture; nursery plants; agriculture;

### AMERICAN ASSOCIATION OF PETROLEUM GEOLOGISTS

Fred A. Dix, Jr., Executive Director

1444 South Boulder
Tulsa, Oklahoma  74119
(918) 584-2555

Founded: 1917

### Type of Organization
Professional Society

### Standards Developer

### Government Adoption
Code of Stratigraphic Nomenclature has been adopted by the American Commission of Stratigraphic Nomenclature.

### Scope
A professional society of geologists engaged in the exploration for hydrocarbons research and teaching.

### Standardization Activities
Maintains two committees active in standardization activities. The Stratigraphic Correlations Committee publishes a Code of Stratigraphic Nomenclature. The Committee on Statistics of Drilling works with the American Petroleum Institute and various government agencies to develop a standardized form for recording data on oil and gas drilling. Cooperates with other organizations to develop standard definitions for the petroleum industry.

### Availability

**AMERICAN ASSOCIATION OF POISON CONTROL CENTERS**

Dr William O. Robertson, President
Seattle Poison Center
Children's Hospital and Medical Center
4800 Sand Point Way, NE
Seattle, Washington 98105
(206) 526-2121

**Founded:** 1957

**Type of Organization**
Trade Association
Standards Developer

**Scope**
Promotes and encourages the development of improved methods for the prevention and treatment of acute poisoning, and furthers the exchange of information about such activities among its members.

**Standardization Activities**
Maintains a Committee on Public Educational Activities which develops material that will be of value to poison control and information centers in educating the lay public about the hazards of, and the prevention of, acute poisoning in and about the home.

A Committee on Personnel Proficiency develops aids for the training of professional personnel in the prevention of acute poisoning. The Committee is responsible for preparing and administering a certification examination for poison information specialists.

A committee on Regional Poison Control Center Certification prepares standard recommended practices for poison control and poison information centers. These have been accepted as standard recommended practices for the establishment and operation of properly qualified centers.

Standards Development

- Standards Developer since 1921
- 1100 members participating in standards activities
- 138 active standards
- Most AATCC Test Methods become American National Standards through ANSI
- Drafts of proposed or revised test methods available for review

Standards Designation

AATCC prefix

Government Adoption

Various government agencies have either adopted or adapted a number of AATCC test methods.

Certification

No certification, qualification, or accreditation programs

Secretariats

ISO/TC 38/SC1, Colour fastness and Colour measurement
ISO/TC 38/SC2, Laundering, Drycleaning and Finishing
USA TAG for ISO/TC 38-Textiles

Scope

Promotes increased knowledge of the application of dyes and chemicals in the textile industry; encourages, in a practical way, research on chemical processes and materials of importance to the textile industry; and promotes the exchange of professional knowledge.

Membership includes many leading textile chemists and colorists in nearly every state and 50 countries. Some 300 companies support the association as corporate members.

Standardization Activities

Internationally recognized for its standard methods of testing dyed and chemically treated fibers and fabrics to measure such performance characteristics as colorfastness to light and washing, crease resistance, shrinkage, wash-and-wear, water resistance, flammability, and other conditions to which textiles may be subjected. Assures textile quality and performance by controlled AATCC test methods.
Maintains cooperative relationships with other associations and agencies of the federal government. Participates in the International Organization for Standardization (ISO) in an effort to bring about worldwide uniformity in testing procedures. Publishes Textile Chemist and Colorist, issued monthly, and an annual Technical Manual containing the association's test methods. Collaborates with the British Society of Dyers and Colourists on numerous projects.

Availability
Distributed directly and through IHS and Global

AMERICAN AUTOMOBILE ASSOCIATION

J.B. Creal, President
100 AAA Drive
Heathrow, Florida 32746-5064
(407) 444-8000 Telex: 89-9485

Founded: 1902

Type of Organization
Trade Association
Works through other organizations to develop standards

Scope
Federation of 154 motor clubs serving more than 30.5 million members throughout the United States and Canada. A nonprofit, tax paying organization, which provides auto and travel related services to its members, and works on behalf of the best interests of the motoring and traveling public to promote safer and more enjoyable travel.

Standardization Activities
Participates in the development of proposed standards of various types relating to increasing the safety and convenience of pedestrians in traffic. Develops detailed methods and various proposed standards for training new drivers. Represented on committees of the Transportation Research Board, National Safety Council, and National Committee on Uniform Traffic Laws and Ordinances whose major purpose is to develop standards which pertain to highway and traffic safety.

Cooperates with other organizations to develop standards for the operation of school safety patrols and adult crossing guards, and in standards activities in the fields of traffic law enforcement, traffic training procedures, and automotive engineering.

Standards Developer

Standards Development
70 standards currently active
20 project technical committees
220 committee members are active in standards development

Standards Designation
ABYC prefix

Government Adoption
U.S. Coast Guard References ABYC standards

Scope
An independent, nonprofit, membership organization representative of recreational boating including members from industry, insurance, government, and the boating public. Membership consists of 1800 individuals, corporations and associations.

Standardization Activities
Develops safety standards and recommended practices for the design, construction, equipage, and maintenance of boats and their related accessories. Standards are generated by project technical committees and reviewed
by the ABYC Technical Board and Board of Directors prior to publication. Standards provide a basis for certification programs of other organizations and are used as source material by the U.S. Coast Guard in their development of safety regulations under the Boating Safety Act of 1971.

Individual members work voluntarily through committees and boards to implement the boating safety standards program. In addition, liaison is maintained with other organizations by means of memberships on NFPA 302, Subcommittee on Motor Craft; SAE Marine Technical Committee; UL Marine Engineering Council; National Safe Boating Council; National Boating Safety Advisory Council; Rules of the Road Advisory Council; ASTM F-15.10, Gasoline Containers for Consumer Use; and ISO/TC 188 Small Craft.

AMERICAN BOWLING CONGRESS/WOMEN'S INTERNATIONAL BOWLING CONGRESS

Dan Speranza, Manager

Equipment Specification Department
5301 South 76th Street
Greendale, Wisconsin 53129
(414) 421-6400

Founded: 1895 Standards Staff: 7

Type of Organization
Trade Association
Standards Developer

Certification
All bowling lanes under the jurisdiction of the ABC/WIBC are certified annually by representative of local bowling associations chartered by ABC/WIBC. Lanes are measured and checked to assure that physical properties and dimensions correspond to ABC/WIBC specifications. When found to meet all specifications, and ABC/WIBC decal is issued for posting in the establishment.

Scope
A nonprofit, noncommercial, membership service organization for male bowlers (ABC) and female bowlers (WIBC). Sponsors competitions; provides standard rules and tests. Approves material and equipment.

Standardization Activities
Instrumental in developing specifications for playing equipment worldwide. Maintains an equipment testing and research department that works with new products brought to it for consideration, and also maintains a constant check on products already in use. Publishes equipment specifications annually in ABC constitution, Rules and Specifications. Standards developed for lanes, bowling balls, pins, pinsetting machines, automatic scorers, and foul detectors; Equipment specifications are printed annually in the ABC Constitution, Rules and Specifications book.

AMERICAN BRUSH MANUFACTURERS ASSOCIATION

Taylor Fernley, Managing Director

1900 Arch Street
Philadelphia, Pennsylvania 19103
(215) 564-3484

Founded: 1918

Type of Organization
Trade Association
Standards Developer

Standards Designation
ANSI B165.1 and B165.2

Scope
The national trade association representing manufacturers of brushes, brooms, and mops, together with suppliers of parts, materials, machinery, and services. ABMA maintains several divisions organized by type of product including paint applicator, personal, household maintenance, broom and mop, and industrial.

Standardization Activities
All current standard activities are conducted by the Safety and Standards Committee of the Industrial Division which works closely with ANSI. The main thrust of two standards developed to date is concern with safe operation of power driven rotary wheel-type brushes. ANSI B165.1 (1979) defines safety requirements for the design, care and use of power driven brushing tools; and ANSI B165.2 (1982) covers safety requirements with wood, plastic, or composition hubs and cores.

Availability

Founded: 1862

Type of Organization
Technical Society
Standards Developer
Established and administers standards called "Rules" for the design, construction, and periodic survey of merchant ships and other marine structures; publishes 15 volumes of Rules and 23 guides; and publishes the Record, a registry of merchant vessels.

ABS prefix

Over 100 governments recognize ABS to act on their behalf by conducting surveys and issuing certificates relating to various international maritime conventions. ABS is authorized by USCG to act on their behalf in reviewing plans and inspecting U.S. flag vessels which are certified by the USCG. USCG also recognizes ABS to perform admeasurement of vessels and issue tonnage certificates on their behalf. Under the Merchant Marine Act of 1920, ABS is recognized as a U.S. government agency for classification of merchant vessels it may own.

ABS has separate volumes of Rules and Requirement for the Certification of Cargo Containers and for Cargo Gear. Also classification involves various certifications to provide assurance that the ABS Rules are met such as those of design plans, machinery components, welders, etc. ABS also provides certification services according to other recognized standards or client-specified standards.

An international ship classification society and nonprofit corporation. Objectives include: preparation of standards, known as "rules" and "guides", for the construction of hulls and machinery of ships and other marine structures, including material specifications and regulations for periodic surveys. Standards published annually and modified to keep pace with developments in shipbuilding and marine engineering; analysis of plans of vessels projected to be built, reconversions of existing vessels, to verify that they meet the standards set by the rules; verification of the building to approved plans of the new hull and its main machinery, boilers and vital auxiliaries, and the construction for hull and machinery as required by the rules; carrying out periodic and damage surveys as called for by the rules; annual publication of the Record of the American Bureau of Shipping which contains essential details of hull and machinery and survey status of bureau-classed vessels; issuance of certificates of character for bureau-classed vessels, i.e., classification certificates, seaworthy certificates, confirmation of class certificates, etc.
Standardization Activities
Promulgates and annually updates its Rules through committees composed of individuals internationally eminent in their marine field.

Availability
Standards distributed directly through all offices of ABS.

(202) 842-1645

Founded: 1926

Type of Organization
Trade Association
Works through other organizations to develop standards

Representation
ANSI, Department of Transportation, Interstate Commerce Commission

Scope
A national trade association for the intercity motor bus industry with membership of more than 500 bus operating companies, plus state and regional bus associations, bus manufacturers, suppliers, and travel and tourism entities interested in bus transportation and tourism.

Standardization Activities
Concerned with the development of standards and requirements in matters affecting motor carrier and motor vehicle safety and occupational safety and health. Included are operation, maintenance, and inspection of vehicles, safety-related parts and accessories such as brakes, tires, lights, windows, seats, etc.; control of noise and pollutant emissions; and accident reporting. Cooperates with the U.S. Department of Transportation, and participates in the work of voluntary groups, such as those sponsored by the American National Standards Institute. Works with federal and state legislative groups in connection with standardization of vehicle sizes and weights.
Also works with the Interstate Commerce Commission and other interested government agencies, and industry groups in connection with standards and requirements relative to such matters as accounting, reporting of
financial and operating data, certification of operating authorities, and vehicle registration.

Association committees and staff representatives are primarily responsible for its standardization activities. Included are committees on Safety, Maintenance, Ethics, and Inspection.

Founded: 1981

Type of Organization
Trade Association
Works through other organizations to develop standards

Representation
7 members active in ACA standardization serving on ASME, ANSI, and ISO standards committees

Scope
Manufacturers of sprocket-driven chain and sprockets for power transmission and the conveyance of materials.

Standardization Activities
Active in standardization of dimensions, of roller, silent, engineering steel and malleable iron chains, sprockets and wheels for the purpose of securing interchangeability, and also in standard recommendations for power capacity and speed for these chains. Does not publish standards, preferring to sponsor standards for adoption through the procedures of the American National Standards Institute (ANSI). Cooperates with the American Society of Mechanical Engineers, Society of Automotive Engineers, American Petroleum Institute, Conveyor Equipment Manufacturers Association, and the American Gear Manufacturers Association in standardization matters of mutual interest. ANSI standards covering chain include B29.1 through B29.25M. Participates in the work of Technical Committee 100 of the International Organization for Standardization.

Standards Developer since 1906; 30 active standards, including 3 metric plus 130 committee reports; 2300 members participate in standards activities; most standards processed through ANSI; draft standards available for review.

53
Standards Designation
ACI prefix

Government Adoption
The Department of Defense has adopted a number of ACI standards.

Certification
ACI administers the following certification programs: Concrete Field Testing Technician, Grade I; Concrete Laboratory Testing Technician, Grades I and II; Concrete Construction Inspector-in-Training; Concrete Construction Inspector, Level II.

ACI accredits equivalent certification programs administered by other organizations.

Scope
Devotes its effort to the solution of technical problems related to the design, construction, and maintenance of concrete and reinforced concrete structures and to the dissemination of information in this field.

Standardization Activities
One hundred nine technical committees study specialized problems through the evaluation of published information, research reports, and majority opinion based on field practices leading to the development of committee reports. Many committee reports evolve into standards after technical review and discussion by the membership and letter ballot of the members.

Standards are confined to codes, specifications, and standards practices related to structures as a whole. Basic materials and "over-the-counter" components are deliberately excluded from the scope of its standardization procedures.

</tbody>
</table>

Industry related products are covered by national consensus standards developed by ASTM, AASHTO, and AREA. Manufacturing standards cover precast concrete products, such as non-reinforced pipe for sewers, culverts, drain tile, and irrigation; reinforced...
circular, arch and elliptical pipe, box sections, and manholes for sewers and culverts; reinforced circular pipe for low-head pressure systems; and perforated pipe. Other manufacturing standards cover joints, jointing materials, and resilient connectors for pipe to structure connections. Proof of design and quality assurance are covered by plant test methods standards. Acceptance of installed products is covered in standards practices for various field tests. Design standards for pipe and box sections cover determination of loads, stresses, and required structural strength.

Works through other organizations to develop standards

**Scope**
Primarily ASTM and AWWA

An international trade association representing the concrete pressure pipe industry. Activities include research, technical services promotion, public relations, advertising, education, and liaison with technical societies and government agencies. Its members produce precast concrete pressure pipe for transmission lines in irrigation, industrial and domestic water-supply systems, as well as distribution feeder mains, pressure siphons, sewer force mains, and sewer outfall lines.

**Standardization Activities**
Not a standards developing organization, but works within the voluntary standards system to coordinate concrete pressure pipe industry standards activities, and acts as the industry voice.

Products of the industry are covered by national consensus standards developed by the American Society for Testing and Material (ASTM) and the American Water Works Association (AWWA). Manufacturing standards cover reinforced concrete pressure pipe, reinforced concrete cylinder pipe, pretensioned concrete cylinder pipe, and prestressed concrete cylinder pipe.
Keywords: water-supply; sewage; construction;

AMERICAN CONFERENCE OF GOVERNMENTAL INDUSTRIAL HYGIENISTS

William D. Kelley, Executive Secretary

6500 Glenway Avenue
Building D-7
Cincinnati, Ohio 45211
(513) 661-7881

Founded: 1938  Standards Staff: 2

Type of Organization: Professional Society
Standards Developer

Standards Development: Standards developer since 1940s

Government Adoption: Various federal agencies, including OSHA, Department of Labor

Secretariats: Threshold Limit Values for Chemical Substances Committee
Threshold Limit Values for Physical Agents Committee

Scope: A national professional association of practicing industrial hygiene and occupational safety and health personnel in federal, state, and local agencies and educational institutions. Assembles guides, recommends practices, and technical background for the evaluation and control of the occupational environment.

Standardization Activities: Developed and annually revises the Threshold Limit Values which are recommended on airborne contaminants and physical agents in the workplace. Used by professionals with direct responsibilities for worker health protection. Publishes the Industrial Ventilation Manual of Recommended Practices.

Availability: Sold directly

Keywords: industrial hygiene; airborne contaminants; occupational safety; Threshold Limit Values; industrial ventilation; public health; government officials;
AMERICAN CONGRESS ON SURVEYING AND MAPPING

John Lisack, Executive Director
5410 Grosvenor Lane
Bethesda, Maryland 20814
(301) 492-0200 FAX: (301) 492-8245

Founded: 1941

Type of Organization
Professional Society
Works through other organizations to develop standards

Certification
Hydrographic Surveyor Certification Program since 1984

Scope
A national professional association representing 11,000 members in the fields of surveying and mapping; composed of three member organizations: National Society of Professional Surveyors (NSPS), American Association for Geodetic Surveying (AAGS), and American Cartographic Association (ACA).

Standardization Activities
Cooperates with ASCE, ANMC, International Cartographic Association (ICA), and International Federation of Surveyors (FIG) to promote standards in the fields of land and geodetic surveying and cartography.

Developed 1989 Digital Cartographic Data Standards.
Works voluntarily through committees.

Keywords
surveying; mapping; cartography; data processing;

AMERICAN COUNCIL OF INDEPENDENT LABORATORIES

Joseph F. O'Neil, Executive Secretary
1725 K Street NW
Washington, DC 20006
(202) 887-5872

Founded: 1937

Type of Organization
Trade Association
Works through other organizations to develop standards

Standards
Participates with others developing standard test procedures and laboratory methods.

Secretariat
ANSI Z34 Committee
Scope
A trade association of independent scientific and engineering laboratories whose membership includes many of the leading testing and inspection firms in the United States, Mexico, Central America, Japan, and Canada.

Standardization Activities
Publishes a Manual of Practice entitled Recommended Requirements for Independent Laboratory Qualification, which encompasses a quality control system for personnel and equipment evaluation as well as calibration and standardization in the system.

Promotes standards of ethics employed by independent laboratories in special fields of interest and activity including sampling, inspection, physical or nondestructive testing, and chemical analysis of raw, intermediate, and finished materials and products; research and development; the improvement of products or processes; the quality control of composition and performance; and professional consultation in various fields of scientific technology.

Does not write standards for products or materials but participates in writing test procedures and methodology in other standards-writing organizations. Cooperates with the National Institute of Standards and Technology, Department of Defense and particularly the Army Corps of Engineers; General Services Administration; Department of Transportation; Department of Labor, Occupational Safety and Health Administration; Department of Health, Education and Welfare; Food and Drug Administration; and the Department of Agriculture.

AMERICAN CRYSTALLOGRAPHIC ASSOCIATION

Marcia J. Vair, Administrative Secretary
P.O. Box 96
Ellicott Station
Buffalo, New York 14205-0096
(716) 856-9600 ext. 321  FAX: (716) 852-4846

Founded: 1949

Type of Organization
Scientific Society Standards Developer
Scope
Promotes the study of the arrangement of atoms in matter, its causes, its nature, its consequences, and the tools and methods used in such studies.

Standardization Activities
The Apparatus and Standards Committee has promulgated standards for camera tracks and bases and has adopted dimensional specifications for goniometer heads.

An ACA appointed representative serves as a liaison to the National Institute of Standards and Technology for the issuance of Crystal Data. This publication provides a complete list of crystalline substances as identifies from unit cell dimensions.

AMERICAN DAIRY PRODUCTS INSTITUTE

Dr. Warren S. Clark, Jr., Executive Director

130 North Franklin Street
Chicago, Illinois 60606
(312) 782-4888 FAX: (312) 782-5299

Founded: 1923 Standards staff: 2

Type of Organization
Trade Association Standards Developer

Standards Development
Standards developer since 1923 for evaporated milk products, testing, and sanitation, since 1925 for dry milk products, and since 1971 for whey products.

Government Adoption
The U.S. Department of Agriculture has adopted industry-recommended standards for grades of nonfat dry milk, instant nonfat dry milk, dry whole milk and dry buttermilk. Developed common and usual names for whey and whey products that have been accepted by the FDA and were published as a Regulation in the Federal Register of September 4, 1981 (Vol. 46, No. 172, pp. 44434-42).

Certification
No certification, qualification, or accreditation programs.
Scope
A national trade association for the processed dairy products industry. Scope of activity includes evaporated and dry milk products as well as whey and modified whey products, including lactose (milk sugar). Serves and promotes the interests of its members; enhances the acceptance and utilization of processed dairy products, maintains liaison and represents the industry in dealings with governmental agencies and legislative bodies; supports technical and marketing research; and assembles and disseminates statistics and other information.

Standardization Activities
Activities coordinated through Standards/Research Committee. Develops standards in the areas of product definitions/nomenclature; specifications and grade classifications; and sanitation for processed dairy products including evaporated milk, evaporated lowfat milk, evaporated skim milk, and evaporated filled milk; nonfat dry milk, instant nonfat dry milk, dry whole milk and dry buttermilk; whey, reduced lactose whey, reduced minerals whey, whey protein concentrate, and lactose. Accepted by the industry nationally and internationally. Cooperates with the Food and Drug Administration and the U.S. Department of Agriculture. Participates in the Codex Alimentarius program.

Formerly
ADPI is the result of a 1986 merger of the American Dry Milk Institute (1925) and the Whey Products Institute (1971). In 1987, the Evaporated Milk Association (1923) merged with ADPI.

Keywords
milk; milk products; whey; whey products; lactose; food;

AMERICAN DEFENSE PREPAREDNESS ASSOCIATION
Lawrence F. Skibbie, President
Two Colonial Place
2101 Wilson Boulevard
Arlington, Virginia 22201-3061
(703) 522-1820
Founded: 1919

Type of Organization
Technical Society
Works through other organizations to develop standards

Representation
Primarily DoD and defense-related industry

Scope
Concerned citizens, military personnel, and engineers interested in industrial preparedness for the national defense of the United States.
Standardization Activities
Coordinates standards through programs, papers, symposia proceedings, panels. Works closely with government officials to develop standards, particularly in areas of engineering documentation and quality assurance.

Formerly
Army Ordnance Association (1947)
American Ordnance Association (1973)

Keywords
national security; defense;

AMERICAN DENTAL ASSOCIATION

Sharon Stanford, Standards Coordinator
Council on Dental Materials, Instruments and Equipment

211 East Chicago Avenue
Chicago, Illinois 60611
(312) 440-2500

Founded: 1859

Type of Organization
Professional Society
Standards Developer

Standards Development
Specifications and certification program since 1928
49 active standards - all American National Standards
Working projects underway for 85 specifications
Draft standards available for comment

Standards Designation
ANSI/ADA prefix

Government Adoption
The Department of Defense has adopted 3 standards.

Certification
Certification program based upon physical standards;
acceptance program based upon proof of biological and clinical safety and effectiveness.

Secretariats
U.S. TAG for ISO/TC106 Dentistry
Working Group 2, Prosthodontic Materials of ISO/TC106
Accredited Standards Committee MD156 (ASC MD156)

Scope (ASC MD156)
Nomenclature, standards and specifications for dental materials, except those recognized as drugs.
Nomenclature, standards and specifications for dental instruments, equipment and accessories used in dental practice, dental technology and oral hygiene which are
Orthodontic, prosthetic, and restorative appliances designed or developed by the dentist for an individual patient are excluded.

**Standardization Activities**

Council on Dental Materials, Instruments and Equipment acts as administrative secretariat and sponsor Activities of ASC MD 156. The ADA also sponsors participation in ANSI activities of the International Organization for Standardization Technical Committee 106 on Dentistry. The ADA works both nationally and internationally in the formulation of standards for dental materials, instruments and equipment.

**Availability**

Distributed through ANSI

**Formerly**

National Dental Association (1897-1922)
Absorbed: Southern Dental Association (1897)

**Keywords**

dentistry; dental materials, instruments and equipment; medical devices; health care;

**AMERICAN DESIGN DRAFTING ASSOCIATION**

Rachel Howard, Executive Director

5522 Norbeck Road
Suite 391
Rockville, Maryland 20853
(301) 460-6875

Founded: 1948

**Type of Organization**

Professional Association

Works through other organizations to develop standards

**Scope**

Conducts educational programs relating to management, administration, performance, and instruction of design/drafting; sponsors councils; conducts an annual convention/exposition. Over 2000 members engaged in the manual and/or automated design and drafting fields.

**Standardization Activities**

Maintains a Standards Committee which reviews ANSI proposed standards relating to the design/drafting fields. Submits comments to ANSI relating to proposed and existing standards. Informs the membership of the release, cost, and availability of new standards.

**Keywords**

design; drafting; interactive graphics; documentation; configuration management; change control; metric; data processing;
AMERICAN ELECTROENCEPHALOGRAPHIC SOCIETY

Jacquelyn T. Coleman, Executive Director

One Regency Drive
P.O. Box 30
Bloomfield, Connecticut 06002
(203) 243-3977

Type of Organization: Professional Society
Standards Developer

Scope: Furthers the knowledge of electroencephalography and related sciences, and promotes the exchange of scientific and professional information and opinions throughout the world.

Standardization: Works to establish uniform standards, techniques, and procedures; assists in setting up standards for training, examination, and qualification of clinical electroencephalographers and technicians; draws up minimum specifications for apparatus and equipment to maintain high clinical standards.

Availability: Distributed directly

Keywords: medical instruments; electroencephalography; neurology; health care;

AMERICAN ELECTROPLATERS AND SURFACE FINISHERS SOCIETY

J. H. Schumaker, Jr., Executive Director

12644 Research Parkway
Orlando, Florida 32826
(407) 281-6441

Founded: 1909

Type of Organization: Scientific Society
Works through other organizations to develop standards

Representation: ASTM, ANSI, ISO

Scope: Promotes all aspects of electroplating and surface finishing.

Standardization Activities: Participates in standards development pertaining to electroplated coatings. Relies on work of American Society for Testing and Materials (ASTM), Committee B-8 on Electrodeposited Metallic Coatings, and endorses the standards prepared by Committee B-8 whose members are members of the American Electroplaters society.
Maintains formal representation on ASTM Committees A-5 on Corrosion of Iron and Steel, D-19 on Industrial Water, and B-7 on the Anodic Oxidation of Aluminum and Magnesium Alloys, as well as American National Standards Institute Committee Z9 on Safety Codes for Exhaust Systems.

Formerly
National Electro-Platers Association of the United States and Canada (1913)
American Electroplaters Society

Keywords
electroplating; metallic coating; materials; surface finishing;

**AMERICAN FEED INDUSTRY ASSOCIATION**

Oakley M. Ray, President
1701 North Fort Myer Drive
Arlington, Virginia 22209
(703) 524-0810 FAX: (703) 524-1921

Founded: 1909

**Type of Organization**
Trade Association

**Scope**
The national trade association of the animal feed manufacturing industry. Carries out substantial activities in the fields of transportation, animal nutrition, feed production, state and federal legislation and regulations, liquid feed, computers, public relations, state and federal feed control, marketing, purchasing, environmental controls, occupational safety and health, and market research.

**Standardization Activities**
Cooperates closely with the Association of American Feed Control Officials in developing a model state feed law and model state feed regulations. The objective is to bring as much uniformity as possible into the state feed laws and regulations. Every state but one has legislation which regulates the production and distribution of commercial feed. Also cooperates with the U.S. Food and Drug Administration in its enforcement of the Federal Food, Drug and Cosmetic Act, with OSHA, EPA, USDA and other government agencies.

Keywords
animal feed; feed; agriculture;

**Scope**
Membership represents 90 percent of the U.S. producers of manmade fibers and yarns. Functions on a national scale to present the industry's position before voluntary standards groups and those government agencies that develop or reference standards applicable to the overall textile industry.

**Standardization Activities**
Not a standards developing organization. The association represents the industry before standards groups such as ASTM, ANSI, and NFPA concerned with flammability standards for textile products including apparel and home furnishing items, such as carpets, draperies, and upholstered furniture. Cooperates with NIST, including the NIST Research Associate program, to develop meaningful and relevant flammability test procedures, such as the Carpet Flooring Radiant Panel Test Method. Represents the industry before those groups which develop or reference methods and standards for other fiber/textile properties, performance and metrication. Monitors and develops appropriate actions of those government agencies which develop or reference standards impacting the man-made fiber/textile industry.

Certification
The American Gas Association Laboratories, a Division of A.G.A., maintain testing facilities for gas appliances and accessories in Ohio and California. They function as a nationally recognized third party certification agency. Gas equipment designs submitted voluntarily by manufacturers are tested for compliance with applicable national standard, principally the Z21 and Z83 gas equipment standards. The production of certified equipment is monitored by regular follow up factory inspections. Appliances and accessories which are design certified by the Laboratories carry the certification seal or the listing symbol of the American Gas Association and are included in the A.G.A. Laboratories directory of Certified Appliances and accessories.

Secretariats
Accredited Standards Committee Z21, Performance and Installation of Gas-Burning Appliances and Related Accessories and its 19 technical subcommittees.

Accredited Standards Committee Z83, Industrial Gas Equipment and Utilization and its 5 technical subcommittees

Accredited Standards Committee Z223, National Fuel Gas Code and its 3 advisory panels
Accredited Standards Committee B109, Gas Displacement Metering and its 2 subcommittees

Scope

A national trade association for 250 gas transmission and distribution companies which together account for 85% of gas delivered in the United States to 172 million consumers.

Coordinates gas industry activities concerning standardization, and information related to transmission, distribution, and utilization of gas. Serves as a clearinghouse for gas energy information for the public; as catalyst in technical and energy policy matters for the gas industry; and as spokesman on national issues for member companies. Promotes the gas industry to the best interests of public safety and a continuing supply of economical energy.

Standardization Activities

Works within the voluntary standards system to coordinate Association activities relative to national standards of interest to the gas industry. While not a standards developing organization, the Association actively participates in national standards development, including appointment of Association representation, in the areas of gas utilization equipment and its installation, and gas operating equipment and supplies.

Functions as the Administrative Secretariat to four Committees whose operating procedures are accredited by the American National Standards Institute (ANSI) as demonstrating the principles of due process and consensus. These four committees have 30 technical subgroups; supervise 47 standards covering residential gas appliances and accessories; 13 standards covering commercial and industrial gas equipment; 3 standards on gas displacement meters; and a standard covering the installation of gas piping and appliances, including their venting.

70 members and 24 staff active in standardization activities of 62 standards developing committees of other organizations, including ASTM, ASME, NFPA, and a number of American National STandards Committees.

Availability

Distributed directly and through ANSI, IHS, and Global

AMERICAN HOSPITAL ASSOCIATION

Douglas S. Erickson, Director Design and Construction Division of Facilities Management

840 North Lake Shore Drive
Chicago, Illinois 60611
(312) 280-6101

Founded: 1898

Type of Organization
Trade/Professional Association

Works through other organizations to develop standards

Representation
National Institute of Science and Technology, agencies within the Department of Health and Human Services and the Department of Labor, ANSI, NFPA, ASTM, EPA, OSHA and others.

Scope
Provides education, research, and representation services for 6,500 institutional and over 20,000 personal members.

Standardization Activities
The Division of Facilities Management has the primary responsibility for codes and standards advocacy activities related to hospital planning, design, construction, engineering, equipment, supplies and facilities management. Maintains liaison with national organizations and government agencies concerned with the development of standards. Major goal is the development of standards which are based on knowledge, cost/benefit analysis and a statistical profile establishing need.

Liaison activities include recommendation, review, revision and testimony on standards. Actively participates in the development of standards for: fire and life safety; hospital engineering; equipment and facilities; infection control; hospital supplies; and environmental issues.

Keywords
hospital; life safety; material management; hospital equipment; health care; facilities management;
## American Hotel and Motel Association

Kenneth F. Hine, Executive Vice President and Chief Executive Officer

1201 New York Avenue, N.W.
Washington, DC. 20005-3917
(202) 289-3100

**Founded:** 1910

### Type of Organization
Trade Association

### Representation
ANSI, ASTM, UL

### Scope
An international trade association representing the hotel and motel industry with primary efforts directed to the United States.

### Standardization Activities
Cooperates with other organizations in standards development. Adoption of any standards by an individual hotel/motel property is solely on a voluntary basis. Maintains liaison with the National Fire Protection Association, the National Institute of Standards and Technology, the National Institute of Building Sciences and the U.S. Fire Administration. Also works with the Council of Insurance Legislators and the Foundation for Fire Safety to seek solutions to the problems of toxicity and smoke generation. Works with the National Legislative Conference on Arson to support arson control.

Active in ANSI's development of USA Standards Safety Code for Elevators, Dumbwaiters, and Escalators; and USA Recommended Practice for the Inspection of Elevators. Represented on various committees of ANSI, ASTM, and UL.

### Formerly
American Hotel Protective Association (1917)
American Hotel Association (1962)

### Keywords
hotels; motels; safety; fire protection;
AMERICAN INDUSTRIAL HYGIENE ASSOCIATION

O. Gordon Banks, Executive Director
345 White Pond Drive
P.O. Box 8390
Akron, Ohio 44320

Founded: 1939

Type of Organization
Professional Society

Secretariats
ANSI Z9 committee

Scope
Objectives are to increase the knowledge of industrial hygiene through interchange and dissemination of information; promote the study and control of environmental factors affecting the health and well-being of workers in the workplace; correlate such activities as are conducted by individuals and agencies throughout industrial, educational, and governmental groups; and bring together persons interested in all aspects of the profession. Acts as clearinghouse for information on occupational health and safety. Brings together members of the profession through the formation of technical committees, local chapters and the conducting of continuing education course work and an annual meeting.

Standardization Activities
This association operates as a standards developer acting as secretariat for ANSI's Z9 committee and through comment by the association's 44 technical committees on public policy.

Keywords
industrial hygiene; environmental; occupational safety; public health;

AMERICAN INSTITUTE OF AERONAUTICS AND ASTRONAUTICS

Harry J. Sheetz, Standards Administrator
370 L'Enfant Promenade, SW

AMERICAN INSTITUTE OF ARCHITECTS

James P. Cramer, Hon. AIA, Executive Vice President/CEO
1735 New York Avenue, NW
Washington, DC 20006
(202) 626-7300
Founded: 1857

Type of Organization
Professional Society
Works through other organizations to develop standards

Scope
Serves the needs and improves the capability of architects; conducts public relations and educational programs. Encourages the utilization of national consensus codes and standards.
Maintains liaison with model building code organizations and standards writing groups within the industry. Several hundred AIA members work within the framework of the AIA Codes and Standards Committee.

Issues a variety of contract forms and formulates recommendations concerning size and character of building product literature directed to the architect. Active in development of a uniform system for correlation of a specifications outline, a filing system for product data, and project cost accounting guide.

AMERICAN INSTITUTE OF CHEMICAL ENGINEERS

Richard E. Emmert, Executive Director

345 East 47th Street
New York, New York 10017
(212) 705-7338

Founded: 1908

Professional Society

Standards Developer

31 ANSI Standards; 17 active

ANSI prefix

ANSI N-46 Sub-Committee: Nuclear Reactor Fuel Cycle

Advances Chemical Engineering in theory and in practice. Maintains a high professional standard among its members; serves society, particularly where chemical engineering can contribute to the public interest.

Recommends and supports ANSI or other standardization committees in areas of specified interest; provides competent and responsible representatives to such committees to ensure that any standards or codes developed are acceptable to the chemical engineering profession; develops an Institute position on major questions arising on standards proposals; and promotes the chemical engineer's participation in international standards work.
### AMERICAN INSTITUTE OF PHYSICS

**Kenneth W. Ford,** Executive Director  
335 East 45th Street  
New York, New York 10017  
(212) 661-9404  
Founded: 1931

**Type of Organization**  
Scientific Society  
Standards Developer

**Scope**  
A nonprofit membership corporation which promotes the advancement of physics and its application to human welfare.

**Standardization Activities**  
Standards, including Secretariats are provided by the Acoustical Society of America and the Optical Society of America. Both are Member Societies of AIP. AIP publishes and distributes standards for the Acoustical Society of America.

**Availability**

structural steel through marketing and technical research aimed at developing the most efficient, safe, and economical design and fabrication of steel framed structures.

Provides a variety of services to the construction industry, design profession, and steel fabricating companies including specifications, technical publications, design aids, research and development programs, plus informational and educational services conducted nationally.

Published the AISC Specification for the Design, Fabrication and Erection of Structural Steel for Buildings, and the Manual of Steel Construction. Also publishes the AISC Code of Standard Practice, and a number of specifications for materials, products, and assemblies which may be used in steel framed structures. The specifications and the manual are accepted and used universally by architects, engineers, building code bodies and government agencies.

AMERICAN INSTITUTE OF TIMBER CONSTRUCTION

R.F. Mullau, Executive Vice President
11818 Southeast Mill Plain
Vancouver, Washington 98684
(206) 254-9132

Founded: 1952 Standards Staff: 3

Type of Organization
Trade Association Standards Developer

Standards Development
Standards developer since 1952
200 members have opportunity to participate in standards activities
15 active standards
One processed through ANSI

Standards Designation
AITC prefix

Government Adoption
Adopted by local, regional, and state building codes and federal government agencies.
Certification
License qualified timber lamination plants to mark and certify products as being in conformance with ANSI A190.1.

Secretariats
ANSI A190.1

Scope
The American Institute of Timber Construction is the national technical trade association of the structural glued laminated timber (glulam) industry.

Standardization Activities
AITC's standardization activities are administered by the Institute's staff with the advice and assistance of the AITC Technical Advisory Committee. In addition to industry standards related to structural glued laminated timber and heavy timber construction, AITC has used the ANSI canvass procedure to develop ANSI/AITC A190.1, "Structural Glued Laminated Timber", which is the basis for the Institute's quality control certification program. ANSI and industry standards are adopted by building code agencies to govern the use of structural glued laminated timber. Standards specify design and manufacturing requirements.

AMERICAN INSURANCE SERVICES GROUP, INC.

John L. Jablonsky, Vice President
Engineering and Safety Service

85 John Street
New York, New York 10038
(212)669-0473

Founded: 1984 Standards Staff: 12

Type of Organization
Trade Association
Works through other organizations to develop standards

Representation
ANSI, ASTM, NFPA, UL, etc.

Scope
This subsidiary of the American Insurance Association represents 260 companies providing property and liability insurance. Endeavors to reduce and control life and property losses as well as injuries, and damage to health and the environment thereby enhancing the general public's safety, health, and welfare.
Publishes information bulletins and reports on industrial safety rules, fire protection, construction, crime prevention, special hazards, workers compensation, motor vehicle safety, and environmental science.

### Standardization Activities

Engineering and Safety Service administers standardization activities. Participates in nearly 100 standards-writing committees of the American National Standards Institute, National Fire Protection Association, American Society for Testing Materials, Underwriters Laboratories Incorporated, and others, that deal with the areas of fire protection, nuclear, chemical and environmental concerns, construction and construction safety, commercial motor vehicles, safety of personnel in the workplace, crime, and concerns regarding products, boilers, and machinery.

### Formerly

Created by the merger of National Board of Fire Underwriters, Association of Casualty and Surety Companies, and American Insurance Association (1964); became a subsidiary in 1984.

### Keywords

occupational safety; crime prevention; motor vehicle safety; fire protection; industrial hygiene; product safety; insurance; environmental science; safety; construction;

## AMERICAN IRON AND STEEL INSTITUTE

Milton Deaner, President

1133 15th Street, NW
Washington, DC.  20005
(202) 452-7100

Founded: 1855

### Type of Organization

Trade Association

### Standards Development

Standards Developer

### Standards Designation

Three design specifications

As a result of early standardization efforts of the Automobile Manufacturers Association at the beginning of this century and present work by the Society of Automotive Engineers and AISI, numerical designations of steels which only refer to chemical composition ranges and limits are often identified as AISI/SAE "Standard Steels."

84
Government Adoption

The design specifications are referred to in building codes and state and federal specifications for construction.

Secretariats

Scope

Activities include research, technology, and engineering, collection and dissemination of statistics, public distribution of information about the industry and its products, public affairs, and discussion of industrial relations including health, safety, and hygiene.

Standardization Activities

Developed and published design specifications for cold-formed steel structural members and for light-gage cold-formed stainless steel structural members.

Actively supports standardization activities through participation in the work of standards boards and committees of American National Standards Institute, American Society of Civil Engineers, American Society for Testing and Materials, National Fire Protection Association, and others.

Availability

Distributed directly and through IHS and Global

**AMERICAN LEATHER CHEMISTS ASSOCIATION**

Velma Becker, Executive Director
c/o University of CincinnatiML #14Cincinnati, Ohio 45221(513) 556-1197

**Type of Organization**
- Technical Society Standards Developer

**Standards Development**
- 150 standard test methods

**Scope**
Chemists, leather technologists, and educators concerned with the tanning and leather industry. Objectives are to devise and perfect methods for the analysis and testing of leathers and materials used in leather manufacture; to promote advancement of chemistry and other sciences in their application to leather related problems.

**Standardization Activities**
Maintains technical committees which develop methods of analyses and testing. Final methods published as the official methods of the association. Works with the American Society for Testing of Materials to coordinate physical test methods. Member of the International Union of Leather Chemists Society and participates in the development of methods for international use.

ALCA methods are incorporated in industry specifications. Members include representatives from government concerned with leather or leather products. Closely affiliated with the Leather Industries of America (formerly known as the Tanners Council of America).

**Keywords**
- leather; tanning; laboratory testing; materials;

| **Standards Development** | Sets the standards under which virtually all of the lumber in the United States and Canada is produced. |

| **Government Adoption** | Widely used by federal and local government agencies |
Scope
The licensing agent for all nine grading agencies and six rules writing agencies in the United States. Consists of 23 representatives and 23 alternate groups of lumber manufacturers, lumber inspection agencies, engineers, architects, contractors, home builders, wholesalers, retailers, millwork manufacturers, and other consumers, as well as five ex officio nonvoting government agency representatives appointed by the Secretary of Commerce.

Standardization Activities
Acts as the standing committee for the purpose of considering revisions or amendments to the National Institute of Standards and Technology Voluntary Product Standard 20-70. This standard provides classification of American standard lumber, grading standards and grademarking, size standards, nomenclature, definitions, and abbreviations. Elects a Board of Review and adopts policies used by the Board in carrying out its functions.

Principal functions of the Board are to review and approve rules submitted by agencies to assure they conform to the American Lumber Standards requirements; review and approve grading agencies; and to continuously review adequacy, competency and reliability of approved agencies.

AMERICAN MEDICAL ASSOCIATION

James H. Sammons, M.D., Executive Vice President
515 North State Street
Chicago, Illinois 60610
(312) 464-5000

Founded: 1846

Type of Organization
Professional Society
Standards Developer

Standards Development
Develops advisory standards
None processed through ANSI

Scope
A national organization of physicians whose objective are to foster the advancement of medical science, medical practice, and the public health.
**Standardization**

Develops advisory standards dealing with drug evaluation, diagnostic and therapeutic technology assessment, guides to the evaluation of physical impairment, physical fitness standards for industry, undergraduate medical education, hospital residency training programs, and continuing medical education. Maintains close liaison with the federal government in matters of drug nomenclature (through the United States Adopted Names Council), medical and device evaluation at the post-marketing level of surveillance, and other issues of a scientific nature that arise in the practice of medicine.

Issues reports relating to guidelines for the determination of permanent impairment, the frequency of medical examinations, and many other issues relative to the medical diagnosis and management of patient problems. Reports are adopted by the AMA House of Delegates if they are to be made AMA policy.

**AMERICAN NATIONAL METRIC COUNCIL**

James M. Meredith, President

1620 I Street, NW
Suite 220
Washington, DC 20006
(202) 857-0474 FAX: (202) 659-5427

Founded: 1973 Standards Staff: 1

**Type of Organization**

Trade Association

Works through other organizations to develop standards

**Scope**

A private, nonprofit organization dedicated to planning, coordinating, and facilitating voluntary metric transition activities in various sectors of the U.S. economy. A focal point for private sector metric transition planning activity and information.

Distributes information about metric activities in the United States, Canada, and around the world. Publishes a newsletter and special issue papers. Conducts conferences, seminars, and educational workshops.

**Standardization Activities**

Assists standards making bodies by identifying needs for standards in SI units, evaluating priorities, and making recommendations for standards development. Maintains several committees that affect
standardization activities. The Standards Task Group has identified the scope and criticality of standards issues and prepared a model chapter and checklist summarizing specific tasks that industry sector committees can incorporate in their metric plans.

**Keywords**
metric; measurement; international trade; manufacturing; business; general; defense;

**AMERICAN NATIONAL STANDARDS INSTITUTE**

Manuel Peralta, President

1430 Broadway
New York, New York 10018
(212) 354-3300

FAX: (212) 398-0023
Telex: 42 42 96 ANSI UI

Founded: 1918

Standards Staff: 110

**Type of Organization**

Standards coordinating and approval organization. The Institute does not develop standards. They are developed by qualified technical and professional societies, trade associations, and other groups which voluntarily submit them to ANSI for approval. U.S. member of nongovernmental international standards bodies.

**Standards Designations**

9,500 standards approved by ANSI are designated American National Standards.

**Government Adoption**

American National Standards are widely adopted and referenced by government at the federal, state, and local levels.

**Certification**

ANSI accredits certification programs sponsored and operated by competent organizations in the United States and represents U.S. interests in international non-treaty certification activities. It does not certify products and services.

**Scope**

250 professional and technical societies and trade associations that develop standards in the United states are members of ANSI; 1,100 companies are members.

ANSI performs the following major functions:

- coordinates the development of voluntary national standards in the United States;
- approves standards as American National Standards; manages and coordinates U.S. participation in nongovernmental international standards developing
organizations, such as the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC);
- serves as the U.S. source and information center for all American National Standards and those issued by ISO, IEC, and the national standards organizations of 69 other countries;
- maintains interface with government at all levels on standards-related matters.

Standardization Activities

Coordinates and harmonizes private sector standards activity in the United States. It assists participants in the voluntary standards system reach agreement on the needs for standards, encourages qualified organizations to develop them, and follows up on progress. It provides standards developers with procedures and services to use their resources effectively, avoid duplication of effort, and resolve conflicts.

Approval of American National Standards

Standards are approved by ANSI as American National Standards when it finds that its criteria for due process have been met and that a consensus for approval exists among those directly and materially affected.

International Management and Coordination

ANSI is the U.S. member of the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC). The Institute manages, coordinates, and provides financial and administrative support for U.S. participation in these two major nongovernmental standards developing bodies. With the support of its members and other cooperating bodies, the Institute participates in some 2,000 ISO technical committees and subgroups. It administers the secretariats of 13 ISO technical committees, 65 subcommittees, and 179 working groups.

It helps govern ISO through membership on its Council and Executive and Planning Committees. The U.S. National Committee of IEC, which is part of ANSI, participates in 90% of the International Electrotechnical Commission's technical program and is represented on IEC's policy making council and committees. It holds the secretariat of 11 IEC technical committees and 21 subcommittees.

Clearinghouse and Information Center

Serving as the clearinghouse and information center for
national, international, regional, and foreign national standards is another of ANSI's functions. The following are available from ANSI:

All 9,500 approved American National Standards
ISO and IEC International Standards
ISO Draft International Standards
IEC Six Months' Rule documents
CEN Proposals - Draft European Standards developed and issued for preliminary vote by the European Committee for Standardization (CEN)
Draft specifications of the Electronic Components Committee of CENELEC - the European Committee for Electrotechnical Standardization
Standards of 86 other national standards organizations that belong to ISO
Latest catalogs issued by ISO, IEC, and 69 members of ISO

Interface with government - Furnishes advice, counsel, and testimony to congressional committees and state and local legislative bodies. It encourages government agencies to participate in voluntary standards activities and to use voluntary standards, where appropriate. Close cooperative ties exist between ANSI and individual federal agencies. For example: the Department of Defense, General Services Administration, and National Institute of Standards and Technology are ANSI members. An ANSI-Consumer Products Safety Commission Coordinating Committee is working to enhance overall cooperation between CPSC and private sector organizations that develop standards for consumer products and services. An ANSI-OSHA (Occupational Safety and Health Administration) Coordinating Committee performs a similar function in the area of standards for industrial safety.

St. Louis, Missouri 63141
(314) 991-4100

Founded: 1898 Standards Staff: 2

Type of Organization
Professional Society
Works through other organizations to develop standards

Representation
ANSI, ASTM, ISO, IEC

Certification
Council On Optometric Education accredits and certifies schools and colleges of optometry in United States and Canada. Council On Clinical Optometric Care accredits optometric clinical facilities.

Scope
A nonprofit corporation representing doctors of optometry and students of optometry. A federation of associations representing each of the fifty state, the District of Columbia, and doctors of optometry in the armed forces. Objectives are to improve the vision care and health of the public and to promote the art and science of the profession of optometry.

Standardization Activities
The Commission On Ophthalmic Standards serves as the coordinating body for AOA's activities with private and governmental groups in the development of standards and
policies related to the quality of ophthalmic materials, instrumentation and procedures.

The Council On Optometric Education is the accrediting body for schools and colleges of optometry, as recognized by the U. S. Department of Education and the Council on Postsecondary Accreditation.

The Council On Clinical Optometric Care evaluates and accredits the quality of vision care for optometric clinical facilities.

Ronald J. Slinn, Vice President
Standards and Metrics Department
260 Madison Avenue
New York, New York 10016
(212) 340-0680 FAX: (212) 689-2628

**Founded:** 1966

**Type of Organization**
Trade Association
Works through other organizations to develop standards

**Representation**
ISO, TAPPI, ASTM, GSA

**Secretariats**
U.S. TAG to ISO/TC 6, Paper, Board and Pulps

**Scope**
The national trade association of 170 companies that manufacture pulp, paper, and paperboard in the United States.

**Standardization Activities**
Standards for testing certain physical characteristics such as bursting strength, tear, brightness, opacity, etc., have been developed for many grades of paper. These domestic specifications are officially published by the Technical Association of the Pulp and Paper Industry. Standard gauge lists for combination paperboard were revised effective January 1969 and adopted by members of the Combination Paperboard Division of the API Paperboard Group.

The Dictionary of Paper, fourth edition 1980, contains nearly 500 pages of concise descriptions of pulp and other raw papermaking materials, papers, paperboards, paper properties and papermaking terms. The contents
afford considerable guidance in the appraisal of paper grades, specifications, or nomenclature standards.

Formerly
Several independent trade associations prior to 1965

pulp; paper; paperboard;

AMERICAN PAPER MACHINERY ASSOCIATION

Frank McManus, Executive Director

5313 38th Street, NW
Washington, DC  20015
(202) 362-6034       FAX: (202) 244-7752

Founded: 1933

Type of Organization
Trade Association

Scope
Works through other organizations to develop standards

Membership consists of the manufacturers of pulp and paper machinery.

Standardization Activities
Participates in the ANSI standards process and programs of the American Paper Institute, TAPPI and others. Currently considering the establishment of a project to develop a voluntary standard.

Formerly
Pulp and Paper Machinery Manufacturers Association

Keywords
paper; machinery;

AMERICAN PETROLEUM INSTITUTE

C. Thomas Sawyer, Vice President, Industry Affairs

1220 L Street, NW
Washington, DC  20005
(202) 682-8000
| **Type of Organization** | Trade Association  
Standards Developer |
|--------------------------|------------------|
| **Standards Development** | Standards developer since 1919  
880 active standards  
100 industry committees and 1,500 people active in standards activities  
15 percent of API standards processed through ANSI  
5 percent published jointly with ASTM |
| **Standards Designations** | API standards are called standards, recommended practices, publications, bulletins, guidelines, and specifications. |
| **Government Adoption** | Department of Transportation, Department of Defense, Occupational Safety and Health Administration, U.S. Customs Service, the Environmental Protection Agency, U.S. Geological Survey. |
| **Certification** | API issues a monogram to those production field equipment manufacturers who produce equipment according to API standards. API also licenses companies to use API specifications on their motor oils if they meet API specifications. |
| **Secretariats** | ISO/TC 67/SC 9, Wellhead Equipment and Pipeline Valves  
ASTM D2, Petroleum Products and Lubricants  
API/ASTM, Joint Committee on Static Petroleum Measurement |
| **Scope** | A national association encompassing all branches of the petroleum industry and composed of over 200 companies. |
| **Standardization** | Activities directed toward fulfilling user-defined requirements of the industry and its customers. The Industry Affairs group produces standards in the area of transportation, marketing, production, refining,
measurement, marketing, production, refining, measurement, safety and fire protection. Maintains liaison with other standardization bodies. Standards are primarily performance oriented with some design and process specifications where appropriate. Standards used worldwide and offered for adoption to the International Organization of Legal Metrology and the International Organization for Standardization.

AMERICAN PHARMACEUTICAL ASSOCIATION

John A. Gans, Pharm. D., Executive Vice President

2215 Constitution Avenue, NW
Washington, DC 20037
(202) 628-4410

Founded: 1852

Type of Organization
Professional Society
Standards Developer

Scope
A national professional society with 37,000 individual pharmacists and pharmaceutical scientists in the United States. Concerns itself with matters affecting the professional, technical, legal, and scientific aspects of the practice of pharmacy.

Standardization Activities
Primary standardization programs pertain to standards of practice for the profession of pharmacy. Responsible for the pharmacy profession's code of ethics. Through its Board of Pharmaceutical Specialties, establishes criteria for specialization and certification of specialists within pharmacy. Participates jointly with other organizations in sponsoring and conducting a program known as the United States Adopted Names Council (USAN), for the establishment of standardized nonproprietary nomenclature for drugs. Through USAN, APA is involved with the World Health Organization in developing international nomenclature for the naming of drugs. Also participates in programs of the Pan-American Health Organization and the Federation International Pharmaceutique. Maintains contact with the Food and Drug Administration; the Treasury Department, Alcohol and Tobacco Division; the Social Security Administration, Medicare Division; and the Justice Department, Drug Enforcement Administration.

Standards Developer
Eleven active standards
None processed through ANSI
Draft standards available for review by members and others at discretion of APA

PS 1 adopted by all government agencies. Other APA standards recognized by most federal, state and local jurisdictions.

Secretariat for NIST Industry Standards Committee organized to maintain Voluntary Product Standard PS 1.

A nonprofit industry trade association engaged in advertising, promotion, quality testing and inspection, product and applied research, and codes and standards activities. Membership consists of mills involved in the manufacture of plywood and other structural-use panels, and of structural composite lumber.

APA standardization activities are administered by the Technical Services Division and encompass engineering design, manufacture, and application of plywood and other structural-use panels produced by its members. Standards are submitted for reference and adoption in building codes and other construction standards.

Leader in the development of performance criteria for qualification of structural panels in accordance with their end use, administered through performance standards and policies.

Cooperates with the Department of Commerce, National Institute of Standards and Technology; the Department of Housing and Urban Development; Federal Housing Administration, Department of Transportation; Department of Defense; National Institute of Building Sciences; and the General Services Administration. Also participates on committees of the American Society for Testing and Materials.

AMERICAN PODIATRIC MEDICAL ASSOCIATION

Dr. Jay Levrio, Director

Council on Podiatric Medical Eduction
9312 Old Georgetown Road
Bethesda, Maryland 20814-1621
(301) 572-9200

Founded: 1912

Type of Organization
Professional Society

Certification
The American Podiatric Medical Association's Council on Podiatric Medical Education is the accrediting body for podiatric medical education recognized as such by the U.S. Department of Education and the Council on Postsecondary Accreditation.

Scope
A voluntary, nonprofit corporation which promotes the art and science of podiatric medicine and the betterment of public health.

Standardization Activities
Maintains standards and accrediting procedures for educational programs by publishing documents for each activity of accrediting or approval. Accredits colleges of podiatric medicine and podiatric assistants training programs. Approves podiatric medical residency programs and continuing medical educational programs. Recognizes specialty boards in specific fields of podiatric medicine.

The Council's standards are subject to the approval of the House of Delegates of the American Podiatric Medical Association.

Standards Developer

Scope
A medical specialty organization which furthers the study of the nature, treatment, and prevention of mental disorders; develops standards for psychiatric facilities; disseminates information and promotes psychiatric education.

Standardization Activities
Actively participates in development of standard classification for mental illness and the Diagnostic and Statistical Manual for Mental Disorders, published by the APA, and used throughout the world. Serves as consultant to the World Health Organization on the publication, International Classification of Diseases.

Joins with the AMA Council on Medical Education and the Residency Review Committee for Psychiatry in establishing standards for approval of residency training programs in psychiatry and is a member organization of the American Board of Psychiatry and Neurology which gives examinations to certify physicians as qualified in psychiatry. Is represented on the Professional and Technical Advisory Committees for Psychiatric Facilities, the Hospital Accreditation Program, Long Term Care Program and Ambulatory Services Care Program of the Joint Commission on Accreditation of Healthcare Organizations.

Activities are conducted through the APA Council on Medical Education; the Council on Economic Affairs and its Committees on Hospital Based/Relates Psychiatric Services; and the Council on Research and Development and its Task Force on Diagnostic and Statistical Manual IV.

### American Psychoanalytic Association

Helen Fischer, Administrative Director

309 East 49th Street  
New York, New York 10017  
(212) 752-0450

**Founded:** 1911  
**Standards Staff:** 4

| **Type of Organization** | Professional Society  
| **Standards Development** | Standards developer since 1911  
| **Certification** | Certification in Adult and Child and Adolescent Psychoanalysis.  
Accreditation program for training institutions.

**Scope**  
A national membership organization of medical psychoanalysts. Studies and advances psychoanalysis; advocates and maintains standards for the training of psychoanalysts and for the practice of psychoanalysis; fosters the integration of psychoanalysis with other branches of medicine and encourages research in all fields having to do with the scientific knowledge and welfare of man.

**Standardization Activities**  
Maintains Board of Professional Standards with eight standards setting committees. Conducts site visits in conjunction with accreditation activities of new training facilities. Certifies graduates of accredited Institutes.

---

106
Scope
Professional organization of public health officials and practitioners which seeks to protect and promote personal and environmental health. Promulgates standards, establishes uniform practices and procedures, develops etiology of communication and performs research in public health related topics.

Standardization Activities
Develops standards of procedures, personnel qualifications, and practice. Publishes and updates Standard Methods for the Examination of Dairy Products; Standard Methods for the Examination of Water and Wastewater; and Standards for Healthful Housing. Publishes other works where standards are included, for example, Suggested Ordinance and Recommendations Covering Public Swimming Pools. Also publishes standard methods for the Microbiological Examination of Ambient Air. APHA is presently developing guidelines for medical experimentation on captive populations.

Represented on various boards of the American National Standards Institute (ANSI) and cosponsors Sectional Committee A40 on Minimum Requirements for Plumbing. APHA's Committee on Professional Education has developed a series of education qualifications for public health workers, as well as standards of accreditation for schools of public health. AOSH committees also develop publications on such subjects as TB control, radiological health and chronic disease which serve as guides for practitioners, scientists, technologists, administrators, and others concerned with public health problems.

**AMERICAN ROAD AND TRANSPORTATION BUILDERS ASSOCIATION**

T. Peter Ruane, President and CEO

Eighth Floor
501 School Street, SW
Washington, DC 20024
(202) 488-2722 FAX: (202) 488-3631

Founded: 1902

**Type of Organization** | Trade Association Standards Developer |

109
Scope

Fosters and encourages the full utilization of scientific and educational measures toward the accomplishment of an integrated national highway, airport, and urban public transportation system adequate to accommodate the growth and advancement of transportation necessary for the civil economy and the national defense.

Membership includes federal, state, county and city highway engineers and administrators, as well as consulting engineers, highway contractors, producers of highway materials, manufacturers and distributors of highway machinery, and educators in civil engineering colleges and universities.

Standardization Activities

Committees study problems relating to highway legislation, finance, design, construction, maintenance, equipment, and operation. Efforts are directed toward development of improved standards to bring about utilization of new materials and eliminate waste and improper methods.

Cooperates with other associations in joint activities. Publishes bulletins dealing with practical application of technical and semi-technical developments.

AMERICAN SOCIETY FOR ARTIFICIAL INTERNAL ORGANS

Karen Burke, Executive Director

National Office
P.O. Box C
Boca Raton, Florida 33429
(407) 391-8589

Founded: 1955

Type of Organization

Scientific Society

Works through other organizations to develop standards

Representation

The ASAIO Renal Disease and Detoxification Committee works in collaboration with its counterpart in AAMI. The society is also represented on the Medical Devices Standards Board of ANSI. Members are called upon to contribute to the FDA activities in medical device
regulation, such as the Cardiovascular and Gastroenterology-Urology Medical Device Classification Panels. Internationally, members represent the United States on ISO/TC 150 SC2: Surgical Implants and Artificial Organs (Cardiac Valves, Pacemakers, Vascular Prostheses, Blood Gas Exchangers and Hemodialysis). Additionally, members contribute to the development of IEC document TC 62D: Hemodialysis Equipment.

Scope

An organization which promotes the development and safe usage of artificial internal organs, with 1,400 members from both medical and engineering specialties. At the present time approximately two-thirds of the activities are in the fields of artificial kidneys and artificial hearts. The remainder are devoted to innovations in other areas, such as plasmapheresis and artificial organs for liver failure, diabetes mellitus and disorders of the genitourinary tract.

Standardization

Members are active in the development of a voluntary medical device standards and guidelines for the user through a variety of mechanisms, including consensus symposia, investigation into the risks and hazards of medical devices, and contributions to the efforts of standards making organizations. Standards committees of the Society are appointed by the President. The Renal Diseases and Detoxification Committee meets annually; members of this committee are also members of the AAMI Committee in this field. Resulting standards are subjected to the review of processes of AAMI and ANSI.

**Type of Organization**

Professional Society

**Standards Developer**

**Scope**

A national professional organization composed of 20,000 members committed to providing efficient health care, quality service and accurate information/test results cost effectively to the public. Also committed to providing proper educational training to future clinicians as well as continuing education to clinical laboratory professionals/educators.

**Standardization Activities**

Standards for day to day practice are covered in ASMT's competence assurance documents, which undergo regular review for continued relevancy; ASMT's position papers; and National Committee for Clinical Laboratory Standards (NCCLS) specifications for biology and chemistry reagents or reference materials, controls for equipment, etc.

Works with the Food and Drug Administration in conducting a pilot project for surveillance of products used in clinical laboratories.

A member of the Medical Device Technical Advisory Board of the American National Standards Institute.

Cooperates with NCCLS and the International Association of Medical Laboratory Technologists in the development of international standards.

Standards Designation
ASTM

Government Adoption
The Department of Defense has adopted 2,000 standards.
Local building codes reference 600. The following agencies also have adopted ASTM Standards: General Services Administration, Public Building Service; Department of Veterans Affairs; Environmental Protection Agency; Food and Drug Administration; Occupational Safety and Health Administration; National Institute of Occupational Health and Safety; Department of Energy; Department of Housing and Urban Development; Department of Agriculture; and Department of Transportation.

Certification
No certification, qualification, or accreditation programs

Scope
A nonprofit organization formed to develop standards on characteristics and performance of materials, products, systems, and services; and to promote related knowledge. Standards include classifications, guides, practices, specifications, terminology, and test methods.

Standardization Activities
Standards cover iron and steel products; nonferrous metal products; metal test methods and analytical procedures; construction; petroleum products; lubricants and fossil fuels; paints; related coatings, and aromatics; textiles; plastics; rubber; electrical insulation and electronics; water and environmental technology; nuclear, solar, and geothermal energy;
medical devices; general methods and instrumentation, general products, chemical specialties, and end use products.

Standard developed by the Society's committees are published in the 68 volume Annual Book of ASTM Standards. Hundreds of technical papers and reports presented at ASTM symposia and meetings are published in Special Technical Publications, the Society's monthly magazine "Standardization News," and in quarterly publications. All are distributed worldwide.

ASTM standards are developed by those having expertise in the specific areas who choose, voluntarily, to work with the ASTM system—producers, users, ultimate consumers, and representatives of government and academia. ASTM provides a forum within which these people can meet on a common ground to write standards that will best meet the needs of all the interested parties. The ASTM system adheres to the principles of due process, assuring equal access to and equal voice in the standards forum.

Draft standard undergo an exhaustive balloting process from the subcommittee, to main committee, and to the entire Society -- with careful attention paid to minority opinions at each balloting level -- before they are published as official ASTM standards.

Availability
Distributed directly and through IHS, Global, and NSA

AMERICAN SOCIETY OF ANESTHESIOLOGISTS

Glenn W. Johnson, Executive Director

515 Busse Highway
Park Ridge, Illinois 60068
(312) 825-5586

Founded: 1905

Type of Organization
Professional Society

Works through other organizations to develop standards

Representation
Individual members participate in standardization activities of ANSI, ASTM, ISO, and NFPA.

Scope
A national medical society composed of over 26,000 members, most of whom are physicians specializing in the practice of the medical specialty of anesthesiology. Among its purposes is to "raise the standards of the specialty by fostering and encouraging education, research and scientific progress in anesthesiology" and to disseminate information concerning the specialty.

Standardization Activities
The society works within the voluntary standards system to present the views of anesthesiologists on matters relating to the agents, devices, and facilities they use in their practices. Its Committee on Equipment and Standards deals with mechanical, electrical, and structural matters as they relate to anesthesiology. This committee is charged with the duties of representing the society in activities related to standards development and supervising and coordinating liaison activities to organizations such as ANSI, ASTM, ISO, NFPA, and other professional and technical bodies in the medical field.

The committee on Equipment and Standards maintains liaison with the standardization work of other professional and technical bodies in the medical field. While previously active in ANSI Committee Z79, Standards for Anesthesia and Respiratory Equipment, ASA currently participates in ASTM Committee F29.

Type of Organization: Professional Society
Standards Development: 200 standard methods of analysis
Standards Designations: ASBC Method
Certification: Check Sample services provide the opportunity for subscribing laboratories to check their analytical accuracy on a periodic basis. For each service, a statistical summary of the analytical data is provided for use as an internal check. Check Sample services include Malt Analysis, Cereal Adjunct, Beer Analysis, and Hop Analysis. Another service available is Malt for Standardizing Mills. Standards malt is used to insure reliable milling and grinding samples for industry-wide analysis. The Soluble Starch service provides a special starch product available only to ASBC members, and is lot-checked by ASBC.
Scope: 750 members worldwide engaged in all aspects of brewing. Maintains high professional standards; conducts, promotes, and encourages scientific research in brewing and related industries; studies, develops, and adopts uniform methods for the analysis of raw materials, supplies, and products; holds meetings and disseminates technical knowledge.
Standardization Activities: Publishes ASBC Methods of Analysis which contain 200 official ASBC methods relating to brewing chemistry. Also has available Tables for Extract in Malt and Cereals, and Tables related to Wort, Beer, Brewing Sugars and Syrups.
Availability: Sold directly
Keywords: beer; beverages; testing;
AMERICAN SOCIETY OF CINEMATOGRAPHERS

Dan Ross, Chief Executive Officer

1782 North Orange Drive
Hollywood, California 90028
(213) 876-5080

Founded: 1919 Standards Staff: 1

Type of Organization
Professional Society
Standards Developer

Scope
Professional directors of motion picture and television photography and others affiliated with cinematography.

Standardization Activities
Offers recommendations to the Engineering Committee of the Society of Motion Picture and Television Engineers. Processes standards through ANSI PH22. Publishes the American Cinematographer Manual which lists standards.

cinematography; photography;

AMERICAN SOCIETY OF CIVIL ENGINEERS

Edwin Jones, Director, Codes and Standards

345 East 47th Street
New York, New York 10017
(212) 705-7252

Founded: 1852 Standards Staff: 1

Type of Organization
Technical Society
Standards Developer

Standards Development
Standards developer form 1875-1895 and 1974-present
600 members and non-members participating in standards activities

Standards Designation
ASCE prefix

Certification
No certification, qualification, or accreditation programs

Scope
A 105,000 member organization for civil engineers in the United States dedicated to the civil engineering profession, offering opportunities for individual
professional development and providing a forum for communication between individuals and groups involved in the practice of civil engineering.

**Standardization Activities**

Maintains activities in the following areas: Composite Deck Slab Standards; Steel Deck and Concrete Diaphragm Standard; Pile Foundation Standard; Drilled Shafts Standard; Temporary Excavations, Construction Dewatering and Underpinning Standard; Soil Exploration Standard; Shallow Foundations Standard; Design and Analysis of Nuclear Safety Related Earth Structures Standard; Seismic Analysis of Safety Related Nuclear Structures Standard; Oxygen Transfer Standard; Structural Applications of Steel Cables for Buildings Standard; Structural Condition Assessment of Existing Buildings Standard; Transmission Structure Foundation Design Standard; Minimum Design Loads for Buildings and Other Structures Standard (formerly ANSI A58.1); Masonry Structures Standards (joint with American Concrete Institute)Urban Subsurface Drainage Standards; Design of Steel Transmission Towers Standard; Inspection of Small Dams Standard; Permanent Railing Systems Standards; Stainless Steel Cold-Formed Sections Standards; Design of Air Supported Structures Standard; Design Loads on Structures During Construction Standard; Design of Engineered Wood Construction Standard; Design of Structures for Fire Protection Standard; Guidelines for Artificial Ground Water Recharge Standard. Technical and Task Committees seek to advance knowledge in specific engineering areas, focusing on relevant problems and concerns, by publishing standards, manuals, guides, reports, proceedings, and by conducting conferences and workshops.

**Availability Keywords**

Distributed directly and through ANSI, Global, and IHS civil engineering; decks; slabs; structures; oxygen transfer; foundations; nuclear safety; building; construction;

**AMERICAN SOCIETY OF HEATING, REFRIGERATING AND AIR-CONDITIONING ENGINEERS**

Jim L. Heldenbrand, Manager of Standards

1791 Tullie Circle NE  
Atlanta, Georgia 30329  
(404) 636-8400

**Type of Organization**  
Technical Society  
Standards Developer

**Standards Development**  
Standards developer since 1959  
Over 400 members and non-members participating in standards activities  
Most standard processed through ANSI  
Draft standards available for review  
69 active standards

**Standards Designation**  
ASHRAE prefix
ASHRAE Standard 90, Energy Conservation in New Building Design, serves as the basis for building code provisions in 47 states.

No certification, qualification, or accreditation programs

U.S. Technical Advisory Group for ISO/TC 8.6, Refrigeration
ISO/TC 86, Subcommittees 1, Safety; 6, Factory Assembled Units; and 8, Refrigerants and Lubricants
ISO/TC 117, Subcommittee 2, Industrial Fans
ISO/TC 144, Subcommittee 1, Air Distribution and Diffusion

An international membership organization operated for the exclusive purpose of advancing the arts and sciences of heating, refrigeration, air conditioning and ventilation, the allied arts and sciences, and related human factors for the benefit of the public.

Assists industry and the public by offering a uniform method of testing for rating purposes, and by suggesting safe practices in designating and installing equipment, by providing proper definitions of this equipment and by providing other information which may serve to guide the industry. Creation of standards is determined by need, and conformance to them is completely voluntary.

Maintains 60 active standards committees, supported by a staff organization administered by the Manager of Standards. Continuously promulgates new standards and reviews current standards to reflect technical advances in the field.

A series of standards pertaining to energy conservation in existing building is in preparation. Other standards specify methods of testing for rating equipment, ventilation levels for indoor air quality, and conditions for indoor comfort.

Sold directly and through ANSI, IHS, and Global

Merger of American Society of Heating and Air-Conditioning Engineers and the American Society of Refrigerating Engineers (1959)

heating; refrigeration; air conditioning; ventilation; energy conservation; environmental quality; construction; building;
## AMERICAN SOCIETY OF MECHANICAL ENGINEERS

Melvin R. Green, Associate Executive Director, Codes and Standards

345 East 47th Street  
New York, New York 10017  
(212) 705-7822  
Telex: 710-581-5267

Founded: 1880  
Standards Staff: 74

### Type of Organization
Technical Society  
Standards Developer

### Standards Development
600 active standards  
Nearly all processed through ANSI  
More than 120 standards committees and 6,000 individuals develop and maintain these standards.

### Government Adoption
120 standards have been adopted by the Department of Defense (DoD). Many others have been adopted by the Coast Guard and one by the Nuclear Regulatory Commission. The Boiler and Pressure Vessel Code has been widely adopted by responsible state and provincial agencies in the U.S. and Canada.

### Certification
ASME operates accreditation programs in connection with its activity for boilers and boiler code pressure vessels, for nuclear plant components, and safety and pollution prevention equipment used in offshore oil and gas operations. The society authorizes manufacturers to apply ASME Code Symbol Stamps to their product, indicating compliance with the respective code or standard. The society also administers Certification Programs relating to Elevator Inspections and Resource Recovery Facility Operators.

### Scope
An educational and scientific society organized to promote the art and science of mechanical engineering and the allied arts and sciences; encourage original research; foster engineering; promote the exchange of information of engineers among themselves and with allied technologists; broaden the usefulness of the engineering profession in cooperation with other engineering and technical societies; and promote a high level of ethical practice.

### Standardization Activities
Standards development is an important part of the society’s activity to promote the art and science of mechanical engineering. The ASME Council on Codes and Standards supervises the standardization activities of the society under the authority delegated to it by the ASME Board of Governors. Standards are developed under ANSI Accredited Organization Procedures. Documents
presented to the Society under the ANSI Canvass Method, where ASME has a Standards Committee whose scope covers that of the proposed standard, are reviewed by the appropriate committee.

Participates actively in international standardization through its sponsorship of ASME Committees, which serve as the USA Technical Advisory Groups for the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC).

The Boiler and Pressure Vessel Code is ASME's most widely recognized standards publication. It is a definitive compilation of safety and performance requirements for power and heating boilers, nuclear reactors and power plants, as well as pressure vessels. The Performance Test Codes define accepted methods of determining performance and efficiency for a wide range of equipment and systems, from safety valves and gas turbines to fuels, incinerators, and centrifugal pumps. Many other fields have benefitted from ASME standards and codes. These include drafting practices and symbols, screw threads, bolts, nuts, rivets, and other fasteners in conventional and metric measure; machine tools, cutters and accessories; valves, pipe fittings, and plumbing fixtures; cranes, conveyors, and related equipment; and safety codes for elevators and escalators.

abbreviations; accreditation; boiler code; cranes; drafting practices; elevators; fasteners; freight containers; hand tools; industrial trucks; machine tools; machinery; nuclear; mechanical; plumbing; pollution prevention; pressure piping; pressure vessels; qualification; quality assurance; safety; solar energy; industrial equipment; valves;

AMERICAN SOCIETY OF PLUMBING ENGINEERS

John S. Shaw, CAE, Executive Director

3617 Thousand Oaks Boulevard
#210
Westlake, California 91362
(805) 495-7120

Founded: 1964

Type of Organization

Technical Society

Works through other organizations to develop standards
### Representation
National Standards Plumbing Code Committee of the National Association of Plumbing-Heating-Cooling Contractors, the American National Standards Institute (ANSI), the American National Standards Committee A40, International Association of Plumbing and Mechanical Officials (IAPMO), Southern Building Code Congress, International (SBCCI), and the American Society of Sanitary Engineers (ASSE), and on local code and administrative authorities.

### Scope
A nonprofit professional technical society organized to elevate the field of plumbing to professional status. The only international organization devoted exclusively to the interests and concerns of plumbing engineering.

### Standardization Activities
Although ASPE does not publish standards, it is engaged in the important work of advising builders, architects, and property owners in the value, to them and to their projects, of well conceived, carefully prepared plumbing drawings and clear, concise specifications.

ASPE's code committee examines all regulatory codes pertaining to the plumbing industry; submits proposed revisions or clarifications of codes to code writing authorities in an effort to simplify, standardize, and modernize all codes; and offers advisory services to other organizations or to governmental agencies involved in writing or enacting codes.

### Keywords
plumbing; codes; sanitation; building;

### AMERICAN SOCIETY OF SAFETY ENGINEERS

Thomas F. Bresnahan, Director, Technical Services

1800 East Oakton Street
Des Plaines, Illinois 60018-2187

(312) 692-4121

Founded: 1911

### Type of Organization
Professional Society

Standards Developer and works through other organizations to develop standards

### Secretariats
ANSI Z87, Eye Protection; Z117, Confined Spaces; Z359, Fall Protection Equipment; A12/64, Workplace, Railings and Stairways
Scope
Composed of 23,000 career safety specialists organized to enhance the status and promote the advancement of all safety disciplines; foster the technical, scientific and managerial knowledge and skills of all safety and health professionals; and support the technical, social, and economic well-being of all safety practitioners.

Standardization Activities
The ASSE currently serves as secretariat to four ASSE accredited national standards committees for Eye Protection (Z87), Confined Spaces (Z117), Workplace, railings and stairways (A12/64), and Fall Protection Equipment (Z359). In addition, the Society appoints its safety professionals to various ANSI, NFPA, and other national standards writing organizations. It also participates on other standards making committees of other organizations where representation of the profession is appropriate. Recommendations of society members are offered to various governmental agencies when establishing advisory standards committees.

AMERICAN SOCIETY OF SANITARY ENGINEERING

Gael H. Dunn, Executive Secretary
P.O. Box 40362
Bay Village, Ohio 44140
(216) 835-3040

Founded: 1906

Type of Organization
Technical Society Standards Developer

Standards Development
34 active standards Standards submitted for ANSI approval

Standards Designation
ASSE prefix

Government Adoption
Standards are referenced by a large number of government agencies.

Certification
ASSE Seal Program

Scope
Plumbers, contractors, apprentices, journeymen, inspectors, engineers, health officials, and
manufacturers interested in promoting public health and sanitation. Conducts research on plumbing and sanitation.

**Standardization Activities**
Develops performance standards for plumbing system components. Standards provide a tool for measuring quality and effectiveness of a product. Products meeting these standards are identified by the ASSE Seal. Components of plumbing systems include backflow prevention devices, pressure regulators, water hammer arresters, water mixing and shower control valves, anti-siphon hydrants, and other devices which directly affect public health and safety.

**Availability**
Distributed directly and through IHS

Certification ASHA is the accrediting agency for college and university programs offering master's degrees in speech-language pathology and audiology and for programs offering clinical services in speech-language pathology and audiology to the public.

Scope A national professional and scientific association representing over 60,000 speech-language pathologists and audiologists engaged in research, teaching, and clinical activities concerned with communication behavior and disorders. Maintains high standards of clinical competence for professionals providing
services to the public; encourages the development of comprehensive clinical service programs; promotes investigation of human communication and its disorders; and stimulates exchange of information about human communication.

**Standardization Activities**

Directed toward assuring quality of the speech-language pathology and audiology services provided to communicatively impaired persons. Develops standards for appropriate education and training of speech-language pathologists and audiologists. Accredits professional clinical service programs in speech-language pathology and audiology which meet criteria on organizational structure, quality service with functional, measurable outcomes, personnel, records, physical plant and equipment, community relations, and program evaluation. Incorporates ANSI standards on electroacoustic measurements of hearing aids; on permissible ambient noise during audiometric testing; and on calibration of audiometric equipment into Professional Services Board (PSB) clinical accreditation standards.

Maintains council on Professional standards which establishes and monitors all standards programs related to certification, continuing education, education and training, and professional services. Reviews and comments on standards proposed by ANSI that pertain to electro- and bioacoustic characteristics of audiometric equipment, hearing aids, and environments for hearing testing.

Standards are recognized by the Council of Postsecondary Accreditation, U.S. Department of Education, Joint Commission on Accreditation of Health Organizations, National Easter Seal Society, Council of State Administrators of Vocational rehabilitation and Commission on Accreditation of Rehabilitation Facilities.

AMERICAN SPICE TRADE ASSOCIATION

Thomas F. Burns, Executive Vice President
580 Sylvan Avenue
P.O. Box 1267
Englewood Cliffs, New Jersey 07632
(201) 568-2163

Founded: 1907

Type of Organization
Trade Association

Standards Designation
Official methods

Scope
Importers, grinders, and distributors of spices, oleo resins, and dehydrated vegetable seasonings.

Standardization Activities
Maintains a Standards Committee whose function is to adopt standards of quality for whole spices, seeds, and herbs imported at American ports of entry. Also, through the ASTA's Research Committee, in cooperation with RESEARCH 900, developed the values of the base nutrient composition of spices including ash, fat, fiber, moisture, protein, calories, and vitamin content. Cooperated with the Wisconsin Alumni Research Foundation to develop the content of twenty-one mineral elements in spices.

Developed a publication, Official Analytical Methods, for Analyzing spices. Also developed a publication, Official Microbiological Methods, which aims to designate official methods for the detection and enumeration of microorganisms occurring on spices, seeds, and herbs and to provide helpful information and guidelines to those responsible for the assessment of microbiological quality of spices and seasonings.

AMERICAN STATISTICAL ASSOCIATION

Barbara A. Bailar, Executive Director
1429 Duke Street
Alexandria, Virginia 22314
(703) 684-1221

Founded: 1839
### Type of Organization
Scientific/Professional Society

### Representation
Works through other organizations to develop standards

### Scope
Composed of persons interested in applied or theoretical statistics. Through the Association, members mutually help each other with the exchange of professional knowledge and the reporting of new developments, insuring that statistical techniques discovered in one field are made known to workers in others. Includes users of statistics in business and industry, finance, agriculture, biology, medicine and public health; in virtually all specialized fields of science, education, engineering, economics, sociology, and demography; and in clinical statistics, military science, pharmacology, nutrition, public opinion polling, market analysis, psychometrics, biometrics, mathematical statistics, quality control, operations research, and many other fields.

### Standardization Activities
While ASA does not set or promulgate official standards it does work to improve standards in statistical presentation. This is accomplished by participating in the development of American National Standards and ASTM standards for analyzing test data, assessment of normality and related subjects. Reviews and comments on ISO draft standards dealing with statistics.

### Keywords
statistics; biometrics; biopharmaceutical; business; economics; testing; quality assurance; data processing;

1740 Broadway, 16th Floor
New York, New York 10019-4394
(212) 315-8778
FAX: (212) 765-7876

**Type of Organization**
Professional Society
Standards Developer

**Standards Development**
Standards developed in areas of pulmonary medicine, environmental health, infectious disease control, respiratory therapy, and medical devices. Standards not processed through ANSI. Draft standards available for review to members.

**Government Adoption**
Standards related to the treatment and control of tuberculosis are developed jointly with the Centers for Disease Control of the U.S. Public Health Service.

**Certification**
No certification or accreditation programs.

**Scope**
A professional society dedicated to the prevention and control of lung disease, and works to provide optimal health care services for individuals with lung disease. Emphasizes research and professional education. Serves as the medical section of the American Lung Association. Provides a forum for review of issues related to all aspects of lung health and the development of programs for the control of lung disease. Functions on a national level through cooperation with federal agencies and national voluntary health organizations.

**Standardization Activities**
Develops standards and classifications for tuberculosis and other respiratory diseases. Provides standards for spirometers which are adhered to by all product manufacturers. Standards developed by the Society are incorporated into accreditation programs for health care institutions. Maintains close liaison with
various government agencies primarily the Department of Health and Human Services. Acts as an advisor to federal agencies in their development of regulations and standards.

Availability
Distributed directly and through state and local affiliates of the American Lung Association.

Formerly
National Tuberculosis Association/American Trudeau Society (1960)

(513) 661-3838

Founded: 1960

Type of Organization
Technical Society

Standards Developer

Certification
Program includes examinations for certified watchmakers and master certified watchmakers. Also participates in state licensing.

Scope
A nonprofit corporation dedicated to the advancement of horology. Six thousand watchmakers and others who sell, service, or collect horological items. Activities include technical bulletins, a certification program, professional seminars, a monthly magazine, technical library, lending library and museum.

Standardization Activities
Involved in standards of craftsmanship through the dissemination of technical bulletins, and certification examinations. Aims to standardize the technical teaching techniques in the United States through its Education committee which operates through the schools.
Participated in the American National Standards Institute's program on the Standardization of Corundum Bearings in Horology, reviewed standards on chronometers for the U.S. Army, and reviewed railroad time standards for the National Institute of Standards and Technology. Worked with the British Horological Society to determine the proper placement of jewels in a 17 jewel watch.

**Availability**  
Distributed directly

**Formerly**  
Merger of Horological Institute of America and the United Horological Association of America.

**Keywords**

**Type of Organization**  
Scientific Society  
Standards Developer

**Standards Development**  
Standards developer since 1890  
102 active voluntary consensus standards  
All processed through ANSI  
22 standards under development  
1,100 members active in standards activities

**Standards Designations**  
AWWA or ANSI prefixes

**Government Adoption**  
The Department of Defense (DoD) has adopted 16 AWWA standards.

**Secretariats**  

**Scope**  
Represents its 48,000 members in all areas concerning water supply. 2,000 volunteers participate in the development of technical documents. Holds three annual conferences as well as other special conferences each year. Publishes a monthly technical journal, news magazine, and publication for water system operating personnel.
**Standardization Activities**

Develops standards for a variety of pipe, fittings, valves, wells, pumps, water treatment chemicals, water storage tanks, water meters, and procedures for installation and use of these products. Solicits both membership and public approval in formulating standards. Use of standards is voluntary.

Standard Methods for the Examination of Water and Wastewater, a compilation of 190 laboratory tests, is published jointly by AWWA, The American Public Health Association and the Water Pollution Control Federation. Developed ANSI standards A21.52 (Standard for Ductile Iron Pipe) and A21.14 (Fittings) - these were published by the American Gas Association (AGA).

**Type of Organization**

Technical Society

**Standards Development**

Developing welding standards since 1928  
1,200 members participating in standards activities, including representation on 37 standards committees of ANSI, NFPA, AWWA, API, ASME, ASTM, and others  
120 active standards

**Standards Designations**

AWS, ANSI/AWS, AWS/SAE, AWS/AWWA, or AWS/AASHTO prefixes

**Government Adoption**

The Department of Defense has adopted 24 AWS filler metal specifications and four other standards.
American Council of the International Institute of Welding (IIW)
ANSI Z49, Safety in Welding and Cutting
Sponsor US TAG for ISO/TC 44, Welding and Allied Processes
Sponsor US TAG for ISO/TC 26, Electric Welding

Founded to advance the science and technology of welding. Prepares standards such as codes, specifications, recommended practices, and technical reports. Holds symposia and technical meetings. Cooperates with other organizations in the preparation and review of welding standards. Active in the International Institute of Welding and the ISO Committee on Welding. Participates through ANSI in establishing the USA position on draft international standards. Acts as a technical advisor to representatives on the IEC Committee on Welding.

AWS technical committees prepare standards covering four broad categories:

Welding fundamentals, including metric practice, symbols, testing, definitions, filler metals, safety and health, and computerization
Welding processes, including resistance welding, thermal spraying, brazing, soldering, oxyfuel, ARC, friction, and high energy
Inspection of welds, including methods, mechanical testing, and qualification of welders and procedures
Industrial applications of welding, including structural, marine construction, water tanks, automotive, sheet metal, piping and tubing, iron castings, machinery and equipment, railroad, and robotics

Sold directly and through ANSI, IHS, and Global domestically, and through several foreign agencies

brazing; soldering; filler metals; welder qualification; welding; thermal cutting; safety; manufacturing; structural welding; thermal spraying;

| Standards Designation | AWPA prefix |
Government Adoption

AWPA Standards are used in federal specifications. Federal Specification TT-W-571 on Wood Preservation parallels AWPA standards.

Scope

An international technical society devoted to research and development of wood preservation chemicals and treating practices for use in the United States and other countries.

Standardization Activities

Develops standards and specifications for wood preservatives and their introduction into the materials to be preserved. Standards cover preservatives, treatment of commodities, analysis methods, and conversion tables.

Availability

Distributed directly

Keywords

wood; preservation; treated wood; construction; building;

AMERICAN WOOD PRESERVERS BUREAU

Eric Yeadon, President

P.O. Box 5283
Springfield, Virginia 22150
(703) 339-6660

Founded: 1971

Type of Organization

Trade Association

Standards Developer

Standards Development

Standards developer since 1971

Developed 23 standards

None processed through ANSI

Standards Designation

LP, General Purpose

MP, Marine Piling

CP, Construction Poles

MLP, Marine Structures

Government Adoption

The AWPB Quality Mark is accepted by the Federal Housing Administration, Farmers Home Administration, Department of Veterans Affairs, U.S. Navy, and DoD. It is recognized by the building codes, ICBO, BOCA, and SBCC, as well as local and other organizations.

Certification

Certifies treated wood inspection agencies to license pressure treating plants to apply the AWPB Quality Mark to properly treated wood.
Scope

A not-for-profit volunteer quality control and certifying organization with 300 members. Provides a nationally known Quality Mark certifying a definite preservative treatment. Operates a wood preservative laboratory to standardize methods and assure quality control. A three man Board of Review of retired scholars handles disputes.

Standardization Activities

All AWPB pressure treated lumber and plywood procedures are based on the American Wood Preservers Association standards.

Availability

Sold directly

precast concrete; concrete; building;

ARCHITECTURAL WOODWORK INSTITUTE

H. Keith Judkins, Executive Vice President
2310 South Walter Reed Drive
Arlington, Virginia 22206
(703) 671-9100

Founded: 1954

Type of Organization
Trade Association
Standards Developer

Scope
To promote the use of architectural woodwork to the architectural and design industry; to develop industry standards; research new and better materials and methods; maintain and offer correspondence course training and methods; maintain and offer correspondence course training for estimators, detailers, and billers; and publish technical data helpful in the design and use of architectural woodwork.

Standardization Activities
Carries on a sustained program of standardization in the fields of cost accounting, estimating, detailing and billing, and the fabrication of architectural woodwork, sometimes known as special millwork, detail millwork, or contract millwork. This is done through the following publications: AWI Cost Accounting Manual (1987); Quality Standards for Architectural Woodwork (1988); Guide Specification for Architectural Woodwork (1988).

Availability

Millwork Cost Bureau
Keywords: wood products; millwork; lumber; building.

ART AND CRAFT MATERIALS INSTITUTE, INC.

Deborah Fanning, Executive Vice President

715 Boylston Street
Boston, Massachusetts 02116
(617) 266-6800

Founded: 1936

Type of Organization:
Trade Association
Standards Developer

Standards Development:
5 active standards

Standards Designations:
Z356.1-.5

Certifications:
The Certified Products Bureau of the Institute, initiated in 1940, insures the safety and quality of the products of subscribers to the bureau. Certified products are identified by a CP, AP, or HL Health Label Seal, all registered Trademarks. The CP Seal insures both nontoxicity and specific quality requirements; the AP Seal insures nontoxicity only; the HL Health Label insures that the product is properly labeled. Nonmember manufacturers may subscribed and authorized to use the Seals of the bureau if they meet the requirements. The products covered by the seals are crayons, chalk, finger paints, modeling clay, liquid and powdered tempera, semi-moist water colors, block printing ink, school paste and related school art products, as well as ceramic products and numerous adult art materials.

Scope:
An association of manufacturers of art and craft materials which conducts a wide range of activities.

Standardization Activities:
Maintains a Certification Committee which is responsible for the standardization activities.

Availability:
Distributed directly
Formerly: Crayon, Water Color and Craft Institute  
Keywords: crafts; water color; crayon; education; consumer products;

**Representation**
Works closely with other organizations in the development of standards including the American Society for Testing and Materials, the American Association of State Highway and Transportation Officials. Staff members serve on technical committees of standards making organizations. Promulgates standards of other organizations.

**Certification**
No certification, qualification, or accreditation programs

**Scope**
An international business league (trade association) representing the manufacturers of asphalt or processors of asphalt materials. Publishes informational and technical literature. Maintains field offices in the continental United States. Conducts extensive programs of education, research, and engineering service related to asphalt products.

**Standardization**
Works closely with its member companies, and serves upon appropriate standards-making committees of the American Society for Testing and Materials, the American Association of State Highway and Transportation Officials, and others. Works in collaboration with kindred organizations such as the National Asphalt Pavement Association, the Asphalt Emulsion Manufacturers Association, the Asphalt Roofing Manufacturers Association, the Highway Users Federation for Safety and Mobility, and others. Prepares Asphalt Institute Guidelines many of which are subsequently processed as ASTM and AASHTO standards.

**Availability**
Distributed directly and through Global and IHS

**ASPHALT ROOFING MANUFACTURERS ASSOCIATION**
Richard D. Snyder, Executive Vice President
6288 Montrose Road
Rockville, Maryland 20852
(301) 231-9050

Founded: 1919

**Type of Organization**
Trade Association
Works through other organizations to develop standards
Representation
Technical Committees cooperate in the formulation and improvement of standards and specifications covering asphalt roofing products developed by the federal government, ASTM, Underwriters Labs, Factory Mutual, and others.

Scope
A national trade association representing U.S. companies that produce asphalt shingles, roll goods, and allied roofing products. Provides basic membership services including research in improving the durability of asphalts for roofing products.

Standardization Activities
Works with standards producing organizations to coordinate industry standards activities and to provide expertise when requested. A Code Task Force works cooperatively with the association's Residential Roofing Committee and Modified Bitumen Roofing Built-Up Roofing Committee to assure recommended application practices adhere to building code requirements.

Formerly
Asphalt Roofing Industry Bureau (1970)

ASSOCIATED LOCKSMITHS OF AMERICA

William R. Mathiesen, Executive Director

3003 Live Oak Street
Dallas, Texas 75204
(214) 827-1701

Founded: 1955

Type of Organization
Trade Association
Standards Developer

Standards Development
3 active standards

Scope
Encourages and promotes the voluntary exchange among locksmiths of technical service data on security products; evaluates the position of the locksmith in the security industry; establishes a uniform code of ethics and conducts trade promotion activities.

Standardization Activities
Maintains a security Standards Committee which administers the standardization activity and is now working on standards for security devices in relation to locks. Works closely with the American Society for Testing and Materials' program for voluntary standards in locking devices, Committee T-12 on Security Systems and Equipment. Was successful in getting industry rapport to standardize and improve the quality of packaging for key blanks. Recommended a Standard City Ordinance on Building Security. Currently is working on a recommended standard for state licensing or registration of locksmiths. The Key Blank Boxes, Building Security, and Locksmith License are the three current standards of ALA, all considered national in scope.

ASSOCIATION OF AMERICAN RAILROADS

Daniel L. Lang, Vice President
Information and Public Affairs

50 F Street, NW
Washington, DC 20001
(202) 639-2100 FAX: (202) 639-5546

Founded: 1934

Type of Organization
Trade Association
Standards Developer

Standards Development
The Manual of Standards and Recommended Practices (19 volumes) contains nearly 1,400 documents.

Standards Designations
Specifications are designated with an "M" prefix, Standards with an "S" prefix, Recommended Practices with an "RP" prefix.

Certification
The Research and Test Department is responsible for conducting certification testing of new designs of cars and components, quality control checks on components and materials, lubricant testing, and analysis of failed components.

Scope
Membership consists of 108 railroads, including 9 Canadian, 4 Mexican, and 59 associate members. Association members haul approximately 90 percent of the nation's rail traffic and account for 82 percent of the rail mileage. The association serves its members in matters that require cooperative handling to better enable the railroads to operate as a national system and to contribute toward the purposes of the national transportation policy set forth by Congress. It is an umbrella organization consolidating a number of smaller, more specialized groups and is organized by departments which span the fields of law, operations
and maintenance, research and testing, railway economics and statistics, finance and accounting, railway information and public affairs, legislation, and data systems.

**Standardization Activities**

AAR specifications, standards and recommended practices are issued by the Mechanical Division on authority of the Division's General Committee. The Division and its standards deal with the design, construction, performance, maintenance, repair, and inspection of locomotives, freight cars, and other railroad mechanical equipment that is interchanged among railroads.

The Communications and Signal Division develops recommended practices for engineering, design, construction, operation, and maintenance of railroad communication and signal systems. It maintains liaison with appropriate professional organizations such as the American National Standards Institute and the Institute of Electrical and Electronics Engineers, and with government agencies. It is the national radio frequency coordinator to the Federal Communications Commission for assignment of radio frequencies for the railroads in the United States, and the United States/Canadian coordinator along the border.

The Data Systems Division, through RAILINC Corporation, a subsidiary of AAR, stimulates the development and application of data processing and information techniques and established procedures which promote their efficient and productive use and simplify the interchange of data. This division serves as the principal railroad representative to American National Standards Committee X3 and the Transportation Data Coordinating Committee. Its committees are examining the industry's coding and standards needs in the area of data elements, teleprocessing protocols, etc.

Other AAR activities involved in standardization include the Safety Division's Hazardous Material Systems Division, which tests and classifies, for transportation purposes, materials considered hazardous under government regulation and makes recommendations covering packaging, labeling, and handling en route. The Division maintains field inspector at key locations throughout the United States and Canada.

Standardization and simplification of railroad accounting and treasury practices and requirements is accomplished through the Economics and Finance
Department. This department prepares various publications on rules, standard forms, procedures, and codes, as well as economic and statistical data covering railroad operations and their financing.

**Availability**
The Manual of Standards and Recommended Practices is sold directly.

**Keywords**
transportation; railroads; accounting; finance; explosives; safety; communications; data processing;

**ASSOCIATION OF ASBESTOS CEMENT PIPE PRODUCERS**

B.J. Pigg, President

1745 Jefferson Davis Highway

Suite 509

Arlington, Virginia 22202

(703) 979-1026 (703) 979-1152

Founded: 1972

**Type of Organization**
Trade Association

**Representation**
Works through other organizations to develop standards

2 member companies represented on standard committees of ASTM and AWWA

16 member companies active in ISO/TC 77

**Scope**
An international association of producers of asbestos cement pipe worldwide. Promotes the use and sale of asbestos cement water and sewer pipe.

**Standardization Activities**
Standards activities are directed toward the development and maintenance of contemporary product, test, and performance standards for asbestos cement water and sewer pipe, including special applications.

**Keywords**
construction; asbestos cement; asbestos cement pipe; sewer pipe;

**ASSOCIATION OF BEDDING AND FURNITURE LAW OFFICIALS**

Mackie Lawrence, Director

Product Safety Division

Texas Department of Health

1100 West 49th Street

Austin, Texas 78756

(512) 458-7519
**Type of Organization**
Professional Society

Standards Developer

**Scope**
Provides a national forum for the discussion of all questions relating to the administration of bedding and upholstered furniture laws as carried on by regulatory officials of the state, commonwealths, territories and possessions of the United States, their political subdivisions, the District of Columbia, and the Dominion of Canada.

**Standardization Activities**
Encourages and promotes the adoption of uniform bedding and upholstered furniture laws, rules, regulations, nomenclature, labeling requirements, and enforcement procedures. Develops tests and adopts standard methods of inspection and sampling of bedding and upholstered furniture and the analyses of filling materials. Develops standard methods of determining the efficiency of insecticides, fumigants, sterilizing and disinfecting processes and equipment as applied to bedding, upholstered furniture, and filling materials. Secures uniformity in the statement of analytical results; promotes, conducts, and encourages research in chemistry and allied fields as these relate to analyses of filling materials used in bedding and upholstered furniture.

**Availability**
Sold directly

**Keywords**
bedding; upholstered furniture; insecticides; fumigants; sterilization; government officials; consumer products;

**ASSOCIATION OF DRILLED SHAFT CONTRACTORS**
Scot Litke, Executive Director
P.O. Box 280379
Dallas, Texas 75228
(214) 681-5994
FAX: (214) 613-7001

Founded: 1972

**Type of Organization**
Trade Association

Standards Developer

**Scope**
Represents 194 foundation drilling contractors, 155 associates (suppliers), and 291 technical affiliates (professional civil engineers), most of which are in the United States, some in Canada, Mexico, South America, Europe, Asia, Australia, and New Zealand. An eighteen member Board of Directors supervises the activities of the Association. Conducts drilled
foundation design and construction seminars worldwide. Funds research at universities; provides scholarships; publishes technical materials and maintains a library.

**Standardization Activities**

Cooperates with the American Concrete Institute in updating and developing with official Standards and Specifications for the Drilled Shaft industry. Works with states in aligning their specifications with that of the ADSC. Working to revise the American Institute of Architects Master Specs. Monitors all phases of the specifications for the industry. Works with governmental agencies at all levels, university civil engineering departments, and individual engineering firms.

**Availability**

Distributed directly

**Keywords**

drilled shafts; caissons; foundation drilling; construction;

**ASSOCIATION OF EDISON ILLUMINATING COMPANIES**

W.O. Whitt, Executive Director

600 North 18th Street
P.O. Box 2641
Birmingham, Alabama 35291-0992
(205) 250-2530

Founded: 1885

**Type of Organization**

Trade Association

Standards Developer

**Standards Designation**

AEIC CS prefix

**Scope**

A trade association of investor-owned electric utilities in the United States engaged in the distribution of electric service for sale to the general public. Its objective is the advancement of electric service to the public for light, heat, and power.

**Standardization Activities**

Maintains representation on several ANSI Committees and on other similar technical organizations involved in standardization relating to the electric utility industry. Prepares and publishes specifications for high voltage underground cable design used in the industry.

**Availability**

Sold directly
Keywords energy; electric power; electrical equipment;

ASSOCIATION OF ENGINEERING GEOLOGISTS

Edwin A. Blackey, Jr., Executive Director

323 Boston Post Road
Suite 3D
Sudbury, Massachusetts 01776

Founded: 1957

Type of Organization Professional Society
Standards Developer

Scope Promotes high ethical and professional standards in the field of geology; members are graduate geologists and geological engineers.

Standardization Maintains two committees active in standards development. The Building Codes Committee is active on a local level as advisors to county and municipal governments considering code revisions, including code provisions for development of floodplains and tidal marshlands. The Committee on Engineering Geology Mapping Symbols develops standard map symbols for use by all states and counties.

ASSOCIATION OF HOME APPLIANCE MANUFACTURERS

Jack Weizeorick, Product Management

20 North Wacker Drive
Chicago, Illinois 60606
(312) 984-5800

Founded: 1967 Standards Staff: 4

Type of Organization Trade Association
Standards Developer

Standards Development Standards developer since 1967
73 members participate in standards activities
26 active standards include metric equivalents
20 standards ANSI approved

Standards Designations ANSI/AHAM and AHAM prefixes
The General Services Administration has adopted several AHAM standards for procurement purposes.

Sponsors five certification programs for Room Air Conditioners, Refrigerator-Freezers, Humidifiers, Dehumidifiers, and Room Air Cleaners

IEC SC59A, Electric Dishwashers
IEC SC59H, Microwave Appliances
IEC SC61B, Safety of Household Microwave Ovens

An international nonprofit association of companies manufacturing major and portable appliances. Functions in five major areas: product standards and certification, government relations, consumer affairs and communications, statistical reports, and international trade. Other functions included industrial relations and market research.

Develops international standards through representation on technical committees of the International Electrotechnical Commission.

Maintains liaison with the National Institute of Standards and Technology, General Services Administration, Food and Drug Administration, Federal Trade Commission, Consumer Product Safety Commission, and Department of Energy.

AHAM standards are national in scope. Their use is promoted through publications and press releases, through certification, and by the American National Standards Institute's recognition.

Sold directly and through ANSI

ASSOCIATION OF OFFICIAL SEED ANALYSTS

Jim Lair, Secretary-Treasurer
Illinois Department of Agriculture - Seed Lab
801 Sangamon Avenue
Springfield, Illinois 62708-9281

Founded: 1908

Type of Organization
Scientific Society
Standards Developer

Scope
Officials of federal, state and provincial seed testing and research laboratories. Develops uniform rules for testing field, vegetable flower and tree seeds, encourages the use of high quality seed, promotes research, and fosters the training of seed analysts.

Standardization Activities
Maintains committees in research, rules, referee, and public service areas to develop standardized methods of seed testing that will permit duplication of results when the same sample is tested by different stations. Quality factors for which tests are made include purity of sample, percentage germination, rate of occurrence of noxious weed seeds, varietal purity, and assaying for fungicidal seed treatment. The Research Committee makes technical information available to the Rules Committee which prepares a new draft revision of the rules every fifth year for approval. The Rules Committee also interprets questionable and disputed points of the Rules for Testing Seeds. The Referee Committee circulates samples among the member stations to determine whether they are testing in accordance with the rules and to identify any weaknesses in the rules. The Public Service Committee encourages association member to publicize the benefits of the association's work and stimulate interest in seed testing.

Type of Organization
Professional Society
Standards Developer

Standards Development
Guidelines and standards developer since 1981
100 members participate in standards activities
None processed through ANSI
Guidelines available for review
9 guidelines published

Standards Designations
ARMA prefix

Scope
An international organization of professionals involved in records and information management. Represents interests in the management of documentation, preservation, disposal, and the efficient handling of recorded information including records management systems, records retention vital records, records centers, computerized information, micrographics technology, word processing, and others.

Standardization Activities
Directs activities toward fulfilling user-defined requirements of the profession. A five-person Standards Committee represents government, manufacturers, and users, and is responsible for final approval of Guidelines and Standards developed by working committees. These committees cover the following areas: Filing Equipment and Supplies, Filing Systems, Glossary-Records Management Terms, Job Descriptions, Records Center Operations, Records Retention, Technology Applications and Vital Records.

ARMA Guidelines are published and made available to the membership and the general public. After one year, the Guideline may be revised and republished as a Guideline or upgraded to a Standard.

ASSOCIATION OF WALL AND CEILING INDUSTRIES - INTERNATIONAL

Eugene Z. Fisher, Technical Director

1600 Cameron Street
Alexandria, Virginia 22314
(703) 684-2924

Founded: 1918 Standards Staff: 1

Type of Organization
Trade Association

Standards Development
Standards developer since 1918
1,400 plus members participate in standards activities

Standards Designations
ASCI guide specifications; also ACI, Gypsum Association, ML/SFA joint Standards, as well as ASTM and ANSI Standards.

Certification
Certification issued for Asbestos Abatement Training Program.

Scope
1,400 firms engaged in the application of acoustical tile, drywall, partitions lathing and plastering, fireproofing, and insulation.

Standardization Activities
Concentrates on application/installation standards development but also monitors and participates in materials and test methods specifications development.

Technical Subcommittees address standardization of materials, systems and application/installation procedures for asbestos abatement, acoustic systems, carpentry, coatings, demountable partitions, exterior insulation and finish systems (EIFS), fireproofing, flooring systems, lathing, furring, plastering, texturing, insulation, light gage steel framing systems (load and non-load bearing, integrated ceilings systems, open plan systems, door-frame-hardware, and allied fields. Final approval by the Association's Board of Directors when recommended by Technical Committee.

Through the Technical Department, AWCI participates in the activities of ASTM Committees C11, C16, C24, E6; and the following NIBS committees: Building Thermal Envelope Coordinating Committee, Building rehabilitation and Preservation.

100 representatives participate in the five A15 Standards Subcommittees. Most standards processed through ANSI. Draft standards available for review.

Standards Designation
AIA/A15.0x

Secretariats
A15.01, A15.05, A15.07, A15.08, A15.09

Scope
Dedicated to promoting the acceptance and productive use of image processing, image analysis and machine vision technologies. The use of these technologies will include both scientific and industrial applications from all aspects of product manufacturing, physical sciences, governmental and research communities. The association's membership includes manufacturers of both related and peripheral products, integrators, end users, consultants and research groups directly involved with these technologies.

Standardization Activities
Standardization in the area of image processing technology including System Communication (A15.01), Performance (A15.05), Terminology (A15.07), Sensor Interfaces (A15.08), Marking and Labeling (A15.09).
Availability Draft standards available for review; ANSI-approved standards available from the association and ANSI.

Keywords image processing; machine vision; automatic inspection; automation;

AUTOMATIC IDENTIFICATION MANUFACTURERS, INC. (AIM USA)

William P. Hakanson, Executive Director
1325 Freeport Road
Pittsburgh, Pennsylvania 15238
(412) 963-8588 Telex: 315186 (AIM PGH)
FAX: (412) 963-8753

Founded: 1972

Type of Organization Trade Association
Standards Developer, also works with other organizations to develop standards

Standards Development Standards developer since 1987
200 member companies; participate in AIM-sponsored, ANSI, government-sponsored, industry trade association-sponsored, and inter-industry standards.
AIM is approve to use the ANSI canvass review method.

Standards Designation AIM

Scope A national trade association of companies involved in the manufacture or integration of automatic identification hardware, software, supplies, services and systems for industrial, commercial and government applications. Technologies represented include bar code, radio frequency identification, radio frequency data communications, magnetic stripe, vision systems, voice systems and OCR.

Standardization Activities Current activities are the standardization of bar code symbols and some aspects of magnetic stripe media measurements (magnetic properties) and specification of their immunity to magnetic damage (at the request of ANSI X3B.10).

Availability Distributed directly

Keywords automatic identification; bar codes; magnetic stripe;
AUTOMATIC METER READING ASSOCIATION

Donald E. Schlenger, Executive Director
P.O. Box 500
Westwood, New Jersey 07675
(201) 666-0902

Founded: 1986

Type of Organization
Trade Association
Standards Developer

Representation
ANSI accreditation in process

Scope
A nonprofit nongovernmental educational association whose purpose is to advance the state of telemetry technology for meter reading, energy management, distribution and control. The AMRA exists to further the universal deployment of telemetry services and establish a forum for the research and development of standards, guidelines and practices. Functions in the areas of automatic meter reading and energy management through telemetry technologies (telephone, radio, powerline carrier, cable, etc.) primarily for electric, gas and water utilities.

Standardization Activities
The AMRA Standards Committee develops guidelines and voluntary standards designed to (1) foster the interchangeability of and encourage multiple sources for system components; (2) promote compatibility of existing and future products; (3) facilitate component and system enhancements, including new features, options and additional applications; (4) simplify and lower the cost of system implementations, including specification and selection process; and (5) minimize risk to manufacturers and users.

These guidelines and voluntary standards will cover system component inputs and outputs (including data protocols, hardware interfaces, power requirements, and component protection), environmental conditions, installations, and such other areas as the needs of the Association members may dictate.

The Standards Committee will work to (1) promote the continued development, testing, and integration of new automatic meter reading and telemetry services, equipment and procedures; (2) work with the relevant standards setting bodies of associated industries to promote the consistency of related standards and
guidelines; and (3) provide a forum for Association members and other interested parties to develop solutions and approaches to standardization and compatibility issues.

**AUTOMOTIVE REFRIGERATION PRODUCTS INSTITUTE**

Timothy B. Tierney, Executive Director

5100 Forbes Boulevard
Lanham, Maryland 20706
(301) 731-5195

Founded: 1983

**Type of Organization**
Trade Association
Standards Developer

**Standards Development**
Founded September, 1983 to develop Performance standards for the Automotive Refrigeration Industry.

**Scope**
Members are manufacturers and suppliers of automotive refrigerant, also container manufacturers, packagers and distributors, and those manufacturers of parts and tools necessary to assemble and test automotive refrigeration products.

**Keywords**
automotive refrigeration; air-conditioning;
BAKING INDUSTRY SANITATION STANDARDS COMMITTEE

Bonnie Sweetman, Secretary-Treasurer

111 East Wacker Drive
Suite 600
Chicago, Illinois 60601
(312) 644-6610

Founded: 1949

Type of Organization
Technical Society
Standards Developer

Standards Development
42 active standards

Certification
Upon application, equipment is certified in accordance with the procedure set forth by the Certification Board. Standards are used by manufacturers and enforcement agencies.

Scope
A nonprofit organization dedicated to achieving sanitation in the baking industry. It is supported by trade associations representing manufacturers of baking machinery for wholesale and retail uses, and interested professional sanitarian and engineering organizations. Writing and publication of standards and certification of equipment promoting the sanitary design, construction, and installation of food-processing equipment are the only purposes and functions of this committee.

Standardization Activities
Develops sanitation standards for baking equipment and is the recognized sanitation standards organization for the baking industry. Government and industry representatives work together in preparing and editing these standards. Task committees are appointed for each specific standard or revision. Final task committee proposals are acted on by the general committee and the BISSC Board of Directors. BISSC standards are published every four years in book form. Latest edition: 1990.

BIOLOGICAL STAIN COMMISSION

Eric A. Schenk, M.D., Secretary
Department of Pathology, Box 626
The University of Rochester Medical Center
Rochester, New York 14642
(716) 275-3197

Founded: 1922

Type of Organization
Scientific Society
Standards Developer

Standards Development
62 standards

Certification
The commission maintains a program of stain certification. Manufacturers and distributors voluntarily submit samples for examination. If the sample meets the commission's specifications, it is approved for marketing as a Certified Biological Stain, and the commission issues certification labels to be affixed to bottles in which it is sold. Certification is on a batch basis, the labels issued by the commission bearing distinctive certification numbers identifying the specific batches with which they are to be used. A sample of each batch is kept on permanent file, and the commission investigates complaints of any unsatisfactory results obtained with a certified stain.

Scope
A nonprofit organization of professional scientists in biology, medicine, and related fields devoted to the establishment of standards for biological stains.

Standardization Activities
Establishes standard specifications for the identification, purity, performance and labeling of the more important biological stains, in order that they may be relied upon as standard tools in biological and medical research. National in scope, the commission has the cooperation of scientific societies whose
interests lie in this field, as well as the interest and cooperation of manufacturers and distributors of biological stains.

Availability
The Commission's standards are included in the appendix of Conn's Biological Stains.

Formerly
Commission on Standardization of Biological Stains (1944)

Keywords
biological stains; testing; medical instruments;

BLUE ANCHOR

Dennis N. Icardi, President
P.O. Box 15498
Sacramento, California 95851
(916) 929-3050 Telex: 37-74291
FAX: (916) 921-9362

Founded: 1901

Type of Organization
Agricultural Cooperative Standards Developer since 1930

Scope
A fresh fruit marketing cooperative handling the fruit of 1,000 growers organized into local associations and contract shippers. All fruit is subject to the standardization program.

Standardization Activities
Issues standards on all deciduous tree fruit and table grape commodities. Updates the Rules and Regulations for each annual season. The standardization policy is set by a Standardization Committee and enforced by authorized agents of the Field Department. Standards required for company members only. Works with various federal and state marketing orders covering pears, plums, peaches, nectarines, and grapes.

BOOK INDUSTRY STUDY GROUP

Sandra K. Paul, Managing Agent

160 Fifth Avenue
New York, New York 10010
(212) 929-1393 FAX: (212) 989-7542
Type of Organization

Trade Association
Standards Developer

Scope

A nonprofit organization whose members come from all areas of the book trade. Specializes in industry research.

Standardization Activities

Committees review existing standards and select those appropriate for the book industry. Endorsed Bookland EAN bar code for books, Code 128 Representation of a draft ANSI/NISO standard for serial identification, and the F.A.C.T. Code 39 Data Identifiers for bar coding book cartons and shipping containers. The Book and Serial Industry Systems Advisory Committees (BISAC and SISAC) develop standards for electronic data interchange, some of which are passed on to the National Information Standards Organization (NISO) to become ANSI/NISO standards. BISAC and SISAC developed unique electronic data interchange formats and are now mapping data elements for ASC X12 conversion.

Government Adoption

Quality standard adopted by most states

Secretariats

Advisory Commission on Textbook Specifications (ACTS)

Scope

Standardization Activities

Together with the Association of American Publishers and the National Association of State Textbook Administrators, provides delegates to the Advisory Commission on Textbook Specification (ACTS) which meets twice each year. ACTS has developed a set of manufacturing standards and specifications which must be met before the purchase of a particular textbook.
will be considered by most state adoption agencies. This booklet, titled Manufacturing Standards and Specifications for Textbooks (MSST), contains quality standards and specifications for paper, printing, and binding, and provides sample forms which should be used by both the state agencies and the publishers of textbooks. The MSST covers only elementary and high school textbooks.

Manufacturers of ingot brass and bronze for the foundry industry.

Standardization Activities
Cooperates with the American Foundrymen's Society, the Non-Ferrous Founders' Society, and affiliated and similar organizations in developing methodology and standards for the production of copper base alloy castings. Participates with ASTM, SAE, Copper Development Association, and military and federal specifications bodies and others in the development of standards and specifications covering ingot brass and bronze. Involved in development of standard reference materials for NIST and has sponsored and directed basic research relating to copper based alloys. Maintains a Technical Committee to consider related subject matter.

Formerly
Non-Ferrous Ingot Metals Institute; Brass and Bronze Ingot Institute (1928); Association of Brass and Bronze Ingot Manufacturers (1950).

Keywords
brass; bronze; casting alloys; materials;
BRICK INSTITUTE OF AMERICA

J. Gregg Borchelt, P.E., Vice President of Engineering & Research

11490 Commerce Park Drive
Suite 300
Reston, Virginia 22091
(703) 620-0010

Founded: 1934

<table>
<thead>
<tr>
<th>Type of Organization</th>
<th>Trade Association Standards Developer</th>
</tr>
</thead>
</table>

Scope
National association of brick manufacturers and the national authority on brick construction. Promotes the further and proper use of brick.

Standardization Activities
Standards development, review, writing, and promulgation are the responsibilities of the Engineering and Research Division. Maintains an exchange and liaison with similar organizations in other countries. Also maintains close liaison with government agencies writing standards in the construction industry field, National Institute of Standards and Technology, National Institute of Building Sciences, and the Departments of Housing and Urban Development, Defense, Energy, Labor, and Commerce. Works with other standards-writing organizations in the development of standards involving or related to Brick Masonry as follows: American Concrete Institute and American Society of Civil Engineers - ACI 530, ASCE 5, Building Code Requirements for Masonry Structures, ACI 530.1 and ASCE 6, specifications for Masonry Structures; American Society for Testing and Materials - Committees C-12 on Mortar for Unit Masonry, C-15 on Manufactured Masonry Units, D-1 on Paint and Related Coatings and Materials, E-5 on Fire Testing and E-6 on Performance of Building Constructions; Building Seismic Safety Council, National Fire Prevention Association

Engaged in research for the development of new standards dealing with masonry design and applications. Currently working on limit states design standard for masonry in conjunction with the National Masonry Standards Joint Committee of the American Concrete Institute, the American Society of Civil Engineers, and The Masonry Society.

## BUILDING OFFICIALS AND CODE ADMINISTRATORS INTERNATIONAL

Clarence R. Bechtel, Executive Director

4051 West Flossmoor Road
Country Club Hills, Illinois 60478-5795
(312) 799-2300

Founded: 1915  
Standards Staff: 55

| Type of Organization | Professional Society  
| Standards Development | Standards Developer  
| Standards Designation | Promulgates the BOCA Basic Code Series of model codes for reference adoption by municipal and state governments.  
| Certification program | Codes are adopted by 17 states and 5000 local governments, predominantly in East and Midwest portions of the United States  
| Secretariats | Maintains a voluntary education and certification for construction officials.  
| Standardization Activities | A nonprofit municipal service membership organization involved in the field of code administration and enforcement, and community development. Goals are to serve the public by advocating the use of safe, suitable, modern construction techniques and materials, through its model codes program; and to serve jurisdictions and their code administrators by providing technological know-how and services related to all specialty areas of code administration and enforcement, in addition to a complete model codes maintenance program.  
|  | Membership services include code interpretations, materials and product evaluation reports, plan review, education programs and documents, and administrative reviews.  
|  | Activities carried on by the technical and professional staff under the direction of its Chief Executive Officer, appointed by the Board of Directors. BOCA
codes state performance requirements for materials under given conditions, and establish evaluation criteria resulting in reduced construction costs and allowing ingenuity on the part of the designer.

26 member companies  
40 members on standards committees of ASTM, ANSI, NACE, SSPC, NEMA, NAMF, DCMA, AWS, ISO, AESF, MFSA, and a number of others

The cadmium industry's market development and informational organization in North America, promoting increased usage of cadmium metal and chemicals through technology transfer, technical services, regulatory activities, and publicity programs. Maintains an awareness of studies on the environmental effects of cadmium and of the regulations affecting the manufacture, use, and disposal of cadmium-containing products. A nonprofit trade association supported by producers and consumers of cadmium both in North America and throughout the world.

**Standardization Activities**  
Promotes the increased use of cadmium metal and chemicals and maximizes the effectiveness of its members on national standards committees. Assists the work of standards developing bodies within its area of interest by designating Council members to coordinate with the appropriate code bodies.

Participates in developing standards including specifications for cadmium electroplating for corrosion and wear properties, color pigments, nickel-cadmium, and other cadmium-containing batteries, cadmium chemical stabilizers in plastics, and for a wide variety of soldering and brazing alloys.

**Keywords**  
electroplating; corrosion protection; pigments; batteries; chemicals; materials;

Scope

A national trade association of 101 carpet and rug manufacturers and 118 companies supplying services and products to the industry. Works on a national and international level to promote its products and provide satisfaction with these products.

Standardization Activities

Standards activities are based on the development of tests which can be used by industry and interested parties to test various components or characteristics of carpets and rugs.

Formerly

American Carpet Institute
Tufted Textile Manufacturers Association

Keywords

carpet; rugs; consumer products;

CAST IRON SOIL PIPE INSTITUTE

William H. LeVan, Executive Vice President

5959 Shallow Ford Road
Suite 419
Chattanooga, Tennessee 37421
(615) 892-0137

Founded: 1949

Type of Organization

Trade Association
Standards Developer

Standards Development

Standards developer since 1949
Technical Committee develops Standards pending approval of the Institute's Board of Directors; ASTM A74-82, endorsed by CISPI

Standards Designation

CISPI prefix

Government Adoption

HUD, WW-P-401E; PBS (PCD) 15410; DOD 4270.21; CEGS 15400; CE 300.01; CE 300.02; CE 600.01; NAVFAC TS-15301; and NAVFAC TS-15401

Certification

No certification, qualification, or accreditation programs

Scope

Aids the U.S. plumbing industry in cooperation with the soil pipe manufacturers. Efforts include product improvement, standardization of soil pipe and fittings, and testing, evaluation, and development in the interest of public health and safety.
**Standardization Activities**

Develops standards for cast iron soil pipe and fittings which are accepted throughout the United States. These standards set dimensions and specifications which provide interchangeability between all manufacturers' pipes and fittings. The CISPI Standards are national in scope. The Technical Committee administers CISPI's Standardization Activities.

The Institute's Technical Committee meets two times a year to review standards, engage in research and development activities, and update CISPI publications.

**Availability**

Through ASTM and plumbing wholesalers and distributors

CEDAR SHAKE AND SHINGLE BUREAU

Michael M Westfall, President
515 116th Avenue, NE, Suite 275
Bellevue, Washington 98004
(206) 453-1323 FAX: (206) 455-1314

Founded: 1915

Type of Organization: Trade Association
Standards Development

Standards Designation:
- Grading Rules for Certi-Split Red Cedar Shakes - 1985
- Grading Rules for Certigrade Red Cedar Shingles - 1984
- Grading Rules for Cert-Saun Red Cedar Shakes - 1981

Government Adoption:
Adopted by all national model building codes which are now recognized by the U.S. Department of Housing and Urban Development (HUD)

Certification:
Performs unannounced inspections of over 300 shake and shingle mills in the northwest United States and Canada. Prints and issues labels for product identification for use by complying mills.

Scope:
Membership includes manufacturers, distributors and users of red cedar shakes and shingles. In addition, inspects and labels shakes and shingles manufactured from species other than red cedar under the auspices of the Wood Shake and Shingle Association, an in-house subsidiary. Promotes the acceptance and use of shake and shingle roofing and siding materials through advertising and trade promotion.

Standardization Activities:
Develops and revises standards relating to the quality, packaging and application of shakes and shingles.

Formerly:
- Red Cedar Shingle and Handsplit Shake Bureau - 1988
- RCSHSB formed from merger of Red Cedar Shingle Bureau and Handsplit Cedar Shake Association - 1963
- Red Cedar Shingle Bureau formed in 1915

CEILINGS AND INTERIOR SYSTEMS CONSTRUCTION ASSOCIATION

Carl A. Wangman, Executive Vice President
104 Wilmot Road
Suite 201
Deerfield, Illinois 60015-5195
(708) 940-8800

Founded: 1949

Type of Organization: Trade Association
Representation: Works through other organizations to develop standards

Scope: An international organization serving the needs of specialty subcontractors who sell and install ceiling systems, as well as other related products and systems.

Provides programs for exchanging information about the industry and its trends, and develops working alliances with other organizations within the construction contracting industry to deal with common problems.

Ceilings and Interior Systems Contractors Association (1949)

Keywords: acoustical tile; ceilings; buildings;

CELLULOSE INDUSTRY STANDARDS ENFORCEMENT PROGRAM

Daniel Lea, Administrator
1315 Talbott Tower
Dayton, Ohio 45402
(513) 223-1891 FAX: (513) 222-5794

Founded: 1982

Type of Organization: Certification Program
Works through other organizations to develop standards
Certification

Scope

Open to all manufacturers of loose-fill cellulose insulation in the United States and territories. Since elements of program are based on U.S. law there is no international membership.

Standardization Activities

Most CISEP participants and the Program Administrator are active members of ASTM Committee C-16, which is responsible for standard Specification C-739, which is the core of the Program's enforcement activity. CISEP represents the U.S. cellulose insulation industry on the ISO Insulation Standards Committee. CISEP works to promote uniformity and compatibility of standards and regulations that apply to cellulose insulation.

Keywords

insulation; cellulose insulation; thermal insulation; building materials; loose-fill insulation;

Founded: 1988

**Type of Organization**

Certification Organization

Standards Developer
**Certification**

Included in certification is inspection of the factory, evaluation of quality control manuals used in the manufacture of the parts, inspection and review of the manufacturing process, materials testing, corrosion testing of metal parts and the evaluation of the fit and finish of the final product.

**Scope**

The CAPA program certifies sheet metal and plastic auto body parts. The program is open to all manufacturers of such parts. There are currently over 550 competitive aftermarket auto body parts which have been certified as meeting CAPA's standards for quality, fit and finish.

**Standardization Activities**

Standards are developed under the auspices of CAPA's Technical Committee which is made up of representatives from the insurance, auto body parts manufacturers, and parts distribution industries. These standards are developed with the assistance of independent technical testing laboratories.

**Keywords**

aftermarket auto body parts; transportation; automobile; manufacturing;

**CERTIFIED BALLAST MANUFACTURERS**

M. C. Davies, Secretary

**Type of Organization**

Trade Association

Works through other organizations to develop standards

**Representation**

ANSI, UL

**Certification**

Certification program for ballasts operating standard fluorescent lamps. Open to any manufacturer who wishes to qualify. To be certified CBM, ballasts must meet performance requirements of ANSI specifications C82.1, including the electrical requirements specified in the C78 standard for the lamp type to be operated. Ballasts must also be UL listed and High Power Factor. Compliance is repeatedly verified by ETL Testing Laboratories, an independent testing organization, which periodically selects samples at random from manufacturers' current CBM production and tests them, as prescribed in ANSI C82.2 and C82.3.
Scope
Major producers of ballasts for fluorescent lamps. Promotes fluorescent lighting by encouraging the manufacture of ballasts which provide quality performance.

Standardization Activities
Works through ANSI to develop standards for fluorescent ballasts.

Formerly
Ballast Advisory Committee (1949)

Keywords
fluorescent lighting; ballasts, electrical equipment;

Standards Developer

Standards Development  
12 member companies participating in standards activities  
Draft standards available for review by non-members  
None processed through ANSI

Scope  
A voluntary, nonprofit trade association which includes among its members 12 North American manufacturers of chemically coated fabrics and PVC sheet and film. Represents its membership in technical, environmental, and governmental affairs of interest to the industry. One of its objectives is to inform and educate the consuming public regarding the uses and merits of chemical fabrics and film; interested in encouraging high standards of quality and service throughout the industry.

Standardization Activities  
Directed toward the setting of voluntary performance and quality standards for various product lines. Solicits input for all interested parties. Works closely with the American Society for Testing and Materials. Committees review and make recommendations on government standards, specifications, and documents; and participate in standards programs with the National Institute of Standards and Technology, Underwriters Laboratories, and other standard setting organizations related to the industry.

Standards are voluntarily adopted by manufacturers and users and applied to various product lines when performance, reliability, and safety are essential.

**CHEMICAL SPECIALTIES MANUFACTURERS ASSOCIATION**

Douglas Fratz, Director, Scientific Affairs

1913 Eye Street, NW
Washington, DC 20006
(202) 872-8110  (202) 872-8114
CSMA product performance evaluation methods have been used for government procurement purposes by GSA. Many have been adopted by ASTM.

Scope

Four hundred companies involved in manufacturing, formulating, packaging, and marketing chemical specialties products, including home, lawn, garden, transportation, institutional, and industrial products. Works in various areas, including federal and state governmental affairs (both legislative and regulatory), communications, public relations, marketing, legal affairs, and scientific and technical affairs.

Standardization Activities

Develops standard product characterization methods, product performance evaluation test methods, and recommended practices for manufacturers and formulators of chemical specialties products through numerous scientific and technical committees in CSMA's six divisions: (1) Aerosol; (2) Industrial and Automotive Specialties; (3) Detergents and Cleaning Compounds; (4) Disinfectants and Sanitizers; (5) Pesticides; and (6) Waxes, Polishes, and Floor Finishes.

Has numerous representatives on committees of voluntary consensus organizations such as ANSI, ASTM, NFPA, ANMC, and AOAC. Standards originated and promoted by CSMA are now ASTM, AOAC, SAE, or other standards as well. Published manuals and compendiums including: Aerosol Guide; Detergents and Cleaning Compounds Test Methods Compendium; Microbiological Test Methods Compendium; Waxes, and Polishes and Floor Finishes Test Methods and General Information.

CAMI Technical Committee serves as Technical Committee on Coated Abrasives of the B74 Committee. CAMI Safety and Industrial Health Committee serves as the Technical Committee B7 of the B74 Committee.

**Scope**
A voluntary, nonprofit association of manufacturing companies which coat and manufacture various types and forms of coated abrasive products in the United States.

**Standardization Activities**
Develops standards for grading of certain abrasive grains on coated abrasive products. These specifications include grading requirements for screen grit size and sedimentation grit sizes of aluminum.
oxide, silicon carbide, garnet, emery, and flint abrasive grains for use on coated abrasive products; procedures for recovery of abrasive grains from products to be tested; and procedures for testing recovered abrasive grains to determine if they conform to grading requirements. Definitions of the trade terms used and methods for identifying products which conform to this standard are included.

Also develops standards which establish the minimum safety requirements related to the usage of coated abrasive forms. Requirements apply to hand-held and fixed-mounted machine operations that use some form of coated abrasive product, and to safety-related maintenance precautions for machines and machine parts. Also contain safety requirements pertinent to operator and bystander protection, dust collection, and potentially hazardous environmental conditions.

COLLEGE OF AMERICAN PATHOLOGISTS

Lee VanBremen, Executive Director
325 Waukegan Road
Northfield, Illinois 60093-2750
(708) 446-8800

Founded: 1947 Standards Staff: 1

Type of Organization
Professional Society
Standards Developer and works through other organizations to develop standards

Certification
Operates a voluntary accreditation program for medical laboratories; commissioned by the National Research Council to batch certify secondary cyanmethemoglobin standards.

Scope
A nonprofit association of more than 10,000 pathologists. Develops and offers programs for the improvement and maintenance of the quality of medical and physician office laboratory testing. Operates a national proficiency survey program with over 13,000 medical and 7,000 physician office laboratories participating.

Standardization Activities
A 9 member Standards Committee coordinates development of reference materials for standardization of medical laboratory tests, coordinates liaison with other
standard setting organizations. Identifies problems in standards development, coordinates their solution. Collaborates with the National Institute of Standards and Technology, the National Institutes of Health, and the Centers for Disease Control.

### COLOR ASSOCIATION OF THE UNITED STATES

Marielle Bancou, Executive Director

409 West 44th Street
New York, New York 10036
(212) 582-6884  FAX: (212) 757-4557

**Type of Organization**
Trade Association
Standards Developer

**Government Adoption**
DoD Color Card

**Certification**
No certification, qualification, or accreditation programs

**Scope**
Membership comes from the textile and fashion industries, and the interior design and environmental fields. Issues seasonal color forecasts of dyed fabrics for women's and men's apparel twice a year. Issues a yearly forecast of interior colors for the interior and environmental fields; these forecasts are applicable to companies producing dyestuffs, paints, automobiles, airplanes, home furnishings, textiles, plastics, cosmetics, and other products. Standardizes government and industry colors; offers consultations; maintains archives and fabric swatch library.

**Standardization Activities**
Produces a Standard Color Card of America for the purpose of simplifying color work by establishing color standards favored for use in the United States. The card presents a comprehensive palette of preferred American colors and is primarily directed to the textile, fashion, and environmental industries.

**Availability**
Distributed directly

</tbody>
</table>
**Standardization Activities**

Administers a Technical Committee active in standards development.

Does not participate in international programs or federal government standardization activities, except when requests are received for specific information.

Publishes standard testing procedures to provide uniform methods for both manufacturers and users to measure and test the physical characteristics of composite cans, tubes, and cores. Develops and publishes recommended industry standards covering dimensions for certain high volume types of composite cans to accommodate customers' closing and handling equipment. Publishes guidelines as sources of information for manufacturers and users of industry products. Publishes and revises testing procedures.

**COMPRESSED AIR AND GAS INSTITUTE**

John H. Addington, Secretary-Treasurer

1230 Keith Building
Cleveland, Ohio 44115
(216) 241-7333  FAX: (216) 241-0105

**Type of Organization**

Trade Association

Standards Developer

**Standards Development**

45 member companies participate in the standards development for industry products used in manufacturing, construction, mining, and other industries.

**Scope**

A national trade association of companies which manufacture air and gas compressors, pneumatic machinery and compressed air and gas drying equipment.

**Standardization Activities**

Representative standards that the institute has developed include performance statements which identify parameters for performance evaluation of centrifugal compressors; a test standard for rating compressed air dryers; and the test code for sound measurement of pneumatic equipment, ANSI S5.1. The latter standard
was developed jointly with the European Committee of Manufacturers of Compressed Air Equipment.

COMPRESSED GAS ASSOCIATION

Carl T. Johnson, President
1235 Jefferson Davis Highway
Suite 501
Arlington, Virginia 22202
(703) 979-0900
Telex: 650 339 1969 MCI WW
FAX: (703) 979-0134

Founded: 1913
Standards Staff: 15

Type of Organization
Trade Association
Standards Developer

Standards Development
Standards developer since 1913
250 member companies participating in standards activities
90 active standards, including metric

Standards Designation
CGA prefix; in some instances, standards also bear ANSI and Canadian Standards Association (CSA) designations.

Government Adoption
Standards comply with Department of Transportation and other government agencies where applicable (federal, state, and local regulations).

Certification
No certification, qualification, or accreditation programs

Scope
Provides, develops, and coordinates technical activities in the compressed gas industries, including end-uses of products, so that they may serve the best interest of the public and industry. Active primarily in the fields of safety and technical specifications pertaining to the compressed gas and related product and service industries, including the medical fields of anesthesia and respiration.

Standardization Activities
Collaborates with national organizations such as the NFPA, the National LP-Gas Association, ASTM, ANSI, AAR, and the American Society of Anesthesiologists, to develop far-reaching specifications and standards of safety to benefit industry and the public.
Compiles information and publishes material, such as the Handbook of Compressed Gases, and pamphlets which contain a description of the used gases and give in detail the safest methods for handling and storing gases. Provides audiovisual presentations.

Conducts national and regional technical meetings and seminars to discuss practices, standards, and problems related to the broad spectrum of the compressed gas industries.

Submits recommendations to appropriate government agencies to improve safety standards and methods of handling, transporting and storing gases. Acts as advisor to authorities, some of which are regulatory such as the U.S. Department of Transportation, the U.S. Interstate Commerce Commission, U.S. Coast Guard, U.S. Food and Drug Administration, Canada's Board of Transport, and state, provincial, municipal, and local agencies concerned with the safe handling of compressed gases. Participates in committees of the United Nations and the International Organization for Standardization (ISO).

Availability
Distributed directly and through IHS and Global

Standards Developer and works through other organizations to develop standards

Standards Designation
ANSI/CAM-I
Scope
A nonprofit research and development membership corporation dedicated to advancing state-of-the-art technology in the application of computers to manufacturing.

Standardization Activities
CAM-I is an accredited standards-making body of ANSI. The CAM-I Standards Committee maintains an active membership of representatives from the industrial and educational members of the CAM-I organization. It develops proposed standards, adopts existing standards, or encourages development of these standards by organizations such as ANSI and NIST. Proposes and fosters national and international standards in association with ANSI, ISO, and other standards groups. Addresses and reviews needed standards; evaluates their potential impact on CAM-I member companies, national, and international standards.

Secretariats
American National Standards Committee X3, Information Processing Systems
Technical Administrator for U.S. TAG for ISO-IEC/JTC1, Information Technology

Scope
A nonprofit organization that provides its members a forum for industry consultation and united action; a means for communicating facts and views of the industry to government, to other industries, and the public.
Standardization Activities

Does not publish standards in its own name but participates actively with national standards bodies. An organizational member of ANSI. Through its Environment and Safety Committee, represents its members to other American National Standards Committees, including B11, Safety Standards for Machine Tools; C63, Radio-Electrical Coordination; C101, Leakage Current for Appliances; S1, Acoustics; S12, Noise; Z136, Laser Safety. Serves on the ANSI Executive Standards Council, Information Systems and Electrical and Electronics Standards Boards, the Industrial Automation Panel, and participates in the Underwriters Laboratories Industry Advisory Conference, Office Appliances and Data Processing Equipment sections.

Promotes standards through publicity in association communications and the technical and trade press; distribution by member companies; reference to, and incorporation of, standards in member company public and internal technical publications; and through implementation of standards in member company products. Active standards committees and projects are listed in CBEMA annual and periodic activity reports.

Through American National Standards Committee X3, member companies participate in corresponding ISO-IEC JTC1, Information Technology, providing direct support to ANSI. Through the Underwriters Laboratories and the U.S. National Committee, CBEMA supports International Electrotechnical Commission Technical Committee 74, Safety of Office Machines and Data Processing Equipment. Also maintains active liaison and cooperation with the International Consultative Committee for Telephony and Telegraphy, CCITT, and the standards programs of the Information Technology Association of Canada, the European Computer Manufacturers Association (ECMA), and with national industry standards bodies of Japan and European countries.

Cooperates with the Federal Information Processing Standards (FIPS) program by direct liaison and exchange of documents between X3 and the National Institute of Standards and Technology. Represents the industry to the standards program of the Occupational Safety and Health Administration, Department of Labor, and related activities of the Department of Health and Human Services.

### CONSTRUCTION INDUSTRY MANUFACTURERS ASSOCIATION

Fred J. Broad, President and Secretary

111 East Wisconsin Avenue
Bank One Plaza 940
Milwaukee, Wisconsin 53202
(414) 272-0943

Founded: 1909

| **Type of Organization** | Trade Association |
| **Standards Designation** | PCSA Standard; LEMB prefix |

### Scope

A nonprofit U.S. trade association representing 200 companies which manufacture heavy construction machines and related components used in the general construction, roadbuilding, housing, mining, energy, and forestry fields.

Acts as a forum for its member companies to discuss and act upon problems and issues of industry-wide concern, including product safety, machine performance standards, government liaison, international trade, statistical marketing data, parts and service information, and energy management.

| **Standardization Activities** | Acts as a clearing house for the construction equipment manufacturing industry in the areas of safety, health, and environmental performance standards for construction machines. The term "performance standards" refers to performance criteria for machine safety, protective devices, noise characteristics, etc., as opposed to engineering standards which dictate design. Published standards include those for mobile cranes and excavators and ratings of vibratory rammers and plates. |
Representatives deal with technical issues (including machine nomenclature, classification and specifications; voluntary consensus standards; regulations; and research) and safety oriented issues for machines such as crawler tractors and loaders, wheel loaders and tractors, graders, dumpers (off-highway haulers), tractor-scrapers, compactors, planers, soil stabilizers, cranes, and excavators.

Active in the broad area of commercial standards that cover product maintenance, usage, certification, test, and inspection. Writes and publishes commercial standards used by the American National Standards Institute in development of consensus standards.

Drafts not available for review

**Standards Designations**  
MASTERFORMAT; SPECTEXT; SPECTEXT II; Manual of Practice

**Government Adoption**  
The Department of Defense has adopted CSI MP-2-1 MASTERFORMAT, Master List of Titles and Numbers for the construction industry.

**Scope**  
A national technical society dedicated to the advancement of construction technology through communication, education, research, and service. CSI serves the interests of more than 19,000 architects, engineers, specifiers, contractors, product manufacturers, and others in the construction industry.
Activities are directed toward standardization of the language and format of construction specifications, as well as format, organization, and coordination of the contents of the Project Manual for a construction project.

Publishes a Manual of Practice which provides techniques, procedures, and formats for the preparation and organization of construction documents. Included is MASTERFORMAT which was jointly issued with CSI's Canadian counterpart, Construction Specifications Canada. MASTERFORMAT provides a uniform system for organizing project cost data, and for filing product information and other technical data. The 16-Division concept presented in MASTERFORMAT has been adopted by government and private practices as a uniform approach for the organization of information contained in construction project manuals.

Produces SPECTEXT and SPECTEXT II through its research affiliate, The Construction Sciences Research Foundation (CSRF). SPECTEXT is a 440 section library of master guide specifications for construction projects prepared in accordance with CSI recommended practices. SPECTEXT II is for smaller, less complex projects. CSI has also developed a product information retrieval system (SPEC-DATA II) and an automated computerized system for specification text manipulation adaptable to all types of master specification programs.

**Certification**

No certification, qualification, or accreditation programs
Scope
A national trade association that represents U.S. companies engaged in the manufacture of cookware, bakeware, and miscellaneous cooking accessories. Promotes the welfare of the cookware industry, improves services to the public, and carries out activities in furtherance of the industry consistent with the public interest.

Standardization Activities
Establishes voluntary standards for products manufactured within the industry. Standards are intended as guides to aid the manufacturer, user, and general public. Standards cover procedures for determining sizes and capacities, uniform terminology for finishes and decorations, specifications for plastic handles and knobs, safety and health guidelines, metal specifications, and metric guidelines. Standards activity is the responsibility of a Standards/Engineering Committee represented by members of domestic cookware/bakeware manufacturers. ANSI Z61.1-1979 has adopted all CMA standards for metal cookware and bakeware.

Standards Development
Standards developer since 1950
270 members participate in standards activities
11 active standards
None processed through ANSI

Standards Designation
STD - Standard
ATC - Acceptance Test Code
WMS - Wood Maintenance Standard
NCL - Nomenclature
Many government bids include CTI Standards as part of the specifications.

The Cooling Tower Institute may certify that a line of towers will perform in accordance with the manufacturers' published ratings.

A nonprofit, technical association dedicated to the improvement of technology, design, performance, and maintenance of cooling towers and cooling tower systems. Consists of manufacturers, users, and suppliers of equipment and chemicals, as well as engineering firms having an interest in cooling water related problems including water and air pollution. International membership.

The standards activities of the Cooling Tower Institute are accredited by ANSI and center on fulfilling user-defined requirement of the industry and its customers. There are 10 published standards including recommended grades, grading rules, and allowable design stresses for redwood lumber; methods and instrumentation for determining water cooling capability of mechanical draft towers; and recommended material, manufacturing limitations, design requirements and allowable loads for timber fasteners. The Institute is also active on standards committees of NACE, ASME, and others.

Standards Handbook

U.S. TAG for Copper and Copper Alloys
### Scope
An engineering development and market research organization for the copper and brass industry; develops new markets for copper and copper alloys; creates new concepts; builds prototypes and proves commercial feasibility for new applications of copper, brass, and bronze. Provides technical support to users of copper and copper alloys.

### Standardization Activities
Carries out standardization activities for brass mill and foundry products. Publishes the Standards Handbook which covers tolerances; alloy data, both wrought and cast; terminology; engineering data; sources; and a specifications cross index. Cooperates with ISO and Pan American Standards Commission (COPANT). Reviews federal and military standards. A Technical Service and Standards Advisory Committee coordinates publication activities and participation in voluntary standard organizations.

**CORDAGE INSTITUTE**

G.P. Foster, Executive Director

42 North Street
Hingham, Massachusetts 02043
(617) 749-1016

Founded: 1920

**Type of Organization**
Trade Association
Standards Developer

**Standards Development**
Standards developer since 1924

**Scope**
Composed of rope and twine manufacturers in the United States, with some Canadian manufacturers and Cordemex of Mexico as special members. Promotes interests of the industry and improves its services to the public; compiles and distributes information; cooperates in handling problems common to the industry.

**Standardization Activities**
Maintains a Technical Committee which develops or participates in developing voluntary, consensus specifications for hard fiber and synthetic rope and twines. Works closely with the U.S. Army, U.S. Navy, the Maritime Administration, the Coast Guard, the
General Services Administration, and others. Works with the Defense Supply Agency (Defense Industrial Supply Center) in regard to military requirements. Cooperates with private organizations including American Merchant Marine Association (towing hawsers on ocean going vessels); American Society of Mechanical Engineers (sling Specifications); National Ski Area Association (rope tow and rescue rope specifications); New York City Fire Department (rescue ropes); public utility companies (specifications and test methods); National Fire Protection Association; and Oil Companies International Marine Forum.

Advises users, consumers and engineers on technical aspects of cordage, twines and ropes.

Ongoing projects include review of testing procedures for breaking strength standards, safety factors, updating of current DI specifications for ropes, chemical and temperature resistance of cordage fibers, resource or expert witness and testing laboratories, and development of standards for abrasion and wet tensile strength.

Publishes technical data, including Quality Control-Minimum Standards; Specifications for Natural and Man-made Fiber Ropes; Standard Test Methods for Synthetic Fiber Ropes; Bend Tests Made on Natural and Synthetic Fiber Ropes; The Cordage Industry Directory; the Safe Use of Rope; Agricultural Twine Standards; Tying Twine standard; Cordate and Rope Definitions; Standard Terminations for Testing; and General Rope Usage.

COS is a research and development consortium funded by a coalition of computer and communications manufacturers, major commercial and industrial users of network systems, elements of the civilian and defense arms of the U.S. government and foreign government and commercial organizations. It includes the North American MAP/TOP Users Group and has numerous university, trade and user group association affiliates.

COS selects and implements test suite specifications profiles based on international OSI/network/ISDN and related standards, contributes to the setting of conformance testing standards, and administers a product certification program - the COS MARK - which serves as a means of promoting high quality conformance and interoperability testing for OSI/ISDN products and services and is an indicator to prospective product purchasers of product interoperability. COS also works with users of open systems to promote the necessary requirements for enterprise, multi-vendor interoperability.

**COSMETIC, TOILETRY AND FRAGRANCE ASSOCIATION**

E. Edward Kavanaugh, President

1110 Vermont Avenue, NW
Suite 800
Washington, DC 20005
(202) 331-1770
FAX: (202) 331-1969

Founded: 1894

**Type of Organization**

Trade Association

**Standards Development**

Developer of more than 300 specifications (voluntary standards) and 500 chemical descriptions since 1942

**Government Adoption**

FDA recognizes the CTFA Cosmetic Ingredient Dictionary as the official nomenclature for ingredient labeling of cosmetic products through 21 CFR S701.3.

**Scope**

A national trade association representing the cosmetic, toiletry, and fragrance industry. Active membership of 266 companies that manufacture or distribute 90% of the
finished cosmetic products marketed in the United States. Also, 278 associate member companies from related industries, such as manufacturers of cosmetic raw materials and packaging materials. Represents its membership internationally in a range of scientific and regulatory areas.

**Standardization Activities**

Specifications developed by a 25 member committee of analytical chemists representing both cosmetic manufacturers and suppliers. Has as its responsibility the publication of the CTFA Compendium of Cosmetic Ingredient Composition which includes specifications that chemically characterize and describe cosmetic ingredients, and test methods and spectra that correspond to these specifications; descriptions of raw materials are provided where specifications have not been developed. Specifications are strictly voluntary and designed to represent the type of ingredients used by the industry. The CTFA Compendium represents the largest collection of authentic specifications on cosmetic ingredients.

In compliance with Food and Drug Administration's regulations, the Association provides standard nomenclature for cosmetic raw materials. A twelve member committee develops this nomenclature.

**COTTON WAREHOUSE ASSOCIATION OF AMERICA**

Donald L. Wallace, Executive Vice President

1150 Connecticut Avenue, NW

Suite 507

Washington, DC 20036

(202) 331-4337

Founded: 1969

**Type of Organization**

Trade Association

Standards Developer

**Scope**

Consists of cotton compress and cotton warehouse owners and operators in the cotton belt states from the Carolinas to California. Associate membership is available to industry-related businesses, such as
insurance companies, banks, equipment dealers, manufacturers, steamship and truck lines.

**Standardization Activities**
Maintains Special Committees on Bale Preparation, Insurance and Standards, and Research and Engineering, which work closely with U.S. manufacturers of cotton bale ties and buckles, with a view to improving their quality, strength, and reliability. Resulting standards, widely used since 1956, cover width of ties, thickness of ties, minimum elongation of ties under stress, flatness of ties, weight and minimum tensile breaking strength of both ties and buckles.

### COUNCIL OF AMERICAN BUILDING OFFICIALS

Richard P. Kuchnicki, President

5203 Leesburg Pike, Suite 708
Falls Church, Virginia 22041
(703) 931-4533

Founded: 1972

**Type of Organization**
Model Code Organization Standards Developer

**Secretariat**
ANSI A117.1, American National Standard for Building and Facilities—Providing Accessibility and Usability for Physically Handicapped People

**Scope**
CABO is a consortium of model building code organizations:
- Building Officials & Code Administration
- International, International Conference of Building Officials and the Southern Building Code Congress

**Standardization Activities**
The members of CABO are the three model building code organizations. Through CABO they coordinate development of their respective codes, and cooperate with other organizations and the federal government. CABO itself has been used as a vehicle for the development of the One and Two Family Dwelling Code and the Model Energy Code, which, in turn, is based on the
ASHRAE standard for energy conservation in new building design. It has also developed the CABO Manufactured Home Construction and Safety Standards.

Standards Developer

Standards Designation
ANSI Z124.x

Government Adoption
All major code bodies and most state codes reference the Z124 Standards.

Certification
CMI administers a Certification Program for cultured marble lavatories, shower receptors and bathtubs utilizing third party independent testing laboratories.

Scope
Represents manufacturers of cultured marble products such as lavatories, bathtubs, shower receptors, water closets and flat stocks. Focuses on improving the quality of cultured marble in the marketplace and increasing market penetration of members' products.

Standardization Activities
Represented on ANSI Z124 Committee that is responsible for standards covering bath tubs (Z124.1), shower pans (Z124.2), lavatories (Z124.3), water closets (Z124.4), and kitchen and bar sinks (Z124.6).

Availability
Distributed through ANSI

Works through other organizations to develop standards

Representation
American Dental Association, the International Dental Federation, American National Standards Institute, the Food & Drug Administration, and other specialized organizations which develop standards and specifications for dental equipment and dental supplies.

Scope
A trade organization of dental manufacturers; represents 170 U.S. companies engaged in research, development, and manufacture of dental equipment and dental supplies. Represents its membership in areas such as technology, government relations, exports, and industry activities.

Standardization Activities
Maintains Technology Committee which works with the FDA, the Defense Department, the National Institute of Standards and Technology and other government agencies, as well as with the American Dental Association, in their development of standards, guidelines, certification, and acceptance programs on various dental products. Develops manufacturing practices manuals.

Keywords
dental supplies; dental equipment; medical equipment;

Door Operator and Remote Controls Manufacturers Association

Frank S. Fitzgerald, Executive Secretary

Suite 201
655 West Irving Park
Chicago, Illinois 60613-6198
(312) 525-2644

Founded: 1959  Standards Staff: 1

Type of Organization
Trade Association
Works through other organizations to develop standards

Scope
A national trade association comprised of manufacturers of vehicular door operators — residential, commercial, or industrial — and/or remote controls for the operation.

Standardization Activities
Maintains a technical committee which developed a Minimum Standard for Heavy Duty Industrial and Commercial Draw Bar Type Electrically Powered Door Operators. It no longer develops standards but cooperates with Underwriters Laboratories in its development of UL 325, Standard for Safety for Door, Drapery, Gate, and Window Operators and Systems. Also cooperates with the Federal Communications Commission regarding the rules and equipment authorization procedures of radio frequency devices. Cooperates with the Consumer Products Safety Commission and the National Safety Council on the safe use of the equipment.

Keywords
doors; remote control; hardware; buildings;

Ductile Iron Pipe Research Association

Troy F. Stroud, P.E., President

245 Riverchase Parkway East
Suite 0
Birmingham, Alabama 35244
(205) 988-9870

Founded: 1915

Type of Organization
Trade Association
Works through other organizations to develop standards

Representation
Three members active in voluntary standards including representatives on standards committees of ANSI, ASTM, AWWA, ASME, NFPA, and others.
### Scope
American manufacturers of ductile iron pipe, dedicated to maintaining the highest piping standards through a program of continuing research. Ductile iron pipe is used extensively for water and wastewater applications.

### Standardization Activities
Participates in national committees that develop product standards pertaining to ductile iron pipe, including standards for manufacture, design, installation, joints, coatings, linings, fittings, and other appurtenances. Utilities and consulting engineers frequently incorporate these standards in purchase orders and contract specifications. Members also provide standards committees with research and test data concerning their products.

### Formerly
- Cast Iron Pipe Publicity Bureau (late-1920's)
- Cast Iron Pipe Research Association (1979)

### Keywords

**Founded:** 1923

### Type of Organization
Professional Society

### Standards Developer

### Scope
Provides consultation services to professional and amateur ornithologists who are active and licensed by the Fish and Wildlife Service to engage in banding and marking activities of birds protected by the Bird Treaty Acts. Publishes a quarterly magazine dealing with bird banding and related activities and research data, new methods, and field techniques. Membership numbers 725.

### Standardization Activities
Standardizes field methods which further aid work done by appropriate governmental agencies in the collection of field data and statistics of bird populations, bird migration, breeding studies, and similar projects involving marking and banding of birds as a means of gathering these data. Cooperates extensively with the U.S. Department of Interior's Fish and Wildlife Service.
EDISON ELECTRIC INSTITUTE

Matthew C. Mingoia, Manager, Standards Programs

701 Pennsylvania Avenue, NW
Washington, DC 20004-2608
(202) 508-5177   Telex: 710 822 0132
FAX: (202) 508-5225

Founded: 1933   Standards Staff: 4

Type of Organization
Trade Association
Work through other organizations to develop standards

Representation
More than 300 representatives serve on more than 100 standards committees of ANSI, IEEE, ASME, NFPA, ASTM, and others.

Scope
Edison Electric Institute is the association of electric companies. Its members serve 96 percent of all customers served by the investor-owned industry. They generate approximately 78 percent of all the electricity in the country and service 74 percent of all ultimate customers in the nation.

Organized in 1933 and incorporated in 1970, EEI provides a principal forum where electric utility people exchange information on developments in their business, and maintain liaison between the industry and the federal government. Its officers act as spokesmen for investor-owned electric utility companies on subjects of national interest.

A basic objective is the "advancement in the public service of the art of producing, transmitting, and distributing electricity and the promotion of scientific research in such fields." EEI ascertains factual information, data and statistics relating to the electric industry, and makes them available to member companies, the public, and government representative.

Standardization Activities
Standards activities are directed toward cost effective programs and innovative techniques to maximize the effectiveness of its representatives serving on national standards committees.

Electric utility companies make extensive use of standards and actively participate in committees.
developing standards they can apply. These include standards for electric power generation and transmission equipment such as boilers, all types of turbines, transformers, circuit breakers, valves and nuclear; all aspects of radiation measurement and protection; and standards for safety, air and water quality, computers, and many others.

Although the Institute is not a standards developing organization, it works within the voluntary standards system to coordinate electric utility industry standards activities and act as the industry voice. Its Engineering, Operating & Standards Executive Advisory Committee has overall responsibility for directing all EEI activities relating to codes and standards. It recommends policy to the EEI Board in regard to participation in standards development work within the voluntary consensus organizations and coordination with government agencies which develop or reference standards in the regulatory process.

The Standards Coordinating Task Force (SCTF) coordinates high priority standards activities of interest to the industry and provides relevant information to member companies. A formal program of interfacing directly with standards developing organizations such as ANSI, IEEE, ASME, NFPA, and ASTM includes a procedure for monitoring and coordinating international standards activities. There are two Task Forces that closely monitor and participate in the NESC and NEC triennial revisions of both Codes.

The SCTF also monitors and coordinates participation in the development of metrication programs within the electric utility industry and monitors activities of the American National Metric Council.

In addition to these committees specifically tasked to monitor and coordinate broad issues and subjects, each EEI technical committee is responsible for monitoring the work of standards-developing committees in their subject area. The technical committees accomplish this through a Codes and Standards Subcommittee which, in cooperation with the Association of Edison Electric Illuminating Companies, advises the Electric Light and Power representatives on standards committees of the industry's position on proposed standards. Each EEI member company is given the opportunity to assign a Senior Engineering Executive who is made aware of standards activities and issues through an EEI Engineering, Operating & Standards newsletter and special reports.

Standards Staff: 2

Type of Organization
Trade Association
Standards Developer

Scope
An international trade association of companies that sell, service, and repair industrial electric motors, generators, transformers, controls, and similar electro-mechanical equipment. Over 2,700 members worldwide.

Standardization Activities
Develops standards and limited warranties for the electrical apparatus sales and service industry that cover the mechanical and electrical aspects of repair, rebuilding, and testing electro-mechanical equipment. This includes single and polyphase AC induction motors, DC motors and generators, transformers (liquid and dry types), hermetic motors, and hand power tools. Also defines the condition of electrical equipment for sale, and has written standard warranties for each condition specified. Developed set of electrical safety standards.

ELECTRICAL GENERATING SYSTEMS ASSOCIATION

Anthony Raucci, Executive Director

Box 9257
Coral Springs, Florida 33065
(305) 755-2677

Founded: 1963

Type of Organization
Trade Association
Standards Developer
Scope

An international industry organization representing manufacturers and distributors involved with the generation, transmission, storage, and control of electrical energy not directly supplied by the public utility companies.

Standardization Activities

Maintains a cooperative standards program for developing and promulgating standards and specifications to serve the industry and its customers; provides an effective liaison between the industry and its customers, both civilian and military, for the interchange of information and ideas; and assists its customers in obtaining the most advanced and reliable products and scientific developments from the industry.

ELECTRONIC DATA INTERCHANGE ASSOCIATION

Jerome L. Dreyer, President and CEO

225 Reinekers Lane, Suite 550
Alexandria, Virginia 22314
(703) 838-8042

Founded: 1968 Standards Staff: 24

Type of Organization

Trade Association
Standards Developer

Standards Development

Has developed 170 industry specific electronic data interchange (EDI) standards for computer-to-computer intercompany business transactions.

Standards Designation

EDI prefix

Secretariats

Industry-specific EDI groups (AIR, OCEAN, MOTOR, RAIL, CHEMICAL)

Scope

A public interest association with membership open to those companies interested in modernizing and automating business systems through the use of computer and communications technology.

Standardization Activities

A national center for the coordination of intercompany standards for the electronic transmission and receipt
of over 170 different business transaction sets used in electronic data interchange (EDI). Develops EDI standards which are used as the baseline standards for computer-to-computer data interchange in the rail, motor, ocean, and chemical industries, including claims, filing and other business applications. Maintains liaison on the development of data standards with industry and government standards bodies, including the United Nations Economic Commission for Europe.

**ELECTRONIC INDUSTRIES ASSOCIATION**

John M. Kinn, Vice President, Engineering Department

2001 Eye Street, NW
Washington, DC 20006
(202) 457-4961    Telex: 710-822-0148

Founded: 1924    Standards Staff: 17

**Type of Organization**
Trade Association

**Standards Development**
Standards developer since 1926
3000 member representatives participate in standards activities through 750 committees, subcommittees and task groups
Majority of EIA standards processed through ANSI
Draft standards available for review

**Standards Designation**
EIA and JEDEC prefixes

**Government Adoption**
The Department of Defense adopts EIA standards applicable to their needs.

**Certification**
EIA is the National Standards Organization (NSO) which is responsible for the IECQ-System certification process within the United States

**Secretariats**
IEC 12F, 46, 46E, 48, 48B, 48C.

**Scope**
A national trade association of companies involved in the manufacture of electronic components, equipment, and systems for consumer, industrial, and government applications. They represent their members in national and international areas of interest.
| **Standardization Activities** | Involved in standardizing components such as resistors, capacitors, switches, transformers, inductors, transistors, and integrated circuits; television tubes, broadcast equipment, data transmission, numerical control, printed circuits, radios, phonographs, satellite communications, and tape systems. Processes standards through ANSI and the IEC. Standards are in use throughout the world either by direct application or by adoption as an international standard. Engineering standards are designed to eliminate misunderstanding between manufacturers and purchasers, facilitate interchangeability and improvement of products, and assist the purchaser in selecting and obtaining with minimum delay the proper product for his particular need. |
| **Availability** | Distributed through Electrical and Electronic Manufacturing Association of Canada, IHS, Global, DECO, NSA, and American Technical Publishers, Ltd. |
| **Keywords** | telecommunications; electronics; industrial equipment; electrical equipment; defense; consumer products; data processing; |

**ELECTRONIC MEDIA RATING COUNCIL**

Melvin A. Goldberg, Executive Director

509 Madison Avenue  
New York, New York 10022  
(212) 754-3343

Founded: 1963  
Standards Staff: 1

**Type of Organization**  
Trade Association

**Scope**

The Electronic Media Rating Council is responsible for determining criteria and standards for audience measurement services; establishing and administering a system of accreditation for audience measurement services; providing and administering an audit system designed to insure users that audience measurements are conducted in conformance with the criteria, standards and procedures developed.

**Standardization Activities**

The Rating Council is made up of representatives of TV and radio networks, broadcast groups and industry
associations representing cable, radio, television, advertising agencies and advertisers. The Council sets the minimum standards which rating services are expected to meet to merit accreditation. The standards involve such items as ethical and operational standards (governing the quality and integrity of the entire activity) and disclosure standards (specifying the detailed information about a rating service which must be made available to users, as well as the form in which the information should be made available.

**ENTOMOLOGICAL SOCIETY OF AMERICA**

Raymond L. Everngam, Jr., Managing Editor

9301 Annapolis Road
Lanham, Maryland 20706-3115
(301) 731-4535

Founded: 1889

**Type of Organization**
Scientific Society

**Standards Designation**
Approved Common Names of Insects

**Scope**
Professional society of entomologists and others interested in the study and control of insects. Maintains specialized education, placement service, and research programs. Compiles statistics.

**Standardization Activities**
Committees work to standardize and define common and scientific names of insects and related arthropods, as well as insecticide names.

**Availability**
Distributed directly

**Keywords**
insects; entomology; insecticides; pesticides; public health; materials;

**EQUIPMENT AND TOOL INSTITUTE**

Donn R. Proven, Executive Manager

1545 Waukegan Road
Glenview, Illinois 60025
(708) 729-8550

244
**Type of Organization**
Trade Association
Standards Developer

**Scope**
Manufacturers of automotive service equipment and tools.

**Standardization Activities**
Prepares test equipment performance guidelines. Maintains the Performance Test Group which communicates with vehicle manufacturers to insure equipment compatibility and with federal and state agencies to insure equipment complies with performance regulations. Publishes guidelines which provide performance criteria that can be used to characterize service equipment as being of a professional grade for the automotive technician. Equipment includes voltmeters, ohmmeters, brake testing equipment, wheel alignment, headlamp testers, timing devices, gauges, exhaust emission analyzers, and others.

**Availability**

**EQUIPMENT MANUFACTURERS INSTITUTE**
John Crowley, Director of Engineering & Safety Programs
10 Riverside Plaza, Suite 1220
Chicago, Illinois 60606-3710
(312) 321-1470 FAX: (312) 321-1480

**Founded:** 1893

**Type of Organization**
Trade Association

**Representation**
Works through other organizations to develop standards
ASAE, SAE, ANSI

**Scope**
Provides an ongoing forum for manufacturers of farm construction and industrial equipment to work together to have an effective voice in decisions affecting their products, their companies, their industries, and the economic well-being of their customers.

**Standardization Activities**
EMI is not a standards development organization. Committees of the Institute utilize industry expertise to develop proposals which are submitted to engineering standards organizations for consideration as possible voluntary standards. Almost all EMI standards proposals are submitted to the American Society of Agricultural Engineers, the Society of
Automotive Engineers, and (indirectly) to the American National Standards Institute and the International Organization for Standardization.

ETL TESTING LABORATORIES

James W. Tucker, Chairman and CEO

Industrial Park
Post Office Box 2040
Cortland, New York 13045
(607) 753-6711

Founded: 1896

Type of Organization

Product Test and Certification Laboratory
Standards Developer

Certification

Approximately 40 percent of ETL's activity is in the field of product certification where it conducts performance tests on a wide range of products. These tests are conducted according to industry standards which are national in scope. Directories are published periodically showing products such as air conditioning equipment, gas appliances, builders hardware, fluorescent ballasts, refrigerators and freezers, and carpeting that meet the requirements for the appropriate certification program.

ETL's certification programs are recognized and used by federal agencies such as General Services Administration (GSA), Department of Housing and Urban Development (HUD), Occupational Safety and Health Administration (OSHA), and Department of Veterans Affairs (VA).

Scope

An independent, employee-owned testing, inspection, certification and safety labeling agency. A multi-disciplined organization, ETL presently operates within eleven disciplines: Acoustical, Air Conditioning and Refrigeration, Carpet, Design Services, Electrical,
Heating, Mechanical, Photometric, Quality Control, Glazing, and Safety.

**Standardization Activities**

Develops testing and certification procedures for standards through experimental testing to determine appropriate test methods. In addition, members of ETL's professional staff are active participants in standards committees sponsored by ANSI, ASHRAE, IEC, NEMA, NFPA, SAE, IEEE, and IES among others.

ETL is also an independent third party testing laboratory providing safety testing to nationally recognized standards such as UL, ANSI, and IEC. ETL's labeling, listing and follow-up program has been accepted by all 50 states, military branches, and the building code agencies for the testing and labeling of electrical and gas or oil-fired products. In addition, ETL has been designated as a Nationally Recognized Testing Laboratory by the Occupational Safety and Health Administration.

**EXCHANGE CARRIERS STANDARDS ASSOCIATION**

O.J. Gusella, Executive Director

5430 Grosvenor Lane
Bethesda, Maryland 20814
(301) 564-4505

Founded: 1983

**Type of Organization**

Trade Association

**Representation**

Standards Developer

Represents exchange carrier interests on ANSI accredited committees and standards boards and other organizations.

**Secretariat**

To Accredited Standard Committee T1 - Telecommunications; ASC .05 Wood Poles and Wood Products; the Carrier Liaison Committee; the Information Industry Liaison Committee; and the Telecommunications Industry Forum.

**Scope**

A private, voluntary association of the exchange carrier industry which addresses technical standards
Standardization Activities
Represents exchange carrier interests in all standards and related technical fields, and provides the sponsoring organization and secretariat for an independent interconnection and interoperability standards committee (T1). Open to all parties interested in the formulation of such standards. These parties include exchange and interexchange carriers, manufacturers, enhanced service providers, user groups, professional associations, and government agencies.

**EXPANDED SHALE, CLAY AND SLATE INSTITUTE**

John P. Ries, Managing Director
Post Office Box 21526
Salt Lake City, Utah 84121

Founded: 1952

Type of Organization
Trade Association
Standards Developer

Scope
A nonprofit technical organization supported by producers of expanded shale, clay, and slate using the rotary kiln process. Objectives are improving and extending the uses of expanded shale aggregate through research and development; disseminating data to the architectural and engineering professions and to the construction industry; cooperation and collaboration with other technical organizations interested and active in the field of concrete; and maintenance of standards for uniformly high product quality.

Standardization Activities
Active in ASTM, ACI, CSI, and ASCE in promulgating building codes, test methods, recommended practices, specifications, and standards for structural lightweight concrete, lightweight concrete masonry, and/or lightweight aggregates.

Availability
Distributed directly or through members
Formerly
Expanded Shale Institute (1952)

EXPANSION JOINT MANUFACTURERS ASSOCIATION

Richard C. Byrne, Secretary
25 North Broadway
Tarrytown, New York 10591
(914) 332-0040

Founded: 1955

Type of Organization
Trade Association
Standards Developer

Scope
Manufacturers of joints for piping systems. Fosters and studies the problems peculiar to expansion joints.

Standardization Activities
Through its Technical Committee, engages in the improvement of standards which were developed in the interest of public safety and for guidance in design and determination of service capacities and quality of bellows expansion joints.

Keywords
expansion joints; industrial equipment;

FACTORY MUTUAL RESEARCH CORPORATION

Carl E. Miller, Senior Vice President and Chief Operating Officer
1151 Boston-Providence Turnpike
Post Office Box 9102
Norwood, Massachusetts 02062
(617) 762-4300 Telex: 92-4415
FAX: (617) 762-9375

Founded: 1835 Standards Staff: 184

Type of Organization
Product Test and Certification Laboratory
Standards Developer

Representation
FMRC engineers participate in standards committees of the NFPA, ASME, ASTM, AWWA, IEEE, ISA, ANSI, ISO, and IEC.

Standards Designation
Data Sheets, Loss Prevention Data, D.S. prefix Approval Standards
Certain FMRC standards are referenced in codes and regulations of various local, state, and federal agencies. OSHA has designated FMRC as a test agency for certain types of equipment requiring approval.

Operates an approval service for a wide range of fire protection and property loss control products. In addition, the approvals staff evaluates products to certify that they meet certain standards of other organizations (e.g. ASTM).

A nonprofit corporation, providing loss control standards development, basic research, applied research, and full-scale testing primarily for industrial, commercial, and institutional policyholders insured by Allendale Mutual, Arkwright, and Protection Mutual. Maintains full-scale testing laboratories and modeling techniques.

Prepares loss prevention data sheets based on staff studies of industrial processes and hazards, loss experience, test work, and research by FMRC scientists and engineers, property inspections by field engineers and input from industry, professional and trade associations, and other sources. Subject matter includes building design and materials, fire protection equipment and systems, heating and electrical equipment, pressure vessels and boilers, hazardous materials and processes, and mechanical equipment. These provide recommended guidelines for the protection of industrial, commercial, and institutional properties against fire, explosions, wind, boiler and machinery accidents, and other insured perils.

Provides approval standards covering various types of fire protection equipment, flammable liquid equipment, fuel and combustion controls, boiler combustion safeguards, industrial trucks, electrical equipment, fire and burglar alarm systems and services, building material assemblies, and products. These specify requirements for approval and listing of equipment, materials, and services intended for loss control purposes and for potential hazards. An approval process includes inspection and audit of the product manufacturer's production and quality control facilities, with periodic follow-up. Approved products are typically labelled as "Factory Mutual System Approved" or "FM Approved."

Standards Developer and works with other organizations to develop standards

Standards Development
Standards developer since 1988
Uses the ANSI canvass review method.

Standards Designation
FACT

Scope
A national association of industry trade associations and governmental agencies which develop, administer or use automatic identification standards and which have a common interest in the reduction of the number of different standards and the development of inter-industry and international standards. FACT represents the views of its members to the international community through liaison with the affiliates of AIM USA (which serves as the secretariat for FACT).

Standardization Activities
Eighteen member organizations and 5 associate company members are involved in the standardization of data identifiers for automatic identification systems and the development of a standard shipping container label in conjunction with ANSI MH10.8.

Availability
Distributed through AIM USA and AIM organizations around the world

Keywords
automatic identification; data identifiers; shipping labels; bar codes;
FEDERATION OF SOCIETIES FOR COATINGS TECHNOLOGY

Robert F Ziegler, Executive Vice President

1315 Walnut Street
Suite 832
Philadelphia, Pennsylvania
(215) 545-1506

Founded: 1922

Type of Organization
Technical Society
Works through other organizations to develop standards

Representation
Many members are engaged in standardization activities with ASTM.

Scope
A technical, professional society of the coatings manufacturing industry. Objectives are to provide and collect scientific, practical, and technical information on the development, manufacture, and use of coatings and printing inks, to encourage scientific and technical educational activities and to promote efforts to improve coatings products and their manufacture. Membership numbers 7,300 and more than 1,000 manufacturers are represented.

Standardization Activities
Cooperates with ASTM on coatings-related standards.

Formerly
Federation of Paint and Varnish Production Clubs

Keywords
paint; coatings; inks; materials;

FELT MANUFACTURERS COUNCIL OF NORTHERN TEXTILE ASSOCIATION

Karl Spilhaus, President

230 Congress Street
Boston, Massachusetts 02110
(617) 542-8220

Founded: 1915

Type of Organization
Trade Association
Standards Developer

Standards Designations
FS14-68/71

Scope
Represents over 80 percent of the pressed felt industry of the United States. Part of Northern Textile Association since 1961.
Actively engaged in the establishment, review, revision, and promulgation of physical and chemical specification requirements for standard types of wool felt in both roll and sheet form. The currently active specification is Wool Felt Standard Specification, FS14-68/71.

In addition to counseling federal agencies and engineering societies, such as the American Society for Testing and Materials and Society of Automotive Engineers, on their wool felt specifications, provides new technical information and papers covering additional wool felt performance characteristics which have not yet reached specification requirement status.

Type of Organization
Trade Association
Works through other organizations to develop standards

Secretariats
Co-Secretariat, ANSI K61.1 Safety Requirement for the Storage and Handling of Anhydrous Ammonia
U.S. Technical Advisory Group to ISO/TC 134 Fertilizers and Soil Conditioners

Scope
Supports standardization through simplification of federal and state fertilizer regulatory laws, as well as chemical analytical methods. Also involved in safety standards activities at state and federal levels.

Standardization Activities
Aims to increase the accuracy and precision of the chemical analysis of fertilizers, and to prevent accidents and injury by means of education and safety practices.
Supports the enactment of state uniform fertilizer laws as recommended by the Association of American Plant Food Control officials. Supports standardization of reporting and publication forms used in various states and counties to record the consumption of fertilizers by material and grade on an annual, semiannual, quarterly, or monthly basis.

Formerly
National Plant Food Institute
Agricultural Nitrogen Institute

**FIBRE BOX ASSOCIATION**

Bruce Benson, President
10 Gould Center
Rolling Meadows, Illinois 60008
(708) 364-9600

Founded: 1940

**Type of Organization**
Trade Association
Standards Developer

**Scope**
A nonprofit trade association representing manufacturers of corrugated and solid fiberboard. Aims to promote the industry's general welfare; to represent members before appropriate government, transportation, industrial, or other agencies; to compile and disseminate statistical information; and to develop data useful to its members in marketing their products.

**Standardization Activities**
Holds membership in the International Corrugated Case Association and participates in pertinent activities of the American National Standards Institute and the International Organization for Standardization.
Advises federal government bodies preparing standards and specifications involving corrugated and solid fiberboard, particularly the General Services Administration.

In conjunction with the Packaging Machinery Manufacturers Institute, it has issued five joint voluntary standards and one recommended practices bulletin, referenced in the FBA Handbook.

**Availability**
Distributed directly

**Standards Development**

Developer of voluntary specifications for flexible packaging material.

28 active standards for cellophane, polyethylene, polyester, and laminated and coated products.

**Scope**

Represents converters of packaging materials and suppliers of film, adhesives, printing inks, and converting machinery. Services include government relations, technical information, and membership.

**Standardization Activities**

Continuous review of industry's need for voluntary regulations. Specifications often serve as the basis for agreement between a converter or supplier and their customers (end-users). Specifications recognized as equal to those of ASTM (American Society for Testing and Materials) and TAPPI (Technical Association of the Pulp and Paper Industry). Works toward eliminating duplication of effort by other standards organizations although some overlap is required.

FRICITION MATERIALS STANDARDS INSTITUTE

Gilbert N. Laycock, Executive Director

588 Monroe Turnpike
Monroe, Connecticut  06468
(203) 452-1877

Founded: 1949  Standards Staff: 1

Type of Organization
Trade Association
Works through other organizations to develop standards

Scope
An association of worldwide manufacturers of friction materials (brake linings, brake blocks, and clutch facings). Members represent over 80% of United States manufacturers of friction materials.

Standardization Activities
Standardization activities, administered by the Data Book and Technical Committee, comprise 25% of the total program. Issues catalogs using a standard numbering system for all current automotive brake linings, brake shoes, and clutch facings. A copyrighted numbering system is authorized for use by the institute, its members and their customers. FMSI's standard numbering system is worldwide in scope. Publishes the Automotive Data Book.

Formerly
Brake Lining Manufacturers Association (BLMA)

Keywords
materials; brake linings; automotive; machinery; clutch facings;

GAS APPLIANCE MANUFACTURERS ASSOCIATION

Harry A. Paynter, President

1901 North Moore Street
Arlington, Virginia  22209
(703) 525-9565  Telex: (703) 525-9565

Founded: 1936

Type of Organization
Trade Association
Works through other organizations to develop standards
Over two hundred representatives of member firms active in 50 standards committees of ANSI, ASTM, ASHRAE, ASME, NFPA, and others.

GAMA operates programs which randomly select gas and oil furnaces and boilers, and gas, oil, electric, and heat pump water heaters from participating members and tests them in accordance with DOE efficiency test procedures at ETL Testing Laboratories, Inc. to verify the manufacturers established efficiency ratings which are published semiannually.

A trade association for 200 manufacturers of residential, commercial, and industrial gas appliances and equipment; gas, electric, heat pump, and oil water heaters; gas- and oil-fired central furnaces; and equipment used in the production, transmission, and distribution of natural gas.

Works through the national standards promulgation procedures of other groups and organizations which develop and maintain 80 standards. In this manner, a high quality of manufacturers' input has been provided in the development and constant maintenance of standards for gas appliances and equipment which have been recognized as American National Standards by the American National Standards Institute.

Cooperates with Government agencies such as the Department of Commerce, Department of Energy, Consumer Product Safety Commission, Federal Housing Administration, Federal Trade Commission and General Services Administration.

manufacture of general aviation aircraft, aircraft engines, avionics, and component parts of general aviation aircraft.

**Standardization Activities**

Directed toward meeting industry needs with respect to dissemination of operating, maintenance and safety information, or to government certification requirements. GAMA standards include specifications for pilot's operating handbook, manufacturers maintenance data, decal to minimize the misfueling of general aviation aircraft, and specification for tape to mark fueling nozzles. In the case of standards developed to fulfill government requirements, FAA participates in the development and approval of the standards. Standards have been used worldwide by aircraft manufacturers in order to meet FAA's requirements without the need to develop individual means of compliance. Monitors the activities of other standards developing organizations, including RTCA, SAE, ASTM, and the ISO.

**GLASS PACKAGING INSTITUTE**

Lewis D. Andrews, Jr., President

1801 K Street, NW
Suite 1105-L
Washington, DC 20006
(202) 887-4850

FAX: (202) 785-5377

Founded: 1945

**Type of Organization**

Trade Association
Standards Developer

**Scope**

Represents the manufacturers of glass containers and closures producing 90 percent of the United States output. Promotes the continued growth and acceptance of glass containers as desirable, competitive packages of beverages, foods, and other commodities.

**Standardization Activities**

Maintains a Technical Committee augmented by specific subcommittees and task groups. This committee meets regularly with qualified specialists from participating firms to review and investigate unique technical problems developing in the industry. Participated in the development of the Department of Commerce, Voluntary Product Standard for Carbonated Soft Drink
Bottles (PS 73-89), which covers major considerations in the manufacture and control of containers for carbonated soft drinks.

Unified Number Designations
Certification
No certification programs; supplier self certification

Secretariats
ASTM Committee B-2, Section on Unified Numbering System Designations for Precious Metals

Scope
An international trade association of miners, refiners, fabricators, and bullion dealers. Extends the market for the use of gold through publications, seminars, joint symposiums with technical organizations, and trade shows.

Standardization Activities
Develops standard alloy designations for gold alloys for Unified Numbering System for Metals and Alloys issued by the Society of Automotive Engineers (SAE) and the American Society for Testing and Materials (ASTM).

Availability
Distributed directly and through ASTM and SAE

Keywords
gold; precious metals; bullion; alloys; materials;

GRAIN ELEVATOR AND PROCESSING SOCIETY

David Krejci, Executive Vice President

301 4th Avenue South
Suite 365
P.O. Box 15026 Commerce Station
Minneapolis, Minnesota 55415
(612) 339-4625

Founded: 1930 Standards Staff: 1

Type of Organization
Professional Society
Works through other organizations to develop standards

Scope
An international association of individuals working directly with grain handling, operations or processing, or individuals providing products and services to the grain handling and processing industries. Promotes individual professionalism and fellowship, and safe, efficient operations within the grain and processing industries.

Standardization Activities
Promotes safe, efficient, cost-effective regulations in the grain handling and processing industries.

Not a standards developer but works through volunteer committees formed both by GEAPS and other grain industry associations.

Committees working with standards and regulatory agencies are the Safety and Health Committee and Grades and Weights Committee. The Safety and Health Committee...
works with and monitors the activities of the Occupational Safety and Health Administration. The Grades and Weights Committee works with the USDA Federal Grain Inspection Service. Standards relating to air and water quality, use of respiratory equipment, noise levels, equipment maintenance, emergency procedures, safety, and air transportation are also monitored.

Formerly
Society of Grain Elevator Superintendents

GRAPHIC COMMUNICATIONS ASSOCIATION

Norman W. Scharpf, President

1730 North Lynn Street, Suite 604
Arlington, Virginia 22209

Founded: 1966 Standards Staff: 3

Type of Organization
Trade Association
Standards Developer

Standards Development
Standards developer since 1976
40 member committees plus staff participate in standards activities
Three active standards or recommended specifications
One being processed through ISO
Draft standards available for review

Standards Designation
GCA Standard; recommended specifications

Government Adoption
Department of Defense, Internal Revenue Service, and others have adopted GCA standards.

Certification
No certification, qualification, or accreditation programs

Scope
An international membership association of printers, publishers, suppliers, and related industry firms dedicated to advancing the application of electronic technologies and modern management techniques in the graphic communications industry.

Standardization Activities
Develops standards and specifications for text processing and textual data base identification; specifications for computer preparation of publications mailing labels; structures for magnetic tape transmittal of name and address information for printing and publishing applications; production
specifications for web offset publications; operation codes for the pressroom; computer protocols for various functional areas. Works with the industry Specifications Committee for Web Offset Publications, and takes a membership role in ANSI X3J6, X3V1 and related task groups.

**Availability**
Distributed directly and through PIA (Printing Industries of America, Inc.)

**HACK AND BAND SAW MANUFACTURERS ASSOCIATION OF AMERICA**

Charles M. Stockinger, Secretary/Treasurer

1230 Keith Building  
Cleveland, Ohio 44115  
(216) 241-7333  
Telex: 980393  

Founded: 1959

| **Type of Organization** | Trade Association  
Standards Developer |
|-------------------------|-----------------------------|
| **Standards Development** | Standards developer since 1920  
Two active standards |
| **Standards Designation** | ANSI prefix |
### Scope
A trade association consisting of 13 United States manufacturers of hack and band saw blades. Promotes common business interests of the industry.

### Standardization Activities
Has been active in the standardization of hack saw blade sizes and band saws. Currently active on ASME B94 TC 19 Standardization Committee for Hack, Band, and Hole Saws, and on ISO/TC 29 WG 15, Band Saws. Continuously reviews and recommends changes in standards due to rapid addition of new blades and applications in the market place. Currently working with machine manufacturers for band saw length standardization.

### Availability
Distributed directly and through ANSI

### Formerly
Merged Hack Saw Association and Metal Cutting Band Saw Association (1959)

### Keywords
cutting; saws; manufacturing;

### HAIR INTERNATIONAL

Rhonda Newell, Office Administrator
1318 Starbrook Drive
Charlotte, North Carolina 28210

Founded: 1924

### Type of Organization
Professional Society
Standards Developer

### Certification
Examinations to certify ability to do hairpiece work, styling, coloring, relaxing, and merchandising are required for the professional certification of barbers.

### Scope
Aims to professionalize the industry through education and standardization.

### Standardization Activities
Administers a National Education Council and Executive Committee which are active in standards activities. Standard rules and regulations are written for and apply to barber colleges, individual students and barbers, hairstylists, textbooks, and for judging contestants in contests. State regulations, however, supersede Hair International rules and regulations. Advocates use of a barber stylist standardized examination and educational program for the profession. Current projects include standardization of advanced educational methods in barber schools, as well as for
shows and educational seminars. Promotes its standards through mailings, personal contact, a monthly magazine, and barber shows.

Formerly
Associated Master Barbers and Beauticians of America

Availability

barbers; hair; beauticians; education;

HAND TOOLS INSTITUTE

Richard C. Byrne, Executive Director

25 North Broadway
Tarrytown, New York 10591
(914) 332-0040

Founded: 1935

Type of Organization
Trade Association
Standards Developer

Standards Development
65 members participate in standards development
25 active standards
Processed through ANSI

Standards Designations
ANSI B107.x

Scope
Promotes and furthers the interests of its members relative to manufacturing, safety, standardization, international trade, and government relations. Provides a broad spectrum of educational subjects of industry interest, such as statistical and marketing surveys. Educates the hand tool user on the safe and proper use of hand tools.

Standardization Activities
Develops and advances standards dealing with performance, design and safety. Representatives serve on U.S. TAGs to ISO standards committee.

Availability
Distributed directly and through ANSI

Formerly
Service Tools Institute

Keywords
tools; industrial equipment; consumer products;
HARDWOOD MANUFACTURERS ASSOCIATION

Susan M. Regan, Executive Vice President
2831 Airways Boulevard, Suite 205
Memphis, Tennessee 38132
(901) 525-8221

Founded: 1935

Type of Organization
Trade Association
Works through other organizations to develop standards

Scope
Manufacturers of southern hardwood lumber and hardwood products. Compiles statistics.

Standardization Activities
Southern hardwoods are graded under the rules of the National Hardwood Lumber Association. Cooperates with the National Hardwood Lumber Association in grade standardization of hardwood lumber; also with Government agencies and all lumber associations in the development of American Lumber Standards fostered by the Department of Commerce.

Formerly
Southern Hardwood Lumber Manufacturers Association

Keywords
lumber; wood products;

HARDWOOD PLYWOOD MANUFACTURERS ASSOCIATION

E.T. Bill Altman, President
1825 Michael Faraday Drive, Box 2789
Reston, Virginia 22090
(703) 435-2900

Standards Staff: 4

Type of Organization
Trade Association
Standards Developer

Certification
HPMA has inspection, testing, and certifying programs for glue bond, structural, flamespread, and formaldehyde emissions.

Scope
A national trade association for hardwood plywood and veneer manufacturers and prefinishers of hardwood plywood. Functions on a national and international level representing its membership at United Nations Food and Agriculture Organization (UN FAO) Wood Based Panel Product Meetings and Asian plywood conferences held every two years. Promotes the sale and use of hardwood plywood.
**Standardization Activities**

Monitors U. S. model building codes with reference to hardwood plywood products.

**Availability**

Distributed directly

**Formerly**

Hardwood Plywood Institute

**Keywords**

hardwood plywood; veneer; paneling; flooring; construction; building; wood products;

**HEALTH INDUSTRY MANUFACTURERS ASSOCIATION**

Norman F. Estrin, Ph.D., Vice President, Science and Technology

1030 15th Street, NW, Suite 1100
Washington, DC 20005
(202) 452-8240

Founded: 1975

**Type of Organization**

Trade Association

Works through other organizations to develop standards

**Secretariats**

U.S. Technical Advisory Groups for IEC/TC 62 and TC 62A

**Scope**

330 manufacturers of medical devices and in vitro diagnostics. Focuses on legislative and regulatory international and health policy issues affecting the industry.

**Standardization Activities**

Works through other organizations to ensure that member views are represented on policy issues related to voluntary and regulatory standards. Cooperates with AAMI, ASTM, NCCLS, ANSI, and other organizations.

**Keywords**

health; medical equipment; diagnostic products;
HEALTH PHYSICS SOCIETY

Richard J. Burk, Executive Secretary

8000 Westpark Drive
Suite 400
McLean, Virginia 22102
(301) 790-1745

Founded: 1956

Type of Organization
Professional Society
Standards Developer

Standards Development
Standards developer since 1956
100 members participate in standards activities
17 active standards
10 in development stage
All processed through ANSI

Government Adoption
Several HPS/N13 standards have been adopted by
government agencies, such as the NRC.

Secretariats
ANSI N13 Committee on Radiation Protection since 1976

Scope
Encourages the development of scientific knowledge and
practical means for the protection of man and his
environment from the harmful effects of radiation,
while encouraging its optimum utilization for the
benefit of mankind.

Standardization Activities
Standards development directed toward the area of
radiation protection including radiation monitoring,
air sampling, personnel dosimetry, bioassay,
environmental surveillance, and radiation emergency
response. Standards are widely used by nuclear facili-
ties, regulatory agencies, research and academic
institutions, and medical facilities which participate
in their development.

Availability
Draft standards distributed directly. Published
standards distributed through ANSI.

Keywords
dosimetry; radiation; nuclear energy; public health;

HEAT EXCHANGE INSTITUTE, INC.

John H. Addington, Secretary/Treasurer

1621 Euclid Avenue
1230 Keith Building
Cleveland, Ohio 44115-2180
(216) 241-7333 FAX: (216) 241-0105
HEX is a nonprofit trade association committed to the technical advancement, promotion, and understanding of a broad range of utility and industrial-scale heat exchanger and vacuum apparatus. The Institute concentrates its efforts on the manufacturing and engineering aspects of steam surface condensers, closed feedwater heaters, power plant heat exchangers, liquid ring vacuum pumps, and steam jet ejectors.

Develops standards concerning steam surface condensers, closed feedwater heaters, power plant heat exchangers, liquid ring vacuum pumps, and steam jet ejectors.

condensers; feedwater heaters; heat exchangers; vacuum pumps; steam jet ejectors; energy; industrial equipment;

HELIICOPTER ASSOCIATION INTERNATIONAL

Frank L. Jensen, Jr., President

1619 Duke Street
Alexandria, Virginia 22314-3439
(703) 683-4646
Telex: 89-615
FAX: (703) 683-4745

 Founded: 1948

Type of Organization
Trade Association
Works through other organizations to develop standards

Representation
Federal Aviation Administration, National Transportation Safety Board, National Fire Protection Association, and other national and international organizations developing standards for safety, test, performance, and environment affecting helicopter design or operation.

Certification
Participates in development and coordination of certifications promulgated by federal, state, and international authorities.

Scope
Nearly 1,100 member companies, including 542 civil helicopter operators in 47 countries. Its 24 committees represent the helicopter industry in federal and state regulatory matters, and provide civil helicopter operator user input in the areas of federal aviation regulation, heliport development, noise, and
related subjects. Develops, promotes, and conducts helicopter safety and management education programs worldwide. Works with the National Transportation Safety Board and the Federal Aviation Administration to identify accident cause factors and trends relating to accident prevention. Publishes periodic Safety Review newsletters.

**Standardization Activities**

Develops, coordinates, and reviews recommended federal, state, and local standards and criteria for heliport and helicopter operations; assists community planners and heliport developers in environmental assessment and analysis of proposed heliports in communities and city business districts; participates in the development of National Fire Protection Association codes involving heliport/helicopter fire protection and crash/rescue services. Develops, coordinates, and recommends to federal, state, and local authorities standards and criteria for the establishment of civil public-use heliports, hospital heliports, off-shore helidecks, private and personal use heliports.

Coordinates emergency medical service planning with national and regional medical authorities, other associations, emergency planners, hospital administrations, helicopter operations, and manufacturers to establish acceptable operational criteria for specific emergency medical service applications.

**Formerly**

Helicopter Association of American (HAA)

**Keywords**

helicopter; heliport; aviation; safety; transportation; emergency medical care;

**HOME AUTOMATION ASSOCIATION**

Nick Pyle, Association Administrator

Post Office Box 3731
Washington, DC 20007
(202) 333-8579

Founded: 1988

**Type of Organization**

Trade Association

Works through other organizations to develop standards

**Representation**

Represents dealers, installers, architects, utilities, manufacturers, designers, engineers, home builders, consultants, and individuals interested in home automation.
**Scope**

Association members meet under HAA's umbrella to discuss issues that affect the home control industry. HAA provides an unbiased forum to discuss the advancement of the home control industry and does not advocate the use of any particular product or protocol. Committees have been established to independently address concerns.

**Standardization Activities**

HAA's Standards and Protocols Committee is addressing need for standards for power line media, packet format, languages and other system elements as well as features which assure compliance with the National Electrical Code and related requirements.

**Keywords**

building; communications; consumer products; information processing; electrical; electronic; energy; environment; heating;

**HOME VENTILATING INSTITUTE - DIVISION OF AMCA**

D.O. Rammien, Executive Director

30 West University Drive
Arlington Heights, Illinois 60004
(708) 394-0150

Founded: 1955

**Type of Organization**

Trade Association

Standards Developer

**Government Adoption**

The HVI label is cited by the Department of Housing and Urban Development, Federal Housing Administration as evidence of compliance with test requirements of the Minimum Property Standards which require that all ventilating equipment be tested and rated according to HVI procedures.

**Certification**

Conducts a program for certified performance standards for residential ventilating devices. HVI certified ratings for air delivery were introduced in 1960 and for sound emission in 1971. All ratings are based on independent tests at Texas A & M University. Products bearing the HVI label must be so certified.

**Scope**

A voluntary organization for manufacturer self-regulation of residential and static ventilating devices.

**Standardization Activities**

Writes recommended practices for manufacturers. Develops certified ratings for air delivery and sound emission related to air change standards for kitchens, bathrooms, and other rooms. Recognized as a quality
control agency by the International Conference of Building Officials. Recognized as a testing agency by the Building Officials and Code Administrators International. Develops standards for space ventilators. Cooperates with ASHRAE, CSA and other organizations in developing proposed standards. Standards are available in HVI's guide and annual directory of ratings.

HUMAN FACTORS SOCIETY

Lynn Strother, Executive Administrator
P.O. Box 1369
Santa Monica, California 90406
(213) 394-1811

Founded: 1957       Standards Staff: 1

Type of Organization
Professional Society
Standards Developer

Standards Development
100 members active in standards activities
One standard available

Secretariats
U.S. TAG to ISO 159

Scope
An interdisciplinary organization of professional people involved in the human factors field. Promotes the discovery, exchange, and application of knowledge concerning the relationship of people to their machines and their environment. Advocates the consideration of operators, maintainers, and users in the design of equipment and facilities. Supports the development of working and living environments that are comfortable and safe.

Standardization Activities
Has developed a standard on visual display terminal (VDT) workplace design through ANSI Safety and Health Management Board.

Availability
Sold directly and through ANSI

Keywords
human factors; ergonomics; safety; workplace design; office products; public health;
HYDRAULIC INSTITUTE

Allen P. Wherry, Secretary Treasurer
30200 Detroit Road
Cleveland, Ohio 44145
(216) 899-0010   FAX: (216) 892-1404
Founded: 1917   Standards Staff: 3

Type of Organization
Trade Association
Standards Developer

Standards Development
Standards developer since 1917
70 member companies participating in standards activities

Certification
No certification, qualification, or accreditation programs

Secretariats
American National Standards Committee B215, Pumps; U.S. TAG for ISO/TC 115

Scope
A nonprofit, national trade association that represents U.S. companies engaged in the manufacture of pumps; dedicated to excellence in engineering, manufacturing, and application of pumping equipment.

Standardization Activities
Publishes standards in the public interest, designed to enhance understanding between the manufacturer and the purchaser, and to assist the purchaser in selecting and obtaining the proper product for his particular need. Cooperates with other organizations, including the American National Standards Institute, the American Society of Mechanical Engineers, the National Electrical Manufacturers Association, and the National Fire Protection Association, in writing standards subject to constant review and revision when necessary. The standards program is based on work performed by Technical Committees specializing in particular types of pumps. The present standards edition is an extensive rework of previous editions with four principal sections: centrifugal, vertical, reciprocating, and rotary pumps. Provides information on: classes, types, and nomenclature; ratings; test codes; applications; and installation, operation, and maintenance; and measurement of airborne sound from pumping equipment and construction materials. Also publishes the Engineering Data Book.

**HYDRONICS INSTITUTE**

John I. Woodworth, Technical Director

35 Russo Place
PO Box 218
Berkeley Heights, New Jersey 07922
(201) 464-8200

Founded: 1915 Standards Staff: 3

**Type of Organization**
Trade Association
Standards Developer

**Standards Development**
Standards developer since 1940

**Government Adoption**
Equipment performance ratings are specified in Standard Specifications of several federal and state agencies.

**Certification**
Equipment rating resulting from tests are certified by the Ratings Committee, and are published in books for general distribution to specifiers. Under new procedures established by DOE and FTC, the Institute tests and certifies the performance of residential boilers as meeting the standards of the regulations. Such certification is provided to municipalities and to users.

**Scope**
Manufacturers of hydronic (hot water and steam) heating and cooling equipment. Compiles statistics; sponsors educational programs. Assists government agencies, professional societies, and other trade associations in developing standards for residential and commercial buildings, hot water heating, steam, piping and system design criteria, residential cooling, panel heating, snow melting.

**Standardization Activities**
Sponsors and funds research programs, the results of which form the basis for developing standards for testing heating boilers, comfort radiation equipment, immersion water heaters, and for establishing their ratings and installation criteria. Performs certification tests as requested for both members and non-members. Performs re-tests on products in manufacturers' stock, chosen at random.

Provides guidance to government agencies at no cost in developing mechanical specifications, energy conservation standards, performance standards.

Bedford, Indiana 47421
(812) 275-4426

Founded: 1928

Type of Organization
Trade Association
Standards Developer

Standards Development
1 active standard

Scope
Serves the construction industry, the architectural profession, and the limestone industry as a coordinating agency for the dissemination of accurate, unbiased information on limestone standards, recommended practices, grades, colors, finishes, and all technical data required for specifying, detailing, fabricating, and erecting Indiana limestone. The institute is supported by quarriers, fabricators and associates of Indiana limestone building stone.

Standardization Activities
Maintains a Technical Committee responsible for standardization activities. The Indiana Limestone Handbook, the only ILIA standard, is the national standard for the industry. In addition, Government agencies include reference to ILIA, as the standard source for information on Indiana limestone, in their standards and specifications.

INDUSTRIAL DIAMOND ASSOCIATION OF AMERICA

J. Edgar Eubanks, Executive Director

3008 Millwood Avenue
Columbia, South Carolina 29205
(803) 252-5646

Founded: 1845

Type of Organization
Trade Association
Standards Developer

Scope
Importers and dealers in industrial diamonds and manufacturers of diamond tools. Conducts research and holds seminars on all facets of industrial diamond usage.

Standardization Activities
Develops standards for industrial diamonds. With the American Society of Manufacturing Engineers, it cosponsors American National Standards Institute (ANSI) Project B-67, Industrial Diamonds and Accessories for Their Use. Through this project, an American National Standard for Diamond Dressing Tools has been developed and approved. With the Grinding Wheel Institute, the association also cosponsors ANSI Project B-74.1, Identification Code for Diamond Wheel Shapes. Other American National Standards to which the association has cooperated include B-74.16, Checking the Size of Diamond Abrasive Grain, and B-74.17, Test for Bulk Density of Diamond Abrasive Grain.

In cooperation with NIST, the association developed a separate Commercial Standard for grading of diamond powder, known as CS261-63, Grading of Diamond Powder in Sub-Sieve Sizes.

IDAA's Toolmakers Industry Committee revises and updates the Handbook - Diamond Tool Shanks, compiled and published by the association since 1954.

INDUSTRIAL FABRICS ASSOCIATION INTERNATIONAL

Steve Warner, Operations Director

345 Cedar Building
Suite 450
St. Paul, Minnesota 55102
(612) 222-2508
Type of Organization
Trade Association
Standards Development
Staff members and IFAI members actively participate on committees of ASTM, BOCA, ICBO, ISO, NFPA, FHWA, and USCG.
Scope
A trade association which has 22 product related divisions, ranging from the Architectural Fabric Structures Institute to the Truck Cover Division. Sixteen hundred member firms represent all levels of the industrial fabrics industry including fiber producers, weavers, coaters, finishers, and laminators.
Standardization Activities
The Camping Products Division, in cooperation with the Finishers and Dyers Division, developed a model flammability code for materials used in camping tentage, designated CPAI-84. The Tarpaulin Division has developed CPAI-63, a quality assurance standard for domestic cotton tarpaulins. The Architectural Fabric Structures Institute has developed ASI-77 as a guide to manufacturers, prospective users, architects, and regulatory agencies. This standard sets requirements for the materials, design, construction, and erection of these structures.

IFAI developed CPAI-CLI, which includes standard classifications and test methods for woven coated and/or laminated polyolefins.

CPAI-75 includes rate-of-burn specifications for sleeping bags, and CPAI-79 includes a listing of standard test methods for coated and laminated fabrics. The association is now in the process of developing a standard for the thermal efficiency of window treatment products.

Founded: 1961

**Type of Organization**
Trade Association

**Representation**
Works through other organizations to develop standards

**Scope**
A national trade association of manufacturers engaged in the production of perforated materials. Develops programs and activities to assist members achieve managerial expertise in marketing, manufacturing and other areas of company operations.

**Standardization Activities**
Originally developed standards for products used in the mining and aggregate industries. This led to the publication of a series of standards widely used in these industries.

Finalized a series of standards for Industrial Perforated Metal which has been adopted and published by ASTM Committee E 29.

Active in ISO/TC 24 which is involved with setting metric standards for perforated materials on a world wide basis. Also works closely with EUROPERF, which is the Trade Association of European Perforators.

| Certification        | The membership of ISEA established an independent organization, the Safety Equipment Institute (SEI), in 1981. SEI administers a nongovernmental program to test and certify industrial safety products. SEI certification is voluntary, requiring annual product testing and quality assurance audits at manufacturing sites. Current programs include industrial helmets, eye and face protective products and emergency eyewash and shower equipment. Certification of respirators is performed by NIOSH and MSHA. |

| Secretariats         | ANSI Z308.1 and Z358.1 |

| Scope                | A nonprofit organization of manufacturers of personal protective products for industrial environments. Dedicated to the safety of workers who rely on protective equipment and to the welfare of the safety equipment industry. Membership is international. |

| Standardization Activities | Works for the development of standards which assure the high performance of safety products. Provides manufacturers input in standards development through official representation to such organizations as American National Standards Institute, National Fire Protection Association, National Society for the Prevention of Blindness, and American Society for Testing and Materials. Product categories involved in standard activities include: emergency eyewash and safety shower, eye and face protection, fall protection, head protection, hearing protection, industrial first aid, industrial safety and health instruments, industrial warning devices, machinery guards, respiratory protection, safety cans, and safety wearing apparel. |

Piscataway, New Jersey 08855-1331
(201) 562-3800

Founded: 1884

Type of Organization
Professional Society
Standards Developer

Standards Development
30,000 members active in standards development
580 standards; 530 standards projects underway
Many processed through ANSI
An ANSI accredited organization

Standards Designations
IEEE Std xx-year

Government Adoption
30 IEEE standards have been adopted by the federal government.

Secretariats
16 American National Standards Committees (some as co-secretariat)

Scope
A transnational professional society of 315,000 engineers and scientists in electrical engineering, electronics, and allied fields.

Standardization Activities
The Standards Board has overall responsibility for standards development and approval, and the responsibility for participation in and cooperation with other organizations on standards issues. The Board currently has nine standing committees that provide assistance and make recommendations, offering expert advice concerning procedural and developmental matters, new opportunities, and future avenues to be explored.

IEEE develops and publishes standards on a variety of topics, including communications, computer languages and software engineering, electrical safety, and commercial and industrial power systems. All IEEE standards are prepared by dedicated expert volunteers acting in their own fields of interest; yet are
approved by a widespread, strict consensus process. Proposed standards are examined by the review committee to ensure that a proper balance of interested parties exists, and that coordination and balloting procedures have been maintained.

**Type of Organization**

Professional Society  
Works through other organizations to develop standards

**Scope**

Devoted to the development and promotion of recommended practices, standards, specifications, research, simulation techniques, testing techniques, contamination control techniques, and the development of design criteria for equipment operation. The Institute is a member of the International Committee of Contamination Control Societies (ICCCS). Recommended practices have been developed by its Contamination Control Division in several areas.

**Standardization Activities**

Considers and investigates matters relating to units and standards, as well as recommended practices, pertaining to, or applicable in, environmental engineering. Cooperates with other national technical organizations in matters regarding environmental standards, testing and engineering. Cosponsors meetings or group efforts with such organizations as American Society for Testing and Materials, American Institute of Aeronautics and Astronautics, Institute of Electrical and Electronics Engineers, and the Department of Defense. Sponsors a representative to the International Electrotechnical Commission concerned
with international standardization of environmental test methods.

Representation

Approximately 125 members active in INMM standardization including representatives on standards committee of ANSI, ASTM and others.

Certification

Nuclear materials specialists and nuclear materials interns are certified by examination and reviewed by a certification committee.

Secretariats

ANSI N14, Transportation of Fissile and Radioactive Materials
ANSI N15, Methods of Nuclear Material Control

Scope

A nonprofit organization of individuals working in governmental, industrial and academic institutions where nuclear materials are utilized. The Institute advances the application of principals of accounting, auditing, engineering, mathematics, physics, statistics, and physical security for the safeguarding of nuclear fuel facilities. INMM also promotes research in the field of nuclear safeguards, materials accounting, materials control, physical protection, waste management, and transportation.

Standardization Activities

Directed toward meeting requirements of industry related to safeguarding nuclear materials. Principal activities include serving as ANSI secretariat for N14 and N15. INMM standards are used extensively in Department of Energy and Department of Defense facilities, as well as government contractors and NRC licensees. In addition, INMM standards are used world-wide by related organizations and commercial enterprises.

ISA-RP, Instrument Society of America Recommended Practice

Government Adoption
The Nuclear Regulatory Commission has adopted five Instrument Society of America Standards.

Certification
No certification, qualification, or accreditation programs

Secretariats

Scope
Chartered as a nonprofit educational organization, its membership comprises more than 41,000 practitioners, scientists, educators, and students worldwide involved in industrial instrumentation and control technology.

Advocates the advancement of the technology of process measurement and control instrumentation through education. Augments the exchange of knowledge and information through a wide variety of publications and by developing consensus industry standards.

Standardization Activities
Prepares and promotes national and international standards which are competent, unbiased, widely applicable, and authoritative. Standards and practices committees span a wide spectrum of industries and technical interests dealing with measurement and control instrumentation. Topics include symbology, computer hardware and software, intrinsic safety, thermocouples, flowmeters, transducers, rotameters, face-to-face dimensions of control valves, control valve sizing, control valve capacity test procedures, manifold designs, pneumatic circuits, annunciators, dynamic response testing, specification forms, piping and instrument drawings, instrumentation for nuclear and fossil fuel power plants, installation practices, terminology, composition analyzers, environmental conditions for digital systems, strain gages, liquid level gages, batch control, combustible and toxic goo detectors, programmable electronic systems, fire
detection instruments, and continuous weighing instrumentations.

**INSULATED CABLE ENGINEERS ASSOCIATION**

E. E. McIlveen, Secretary-Treasurer

P.O. Box 440

South Yarmouth, Massachusetts 02664

(508) 394-4424

Founded: 1925

**Type of Organization**

Trade Association/Technical Society Standards Developer

**Standards Development**

Standards developer since 1925

100 members participating

30 active standards

Some standards processed through ANSI

**Standards Designation**

ICEA, ICEA/NEMA, or ICEA/IEEE prefix

**Government Adoption**

FAA, GSA, Air Force, Navy, Rural Electrification Administration, and others

**Certification**

No certification, qualification, or accreditation programs

**Scope**

An international nonprofit association of cable engineers which develops and publishes standards for electrical power, control, instrumentation, communications, and portable cables. The principal standards writing authority for industrial and utility cables in North American and recognized throughout the world. Membership confined to engineers who are on the technical staffs of concerns engaged in the manufacture of insulated electrical wires and cables, and who are qualified by technical training or experience to contribute to the Association's activities.

**Standardization Activities**

Publishes recommended practices and treatises resulting from engineering research conducted by the Association. Publication on cable amperages recognized as joint standards by the National Electrical Manufacturers
Association (NEMA), Institute of Electrical and Electronic Engineers (IEEE) and the American National Standards Institute (ANSI).

### INTER-SOCIETY COLOR COUNCIL

Dr. Dan C. Rich, Secretary
c/o Applied Color Systems
Post Office Box 5800
Princeton, New Jersey 08540
(609) 924-2189

Founded: 1933

### Type of Organization
Technical Society
Works through other organizations to develop standards

### Scope
Coordinates work leading to the description and specification of color, and promotes the practical application of such work to color problems arising in science, art, and industry. Membership consists of 24 delegates from national societies and individual members, all with a common interest in color.

### Standardization Activities
Not a standardizing body, but many of the results of its work are incorporated by its member bodies into standards which they issue or sponsor. This work is carried out by subcommittees of the ISCC Problems Committee.

Examples of preliminary work done within the ISCC include the ISCC-NIST Method of Designating Colors and a Dictionary of Color Names (NIST Circular 553); designations of filters for theatrical lighting; definitions of color terms; recommendations for illuminating and viewing conditions in the colorimetry of reflecting materials; standard methods for mounting textile samples for colorimetric measurement; standard practice for the visual examination of small color differences; the determination of sets of maximally different nonfluorescent colors; identification of pigments in use in artists' paint leading to a method for lightfastness determination and an artists' paint specification.

### Keywords
color; colorimetry; instruments; testing;
INTERNATIONAL ASSOCIATION OF ELECTRICAL INSPECTORS

W. I. Summers, Executive Director

930 Busse Highway
Park Ridge, Illinois 60068
(312) 696-1455

Founded: 1928 Standards Staff: 2

Type of Organization
Trade Association
Works through other organizations to develop standards

Representation
20 members and 20 alternates on the National Electrical Code promulgated by the National Fire Protection Association. Also participates on the ANSI C80, C73 and ANSI C2 committees; The UL Standards Review Council; and NFPA committees 70A, 70B, 70E, and 79.

Certification
Member of the National Board of Governors for the certification of electrical inspectors, administered by the Educational Testing Service, Princeton, New Jersey.

Scope
Promotes cooperation between inspectors, the electrical industry, and the public. Collects and disseminates information relative to the safe use of electricity. Over 20,000 members including inspectors, contractors, electricians, consulting engineers, utilities, and testing labs. Seventy-five percent of its meetings and publication programs are devoted to standardization activities. Maintains liaison in its code activities with its members in Canada and Japan.

Standardization Activities
Cooperates in the formulation of standards for the safe use of electrical materials, devices, and appliances. Also promotes the uniform understanding and application of the National Electrical Code, as well as other electrical codes and standards. Maintains liaison with the federal government in many standardization activities, particularly for the use and application of the National Electrical Code. Cooperates with the Department of Housing and Urban Development, the Consumer Product Safety Commission, as well as with the Occupational Safety and Health Administration (OSHA) of the Department of Labor. Also serves on various NFPA, ANSI, and UL standards writing committees.

Keywords
electrical code; inspection; safety; building; government officials;

| Government Adoption                  | The Uniform Plumbing Code is used in over 2,500 jurisdictions in the United States and is the mandatory code for 13 states. |

| Certification                        | A monthly listing of 10,000 products certifies that products have been tested and meet the requirements of applicable standards and the Unified Plumbing Code. Certification must be updated and renewed annually and manufacturers are subject to reinspection during the year of listing. |

| Secretariats                         | ANSI Committee Z124 |

| Scope                                | Established by and for inspection officials of cities, counties, and states with the goal of bringing about uniformity in plumbing codes and their interpretation. Cosponsors the Uniform Mechanical Code with the International Conference of Building Officials. |

| Standardization Activities           | Presently writes installation and product standards for conventional plumbing products. Promulgates both installation and material standards for plumbing in the mobile home and recreational vehicle industry. Standardization activities are administered by the IAPMO Standards Committee and IAPMO Mobile Home Standards Committee. Works with the Department of Housing and Urban Development, the Department of Labor, and the National Institute of Standards and Technology. |

**INTERNATIONAL ASSOCIATION OF WIPING CLOTH MANUFACTURERS**

Bernard Brill, Executive Vice President

7910 Woodmont Avenue
Suite 1212
Bethesda, Maryland 20814

Founded: 1932

Type of Organization

- Trade Association
- Standards Developer

Standards Development

- Two active standards

Government Adoption

General Services Administration has adopted Wiping, Cotton, and Cotton-Synthetic dated October, 1981.

Scope

Focuses on common problems and opportunities in the management, promotion, research and development of the wiping materials, used clothing, and textile recycle industry.

Standardization Activities

Publishes Specifications for Wiping Cloths for use by all phases of industry that use wiping cloths in their operation. Specifications cover material, content, and grade of wiping cloths.

Availability

Distributed directly

**INTERNATIONAL CARGO GEAR BUREAU**

Charles G. Visconti, President

17 Battery Place
New York, New York 10004
(212) 425-2750

Founded: 1966

**Type of Organization**
Trade Association

Works through other organizations to develop standards

**Scope**
A nonprofit membership corporation of makers and users of cargo handling equipment. Provides recognized registration, inspection, certification, documentation, design evaluation, and consultation services throughout the world for materials handling equipment ashore and afloat including shipboard cargo gear, cranes, derricks, cargo containers, road vehicles, and related devices.

**Standardization Activities**
Monitors and participates in standards development activities of international organizations including the International Maritime Organization (IMO) and ISO, ship classification societies, and national standards bodies.

**Keywords**
cargo handling; industrial equipment; transportation;

---

**INTERNATIONAL CITY MANAGEMENT ASSOCIATION**

William H. Hansell, Jr., Executive Director

1120 G Street, NW
Washington, DC 20005
(202) 626-4600

Founded: 1914

**Type of Organization**
Professional Association

Standards Developer
Scope

City managers, county managers, municipal administrators, assistants and directors of councils of governments. Provides state-of-the-practice information to local governments through sale of books, reports, and subscription services. Sponsors training.

Standardization Activities

Regularly publishes information on effectiveness and efficiency measures as part of its work in increasing the proficiency of municipal administrators and strengthening the quality of urban government through professional management.

Formerly

International City Managers Association (1969)

INTERNATIONAL COALITION FOR PROCUREMENT STANDARDS

Laurel Davis O'Brien, ICPS Coordinator

c/o ASTM
1916 Race Street
Philadelphia, Pennsylvania 19103-1187
(215) 299-5400                      FAX: (215) 977-9679

Founded: 1979

Type of Organization

Professional Society

Works through other organizations to develop standards

Scope

Brings representatives of national and international purchasing associations and individuals with an interest in purchasing standards together in an effort to communicate, cooperate, and coordinate activities of recognized standards organizations to develop voluntary consensus standards. Promotes and encourages the professional development of its members.

Standardization Activities

Encourages participation by its members in the activities of all consensus standards organizations; initiates, through interaction with these consensus standards organizations, the formulation of specifications, standards, and test methods where none currently exist; aids in the revision and updating of existing specifications, standards, and test methods; and cooperates with other members of the Coalition to avoid duplication of effort.

Keywords

purchasing; procurement;
INTERNATIONAL COMMUNICATIONS INDUSTRIES ASSOCIATION

Kenton Pattie, Executive Vice President

3150 Spring Street
Fairfax, Virginia 22031
(703) 273-7200

Founded: 1939

Type of Organization: Trade Association
Works through other organizations to develop standards

Representation: American National Standards Committee PH7

Scope: Commercial trade association for manufacturers, producers, and dealers of audio and visual communications products in the area of projection, as well as video and computers. Membership includes 800 domestic companies and more than 100 international members.

Standardization Activities: Seventy-five members active on working committees, subcommittees and task forces of Committee PH7 on Instructional Audio-Visual Systems Standards. Standards developed through PH7, issued through ANSI.

Formerly:
National Association of Visual Education Dealers (1939-1947)
National Audio-Visual Association (1947-1983)

Keywords: audio-visual; visual; communications;

INTERNATIONAL CONFERENCE OF BUILDING OFFICIALS

G. David Tayco, Director Administrative Services

5360 South Workman Mill Road
Whittier, California 90601
(213) 699-0541

Founded: 1922

**INTERNATIONAL DISTRICT HEATING AND COOLING ASSOCIATION**

Clinton W. Phillips, P.E., Director, Technology and Standards Division

1101 Connecticut Avenue, NW
Suite 700
Washington, DC 20036
(202) 333-4922
FAX: (301) 774-0949
Type of Organization: Trade Association Standards Developer

Standards Development: 40 members serve on standards committees of ASTM, ASHRAE, ANSI, AGA, and others.

Scope: Five hundred members, utilities, municipalities, universities, institutions, manufacturers, consultants, engineers, government officials, and others working in the district heating and cooling/cogenerated heat and power (DHC/CHP) industry. Serves worldwide interests in DHC/CHP, particularly in the United States and Canada. Most commercial DHC/CHP systems, operated by investor owned utilities, are members of IDHCA. Provides a principal forum to exchange information and maintains a liaison with federal agencies and related professional organizations.

Standardization Activities: Currently developing 2 IDHCA/ANSI standards: Liquid Thermal Meter Standard and Steam Thermal Meter Standard.

Two standards committees and ten technical groups - Production, Distribution, Airports/Hospitals/Military Bases, R&D, Cooling, College/University, Measurement/Controls, Economics, and Development - review and comment on applicable standards.

Availability: Distributed directly

INTERNATIONAL ELECTRICAL TESTING ASSOCIATION

Mary Jordan, Executive Director

221 Red Rocks Vista Drive
Post Office Box 697
Morrison, Colorado 80465
(303) 467-0526

Founded: 1972

Type of Organization
Trade Association
Standards Developer

Standards Development
Acceptance and Maintenance Testing Specifications for electrical power distribution and utilization equipment.

Standards Designation
NETA ATS-1987 Acceptance Testing Specification
NETA MTS-1989 Maintenance Testing Specification

Government Adoption
Specifications adopted by GSA, the Postal Service, and military departments

Certification
The International Electrical Testing Association is responsible for the certification of independent testing organizations and their technical personnel.

Scope
An international organization representing independent electrical power system testing and maintenance companies in areas of common interest, such as specifications for acceptance and maintenance testing, qualifying of technical personnel, qualifying of companies, NFPA and governmental committees, representation, etc.

Standardization Activities

Availability
Distributed directly

Formerly
National Electrical Testing Association
INTERNATIONAL FABRICARE INSTITUTE

Charles Riggott, General Manager

12251 Tech Road
Silver Spring, Maryland 20904
(301) 622-1900

Type of Organization
Trade Association
Works through other organizations to develop standards

Representation
Represented on ASTM Textiles Committee, NFPA Drycleaning Committee, AATCC Drycleaning Committee, and ASTM Solvents Committee.

Certification
Certifies as drycleanable and/or launderable, fabrics, garments, draperies, etc., when they pass tests designated by ASTM, NFPA, and/or AATCC. Certifies new or used solvents as meeting ASTM specifications.

Scope
An international association of 13,000 drycleaners and/or launderers.

Standardization Activities
Interested in, and active on, standards committees involved in quality control and safety as affects members and their customers.

Formerly
American Institute of Laundering (1883)
National Institute of Drycleaning (1907)

Keywords
drycleaning; laundering; textiles; consumer products;

INTERNATIONAL FENCE INDUSTRY ASSOCIATION

Frederick G. Dempsey, Jr., CAE, Executive Vice President

5300 Memorial Drive
Suite 116
Stone Mountain, Georgia 30083

Founded: 1962

Type of Organization
Trade Association
Works through other organizations to develop standards

Representation
ASTM Committee F14

Keywords
electricity; certification; safety;
Scope
Serves the entire fence industry in North America and 22 foreign countries. Membership includes installer contractors, wholesalers, manufacturers, and related fence industry business.

Standardization Activities
Members work with ASTM and Chain Link Fence Manufacturers Institute (CLFMI) to develop standards and specifications for fence products.

Keywords
fence; construction;

James E. Elsener, Executive Secretary
c/o Smith, Bucklin and Associates
111 East Wacker Drive
Suite 600
Chicago, Illinois 60601
(312) 644-6610 FAX: (312) 565-4658

Founded: 1971

Type of Organization
Trade Association

Standards Development
Standard Developer since 1976
One active standard, ANSI approved
Available for review by members and non-members

Standards Designation
ANSI/IIAR 74-2-1984

Government Adoption
City of Columbus, Ohio has adopted IIAR 74-2 as part of the City Building Code.

Certification
No certification, qualification, or accreditation programs

Secretariats
IIAR is the ANSI designated secretariat for ANSI/IIAR 74-2-1984.

Scope
A not-for-profit organization formed to promote education, information and standards for proper and safe use of ammonia as a refrigerant. Introduces and encourages constructive educational efforts in the fields of design, safety, installation, operation, maintenance, application, and other subjects to furnish a better understanding of the use of ammonia as a refrigerant.
Standardization Activities

Availability
Distributed directly or through ANSI

Keywords
ammonia; refrigeration; CFC alternative; cooling;

INTERNATIONAL MASONRY INSTITUTE
Ray Lackey, Executive Vice President
823 15th Street, NW
Washington, DC 20005
(202) 783-3908
Founded: 1970

Type of Organization
Trade Association
Works through other organizations to develop standards

Representation
Participates in the standards activities of ASTM, ACI, ASCE, NFPA, and others.

Scope
Formed through a joint trust agreement between the Mason Contractors Association of America and the International Union of Bricklayers and Allied Craftsmen. Activities include promotion and national advertising for masonry construction, training of craftsmen, and development of areas related to masonry materials, design and construction.

Standardization Activities
Participates on committees involved in the development of standards associated with masonry and masonry construction including ASTM, ACI, ASCE, NFPA, and ANSI. Monitors and recommends changes to the national model codes: BOCA, ICBO, and SSBC.

Keywords
masonry; construction;

**INTERNATIONAL TAPE/DISC ASSOCIATION**

Henry Brief, Executive Vice President

505 Eighth Avenue
Floor 12A
New York, New York 10018
(212) 643-0620 FAX: (212) 643-0624

Founded: 1970

**Type of Organization**
Trade Association
Standards Developer
| Standards Development | Standards developer since 1978  
|                       | Five current standards  
|                       | None processed through ANSI |
| Standards Designations | ITA-A prefix |
| Scope | An international trade association that represents companies of many nations in the consumer and industrial electronics sector, specifically tape and disc, both audio and video, as well as home entertainment firms related to tape/disc/audio/video. |
| Standardization Activities | The Audio Technical Committee is responsible for an ongoing standardization program in all aspects of audio and video tapes and discs. Five standards are currently active. These include standards for audio cassettes, 8 track cartridges, splicing tape and duplication guidelines for 8 track and 4 track cartridges, and Minimum Standards of Audio Tape Products. Committee members also participate on IEC, ISO, EIA, AES, SMPTE, and ANSI Committees. |

**JEWELERS VIGILANCE COMMITTEE**

Joel A. Windman  
Executive Vice President and General Counsel

1185 Avenue of the Americas
New York, New York 10036
(212) 869-9505
Founded: 1912

**Type of Organization**
Trade Association
Standards Developer

**Standards Development**
Standards developer since 1913

**Government Adoption**
Adopted by the Department of Commerce and the Federal Trade Commission.

**Scope**
National organization supported by the jewelry industry, specializes in marking, labeling, terminology, and trade problems.

**Standardization Activities**
Works with government to assist industry and consumers. Develops voluntary product standards in the areas of precious metals, precious stones, and watches. Standardization work contributed to Federal Trade Commission's development of Guides for the Jewelry Industry. Conducted and revised a standardization study on the National Gold and Silver Stamping Act.

**Availability**
Distributed directly and through the Federal Trade Commission

**Formerly**
American Jewelers Protective Association (1943)

**Keywords**
jewelry; precious metals; precious stones; materials; consumer products;

**JOINT NEUROSURGICAL COMMITTEE ON DEVICES/DRUGS**

Dr. M. Salcman, Dr. R. Crowell, Cochairmen
c/o American Association of Neurological Surgeons
22 South Washington Street
Suite 100
Park Ridge, Illinois 60068
(312) 692-9500

Founded: 1974

**Type of Organization**
Professional Society

**Representation**
ASTM, AAMI, ANSI, FDA Advisory Panel, World Federation of Neurosurgical Societies

**Scope**
An educational and advisory group sponsored by the American Association of Neurological Surgeons and the Congress of Neurological Surgeons to assist in the
writing of neurological standards by participating in the activities of standards developing organizations. Also active as an advisory group for such organizations as the American Medical Association, the American College of Surgeons, the FDA, and the U.S. Congress.

### Standardization Activities

Coordinates participation in committees developing standards for materials, devices, and practices used by neurosurgeons. Current activities center on ASTM F4.05, Subcommittee on Neurosurgery, and Committees of the Association for the Advancement of Medical Instrumentation (AAMI). Standards of interest include: tissue adhesives, aneurysm clips, carotid clamps, cranial tongs, stereotactic devices, surgical microscopes, RF generators, transcutaneous electrical nerve stimulators, intracranial pressure-monitoring devices, and computed tomography practices. Monitors activities of ISO/TC 150/SC 3 and IEC/TC 62 through ASTM and AAMI.

### Formerly

Merger of committees on Materials and Devices of the American Association of Neurological Surgeons and the Congress of Neurological Surgeons (1974)

### Keywords

medical devices; neurosurgery; materials; instrumentation; medical care;

---

### JUVENILE PRODUCTS MANUFACTURERS ASSOCIATION

William L. MacMillan, Executive Director

66 East Main Street
Moorestown, New Jersey 08057
(609) 234-9155

Founded: 1962 Standards Staff: 3

### Type of Organization

Trade Association

Works through other organizations to develop standards

### Representation

American Society for Testing and Materials

### Certification

Sponsors a certification program for play yards, high chairs, walkers, expandable gates and enclosures, carriages and strollers which provides a certification seal and directory listing for all products in compliance with ASTM Safety Specifications.

### Scope

Association of manufacturers of juvenile furniture and accessories.

### Standardization Activities

Advocates the use of ASTM Standards for performance / requirements for play yards, high chairs, walkers,
expandable gates and enclosures, carriages and strollers, full-sized baby cribs and crib cornerpost extensions.

Keywords: juvenile furniture; consumer products;

LABORERS INTERNATIONAL UNION OF NORTH AMERICA

Angelo Fosco, General President
905 16th Street, NW
Washington, DC 20006
(202) 737-8320 FAX: (202) 737-2754

Founded: 1903

Type of Organization: Labor Union
Works through other organizations to develop standards

Certification: Training facilities are set up throughout North America to gain a high competency level for members who are in the construction industry.

Standardization Activities: Active in all model codes with continuous voting representation on the ASME A.40 Committee. Has a specific interest in standards development because of the health and safety of labor workers, as well as the public.

Formerly: Prior to 1965 International Hod Carriers, Building and Common Laborers' Union of America

Keywords: union; utilities; pipe installation; construction; safety;

LASER INSTITUTE OF AMERICA

Peter Baker, Executive Director
12424 Research Parkway
Suite 130
Orlando, Florida 32826
(407) 380-1553 FAX: (407) 380-5588

Founded: 1968 Standards Staff: 1

Type of Organization: Professional Society
Standards Developer

Representation: ANSI

Secretariats: ANSI Z136 Committee on Laser Safety

325
Scope
A nonprofit membership organization devoted entirely to the educational advancement and promotion of the technology and applications of lasers. Conducts continuing education courses, seminars and technical symposia nationwide, and offers a variety of educational materials and publications.

Standardization Activities
Develops Standards on the Safe Use of Lasers. Provides guidance in hazard education and control measures to industry and health care facilities, and all personnel involved with lasers in manufacturing, communication, and medical applications. Details laser safety and training programs as well as medical surveillance. Provides protocols for the various conditions of eye and skin exposure and methods for determining the information required for hazard evaluation and control. These consensus standards have been adopted by the national and international federal and state regulatory bodies, including the military, as basic documents or inputs to IEC and WHO Standards dealing with Laser Safety.

Keywords
laser; safety; medical;

LEAD INDUSTRIES ASSOCIATION
Jerome F. Smith, Executive Director

292 Madison Avenue
New York, New York 10017
(212) 578-4750 FAX: (212) 684-7714

Type of Organization
Trade Association
Works through other organizations to develop standards

Representation
75 members active in standardization activities
Represented on committees of ASTM, ANSI, NIST, ISO, ACS, NACE, AWS, and others.

Scope
A nonprofit trade association representing all segments of the lead industry. Serves as the industry's market development arm by promoting increased use of lead and its end-products in a cost-effective and environmentally sound manner.

Standardization Activities
Maximizes the effectiveness of its representatives on national standards committees. Participates in developing standards for noise control, radiation protection, waste disposal, waterproofing, ceramics, solder, plastics, and batteries.
Committees monitor and assist the work of standards developing bodies within their areas of interest by designating committee members for liaison and coordination with appropriate code bodies.

**Keywords**

nuclear; noise control; solder; lead; materials;

### LIBRARY BINDING INSTITUTE

Sally Brauer, Executive Director

8013 Centre Park Drive
Austin, Texas 78754
(512) 836-4141

Founded: 1935

**Type of Organization**

Trade Association
Standards Developer

**Standards Development**

**Certification**

Certification program for members who are commercial library binders.

**Scope**

An international trade association of library binders, suppliers to the industry and all others interested in preserving the useful life of written materials. Works at providing members with information and services so that they can better serve their customers.

**Standardization Activities**

Works with ANSI and Z39 Committees. Also has developed interorganizational Library Binding Institute standard for library binding.

**Availability**

Sold directly

**Keywords**

library binding; book binding; communications;

### LIGHTNING PROTECTION INSTITUTE

Marvin M. Frydenlund, Managing Director

Trade Association  
Standards Developer

**Standards Development**  
20 members participate in standards development
### Government Adoption
Department of Defense has adopted 0100-87

### Scope
Primary objective is to promote the progress and development of the magnetic materials industry through standardization programs and other activities as may be necessary.

### Standardization Activities
The Standards and Engineering Committee of MMPA administers all standardization programs, which comprises approximately 50 percent of all the programs of MMPA. It has published 0100-87, Standard Specifications for Permanent Magnet Materials; PC 100, Standard Specifications for Ferrite Pot Cores; TC 200, Standard Specifications for Ferrite Threaded Cores; UEI 300, Standard Specifications for Ferrite U, E & I Cores. This committee is also conducting work on standard methods for magnetic testing, magnetization, stabilization, and measurement guidelines.

### Availability
Sold directly

## MANUFACTURED HOUSING INSTITUTE

Jerry C. Connors, President

1745 Jefferson Davis Highway
Arlington, Virginia 22202
(703) 979-6620

Founded: 1936 Standards Staff: 2

### Type of Organization
Trade Association

Works through other organizations to develop standards

### Representation
The technical staff and membership participate in development of national standards by a consensus committee for manufactured housing and in cooperation with ASHRAE, NFPA, ASTM, NCSBCS, UL, and others endorsed by ANSI.

### Secretariats
Secretariat for a consensus committee which makes annual recommendations to the U.S. Department of Housing and Urban Development (HUD), to update the Federal Manufactured Home Construction and Safety Standards.
Scope

A nonprofit trade association comprised of manufacturers and suppliers engaged in producing and servicing manufactured homes. Serves as a liaison to Congress and federal agencies in order to promote and protect the interest of the manufactured housing industry and its consumers. Provides monthly statistical reports on the industry and marketing strategies. Maintains a public relations program and sponsors annual expositions and forums.

Standardization Activities

The standards program is designed to assist members in making the manufactured home a safe, comfortable residence for the owner to live amid attractive surroundings. Advises the U.S. Department of Housing and Urban Development in their maintenance/proponency of the Federal Manufactured Home Construction and Safety Standards and Procedural and Enforcement Regulations (24 CFR 3280, 3282, 3283). These federal standards regulate the design and construction of the homes that are constructed by MHI members.

**MANUFACTURING JEWELERS AND SILVERSMTTHS OF AMERICA**

Matthew A. Runci, Executive Director

100 India Street
Providence, Rhode Island 02903
(401) 274-3840 (401) 274-0265

Founded: 1903

**Type of Organization**

Trade Association

**Standards Development**

Standards developer since 1933

**Standards Designations**

FTC rules for the jewelry industry

**Government Adoption**

Current rules adopted 1957, amended 1959

**Secretariats**

Jewelers Vigilance Committee

**Scope**

A national education and information organization for jewelry and silver product manufacturers.

**Standardization Activities**

Engaged in marking, stamping, nomenclature, precious metals, semiprecious metals, stones, pearls, country origin marks, and related practices. Industry committees agree on proper standards in keeping with the U.S. National Stamping Act. These proposals are submitted to FTC for inclusion into "rules for the jewelry industry." Rules are generally enforced by
FTC, periodic checks of merchandise are made by MJSA and JVC to assure that the standards are being properly followed.

Availability
Distributed through the Federal Trade Commission

Keywords
jewelry; precious metals; precious stones; gold; silver; materials; consumer products;

MAPLE FLOORING MANUFACTURERS ASSOCIATION

John R. Waxman, Vice President

60 Revere Drive
Northbrook, Illinois 60062
(708) 480-9138 Telex: 910-221-5870

Founded: 1897 Standards Staff: 1

Type of Organization
Trade Association
Standards Developer

Standards Development
60 members active in standards activities

Certification
Certified products receive the association's written approval. Publishes a list of tested and accepted finishes periodically.

Scope

Standardization Activities
Establishes and enforces uniform grades and standards of products; improves methods of manufacture; and makes the association trademark a symbol of excellence in methods and materials. Establishes grading rules for hard maple, beech and birch flooring signify that the flooring is standardized and guaranteed by the association to be in accordance with the current established grading rules. Adopted specifications for heavy duty and for gymnasium type floor finish products. Revises specifications every three years for the purpose of improving performance characteristics of the heavy duty and gymnasium floor finishes.

Availability
Distributed directly

Keywords
wood; grading rules; inspection; lumber; flooring; building;
MARBLE INSTITUTE OF AMERICA

Robert Hund, Managing Director

33505 State Street
Farmington, Michigan 48024
(313) 476-5558

Founded: 1907

Type of Organization
Trade Association

Works through other organizations to develop standards

Representation
ASTM C18 Dimension Stone Committee
ANSI A108.1 Installation of Ceramic and Marble Tile;
Installation Materials
ASTM E06 Performance of Building Construction

Scope
Objective is to encourage increased usage of dimension stone in North America. Membership composed of producers, fabricators, importers, exporters, sales agents, distributors, finishers, installing contractors, and those who sell products and services to the industry.

Standardization Activities
Helps establish standards for dimension stone through ANSI and ASTM committees. Promotes quality of workmanship; publishes design manual and quarterly magazine: "Stone Through the Ages."

Formerly
Merger of National Association of Marble Dealers and National Association of Marble Producers (1944)

Keywords
marble; granite; limestone; sandstone; slate;
bluestone; quartzite; dimension stone; building;
furniture; materials;

MARKING DEVICE ASSOCIATION

David G. Lister, Managing Executive

435 North Michigan Avenue
Suite 1717
Chicago, Illinois 60611
(312) 644-0828

Founded: 1910

Type of Organization
Trade Association

Standards Developer

Scope
Manufacturers of marking devices including rubber and metal stamps, name plates, and seals.
### Standardization Activities

Prepares standards for various kinds of metal marking tools and dies. Included are standards for size and depth of marking characters, styles of symbol stamps, stock sizes for various stamp blanks. Other standards in use include those for bores and keyway sizes for roll dies, roller die blanks, and type and type holders for interchangeable steel type.

Develops standard terminology for all kinds of marking devices, including metal marking tools and dies, rubber stamps, seals, stencils, and marking inks.

### Availability

Distributed directly

### Keywords

marking devices; stamps; stencils; seals; inks; office products; manufacturing;

**MASONRY AND CONCRETE SAW MANUFACTURERS INSTITUTE**

Allen P. Wherry, Executive Director

30200 Detroit Road  
Cleveland, Ohio 44145  
(216) 899-0010  
FAX: (216) 892-1404  
Founded: 1981  
Standards Staff: 3

**Type of Organization**  
Trade Association  
Standards Developer

**Standards Designations**  
ANSI B7.5

**Scope**  
Membership consists of manufacturers of conventional abrasive blades, masonry saws, concrete saws, diamond wheels, and others.

**Standardization Activities**  
Develops safety standards for the use of masonry and concrete saws. Works with ANSI and promulgates its documents through the Grinding Wheel Institute's Accredited Standards Committee B7.

Developed the ANSI Safety Code for The Construction Use and Care of Gasoline Powered, Hand Held, Portable, Abrasive, Cutting Off Machines.

**Availability**  
Distributed directly and through ANSI

**Keywords**  
abrasive blades; diamond wheels; masonry saws; concrete; industrial equipment;
### MATERIAL HANDLING INSTITUTE

A.L. Leffler, Executive Vice President

8720 Red Oak Boulevard, Suite 201
Charlotte, North Carolina 28217
(704) 522-8644

Founded: 1945

**Type of Organization**: Trade Association

**Representation**: Works through other organizations to develop standards

**Scope**: Represents manufacturers of industrial material handling equipment used in plants, plant-yards, piers, terminals, and warehouses.

**Standardization Activities**: Product Sections, through Engineering Committees, develop source material for adoption as American National Standards under the canvass procedure of the American National Standards Institute, and furnish source materials to the American Society of Mechanical Engineers Standards Department for promulgation under ANSI procedures.

Comments on military specifications of the Naval Sea Systems Command, Army Mobility Command, Naval Construction Battalion Center and the Naval Engineering Center.

**Absorbed**: Association of Lift and Portable Elevator Manufacturers

**Keywords**: material handling; industrial equipment;

### MATERIALS AND METHODS STANDARDS ASSOCIATION

Harvey J. Powell, President

Post Office Box 332
Grand Haven, Michigan 49417
(616) 842-7844

Founded: 1962  Standards Staff: 5

**Type of Organization**: Trade Association

**Standards Development**: Standards Developer

45 members active in standards development
Scope
Establishes standards of quality and performance of materials and methods for installation and use of ceramic tiles.

Standardization Activities
Member of ANSI A108 and ANSI A137-1 Committees; member of Tile Council of America Handbook for Ceramic Tile Installation Committee; issues bulletins on the installation of ceramic tiles.

Availability
Distributed directly

Formerly
Methods and Materials Standards Association

Keywords
tile; mortar; building; materials; ceramic products;

MECHANICAL CONTRACTORS ASSOCIATION OF AMERICA

James R. Noble, Executive Vice President
1385 Piccard Drive
Rockville, Maryland 20850
(301) 869-5800     FAX: (301) 990-9690

Founded: 1889

Type of Organization
Trade Association
Works through other organizations to develop standards

Scope
A construction trade association of 1600 firms employing approximately 150,000 persons. Members build systems that move both liquid and gas fluids. This includes fabrication and installation of heating, ventilating, air conditioning, plumbing, and process piping systems in multi-residential, commercial, public, and industrial facilities.

Standardization Activities
Participates in national standards development with American National Standards Institute (ANSI); American Society of Mechanical Engineers (ASME); National Safety Council (NSC); Underwriters Laboratories (UL) for development of consensus standards related to heating, ventilating, air conditioning (HVAC), plumbing, piping, welding, safety, and other construction-related topics.

Keywords
heating; piping; ventilating; air-conditioning; plumbing; welding; safety; construction; building;
MECHANICAL POWER TRANSMISSION ASSOCIATION

Robert A. Reinfried, Executive Director

932 Hungerford Drive, Suite 36
Rockville, Maryland 20850
(301) 738-2448

Founded: 1933

Type of Organization
Trade Association
Standards Developer

Standards Development
Standards developer since 1936
Seventeen member companies participate in standards activities
Standards processed through ANSI

Standards Designation
MPTA and RMA/MPTA prefixes

Scope
Manufacturers of multiple V-belt drive sheaves for mechanical power transmission machinery.

Standardization Activities
Concerned with the development of standards and other programs concerning V-belt drive systems and devices, variable speed drives, synchronous drives, and other belt drives. Maintains liaison with the Rubber Manufacturers Association. V-belt and synchronous drive standards are developed in liaison with RMA.

Availability
V-belt drive standards are available through RMA.

Formerly
Multiple V-Belt Drive and Mechanical Power Transmission Association

Keywords
belt drives; machinery; industrial equipment;

METAL BUILDING MANUFACTURERS ASSOCIATION

Charles M. Stockinger, General Manager

1230 Keith Building
Cleveland, Ohio 44115
(216) 241-7333 Telex: 980-393

Founded: 1956 Standards Staff: 3

Type of Organization
Trade Association/Industry Voluntary Standards Standards Developer

Scope
Promotes the uses of metal buildings; deals with technical and trade promotional problems pertinent to
the industry; compiles and publishes information of benefit to the industry and others interested in metal buildings; cooperates in the adoption and maintenance of standards for metal buildings.

**Standardization Activities**
A Technical Committee prepares recommendations concerning such projects as methods used in application of design loads, recommended minimum thicknesses of steel used in manufacturing metal buildings in order to assure proper service, and other general recommendations for use by model code bodies in preparing or revising these codes in order to have properly constructed metal buildings. Works in conjunction with the American Iron and Steel Institute, model code bodies, the American Institute of Steel Construction, and other code committees to assure users that proper installations are made.

**Availability**
Distributed directly

**Keywords**
metal buildings; building; structures;

**METAL LADDER MANUFACTURERS ASSOCIATION**

R. L. Werner, Secretary
P.O. Box 580, Osgood Road
Greenville, Pennsylvania 16125
(412) 588-8600

**Type of Organization**
Trade Association
Standards Developer

**Scope**
Manufacturers of light metal ladder products. Promotes standardization and simplification of products, sizes, and dimensions to eliminate waste and reduce cost. Conducts safety research.

**Standardization Activities**
Works on ANSI code committees for ladders, stages, and scaffolds. Promulgates safety standards pertaining to products manufactured by its members. Active on ANSI committees for portable metal ladders; mobile scaffolds, ladder towers and telescopic work platforms; construction code; and temporary scaffolding.

**Availability**
Sold directly and through ANSI

**Keywords**
metal ladders; ladders; planks; scaffolds; industrial equipment; consumer products;

### METAL TREATING INSTITUTE

M. Lance Miller, Executive Director

302 Third Street
Suite One
Neptune Beach, Florida 32233
(904) 249-0448

Founded: 1933
Type of Organization: Trade Association Standards Developer

Standards Development: Standards developer since 1975
None processed through ANSI

Scope: Firms engaged in commercial heating of metals, tools, and other metal products. Conducts regional and national meetings for exchange of information; acts for its members in national affairs affecting the industry.

Standardization Activities: Prepared a set of quality assurance standards which outlines a standard of good process and equipment control and provides customers with specific and meaningful criteria for comparing or evaluating equipment, processes, process controls, and record-keeping systems in the heat treating facility where this standard is employed. Also provides procedures which establish a measure of uniformity among its users so that customer surveys may be made more quickly with better comparability and consistency.

Availability: Sold directly

Keywords: metal treating; heat treating; manufacturing; materials;

MINERAL INSULATION MANUFACTURERS ASSOCIATION

Kenneth D. Mentzer, Executive Vice President

1420 King Street
Suite 410
Alexandria, Virginia 22314
(703) 684-0084

Founded: 1933  Standards Staff: 1

Type of Organization: Trade Association
Works through other organizations to develop standards

Representation: Members active in ASTM C16 and E6; ASHRAE TC4.4; Model building code organizations; ISO committees concerned with insulation.

Certification: Initiated, with NAHB Research Foundation, programs for the certification of mineral fiber batts, blankets, and loose wool.
**Scope**
A nonprofit organization rendering services to promote the welfare and development of mineral wool insulation products designed for installation in buildings utilized for human occupancy.

**Standardization Activities**
Develops standards and specifications, national in scope, referring to mineral wool insulation products. Cooperates with and advises government agencies at all levels on thermal performance standards that will contribute to the conservation of energy. Also advises and consults with other energy suppliers and professional organizations regarding standards, research, applications, and other related matters.

**Formerly**
National Association of Rock and Slag Wool Industries (1933)

**MO-SAI INSTITUTE**

R. C. Robinson, Secretary/Treasurer

P.O. Box 539
Redmond, Washington 98073-0539
(206) 868-1922

Founded: 1940

**Type of Organization**
Trade Association

**Standards Development**
Standards developer since 1940
Standards for design, manufacture, and quality assurance in the fields of precast and prestressed architectural concrete and glass fiber concrete

**Government Adoption**
Standards cited by GSA, Army Corps of Engineers, Navy Facilities Command.

**Certification**
Through programs of American Concrete Institute, Prestressed Concrete Institute, ASTM

**Scope**
A nonprofit organization that is organized to standardize, improve, and promote the use of precast architectural concrete. Standardization is administered by the Technical Committee.

**Standardization Activities**
Current standards are contained in one publication, Standard Specifications of Mo-Sai Institute. Standards are national in scope and are promoted through market development activities of member companies.

**Availability**
Distributed directly

**Keywords**
crane; concrete; precast concrete; prestressed concrete; building; construction;

**Type of Organization**

Technical Society

Standards Developer

**Scope**

A nonprofit organization primarily engaged in research and training in the field of methods-time-measurement (MTM). Maintains the following committees: Membership; Conference; Public Relations; Technical Services;
**Standardization Activities**

Establishes standards for a methodology for deriving a time to perform a given manual task including standardization data for clerical operations, work under the microscope, and work in maintenance areas. Also developed and provides specialized productivity management services such as RX:MedTrol, a system to provide quality healthcare in a cost-effective manner.

Maintains an Association for Standards and Research composed of academicians, individual members and corporate memberships that include various branches of the Government, insurance companies, manufacturing facilities, banks, educational institutions, consultant companies, the Association for the Blind, etc.

College Park, Maryland 20740

(301) 779-6555

**Type of Organization**

Technical Society

**Representation**

Standards Developer

ANSI X11.1

**Scope**

A nonprofit corporation devoted to the advocacy of the MUMPS computer language and facilitation of MUMPS technology as a component of the information processing community. MDC operates as an open membership body using the strictly voluntary efforts of its members. MDC meets three times a year and has approximately 80 member organizations.

**Standardization Activities**

MDC is officially recognized by ANSI as responsible for developing standards for the MUMPS Computer language. The MDC is engaged in perfecting the MUMPS language specification and determines the technical specifications for binding MUMPS to the surrounding body of standards that must be related to MUMPS. This committee has published three revisions of ANSI X11.1 - in 1977, 1984, and 1990.

### NATIONAL ACCREDITATION COUNCIL FOR AGENCIES SERVING THE BLIND AND VISUALLY HANDICAPPED

**Dr. James D. McComas, President**

79 Madison Avenue  
Room 1406  
New York, New York 10016  
(212) 683-8581
Founded: 1967

Type of Organization
Technical Society
Standards Developer

Scope
Develops standards and administers a voluntary system of accreditation for local, state, and national agencies providing direct services to blind and visually handicapped persons.

Standardization Activities
Develops and updates standards for the management and services for agencies and schools for the blind and visually handicapped and administers a voluntary system of accreditation. Twenty-five sets of standards cover all areas of administration and service delivery for schools, workshops, rehabilitation centers, and other organizations serving blind and visually handicapped persons.

Standards are used as guidelines for reviewing degree of compliance by schools and agencies. Accreditation is awarded relative to compliance with Council standards, which are revised periodically. Public recognition of accreditation is made by the Commission on Accreditation. Accreditation may be granted for maximum of five years or for less than the maximum period. The Commission may grant accreditation, deny it, or postpone a decision.

Availability
Sold directly

(603) 673-3311    FAX:  (603) 672-2613

Type of Organization
Trade Association
Standards Developer

Scope
A trade association of more than 1,000 commercial tree service firms. A strong supporter of the voluntary standards system.

Standardization Activities
Instrumental in the development of ANSI Z133.1, American National Standard for Tree Care Operations - Pruning, Trimming, Repairing, Maintaining, and Removing Trees, and Cutting Brush - Safety Requirements, and all five of its revisions.
Keywords: trees; safety;

NATIONAL ASSOCIATION OF ARCHITECTURAL METAL MANUFACTURERS

A. L. Sisco, Executive Vice President

600 South Federal Street
Suite 400
Chicago, Illinois 60605
(312) 922-6222

Founded: 1937

Type of Organization: Trade Association
Standards Developer

Standards Development: Eleven standards
Two processed through ANSI

Standards Designations: NAAMM Standard, NAAMM Recommended Voluntary Standard,
ANSI/NAAMM prefix

Scope: A nationwide association of fabricators of architectural, commercial, residential, ornamental, miscellaneous, and hollow metal products. Promotes mutual interests and cooperation among members of industry; promotes educational and informational activities; compiles and disseminates statistics; furnishes technical information to architects and engineers; maintains and improves technical standards of the industry; conducts studies and surveys to increase the use of the markets for industry products; promotes and assists in the development of new products.

Standardization Activities: Five divisions active in standards activities including Architectural Metal Products Division, Flagpole Division, Hollow Metal Manufacturers Association Division, Metal Bar Grating Division, and Metal Lath/Steel Framing Association Division. Voluntary standards and specifications developed for metal stairs, metal stair railings, pipe railings, flagpoles, hollow metal doors and frames, metal bar grating, metal lath and plaster assemblies and lightgage steel framing which are widely accepted by architects, engineers, specification writers, code groups, and government agencies.

Standard for Fabrication of Metal Bar Grating, Specifications for Metal Lathing & Furring and Lightweight Steel Framing Systems Manual. Also revises and updates standards on a regular basis. Also provides representation to ASTM committees where appropriate to the development of performance and testing standards.

**Availability**
Distributed directly

**Formerly**
National Association of Ornamental Metal Manufacturers. Absorbed the National Steel Door and Frame Association (1962)

**Keywords**
architectural metals; stairs; railings; bar-gratings; flagpoles; doors; door frames; building; light gauge steel framing; metal lath;

**NATIONAL ASSOCIATION OF BROADCASTERS**

Michael Rau, Vice President - Science & Technology

1771 N Street, NW
Washington, DC 20036
(202) 429-5346

Founded: 1922

**Type of Organization**
Trade Association Standards Developer

**Standards Development**
Standards developer since 1941

**Standards Designations**
NAB and NARTB prefixes

**Certification**
No certification, qualification, or accreditation programs

**Secretariats**
NAB is the secretariat of the Advanced Television Systems Committee whose purpose is to coordinate the development of voluntary national standards for Advanced Television Systems in the United States. NAB is also secretariat of the National Radio Systems Committee (NRSC) whose purpose is to better the relationship between broadcasters and radio receiver manufacturers through technical improvements.

**Scope**
Represents membership of 5,000 radio and over 900 television stations, including the major networks. Represents the industry before Congress, the White House, and federal regulatory agencies.
### Standardization Activities

Maintains standards committees regarding the retention and review of existing NAB standards and practices. As a member of the Joint Committee on Inter-Society Coordination composed of the NAB, EIA, IEEE, NCTA, and SMPTE, the NAB participates in many standards setting committees representing broadcasters and broadcasting interests. Standards pertain to radio and television technical improvements, and producing test records and CDs.

### NATIONAL ASSOCIATION OF CHAIN MANUFACTURERS

Ross G. Wilcox, Executive Vice President

20 North Wacker Drive
Suite 3318
Chicago, Illinois 60606
(312) 558-1849

Founded: 1932

### Type of Organization

Trade Association

Works through other organizations to develop standards

### Representation

Standards committees of ASTM, ASME, and others.

### Scope

Ten manufacturers of welded chain, weldless chain, and tire chains. In addition to standardization, the Association promotes the use of chain and serves as a liaison in contacts with technical and professional groups and federal governmental agencies.

### Standardization Activities

The Association has three committees involved in various aspects of standards development and coordination. These are the Engineering Subcommittee, Ad Hoc Committee on Metrication, and Tire Chain Technical Subcommittee. Along with development of industry standards, members of these groups serve on various standards setting bodies.

### Formerly

The Chain Institute

<td>Assists the public and industrial communities to conserve energy and materials through corrosion control and materials selection. Provides a forum for the presentation of new technology and evaluation of existing technology; publishes literature concerned with the science and engineering of corrosion; supports the needs of other learned societies by supplying information regarding the science and engineering of corrosion control and materials selection; establishes and publishes technical standards and practices to guide producer and user industries; promotes the recognition of corrosion engineering as a profession by means of education, accreditation, and certification programs.</td>
</tr>
</tbody>
</table>
### Standardization Activities

Standardization activities accomplished through approximately 350 technical committees which are composed of representatives from industries in which corrosion is a problem. Identifies corrosion problems and solutions and assembles information to define the problems. Develops standards which are reviewed by interested industry parties. Standards represent a consensus of persons substantially concerned with their subjects.

Makes concerted efforts to involve other technical societies in relevant standardization activities through formal liaison.

Primary focus on standardization has been related to development of performance standards. Standards have been proposed regarding performance (resistance to corrosion) of offshore steel platforms, performance of cathodic protection systems, and performance of materials in corrosive environments.

### Availability

**NATIONAL ASSOCIATION OF COUNTY ENGINEERS**

Milton L. Johnson, P.E., Executive Director

326 Pike Road  
Ottumwa, Iowa 52501  
(515) 684-6928

Founded: 1956

**Type of Organization**  
Professional Society  
Standards Developer

**Scope**

Identifies various technical and management problems common to most counties and documents their solutions. Conducts workshops and holds a Management Research Conference annually. Affiliated with the National Association of Counties.

**Standardization Activities**

Publishes Action Guide Manuals which emphasize standards for county engineering management and procedures for simplified engineering and technical analysis. Subjects include: organization-personnel purchasing; cost records; advance road programs; county planning; planning county road systems; refuse disposal; county traffic operations; maintenance management; public support; spot safety improvements;
bridge inspection; soil erosion and water pollution prevention; aerial photography; drainage; travel generation; and subsurface soils exploration. Works closely with federal departments, Congressional Committees, the Highway Research Board, and state agencies.

NATIONAL ASSOCIATION OF HOSIERY MANUFACTURERS

Sid Smith, President and CEO

447 South Sharon Amity Road
Charlotte, North Carolina 28211
(704) 365-0913

Founded: 1905

Type of Organization: Trade Association
Standards Designation: Commercial Standards, CS prefix
Scope: Composed of manufacturers who knit or otherwise process hosiery of any type. Develops standards for hosiery measurement, performance, and quality.
Standardization Activities: Active in technical research leading to standards concerning size systems and terminology for various types of hosiery. NAHM Sizing Standard is an industry standard using body measurements for the sizing of men's, women's, and children's knee-high and shorter hosiery. Developed a simple method for use in describing women's pantyhose in order to provide wearers with proper fitting garments. Instrumental in developing measurement standards.
Availability: Distributed directly
Keywords: sizes; hosiery; clothing; consumer products;

NATIONAL ASSOCIATION OF HOSPITAL PURCHASING MATERIALS MANAGEMENT

Tedd Heckethorn, Acting Executive Director

Post Office Box 1046
Lewiston, Pennsylvania 17044
(717) 242-0106

Founded: 1957

Type of Organization: Professional Society
Certification: The Professional Development Committee has established guidelines for the certification of hospital purchasing managers.
Scope: A nonprofit professional organization of hospital purchasing directors. Fosters an increased knowledge
of and proficiency in purchasing management; conducts and participates in educational programs and activities; provides media for the interchange of ideas and dissemination of material relative to hospital purchasing management.

**Standardization Activities**

Establishes standards of performance for individuals and institutions in the various areas of hospital purchasing management through certification and educational conferences and research in hospital purchasing management.

**Formerly**

National Association of Hospital Purchasing Management (1968)
National Association of Hospital Purchasing Agents (1957)

**Keywords**

hospital management; purchasing; general; health care;

Standards Development
Standards developer since 1969

Standards Designation
Nameplate Industry Standards and Practices

Government Adoption
Military Specifications for nameplates

Scope
Membership accounts for approximately two-thirds of the total business volume of the name plate manufacturing industry in the United States. The term "name plate" refers to any metal or plastic plate that has been etched, embossed, stamped, engraved, or imprinted and which is fastened to another object for purposes of identification, instruction, or decoration.

Standardization Activities
Standards represent a relatively small but highly significant portion of the association's activities. In 1969 published Metal Name Plate Industry Standards and Practices, which was updated in 1987 under the name of Name Plate Industry Standards and Practices. This
The book is the only set of standards in existence for the industry in the United States. Among the subject areas covered are: nomenclature, finishes, fabrication tolerances, materials, fastening methods, inspection, reject procedure, delivery, and equipment preparation. Copies have been distributed throughout the industry and to customers of the industry in both private and public sectors for their information and use in writing specifications. The Book of Standards Committee is responsible for compiling and coordinating changes.

U.S. Technical Advisory Group ISO/TC 72
Scope
An association for manufacturers of image technology products. Promotes and encourages a wider understanding and appreciation of image technology, and a greater use of image technology products worldwide.

Standardization Activities
Promotes standardization of all photographic products, and methods of testing product performance. Ensures interchangeability and compatibility of photographic components and materials.

Domestic standards committees are accredited by the American National Standards Institute and follow a voluntary consensus system. Proposes programs of work and gives direction and guidance to the various Accredited Standards Committees while maintaining over 276 approved standards. Cooperates with ANSI, ASTM, ANMC, IEEE, NEMA, SMPTE, ISO, and IEC.

International activities include developing international photographic standards under ISO procedures, and maintaining close liaison with other international standards developing organizations in allied fields. Promotes participation in the activities of the International Electrotechnical Commission (IEC) through NAPM's domestic and international standards committee secretariats.

NATIONAL ASSOCIATION OF PURCHASING MANAGEMENT

R. Jerry Baker, Executive Vice President
2055 East Centennial Circle
Post Office Box 22160
Tempe, Arizona 85252

Founded: 1915

Type of Organization: Professional Society
Works through other organizations to develop standards

Certification: Certified Purchasing Manager Program which establishes a standard of competency.

Scope: Provides national and international leadership in purchasing and materials management research and education. Provides opportunities for expansion of professional skill and knowledge. Encourages public understanding of the purchasing and materials management concepts.

Standardization Activities: Promulgates standards through company standardization programs. Sponsors educational programs which are related to the broad field of standardization and simplification. In an effort to further advance sound principles of purchasing and to elevate the purchasing profession, this committee's professional development program publishes a series of handbooks.

Formerly: National Association of Purchasing Agents (1968)

NATIONAL ASSOCIATION OF RELAY MANUFACTURERS

D.E. Dangott, Executive Director

P.O. Box 1506
Elkhart, Indiana 46515
(219) 264-9421

Founded: 1947

Type of Organization: Trade Association
Standards Developer

Scope: Promotes the standardization of terminology and test procedures in the manufacture and uses of relays. Cosponsors a National Relay Conference to provide engineers and specialists concerned with relays the opportunity to present results of their technical
investigations to representatives of prominent relay manufacturers, users, and academicians.

**Standardization Activities**

Maintains standards committees which coordinate member activities with relay users and Government agencies in establishing specifications for relays. Cooperates with Electronic Industries Association and others to write standards for reed switches, solid state relays, and mercury displacement relays. Develops other specifications for low carbon and silicon steels, and EMI iron for use in magnetic circuits for relays. Publishes Engineers Relay Handbook which contains specifications relating to terminology and test procedures. It is an all-encompassing engineering reference source, covering all relays from electromechanical to hybrid and solid state. Also publishes the booklet, Definitions of Relay Terms.

**NATIONAL ASSOCIATION OF ROCKETRY**

James P. Miller, President

1311 Edgewood Drive
Altoona, Wisconsin 54720
(715) 834-8074

Founded: 1958 Standards Staff: 4

**Type of Organization**

Scientific Society

**Standards Development**

Standards developer since 1958

10 manufacturers participate in standards activities

2 active standards

**Government Adoption**

48 state governments use NAR Safety Certification as a prerequisite for sale.

**Certification**

See below

**Scope**

A national hobby service organization for model rocketeers. Provides a monthly magazine, technical materials, liability insurance, and education programs for its members. Sanctions local clubs and local contests. Homologates national model rocket flight records. The U.S. Representative to the FAI CIAM Subcommittee on Space Models where it interacts internationally with other hobby organizations. Chairs the NFPA Committee on Pyrotechnics and works closely with
the HIA to monitor state and national hobby legislation.

**Standardization Activities**

Certifies model rocket motors for safety prior to their sale in 48 states. Certification is based upon the reliability of the motors, casing temperatures, and the total impulse. Contest certifies model rocket motors prior to their use in Association sanctioned contests.

Recertifies model rocket motors every third year. Established a random sampling program to spot check motors for sale to consumers on hobby shop shelves. Maintains records of motor failures filed by its members; these records are provided to the manufacturers as input for product correction and development.

**NATIONAL ASSOCIATION OF STATE PURCHASING OFFICIALS**

Darrell D. Perry, Executive Secretary

Box 11910 Iron Works Pike
Lexington, Kentucky 40578
(606) 252-2291

Founded: 1947

Affiliated with the State Council of Governors.

See Section 4.1 of this Directory listing state government standardization activities.

**NATIONAL ASSOCIATION OF STATE TEXTBOOK ADMINISTRATORS**

Becky McConkey, Executive Director

3905 Reedy Creek Road
Raleigh, North Carolina 27606-6441
(919) 733-6015

**Type of Organization**

Professional Society

**Standards Designations**

NASTA prefix
Scope
Directors of state education agencies responsible for the purchase and distribution of textbooks for public schools.

Standardization Activities
Maintains an Advisory Committee which develops specifications for hard cover textbooks and non-consumable softcovered texts. Specifications cover margins, uniform labelling, paper, binding, and stitching. Cooperates with BMI (Book Manufacturer's Institute) and AAP (Association of American Publishers) to develop specifications. Publishes Manufacturing Standards and Specifications for textbooks developed by a commission comprised of NASTA, BMI, and AAP.

NATIONAL AUTOMATED CLEARING HOUSE ASSOCIATION

Elliott McEntee, President
607 Herndon Parkway
Suite 200
Herndon, Virginia 22070

Founded: 1974

Type of Organization
Trade Association
Standards Developer

Standards Development
Standards developer since 1974

Scope
A national trade association involved in developing payments standards for automated clearing house (ACH) transactions. Processed over 1 billion ACH transactions in 1989 for applications such as direct deposit, preauthorized debits, corporate cash concentration, and electronic data interchange (EDI) payments. Forty-two member associations representing over 16,000 financial institutions.

One standard

Standards Designations
NAMA Standard for the Sanitary Design and Construction of Food and Beverage Vending Machines (as amended, September 1989)

Government Adoption
Adopted by many states, counties and municipalities and, by reference, the Army, Air Force, and Navy. Results of evaluation activity are recognized nationwide.

Certification
Evaluation and testing are conducted by retained consultants. Reevaluation is conducted annually.

Scope
The national association of the vending and contract food service industry. Membership includes national/regional/local operating companies, machine manufacturers, distributors, and product suppliers. Services include legislation, government relations, education, conventions, state affiliate organizations, public relations, publications, and public safety.

Standardization Activities
Maintains a 20-member Automatic Merchandising Health Industry Council comprised of representatives from national public health associations, federal regulatory and military agencies, vending operators, machine manufacturers and suppliers. Recommends to NAMA all administrative policies and procedures used in the evaluation program. Works with Underwriters Laboratories on UL standards 541 and 715.

National Automobile Theft Bureau

Paul W. Gilliland, President

10330 South Roberts Road - 3A
Palos Hills, Illinois 60465
(312) 430-2430

Founded: 1912

Type of Organization: Service Organization
Works through other organizations to develop standards

Scope
The NATB formulates and implements policies for the prevention of vehicle theft, vehicle arson, and vehicle fraud. NATB cooperates with duly constituted public authorities in the prosecution of individuals engaged in vehicle crime and fraud. The Bureau is an agency for the location and identification of stolen vehicles and for the promotion of anti-vehicle theft activities. NATB is a crime prevention organization supported by more than 650 property-casualty insurance companies, providing assistance to law enforcement, insurance and the public.

Standardization Activities
Cooperates with automobile manufacturers in the adoption of a standard vehicle identification number, as well as in a standard method of stamping and affixing such numbers.

Prints and distributes to law enforcement agencies a Motor Vehicle Identification Manual, a Commercial Vehicle Identification Manual, and Manual for the Investigation of Automobile Fires. Services of the bureau are for the benefit, not only of insurance companies and law enforcement agencies, but of the entire motoring public.

Keywords
automobile theft; law enforcement; insurance; transportation;

National Bark And Soil Producers Association

Robert C. LaGasse, Executive Director

13542 Union Village Circle
Clifton, Virginia 22024
(703) 830-5367

Founded: 1971

Type of Organization: Trade Association
Standards Developer
Standards Development
Standards developer since 1972

Scope
Represents producers of bark and soil products in the United States and Canada. Disseminates information about the use of products to horticulture firms, garden shops, and the public.

Standardization Activities
The industry forum for development of bark and soil product standards; works with other organizations, such as the National Conference on Weights and Measures to develop standards. Has defined ten product categories. Grade standards serve as guidelines for producers and are used on product bags as an indication of quality.

Availability

NATIONAL BOARD OF BOILER AND PRESSURE VESSEL INSPECTORS

W. L. Garvin, Assistant Executive Director
1055 Crupper Avenue
Columbus, Ohio 43229
(614) 888-8320  Telex: 246-625

Founded: 1919

Type of Organization
Professional Society
Standards Developer

Standards Designation
National Board Inspection Code, 1983 (an ANSI Standard);
National Board Boiler Blowoff Equipment, 1973;
Relieving Capacities of Safety Valves and Relief Valves, 1983.

Certification
All states, municipalities, and Canadian provinces that have boiler and pressure vessel laws recognize the National Board inspector's commission and National Board stamping boilers and pressure vessels as meeting their safety law requirements for new construction. Transfer of such objects between states is implemented by National Board stamping. Relieving capacities of safety valves and pressure relief valves as certified by the National Board is used by various state, municipal, and provincial jurisdictions to determine adequate volumetric relief of the pressurized medium in event of runaway conditions.
Scope

Confines its membership to persons charged with enforcement of the boiler and pressure vessel laws in various states in the United States and the Canadian provinces.

Standardization Activities

Operates in the following areas of standardization: boiler and pressure vessel law enforcement; uniform boiler laws and rules throughout the jurisdiction of its members; uniform qualifications for boiler and pressure vessel inspectors, including identical examinations conducted simultaneously throughout the United States and Canada; uniform stamping of boilers and pressure vessels that are inspected during construction by such boiler and pressure inspectors who hold valid National Board commissions; and uniform relieving capacity ratings of safety valves and pressure relief valves for boiler and unfired pressure vessel service. Works with the American Society of Mechanical Engineers, Boiler and Pressure Vessel Code; the U.S. Department of Labor, Occupational Safety and Health Administration (OSHA); the U.S. Coast Guard; and the U.S. Nuclear Regulatory Commission (NRC) in the development of safety standards, codes, and uniform safety inspections.

NATIONAL BUILDING GRANITE QUARRIES ASSOCIATION

Kurt M. Swenson, Secretary
c/o Rock of Ages Corporation
Post Office Box 482
Barre, Vermont 05641
(802) 476-3115 FAX: (802) 476-3110

Founded: 1916

Type of Organization

Trade Association
Standards Developer

Standards Development

Standards developer since 1916

Scope

A national trade association of companies involved in the quarrying and manufacture of granite for architectural applications. They represent their members in national and international areas of interest.
### Standardization Activities
Publishes Specifications for Architectural Granite annually. Specifications are reviewed and updated annually. Also provides listing of available types of granite from members classified by color, name, quarry location and quarrier. Also provides other assistance on architectural granite upon request.

### Availability
Distributed directly

### Keywords
granite; building materials; architecture; architectural granite; building granite;

### NATIONAL BURGLAR AND FIRE ALARM ASSOCIATION
Charles B. Lavin, Sr., CAE, Executive Director
7101 Wisconsin Avenue
Suite 1390
Bethesda, Maryland 20814-4805
(301) 907-3202

**Type of Organization**
Trade Association

**Representation**
Representatives on NFPA, UL, and ASTM Committees

**Scope**
Represents 2,400 installing and operating alarm companies, as well as manufacturers and suppliers of alarm equipment services. Maintains liaison with the insurance industry, fire and policy organizations, state and federal agencies, and many special groups.

### Standardization Activities
Standards committee monitors all standards of interest to members and distributes information accordingly. Input to consensus standards is provided through members on various committees.

### Keywords
burglary; fire alarm; security; alarm system; buildings;

### NATIONAL CABLE TELEVISION ASSOCIATION
James P. Mooney, President
1724 Massachusetts Avenue, NW
Washington, DC 20036
(202) 775-3550

**Founded:** 1952
**Type of Organization**
Trade Association
Standards Developer

**Scope**
Represents the interests of the cable television industry before Congress and federal agencies, in courts of law, and before state regulatory agencies in dialogues with other industries and groups.

**Standardization Activities**
Maintains an Engineering Department which administers the standardization activities. Issues Engineering Standards which cover the areas of Visual Carrier Level, Amplifier Distortion, Graphic Symbols, the Standards Numbering System, and Noise Level in Cable Systems. The active standards committees and new projects are C-TAC (Cable Television Advisory Committee); EIA/CTSC (Cable Television Systems Communications); NEC (National Electric Code); and the JCIC (Joint Committee on Inter-Society Coordination). Promotes the use of standards through a bulletin and training courses. Participates in subcommittees of the International Electrotechnical Commission and is involved with the Federal Communications Commission.

### NATIONAL CARGO BUREAU

S. Fraser Sammis, Chairman

30 Vesey Street
New York, New York 10007
(212) 571-5000 FAX: (212) 571-5005

Founded: 1952

**Type of Organization**
Trade Association
Standards Developer

**Certification**
The bureau is authorized by the U.S. Coast Guard to certify the loading of bulk grain cargoes and to approve grain loading plans in accordance with current regulations. The Bureau is officially recognized by the Coast Guard and the Department of Labor as a cargo gear certification agency.

**Scope**
A nonprofit organization whose membership is comprised of persons prominently identified with steamship management or marine insurance underwriting organizations. Dedicated to the safe loading, stowing,
securing, and unloading of cargo and cargo containers on all vessels, and for the design, strength, safety, and suitability of cargo handling gear and cargo containers, including the security and integrity of containers.

**Standardization Activities**

Assists the U.S. Coast Guard in administering the provisions of the Dangerous Cargo Act and the applicable regulations in Title 46, of the Code of Federal Regulations, Shipping, with respect to inspection of vessels for suitability for loading dangerous cargo; examination of stowage of dangerous cargo; making recommendations as to towage requirements of dangerous cargo; and issuance of certificate of loading setting forth that the stowage of dangerous cargo is in accordance with the regulations.

Participates in activities of the International Maritime Organization (IMO) by being active on the IMO Maritime Safety Committee, the Subcommittee on Containers and Cargos, and the Subcommittee on the Carriage of Dangerous Goods. This subcommittee revised the international regulations for the carriage of bulk grain.

NATIONAL CLAY PIPE INSTITUTE

E. J. Sikora, Vice President
Post Office Box 759
253-80 Center Street
Lake Geneva, Wisconsin 53147
(414) 248-9094

Founded: 1944 Standards Staff: 2

Type of Organization
Trade Association
Standards developer by working through ASTM

Government Adoption
Federal agencies involved directly and indirectly in construction activities have adopted ASTM standards for Vitrified Clay Pipe and its installation.

Secretariats
ASTM Committee C-4.

Scope
An international trade association, representing the major U.S. manufacturers of Vitrified Clay Pipe, with Associate Members in several foreign countries. Renders engineering advisory services to design engineers, Government officials, and others. Conducts scientific research, national advertising, and public relations programs on behalf of the industry at various independent research laboratories and universities.

Publishes the Clay Pipe Engineering Manual for engineers, city and state officials, and architects. Also technical brochures of an educational nature relating to the use of Vitrified Clay Pipe in sanitary sewer systems.

Standardization Activities
Active in the American Society for Testing and Materials. Assists in the development of federal specifications.

Availability
Sold directly

NATIONAL CLAY POT MANUFACTURERS ASSOCIATION

Stone Manes, President
P.O. Box 485
Jackson, Missouri 63755
(314) 243-3138
Founded: 1956

Type of Organization: Trade Association

Scope: A nonprofit corporation which acts to stimulate professional and public interest in the uses and advantages of clay flower pots and in modern techniques employed in their production.

Standardization Activities: Develops standard sizes and shapes of clay flower pots manufactured in the United States.

Availability: Distributed directly

Keywords: flower pots; planting; agriculture; horticulture; floriculture; retail;

NATIONAL COFFEE ASSOCIATION OF THE USA

George E. Boecklin, President

110 Wall Street
New York, New York 10005
(212) 344-5596

Founded: 1911

Type of Organization: Trade Association

Scope: Works through other organizations to develop standards Green coffee importers, jobbers, brokers, and agents; instant coffee processors; roasters and allied coffee industries. Promotes sound business relations among members of the trade to increase coffee consumption.

Standardization Activities: Representatives from member firms assist in development of ISO standards, Codex Alimentarius standards; U.S. Government and various other standards for purchasing.

Keywords: coffee; agriculture; beverages;

NATIONAL COIL COATERS ASSOCIATION

Kenneth Dickson, Executive Director

1900 Arch Street
Philadelphia, Pennsylvania 19103
(215) 564-3484

Founded: 1962
Type of Organization
Trade Association Standards Developer

Scope
Manufacturers of continuously coated metal coil, other than metal plated coil. Fosters development of standard test methods, exchanges technical information, collects statistics, and promotes coated coil.

Standardization Activities
Maintains a Technical Section which works to develop test methods and evaluate new processes. Activities include accelerated testing, physical testing, and standards development in the areas of color, laminate, aluminum, and steel. Supports ASTM, ANSI, and AISI in this work. Publishes a Technical Manual and Bulletins.

NATIONAL COMMITTEE FOR CLINICAL LABORATORY STANDARDS

John V. Bergen, Ph.D., Executive Director

771 E Lancaster Avenue
Villanova, Pennsylvania 19085
(215) 525-2435

Founded: 1968 Standards Staff: 13

Type of Organization
Voluntary Consensus Standards Developer

Standards Development
Accredited by ANSI
Over 1,200 scientists participate in 115 projects
81 standards and guidelines available; 20 at approved level, 20 at tentative level, and 41 at proposed level
150 active members (professional organizations, governmental agencies, industrial organizations)
1,050 corresponding members (state agencies, universities, clinical laboratories, international organizations)

Secretariats

Scope
A national nonprofit, educational organization whose purpose is to provide a communication forum for, and to promote the development and use of, national and international standards for the clinical laboratory.
Based on the principle that voluntary consensus standards for clinical laboratory testing are necessary in order to maintain laboratory performance at levels that ensure high quality patient care.

Represents an active membership with balanced representation of the professional sector, government, and industry, including professional organizations, state and federal agencies, trade associations, and individual companies. Members participate in the development of proposed, tentative, and approved NCCLS standards and guidelines.

**Standardization Activities**

Develops standards in ten areas: clinical chemistry, evaluation protocols, instrument systems, general laboratory practices, immunology, hematology, microbiology, ligand assay, toxicology/drug monitoring, and alternate site testing.

Publications focus on laboratory procedures, bench and reference methodologies, and scientific evaluation protocols, providing realistic standards and guidelines that the clinical laboratory can use in its day-to-day activities. Standards publications include those relating to antibiotic susceptibility testing, blood collection, water purity testing, and clinical laboratory instrumentation. Also administers the National Reference System for the Clinical Laboratory (NRSCL) which provides the scientific basis to ensure that clinical laboratory results can be interchanged within defined limits of accuracy and precision.

**Availability**

Distributed directly

**Keywords**

clinical chemistry; medical instruments; laboratory; testing; immunology; hematology; microbiology; ligand assay; toxicology/drug monitoring; public health; reference technology; physician's office laboratory;

**NATIONAL COMPUTER GRAPHICS ASSOCIATION**

Carl Machover, President

2722 Merrilee Drive
Suite 200
Fairfax, Virginia 22031
(800) 225-NCGA
(703) 698-9600

Founded: 1979

**Type of Organization**

Trade Association
Standards Developer
Secretariats
ISO/IEC JTC1/SC24/WG1

Scope
Trade association comprised of more than 6,000 computer graphics professionals and 120 corporate members. NCGA is dedicated to developing and promoting the computer graphics industry and improving applications in business, industry, government, science and the arts.

Standardization Activities
NCGA's annual systems integration demonstration showcases the association's commitment to improving productivity through the widespread education and use of computer graphics standards.

NCGA is administrator of the IGES/PDES Organization and serves as secretariat for the international committee on computer graphics, ISO/IEC JTC1/SC24/WG1. NCGA also promotes the use, benefits and acceptance of data exchange standards for the geographic information systems (GIS) and mapping industries through the association's Geographic Data Exchange Standards Forum.

Keywords
computer; computer graphics; mapping; IGES/PDES; geographic information systems (GIS);

NATIONAL CONCRETE MASONRY ASSOCIATION

Kevin D. Callahan, Vice President of Technical Services

2302 Horse Pen Road
P.O. Box 781
Herndon, Virginia 22070
(703) 435-4900

Founded: 1920 Standards Staff: 5

Type of Organization
Trade Association

Works through other organizations to develop standards

Representation
All national code bodies; ASTM committees and American Concrete Institute standards committee.

Scope
A nonprofit trade association representing concrete masonry manufacturers throughout the United States, Canada, and 21 other countries. Encourages development of the art and science of manufacturing concrete masonry; creates a standard of excellence in manufacturing; develops criteria for the proper use of concrete masonry products and concrete pavers and encourages such use; and facilitates the interchange of practical knowledge among its members and related industries and organizations.
Activities of the association are developed by the Technical and Specifications Review Committees and are subject to approval by the Board of Directors. Maintains continuing liaison and participation in the standardization and specification activities of the major national code bodies in the United States, the American Society for Testing and Materials, the American Concrete Institute, ASCE, BSSC, AIA, and CSI. Liaison and product specification assistance conducted on a regular basis with agencies of the federal government including the National Institute of Standards and Technology, Departments of Housing and Urban Development, Defense, Commerce, Agriculture, and with the Corps of Engineers, Department of Veterans Affairs, General Services Administration, National Aeronautics and Space Administration, and the Federal Aviation Administration.

NATIONAL CONFERENCE OF STATES ON BUILDING CODES AND STANDARDS

Robert C. Wible, Executive Director

481 Carlisle Drive
Herndon, Virginia 22070
(703) 437-0100

Founded: 1967 Standards Staff: 5

Type of Organization

Professional Society

Works through other organizations to develop standards

Certification

Participates in National Certification Program for construction Code Inspectors (NCPCCI) examinations.

Scope

Founded by a group of state governors concerned with the need to better coordinate state building code and public safety activities, NCSBCS today represents the fifty states and several territories in the area of building codes and standards. It maintains an Executive Branch Agreement of the National Governors Association and includes as members governor-appointed representatives of each state and territorial government. Also included as members are other state and local building officials, practicing architects and engineers, building contractors, product manufacturers and suppliers, and consumers. NCSBCS promotes intergovernmental reforms in the area of building codes and standards and encourages the establishment of standards and practices which promote the development, introduction, and acceptance of innovative building materials and techniques.
50 delegates and 5 standards staff participate in the development, updating, and ongoing maintenance of building codes and standards at the state and federal level. Responsible for the ANSI A225.1 Standard on Manufactured Housing Installations (Manufactured Home Sites, Communities and Set-ups). NCSBCS provides state government with a voice before other standards setting organizations. Some current public safety programs of NCSBCS include: acting as the monitoring and standardization agent for the U.S. Department of Housing and Urban Development in the federal manufactured housing construction and safety program; assisting the states in maintaining and updating their building energy conservation and architectural accessibility requirements; researching and developing models of effective and efficient state building code administration; and development of interstate reciprocity for modular and industrialized buildings.

Keywords
building codes and standards; manufactured home installations; state government; heating; safety; energy; building; government officials;

NATIONAL CORRUGATED STEEL PIPE ASSOCIATION

Venlo J. Wolfsohn, Executive Director

2011 Eye Street, NW

(202) 223-2217 FAX: (202) 457-9121

Founded: 1955

Type of Organization
Trade Association
Standards Developer

Standards Development
Standards developer since 1956
74 member companies participating in standards activities
5 active standards
None processed through ANSI

Standards Designation
CSP prefix

Scope
A national trade association that represents corrugated steel pipe fabricators, steel suppliers, and manufacturers of related products. Improves and expands the use of corrugated steel pipe and plate for culverts, sewers, bridges, subdrains, and other drainage facilities.
Maintains an active Technical Advisory Committee which develops CSP standards along with participating in and monitoring the work of other technical bodies such as ASTM, AASHTO, and AISI. Engineering organizations, specifying agencies, and users of corrugated steel pipe use standards. Widespread activities of the association make it possible for county, state, Federal, city, consulting and other engineers, as well as construction personnel, to become thoroughly acquainted with design, use, installation, and acceptance of corrugated steel pipe throughout the United States.

NATIONAL COTTON COUNCIL OF AMERICA

Phillip C. Burnett, Executive Vice President
P.O. Box 12285
Memphis, Tennessee 38182
(901) 274-9030

Founded: 1938 Standards Staff: 4

Trade Association

Members provide input or serve on various committees of standards developers, such as ASTM, ISO, AATCC, ACGIH, OSHA, CAL/OSHA, CPSC, EPA, and ANSI.

Joint Cotton Industry Bale Packaging Committee (JCIBPC). NCCA is one sponsor of the International Cotton Calibrations Standards Committee.

The National Cotton Council is the central organization of the U.S. cotton industry representing growers, ginners, warehousemen, merchants, cooperatives, manufacturers, and cottonseed crushers. It serves its members through programs of technical services, foreign operations, communications services, economic services, and legislation.

Works with industry and government agencies in developing needed fiber/textile test methods, product standards, and safety/health environmental standards affecting the cotton industry. Develops specifications to improve the quality and protection of the American cotton industry.
cotton bale and to improve its appearance and saleability in domestic and foreign markets. Sets cotton bale standards to guide handlers and processors in evaluating and communicating bale conditions. Through the JCIIBC, develops specifications for acceptable cotton bale packaging materials. These are adopted by reference by the Commodity Credit Corporation as a requirement for CCC loan eligibility.

Keywords
cotton; bale packaging; fiber testing; cottonseed; textiles; safety environment; agriculture;

NATIONAL COTTONSEED PRODUCTS ASSOCIATION

Allen Ater, Executive Vice President

P.O. Box 12023
Memphis, Tennessee 38182-0023
(901) 324-4417  FAX: (901) 324-4421

Founded: 1897  Standards Staff: 2

Type of Organization  Trade Association
Standards Developer

Standards Development
244 members actively participate in the use of NCPA Trading Rules.

Scope
Virtually all contracts between members and between members and non-members are subject to the provisions of the Trading Rules of the National Cottonseed Products Association.

Standardization Activities
Trading Rules provide for handling, sampling, and analysis of cottonseed and cottonseed products and for handling normal variation in quality and in actual delivery weights. Trading rules, such as those for cottonseed oil trading rules, relate final compensation to yield or out-turn of refined oil from the crude oil.

Standards Developer

**Standards Development**
Recommendations developed since 1928
75 published reports which contain recommendations

**Scope**
A nonprofit corporation which seeks to promulgate information and recommendations based on leading scientific judgment on matters of radiation protection and measurement and to foster cooperation among organizations concerned with these matters.

**Standardization Activities**
Collects, analyzes, develops, and disseminates in the public interest information and recommendations about protection against radiation and radiation measurements, quantities, and units, particularly those concerned with radiation protection. Provides a means by which organizations concerned with scientific and related aspects of radiation protection and of radiation quantities, units, and measurements may cooperate for effective utilization of their combined resources. Develops basic concepts about radiation quantities, units, and measurements about the application of these concepts and about radiation protection. Cooperates with the International Commission on Radiological Protection, the International Commission on Radiation Units and Measurements, and other national and international organizations, governmental and private.

Maintains seventy-seven Scientific Committees to draft proposed recommendations.

Founded: 1929

Type of Organization
Trade Association
Standards Developer

Standards Development
Standards Developer since 1929
All members participate in standards development

Standards Designation
NDMA

Scope
Objectives are to establish and maintain the rules and standards for the industry; conduct and stimulate trade promotion activities for the industry; and to hold educational plant tours and meetings that promote exchange of manufacturing techniques and ideas in the industry among its members.

Standardization Activities
Cooperates with all lumber, furniture, cabinet and related wood using manufacturers/associations in bringing about standardization programs on grading rules for wood component products. Publishes the "NDMA Rules and Specifications for Dimension and Woodwork." These Rules are recognized by the National Hardwood Lumber Association, and are considered international in scope.

NATIONAL EASTER SEAL SOCIETY

John Garrison, President
70 East Lake Avenue
Chicago, Illinois 60601
(312) 726-6200

Founded: 1919

Type of Organization
Technical Society
Works through other organizations to develop standards

Representation
ANSI, CARF, ACA, ASHA, JCAH, ACDD, NHC, BBB, and NCIB

Scope
Represents 160 state and local affiliates serving persons with disabilities. Programs include legislative advocacy and the maintenance of standards
for programs in occupational, physical and speech therapy, recreation, and other rehabilitation services.

| Standardization Activities | Works to develop standards which ensure effective and efficient treatment and services for persons with disabilities as well as their integration into the education, housing, employment, and other community services. Representatives serve on Boards of national accrediting organizations and the ANSI Secretariat for the Standard for making Buildings Accessible to the Physically Handicapped. Involves consumers, designers, code officials, manufacturers, and representatives of federal regulatory agencies in its activities. Promotes the ANSI specification for accessibility to ensure one uniform standard for reference in building codes, laws, and regulations. |
| Keywords | disabled; physically handicapped; accessibility; codes; buildings; public health; social welfare; |

**NATIONAL ELECTRICAL CONTRACTORS ASSOCIATION**

Charles H. Williams, Manager of Codes and Standards

7315 Wisconsin Avenue, 13th Floor
Bethesda, Maryland 20814
(301) 657-3110

Founded: 1901

**Type of Organization**

Trade Association

Standards developer and works through other organizations to develop standards

**Standards Development**

Developed and maintains workmanship standard

**Representation**

The Correlating Committee and all of the code making panels of the National Electrical Code Committee. Also represents electrical contractors for the development of the National Electrical Safety Code, which is concerned with electrical outdoor construction. Serves on standards committees of ANSI, IEEE, NFPA, UL, and others.

**Standards Designation**

NECA Standard of Installation

**Scope**

A nationwide trade association representing the electrical contracting industry. Provides management services and labor relations programs. Sponsors research and educational programs; compiles statistics; conducts seminars.
Sets basic standards for electrical equipment and materials and methods of their installation. The NECA Technical Service maintains competent representation on interindustry and other standards agencies. NECA's Standard of Installation defines good workmanship and has been an authoritative guide to determine the "neat and workmanlike manner" requirements of the National Electrical Code. Prevents and reduces accidents by providing continuing information to its members on OSHA requirements.

NATIONAL ELECTRICAL MANUFACTURERS ASSOCIATION

Frank K. Kitzantides, Manager, Engineering Department

2101 L Street, NW
Washington, DC 20037
(202) 457-8479 Telex: 904077 NEMA WSH
FAX: (202) 457-8411

Founded: 1926 Standards Staff: 14

Trade Association
Standards Developer

Standards developer since 1926
630 members participating in standards activities
170 current standards
20 standards recognized by ANSI
5 standards endorsed by EEMAC
Draft standards distributed for user review

Several standards have been adopted as federal standards.

28 ANSI committees dealing with electrical equipment

A trade association of manufacturers of equipment and apparatus used for the generation, transmission, distribution, and utilization of electric power. Membership comprises 630 electrical manufacturing companies in the United States. Membership is limited to domestic corporations, firms, and individuals
engaged in the manufacture or promotion of products included within 70 NEMA product subdivisions. Products include transformers, wire and cable, switchgear, industrial control and systems, lighting, building equipment, diagnostic imaging and therapy systems products and industrial automation equipment.

Standards are designed and written to eliminate misunderstandings between manufacturers and users of electrical products and to provide for safety in the application of these products. Involves all interested parties in standards development and review. Cooperates with organizations such as the American Society for Testing and Materials, National Fire Protection Association, Underwriters Laboratories, the Institute of Electrical and Electronics Engineers, and others. Also cooperates with federal agencies.

Supports ANSI and has representation on standards committees and sponsors several of them. Also represented on ANSI Standards Boards and the Organizational Member Council. Participates in the International Electrotechnical Commission (IEC), the IEC System for Conformity Testing to Standards for Safety of Electrical Equipment (IECEE), and in the International Organization for Standardization (ISO).

NEMA also participates in the development of safety standards affecting electrical equipment. Cooperates with other branches of the industry in an effort to secure acceptance throughout the country of the National Electrical Code and the National Electrical Safety Code. Members also cooperate in an independent advisory capacity with the Underwriters Laboratories in the development of electrical safety standards.

Sold directly by NEMA and through IHS, American Technical Publishers Ltd., and Global

Formerly Formed by merger of Electrical Power Club and Associated Manufacturers of Electrical Supplies (1926)

NATIONAL ELEVATOR INDUSTRY

Edward A. Donoghue, Manager-Codes and Safety

600 Third Avenue, 9th Floor
New York, New York 10016
(212) 730-2124
**Type of Organization**  
Trade Association  
Standards Developer

**Standards Development**  
Standards developer since late 1950's  
100 members participating in Code and Standards activities pertaining to elevators, dumbwaiters, and moving walks  
Two active standards  
None processed through ANSI

**Standards Designation**  
Suggested Minimum Passenger Elevator Requirements for the Handicapped  
Vertical Transportation Standard (formerly Elevator Engineering Standard Layouts)

**Government Adoption**  
Suggested Minimum Passenger Elevator Requirements for the Handicapped has been adopted by numerous jurisdictional authorities and model building codes.

**Secretariats**  
U.S. TAG for ISO/TC 178, Lifts and Escalators

**Scope**  
Promotes the interests of its members by acting as representative in collective bargaining with the International Union of Elevator Constructors and other labor organizations; advancing sound engineering practices within the industry in cooperation with government agencies in activities related to elevator codes and the installation, service, and maintenance of elevators and related products; compiling and furnishing statistical information, including figures on accident reduction and employee safety.

**Standardization Activities**  
Actively participates with code and standards organizations and enforcing authorities in developing, maintaining, and applying safety codes and standards that pertain to elevators, dumbwaiters, escalators, and moving walks. Develops requirements for the handicapped using vertical transportation, codes for personnel elevators, personnel and material hoists, model building codes, electrical codes, requirements for elevator fire doors, and metric codes.

Promotes the adoption of new state and local elevator codes, revises existing elevator safety codes and secures uniform interpretation of the Safety Code for Elevators and Escalators ANSI/ASME A17.1. Representatives of the NEII Central Code Committee are members of ASME A17, NFPA 70, 80 and 101, BOCA, SBCC, ICBO, and ASTM.

The Standards Committee is responsible for the development of industry standards for elevators, dumbwaiters, and escalators. The Vertical Transportation Standard gives architects and building
owners standard dimensions from which they can produce building layouts.

Vienna, Virginia 22180
(703) 784-3840

Founded: 1971

Type of Organization    Trade Association
Standards Developer

Standards Development
3 procedural standards publications

Government Adoption
Balancing of Environmental Systems is referenced in Federal Guide Specifications.

Certification
NEBB offers certification for firms that meet all requirements established for Performance of Air Systems, Performance of Hydronic Systems, and Sound and Vibration Measurement.

Scope
A nonprofit organization sponsored by the Mechanical Contractors Association of America (MCAA) and Sheet Metal and Air Conditioning Contractors National Association (SMACNA).

Standardization Activities
Works in conjunction with other organizations to develop industry procedural standards for testing, adjusting, and balancing (TAB) of environmental systems in buildings. Represented on the American Society for Heating, Refrigerating and Air conditioning Engineers (ASHRAE) 111 Committee, Testing, Adjusting, Balancing. Develops manuals that provide a comprehensive set of systematic procedures representing the state-of-the-art of TAB work. Manuals cover air/hydronic TAB and sound
and vibration measurement procedures for environmental systems in buildings.

Keywords
balancing; sound; vibration; air handling; hydronic systems; HVAC Systems; environmental systems; acoustics; building;

NATIONAL ENVIRONMENTAL HEALTH ASSOCIATION

Nelson Fabian, Executive Director
720 South Colorado Boulevard
Suite 970
Denver, Colorado 80222
(303) 756-9090

Founded: 1937

Type of Organization
Professional Society
Standards Developer

Certification
Offers professional registration for environmental health and protection personnel either by reciprocity from a state or by examination. Also certifies environmental health technicians.

Scope
A national, nonprofit professional and educational organization for people who work in controlling environmental hazards for the betterment of human health and well being.

Standardization Activities
Publishes a state-of-the-art manual for on-site wastewater management, a peer review journal, a trends report, and various model ordinances such as a model ordinance for the regulation and certification of swimming pool service companies, and swimming pool technicians and apprentices. Promotes educational and performance standards for environmental health practitioners.

NATIONAL FASTENER DISTRIBUTORS ASSOCIATION

Mary Ann Langholz, Executive Director
1348 Haddon Road
Columbus, Ohio 43209
(614) 237-0252 FAX: (614) 237-3898

Founded: 1968

Type of Organization
Trade Association

Representation
Works through other organizations to develop standards

The Association is a member of ANSI, ASME, ASTM, the American National Metric Council, and the Industry Bar Code Alliance.

Scope
209 manufacturers and distributors in the fastener industry with members located in 41 states employing 18,000 people.

Standardization Activities
An information gathering group that disseminates data to the proper standards committees. Writes specifications only if the situation cannot be handled by an existing standards developing organization. Currently developing a bar code standard

Keywords
fasteners; manufacturing;

NATIONAL FEDERATION OF ABSTRACTING AND INFORMATION SERVICES

John Schnepp, Chairman
Common Practices and Standards Committee
1429 Walnut Street
Philadelphia, Pennsylvania 19102
(215) 563-2406 FAX: (215) 563-2848

Founded: 1958

Type of Organization
Technical Society

Works through other organizations to develop standards

Representation

Scope
A nonprofit federation of organizations involved in abstracting and indexing services, operating information centers, or conducting research in information science. Improves the extent and quality
of the documentation and use of the world's literature through research programs, publications, and seminars. Concerned with developing communications, cooperation, and coordination among all segments of the information processing and dissemination community including primary publishers, libraries, commercial and industrial abstracting and indexing services, data analysis centers, information dissemination centers, and teachers and researchers in the field. Also serves as a communication forum for its members through meetings, workshops, committee activities, and publications.

Although NFAIS is not a standards-setting body, it works within the voluntary standards community to foster the development and use of standards relevant to its membership. Because NFAIS members are involved in various aspects of the processing and disseminating of information, their interest in standards ranges widely. Relevant standards may pertain directly to abstracting and indexing practices. Also of interest are standards dealing with information science, primary publishing, library work, data processing, and computer readable information transfer. Relevant standards may also arise from individual subject areas or disciplines with which the information deals, such as engineering, biology, philosophy, or art.

NFAIS, through its Common Practices and Standards Committee (CP&S), serves as a communications link between the voluntary standards-setting community and the information publishing and distribution community. The CP&S Committee coordinates the NFAIS response to ballots or requests for comments pertaining to draft standards. This is accomplished by polling the NFAIS membership and, in some cases, by resolving minority votes on specific standards. By the same mechanism, NFAIS recommends and votes on qualified individuals to run for office or to serve on committees in standards-setting bodies.

Further, NFAIS encourages the active participation of its members on standards-setting bodies. Through its members and officers, NFAIS plays a role in the work of such standards setting bodies as: ANSI Committees X3-Information Processing and Z39-Library and Information Sciences and Related Publishing Practices; ISO Committees TC 46-Documentation and TC97-Computers and Information Processing; UNESCO through its UNISIST and ISDS (International Serials Data System) agencies; IFLA (International Federation of Library Associations); ICSU-AB (International Council of Scientific Unions - Abstracting Board); FIPS; and the AAP Electronic Publishing Subcommittee.
In addition to its support for the development of voluntary standards, NFAIS also encourages the general adoption of those standards considered most applicable and useful to the information processing and distribution community. Periodically, NFAIS surveys the implementation of standards by its members in order to determine which standards are being used and the ways in which they are used. Such surveys also provide information on the common practices and the de facto standards of members which may be candidates for formal standardization.

NATIONAL FEDERATION OF STATE HIGH SCHOOL ASSOCIATIONS

Bruce B. Durbin, Executive Director

11724 Plaza Circle
Kansas City, Missouri 64153
(816) 464-5400

Founded: 1920

Type of Organization
Academic Federation
Standards Developer

Standards Development
Prepares rules and standards for 13 interscholastic sports.

Scope
Represents 20,000 high schools and 10 million secondary school students, primarily to secure proper adherence to the rules of various state high school associations during interstate competition. Establishes standards for sanctioning domestic athletic events.

Standardization Activities
Publishes and distributes playing rules for domestic competition in interscholastic sports: baseball, basketball, football, gymnastics, soccer, swimming and diving, track and field, volleyball, ice hockey, wrestling, field hockey. Sixty-six rules related publications are published including 28 rule books and 13 rule examinations. Provides national interpretation of the rules and advocates safety standards which are incorporated in the rule publications.

NATIONAL FERTILIZER SOLUTIONS ASSOCIATION

James B. Boillot, Executive Vice President

339 Constor Drive
Manchester, Missouri 63011
(314) 256-4900

Founded: 1955 Standards Staff: 1

Type of Organization Trade Association

Standards Standards developer since 1974
Development 4 active standards, all processed through ANSI

Scope A national trade association representing the fluid fertilizer industry worldwide. Consists of 950 member companies in the United States and 16 foreign countries including retail fertilizer dealerships, fertilizer manufacturers, equipment manufacturers, and distributor/jobbers. Serves its membership through support programs in research, technical services, education, legislative action, public relations, and publication services.

Standardization Activities Develops guidelines for regulatory authorities writing their own regulations. Assists individuals working with equipment and materials covered by the standards.

Availability Sold directly and through ANSI

NATIONAL FIRE SPRINKLER ASSOCIATION, INC.

John A. Viniello, President

P.O. Box 1000
Patterson, New York 12563
(914) 878-4200

Founded: 1914

Type of Organization
Trade Association
Standards Developer

Standards Development
64 representatives and 54 committees active in standards development.

Scope
A national trade association of fire sprinkler manufacturers and installers. Advances the art of automatic control of fire through automatic sprinklers, and the conservation of life and property from fire.

Standardization Activities
Cooperates with national technical bodies in the preparation of standards and fire protection sections of building codes and ordinances. Sets standards for design, installation, inspection, and maintenance of automatic sprinklers.

Cooperates with the American Insurance Association, Insurance Services Office, Underwriters Laboratories (UL), and Factory Mutual Engineering and Research in the formulation of standards, specifications, and regulations for fire apparatus and their use.

Officially represented on sectional committees functioning under the procedure of the American National Standards Institute (ANSI) engaged in the development and revision of code for pressure piping, pipe threads, and pipe flanges and fittings.

The NFSA is a member of the Southern Building Code Congress, the International Conference of Building Officials, and Code Administrators International. Maintains consistency between codes and standards and coordinates the industry's activities in the model code field with those in the standard making bodies, including National Fire Protection Association, American Society for Testing and Materials, American National Standards Institute, Underwriters Laboratories, Factory Mutual System, and others.

**Certification**
None.
Scope
A nonprofit trade association serving manufacturers of fluid power (hydraulic and pneumatic) products with 180 corporate members nationwide.

Standardization Activities
Standards activities account for half of the total association programs. Administered through a technical board, under which are organized 16 committees and 150 project groups. Standards cover dimensions, specifications, methods of testing or rating, terminology, symbols, and procedures for systems, as well as individual components, including fluid power cylinders, valves, pumps, motors, sealing devices, conductors, fittings, filters, fluids, servovalves, accumulators, and pneumatic logic devices. Solicits technical input from all affected interests.

Committees and staff participate in standards programs of ANSI, SAE, ASME, ASTM, ISA, and ASLE. Currently developing a certification program for pressure and fatigue rating of fluid power components.

Availability
Sold directly and through ANSI, Global, and IHS

NATIONAL FOOD PROCESSORS ASSOCIATION

John R. Cady, President

1401 New York Avenue, NW
Suite 400
Washington, DC 20005
(202) 639-5900

Founded: 1907

Type of Organization
Trade Association
Works through other organizations to develop standards

Scope
A national trade association established to help members maintain and improve product quality. Operates research laboratories in Washington, DC; Berkeley, CA; and Seattle, WA. Represents 600 member companies which pack processed-prepared fruits, vegetables, meats, fish and specialty products, including canned, frozen, dehydrated, and other processed food products. Also includes companies that provide equipment, supplies, and services to food processors.
### National Canners Association

Maintains liaison with the National Conference on Weights and Measures for the purpose of developing constructive and uniform laws and regulations on the state level. Also maintains liaison with the U.S. Technical Advisory Group and delegates to meetings of ISO/TC 52 and its subcommittees on international standards for metal cans for food.

**NATIONAL HARDWOOD LUMBER ASSOCIATION**

Ernest J. Stebbins, Executive Manager  
Box 34518  
Memphis, Tennessee 38134-0518  
(901) 377-1818  
Founded: 1898

**Type of Organization**  
Trade Association  
Standards Developer

**Standards Designations**  
NHLA prefix

**Certification**  
The association maintains qualified inspectors in the principal hardwood markets and producing districts of the United States and Canada who are authorized to issue certificates of inspection of hardwood lumber and cypress, the correctness of the grades and measurements shown on the certificate being guaranteed by the financial resources of the association. This official inspection service is available to the members and nonmembers on federal, state or local government contracts. Extensive use of this service has been made by the U.S. Defense Supply Agency.

**Scope**  
United States and Canadian hardwood lumber and veneer manufacturers, distributors, and consumers. Inspects measures, and certifies hardwood lumber.

**Standardization Activities**  
One of the principal functions is the maintenance of standards for the grading of hardwood lumber, and an inspection staff for the official application of the standards.

Issues biennially a new edition of the Rules for the Measurement and Inspection of Hardwood Lumber, Cypress, and Thin Lumber. NHLA's grade rules are recognized as standard throughout the world.

Maintains a school in Memphis, Tennessee for training hardwood inspectors.

NATIONAL INSTITUTE OF BUILDING SCIENCES

David A. Harris, President

1201 L Street, NW
Washington, DC 20005
(202) 289-7800

Founded: 1978 Standards Staff: 25

Type of Organization
Scientific Society Standards Developer

Secretariats
Building Seismic Safety Council
Building Thermal Envelope Coordinating Council
Wood Protection Council

Scope
Congressionally authorized, nonprofit, nongovernmental scientific/technical institution. Functions and responsibilities relate to building regulations in the following four areas: (1) development, promulgation, and maintenance of nationally recognized performance criteria, standards, and other technical provisions for maintenance of life, safety, health, and public welfare suitable for adoption by building regulating jurisdictions and agencies, including test methods and other evaluative techniques relating to building systems, subsystems, components, products, and materials with due regard for consumer problems; (2) evaluation and prequalification of existing and new building technology; (3) conduct investigations in direct support of building regulations and evaluation of new technology; and (4) assembly, storage, and dissemination of technical data and other information directly related to the preceding areas.

Standardization Activities
Implements the regulatory environment and facilitates the introduction of new and existing products and technology into the building process. Advises both the public and private sectors of the economy with respect to the use of building science and technology in achieving nationally acceptable standards and other technical provisions for use in federal, state, and local housing and building regulations. Publications and services are available to all those who procure, design, construct, use, operate, maintain, and retire physical facilities. Services of the Institute are also useful to other public and private organizations which perform related research and other tasks on which building standards and regulations are based.

The members of the Institute elect a 36-member Consultative Council which provides a direct line of communications with all appropriate trade, professional
and labor organizations, private and public standards, code and testing bodies, public regulatory agencies and consumer groups. The Council is responsible for overseeing the consensus procedures and conduct of consensus activities of the Institute.

Using Compact Disc-Read Only Memory (CD-ROM) technology, the Institute publishes the Construction Criteria Base (CCB). The CCB contains guide specifications, design and construction criteria and standards developed and used by various federal construction agencies. Many of the public and private standards referenced in the guide specifications, including model codes, are contained in the CCB which is available on a subscription basis.

**NATIONAL INSTITUTE OF INFANT SERVICES**

John A. Shiffert, Executive Director

Diaper Service Accreditation Council  
2017 Walnut Street  
Philadelphia, Pennsylvania 19103  
(215) 569-3650

Founded: 1938

**Type of Organization**
Scientific Society  
Standards Developer

**Certification**
Sponsors an autonomous professional Diaper Service Accreditation Council which has promulgated standards for plant sanitation, customer service, and marketing practice. The council accredits diaper service applicants who go through self-evaluation and inspection by an independent site committee for evaluation against the standards. Accredited members must maintain all standards as they may be changed in annual review by the council.

**Scope**
Conducts research into the requirements of diaper processing to meet the sensitivity of infant skin.

**Standardization Activities**
Standards are established through a process by which an independent accredited medical laboratory under the supervision of a clinical pathologist conducts microbiological and patch test studies on infants to establish standards. The laboratory then devises
testing procedures by which random sample diapers can be tested routinely against the prescribed standards.

Standards are raised from time to time as new knowledge is revealed by the continuing research program. The diaper test now include five major areas: (1) a sanitary score, awarded on the basis of microorganisms found on the sample; (2) a pH test by the calorimetric procedure, to show that the sample meets the acceptable range of 4.5 to 6.5; (3) evidence of impregnation of the sample with an EPA-approved bacteriostat; (4) a softness test with freedom from stiffness or spilling; and (5) an absorbency test so that water added drop by drop enters the fabric immediately. A diaper service must meet these standards in order to establish qualification and maintain membership.

NATIONAL INSTITUTE OF OILSEED PRODUCTS

Janet M. Esary, Executive Secretary

2600 Garden Road
Suite 208
Monterey, California 93940
(408) 649-1204

Founded: 1934

Type of Organization
Trade Association
Standards Developer

Certification
Chemists Certification Program requires annual successful completion of the American Oil Chemists' Society Smalley Check Sample Series.

Scope
A nonprofit organization devoted to promoting the vegetable oils and vegetable oil products industry. Informs members of the uses and economic conditions affecting vegetable oil products -- their manufacture, distribution, and sale.

Standardization Activities
Maintains and publishes annually, uniform trading rules containing standard terms and conditions for which the products may be traded. These rules cover product grade and quality specifications, quantity specifications, sampling and chemical analysis.
procedures, adjustments and settlement of disputes by arbitration.

Cooperates with the International Association of Seed Crushers (Europe), Philippine Coconut Oil Producers Association, Philippine Copra Exporters Association, and the U.S. Department of Agriculture in efforts to improve product quality and establish higher standards of trade practices, which are then incorporated in the rules.

**NATIONAL KEROSENE HEATER ASSOCIATION**

Diane G. Thorne, Administrative Director

First American Center, #15
Nashville, Tennessee 37238
(615) 254-1961

Founded: 1981

**Type of Organization**
Trade Association

**Standards Development**
2 active standards

**Certification**
A certification seal program has been developed that requires listing to Underwriters Laboratories Standard 647 and compliance with additional standards developed by the NKHA.

**Scope**
A not-for-profit association of 80 member firms dedicated to consumer education and high product standards. It establishes and updates technical, labelling, and safety standards.

To be a "Regular" member, a firm must be "engaged in manufacturing, trading, and/or national or international marketing of kerosene heaters or kerosene which meets the minimum safety standards established by the Association." Their kerosene heaters must also be in compliance with UL 647 - Standard for Unvented Kerosene-Fired Room Heaters and Portable Heaters.

Association programs include ongoing public affairs programs to educate and assist lawmakers, fire and safety agencies, other public officials, and the general public on the benefits and safe use of kerosene
heaters. The Association updates members on regulatory issues, industry trends, technological advances, and safety matters.

**Standardization Activities**

Kerosene heaters manufactured or sold by NKHA members must meet minimum safety standards adopted by the NKHA Board of Directors.

The NKHA Standards and Technical Committee reviews safety standards and testing procedures and evaluates worldwide technical developments and data related to kerosene heaters. Only those heaters incorporating advanced technology and state-of-the-art safety features conform to NKHA standards.

The Association campaigns for comprehensive product safety standards and legislation and has recommended more stringent standards in evaluating the safety of kerosene heaters.

Currently two standards are in effect: Standard for Marking of Portable Kerosene Heaters, and Standard for Marking of Kerosene Containers.

**NATIONAL LEAGUE FOR NURSING**

Mary F. Liston, Ed.D., Acting Executive Director

10 Columbus Circle
New York, New York 10019
(212) 582-1022

Founded: 1952

**Type of Organization**

Professional Society
Standards Developer

**Government Adoption**

The National League for Nursing is officially recognized as the national accrediting agency for nursing education by the U.S. Department of Education.

**Scope**

Individuals in nursing and other health professions, nursing educational institutions, hospitals, home and community health agencies, and providers of nursing and other health care services. Works to assess nursing needs, improve organized nursing services and nursing education, and foster collaboration between nursing and other health and community services. Develops and promotes criteria for self-evaluation of hospital and
other institutional nursing services.

**Standardization Activities**

Develops and improves the standards of quality nursing education, nursing service, and health care delivery in the United States. Administers accreditation of educational programs in nursing. Officially recognized as the national accrediting agency for nursing education by the Council on Postsecondary Accreditation (COPA) and by the U.S. Department of Education.

Criteria for educational programs are developed and approved by nurse educators and address the program's organization, administration, students, faculty, curriculum, resources, facilities, and services. Standards for community and home health agencies, approved by leaders in the field of community health, address community assessment, organization and administration, program, staff, evaluation, and future plans.

**NATIONAL LIME ASSOCIATION**

Kenneth A. Gutschick, Technical Director

3601 North Fairfax Drive
Arlington, Virginia 22201
(703) 243-5463 FAX: (703) 243-5489

Founded: 1902

**Type of Organization**

Trade Association

Work through other organizations to develop standards

**Representation**

Active in ASTM, AWWA, and other organizations in developing standards

**Secretariats**

ASTM C7 on Lime; ASTM C12 on mortar; AWWA lime specification committee

**Scope**

An association of commercial producers of quicklime and hydrated lime. Members provide about 85% of the commercial lime used in the United States - for steelmaking; water, sewage and waste treatment; sulfur
dioxide removal from flue gasses; industrial chemicals; stabilization for road and airfield construction; mortar and plaster, etc.

Standardization Activities
Engages in committee work with American Society for Testing and Materials, American National Standards Institute, American Road and Transportation Builders Association, American Water Works Association, Air Pollution Control Association, Construction Specifications Institute, etc., in standards related to lime. Instrumental in working to develop specifications which will be reasonable and helpful to the hundreds of users of lime and lime products.

Keywords
lime; calcium oxide; calcium hydroxide; magnesium oxide; magnesium hydroxide; burnt lime; quick lime; hydrated lime; high calcium lime; dolomitic lime; mortar; soil stabilization; flue gas desulfurization; neutralization;

NATIONAL LUBRICATING GREASE INSTITUTE
Duane J. Fike, General Manager
4635 Wyandotte Street
Kansas City, Missouri 63112

Trade Association/Technical Society
Standards Developer

Standards Development
200 members active in standards development

Standards Designation
NLGI

Certification
NLGI Reference Systems available for use as research tools in the development and evaluation of lubricating grease formulations.

Scope
A technical society whose objectives are the development of better lubricating greases for the
consumer and better grease lubricating engineering service to the industry. Collects and disseminates technical data.

Standardization Activities

Develops standards within ASTM and Recommended Practices with SAE. Also maintains liaison with other groups including API, STLG, Independent Lubricant Manufacturers Association (ILMA), National Petroleum Refiners Association (NPRA), and Petroleum Packaging Committee (PPC). Maintains Technical Committee charged with developing data pertinent to the manufacture, standardization, and application of industry products. Works with ISO to develop standardized definitions. Developed NLGI Chassis and Wheel Bearing Service Classification System. NLGI consistency numbers recognized worldwide as the measure of one important grease characteristic. Cooperates with various Government agencies including DoD, NIST, FTC, and ICC.

Post Office Box 50040
2756 Dauphin Island Parkway
Mobile, Alabama 36605
(205) 473-1793 FAX: (205) 473-1669

Founded: 1957

Type of Organization

Trade Association

Standards Development

Standards Committee composed of design engineers, representing manufacturers and service dealers of marine electronic communication and navigation equipment. Committee membership is on a voluntary basis and functions at the direction of the association Board of Directors.

Standards Designation

NMEA 0180, NMEA 0182, NMEA 0183

Representation

IEC/TC 80/WG 6
A nonprofit trade association of companies involved in the manufacture, distribution, sales and service of ship-board marine electronic devices for communications, navigation, automation and acoustics. Aims to distribute industry information, contribute to U.S. and international rules and regulations and provide leadership to improve quality of industry.

Beginning in 1980, established standard interface formats for transmission of data communications between marine electronic equipments to eliminate incompatibility among manufacturers and facilitate the ability of sellers and purchasers to interchange devices regardless of brands. Standards in use throughout the worlds by voluntary application. In 1988, a working group (WG 6) was established by TC 80 of the IEC to produce a draft standard for digital interface for navigation equipment within a ship. NMEA, working through ANSI, is now the technical committee representing the United States. With the NMEA 0183 Standard as a basis, a final standard will be adopted as an official international standard.

NMRA Standards

NMRA Recommended Practices

Grants an NMRA Conformance Warrant to products conforming to NMRA standards.

Advances the hobby of scale model railroading through the development, adoption, and regulation of standards; promotes cooperation and understanding between
producers and users of hobby materials; and increases opportunities for fellowship among model railroaders. Membership comprises about 27,000 persons active in the field in the United States and throughout the world.

**Standardization Activities**

Establishe and maintains design standards for the manufacture of components for use in the hobby. These are intended to insure interchange between items produced by various sources and to improve performance. Adopted in 1936, specifications have been followed continuously by producers of scale railroad models and parts since that time, including refinements as the state of the art progressed.

Standards define track and wheel relationships, electrical power specifications, and clearance dimensions between rolling stock and trackside structures. NMRA recommended practices cover desirable characteristics other than those necessary for physical interchange and are intended to enable manufacturers to improve their product in a manner most suited to the user's needs. A General Engineering Committee is charged with responsibility for development of standards and recommended practices, and a separate Conformance-Inspection Committee checks manufactured products for compliance. Items meeting the standards and specifications are granted an NMRA Conformance Warrant which may be used in advertising as long as continued compliance is indicated by repeat inspections.

1600 Eisenhower Lane
Lisle, IL 60532
(708) 515-0600 FAX: (708) 515-8774

Type of Organization
Trade Association for the Propane Industry. Works through other organizations to develop standards.
Representation

Representatives on Standards Committees of ANSI, ASTM, NFPA, ASME and API.

Scope

A vertically structured national trade association of companies and individuals involved in the production, transportation, distribution, and marketing of liquefied petroleum gas.

Standardization Activities

Provide input to and representation on various standards making organizations. Focus is on standards associated with the safe handling and use of LP-Gas and the associated equipment and material.

Keywords

energy; safety; liquified petroleum gas; LP-Gas;

NATIONAL RETAIL MERCHANTS ASSOCIATION

James R. Williams, President

100 West 31st Street
New York, New York 10001
(212) 244-8780

Founded: 1911

Type of Organization

Trade Association

Standards Development

Participates in the development of standards in cooperation with ANSI

No NRMA standards are processed through ANSI

Standards are developed by committees of the membership

Scope

The nation's largest trade association representing the general merchandise retail industry with 4,500 individual corporate members operating approximately 45,000 department, chain, specialty and independent stores in the United States and an additional 1,000 stores in 50 nations abroad. NRMA members' aggregate domestic sales are in excess of $150 billion annually and they employ more than three million workers.

Devoted to the exchange of information among retailers and to research and education. Takes an active part in the formulation of standards and specifications relative to retail store organization, retail trade terminology, business practices, and specifications for commodities used in the trade. Cooperates actively with ANSI and other technical and trade organizations and the government.

Standardization Activities

Endorsed the Universal Product Code (UPC) for uniform merchandise identification acceptable to both general merchandise retailers and vendors. Developed, made available and maintains standard color and size codes
for common usage between retailers and manufacturers. Participates in the General Merchandise and Apparel Implementation Committee of the Uniform Code Council (secretariat for the UPC) in standards definition and approval for merchandise marking, shipping, container labeling and identification and definition of standards for ANSI X.12 Electronic Data Interchange (EDI) fields, usage and transaction sets. Is active on the EDI Advisory Committee of the Uniform Code Council and in the Federation of Automated Coding Technologies (FACT). Offers the Standard Color and Size Code Handbook.

Initiated programs for the establishment of several Simplified Practice Recommendations under the auspices of the National Institute of Standards and Technology (NIST). Formerly cooperated with NIST in the revision of several Simplified Practice Recommendations, and cooperates actively with NIST in the establishment of standard sizing of all apparel.

A nonprofit, nongovernmental public service organization. Aims to determine and evaluate methods and procedures that prevent accidents and mitigate injury and economic loss resulting from accidents, and to provide leadership to expedite the adoption and use of those methods and procedures that best serve the public interest. Functions in the areas of occupational safety and health, traffic safety, motor transportation safety, product safety, and consumer safety.

Focuses on standards concerned with safety of products or systems and with accident/injury record systems. In its materials and publications, references all of the appropriate codes and standards adopted by nationally recognized consensus standard producing organizations. Represented on ANSI's Organizational Member Council, the Safety and Health Standards Board, and the ANSI/OSHA Coordinating Committee.

Keywords
safety; accident prevention; occupational health; traffic safety; consumer products; social welfare;

NATIONAL SANITATION FOUNDATION

James G. Kendzel, Manager Standards Development

P.O. Box 1468
NSF Building
3475 Plymouth Road
Ann Arbor, Michigan 48106
(313) 769-8010

Founded: 1944 Standards Staff: 3

Type of Organization
Voluntary Research, Standards, and Testing Organization

Standards Development
Standards developer since 1944
40 active standards and criteria
Voluntary program involving the active cooperation of the manufacturer, the user, and the regulatory officials
Accredited by ANSI
Five processed through ANSI

Government Adoption
Many U.S. regulatory jurisdictions require by law, regulations, or department policy, products which comply with NSF standards or criteria.

Certification
Products determined in compliance with NSF standards or criteria by NSF Certification Services are authorized for listing and display the NSF Mark.
A noncommercial, not-for-profit standards, research, testing, and educational organization. Seeks answers in environmental health, and establishes public and environmental health standards with the cooperation of all concerned.

Involves approximately 1,400 domestic and foreign manufacturers who use the NSF Mark on products meeting the applicable standard or criteria. Publishes and distributes a list of available standards as well as annual listings covering food service equipment, plastic piping system components and materials, swimming pool equipment, drinking water direct and indirect additives, and special categories, including plumbing components for mobile homes and recreational vehicles, water and wastewater treatment devices, biohazard cabinetry, and flexible membrane liners.

NATIONAL SASH AND DOOR JOBBERS ASSOCIATION

Robert T. O'Keefe, Executive Vice President

2400 E. Devon Avenue, Suite 314
Des Plaines, Illinois 60018
(708) 299-3400

Founded: 1964

Type of Organization
Trade Association
Works through other organizations to develop standards

Scope
Promotes the use and increased consumption of stock millwork and related building products, including new products; advocates and promotes the sale of such products through sash and door jobbers; promotes the growth of the industry.

Standardization Activities
The association supports the development of standards related to window and door products. In cooperation with the National Wood, Window and Door Association (NWWDA), helped prepare and further commercial standards relating to double hung casement, awning, and single hung wood window units which have been incorporated into NWWDA's Industry Standard 2.
Initiated and developed Voluntary Product Standard PS 32-70 for wood interior hinged door units which was promulgated by the Department of Commerce in 1970. To maintain the existence of a nationally recognized standard, NSDJA has developed the Recommended Product Standard for Interior Pre-hung Door Units (PS 1-79).

**Formerly**

Formed by the merger of the Northern Sash and Door Jobbers Association (1935) and the Southern Sash and Door Jobbers Association (1935)

**Keywords**

windows; doors; sash; millwork; building; wood products;

### NATIONAL SCHOOL SUPPLY AND EQUIPMENT ASSOCIATION

Tim Holt, Executive Vice President

2020 N. 14th Street, Suite 400
Arlington, Virginia 22201
(703) 524-8819

Founded: 1916

**Type of Organization**

Trade Association

Works through other organizations to develop standards

**Certification**

Issues certification when operable and folding walls are tested for sound transmission loss in accordance with ASTM E90.

**Scope**

Manufacturers and distributors of school supplies, equipment, and instructional materials. Operating Divisions address the needs of manufacturers and users of auditorium, theatre, bleacher, and classroom seating, as well as play ground equipment, and operable partitions.

**Standardization Activities**

Operable Partition Section of NSSEA has endorsed ASTM E557-77 which provides a standard for the application and installation of operable partitions. Also issues testing procedures for measuring sound transmission loss.

**Availability**

Distributed Directly

**Formerly**

National School Service Institute (1958)

**Keywords**

partitions; school equipment; noise control; education; buildings;

ANSI K61, Z80, Z87
ASTM F8.57

Secretariats

ANSI Z87 Committee

Scope

The oldest voluntary health agency nationally engaged in the prevention of blindness through a comprehensive program of community service, public and professional education, and research.

Standardization Activities

With advice and guidance of professional scientific advisory committees, develops standards for vision screening of preschool and school age children, for eye safety programs in schools and industry, for glaucoma screening, and for services providing low vision aids to the partially sighted.

Availability

Sold directly and through ANSI

Formerly

Formed by Merger of New York State Committee for the Prevention of Blindness and the American Association for the Conservation of Vision (1918)
National Committee for the Prevention of Blindness (1927)

NATIONAL SOFT DRINK ASSOCIATION

William L. Ball, III., President

1101 16th Street, NW
Washington, DC 20036
(202) 463-6732

Founded: 1919

Type of Organization

Trade Association
Standards Developer

Standards Development

Three active standards

Standards Designation

VPS, ANSI/VPS, and VS prefixes

Government Adoption

PS 73-89 Carbonated Soft Drink Bottles (1989)

Scope

Provides manufacturers of soft drinks throughout the United States and others interested in the welfare of the industry a forum to discuss matters of common interest, provides a medium for improving soft drink
plant operating procedures, conducts research on problems relating to the industry, and provides informational and educational services in the interest of the consumer.

**Standardization Activities**
Instrumental in the development of voluntary standards or guidelines, designed for the betterment of the consumer and the bottling and packaging activities of the industry.

**Availability**
Sold directly, through Government Printing Office, and ANSI

**Formerly**
American Bottlers of Carbonated Beverages (1967)

**Keywords**
soft drinks; beverages; packaging;

**NATIONAL SOLID WASTES MANAGEMENT ASSOCIATION**

John A. Legler, Deputy Director, Equipment and Risk Management

1730 Rhode Island Avenue, Suite 1000
Washington, DC 20036
(202) 659-4613 FAX: (202) 775-5917

**Scope**
ANSI Z245 on Refuse Processing, Collection, and Disposal

2,500 companies

**Standardization Activities**
Develops safety standards primarily associated with the solid waste management industry. Includes procedures for the manufacturing, installation, and operation of equipment and facilities. Standards Committee includes manufacturers, distributors, end users or operators, government regulation and/or enforcement agencies, and special purpose or trade associations.

**Availability**
Distributed through ANSI

**Formerly**
Absorbed the Incinerator Institute of America (1974)
NATIONAL SPA AND POOL INSTITUTE

Carvin Di Giovanni, Technical Director

2111 Eisenhower Avenue
Alexandria, Virginia 22314
(703) 838-0083 FAX: (703) 549-0493

Founded: 1956

Type of Organization
Trade Association
Standards Developer

Scope
A national trade association comprised of approximately 4,300 swimming pool builders, pool equipment manufacturers and suppliers, architects, engineers, public officials, and others allied with the pool industry. Sets guidelines for pool builders and works toward better pool building and the maintenance of high ethical standards.

Standardization Activities
Develops standards for residential and public swimming pools, hot tubs and above-ground pools. Cooperates with the American Public Health Association, National Safety Council, Underwriters Laboratories, National Sanitation Foundation, National Electrical Code, International Association of Plumbers and Mechanical Officials, Consumer Product Safety Commission, and the Young Men's Christian Association of the United States. Provides information and assistance to a number of Government agencies and maintains liaison with other international swimming pool and spa organizations. Follows accreditation procedures of ANSI. Administers a Technical Council which maintains committees in the areas of design, accessory equipment, chemical treatment, circulation systems and publications.

<td></td>
</tr>
<tr>
<td><strong>Scope</strong></td>
<td>A nonprofit organization of 100 industrial executives, managers, engineers, technicians, educators, and students that promotes, within U.S. industrial and educational societies, the significance and expert knowledge of those standards in common use within American industry.</td>
<td></td>
</tr>
<tr>
<td><strong>Standardization Activities</strong></td>
<td>The association promotes the concept of &quot;management by accountability.&quot; This concept fosters the use of certification, accreditation, registration, and licensure to combat the plague of standards illiteracy in America. It has warned industry that a nation that cannot relate to its own standards will not long be competitive in a global market requiring compliance to foreign and international standards. The association promotes testing of our industrial work force on proficiency in those standards and specifications common to their line of work. The association has initiated its campaign for proficiency testing of the American work force in the field of dimensional metrology. In conjunction with the American Society of Mechanical Engineers, they have focused on the Y14 and B89 standards for its first personnel certification programs.</td>

### Scope
A nonprofit trade association supported by producers of stone and manufacturers of plant equipment and supplies used by the crushed stone industry. Serves the quarrying industry.

### Standardization Activities
Cooperates with national technical organizations in standardizing specifications, test methods, and recommended practices involving the use of stone. Represented on technical committees of the American Society for Testing and Materials dealing with concrete and concrete aggregates, road and paving materials, and mortars for unit masonry. Participates in technical committee work concerned with the development of recommended practices of the American Concrete Institute, the American Railway Engineering Association, and the Transportation Research Board of the National Research Council.

Participates in a joint committee composed of representatives of the National Sand and Gravel Association and the National Slag Association to work on problems of mutual interest.

### Keywords
aggregates; materials; construction; stone;

### NATIONAL TERRAZZO AND MOSAIC ASSOCIATION
Edward A. Grazzini, Executive Director

3166 Des Plaines Avenue, Suite 24
Des Plaines, Illinois 60018
(312) 635-7744 (800) 323-9736 FAX: (312) 635-9127

Founded: 1923 Standards Staff: 5

### Type of Organization
Trade Association

### Standards Development
Standards Developer

25 active standards

### Government Adoption
All technical manuals and design catalogs are accepted by Government agencies.

### Scope
Contractors who install terrazzo and mosaic work and firms which produce or manufacture materials. Provides information to building owners, architects, builders, and terrazzo contractors. Conducts research on installation methods.

### Standardization Activities
Maintains a Technical Committee and Quality Control Committee active in standards development. Publishes Technical Data Book which contains 25 standard national
specifications for the installation of both cementitious and resinous terrazzo. Also develops standards on various application and grinding techniques.

Availability
Distributed directly

Keywords

NATIONAL WATER WELL ASSOCIATION

Jay H. Lehr, Ph.D, Executive Director

6375 Riverside Drive
Dublin, Ohio 43017
(614) 761-1711 FAX: (614) 761-3446
**Type of Organization:** Technical Society  
Works through other organizations to develop standards

**Representation:**  
American Water Works Association; American Society for Testing and Materials;

**Certification:**  
Offers a voluntary Certification Program for both ground water contractors and ground water scientists and engineers. Contractor certification includes one general and 12 specific examinations.

**Scope:**  
An organization of water well drilling contractors, manufacturers, wholesale suppliers and professional geologists, hydrologists, and engineers interested in the problems of locating, developing, and utilizing underground water supplies. Objectives of the association include the promotion of scientific development and the advancement of the science of ground water hydrology.

**Standardization Activities:**  
Specification Committee cooperates with various organizations in developing standards for well construction and the sampling and monitoring of ground water resources. The National Ground Water Information Center, a service of the Association, maintains an online data base of standards applied throughout the ground water industry.

**Keywords:**  
wells; water wells; hydrology; public health;

#### Type of Organization  
Trade Association  

#### Representation  
Works through other organizations to develop standards  

#### Secretariats  
ANSI Committee Z80, Ophthalmic Standards  

#### Scope  
An association for independent ophthalmic prescription eyeglass and contact lens fabricators located in the United States and Canada.  

#### Standardization Activities  
Its primary objective is the creation and maintenance of voluntary standards which meet the safety and effectiveness needs of the consumer by providing products which perform within the current state of the manufacturing art.  

Participates with industry and professions in the maintenance of existing standards to eliminate design in favor of performance requirements wherever possible, and to keep industry standards in line with advances in technology. As new technologies develop, the Association assumes an active role in the assessment of proper performance standards and testing techniques.  

#### Formerly  
Central States Wholesalers Association (1939)

OPTICAL SOCIETY OF AMERICA

Evelyn Roberts, Technical Activities Manager
2010 Massachusetts Avenue NW
Washington, DC 20036
(202) 223-8130

Founded: 1916

Type of Organization
Scientific Society
Standards Developer

Scope
Primary purpose is to increase and diffuse the knowledge of optics in all its branches, pure and applied; to promote the mutual interests of investigators of optical problems, of designers, manufacturers, and users of optical instruments and apparatus of all kinds; and to encourage cooperation among them.

Standardization Activities
Standardization and specification work handled by technical committees which publish reports in the society's journal on visual sensitometry; colorimetry; photometry; standard wavelengths; nomenclature and standards; photography; radiometry; and spectrophotometry. The latest and most elaborate of these technical reports appeared as a book, The Science of Color, and as a set of uniformly spaced color
samples. Cooperates with other technical organizations in standardization within the various branches of optics. Has a standing committee for review of ISO standards. Cooperates actively with the International Commission for Optics, the International Commission on Illumination and the American National Standards Institute. Maintains representation on boards or committees of the American Institute of Physics, the National Research Council, the American Association for the Advancement of Science, and the Inter-Society Color Council.

**ORTHOPEDIC SURGICAL MANUFACTURERS ASSOCIATION**

Robert F. Games, President

1450 Brooks Road  
Memphis, Tennessee  38116  
(901) 396-2121  Fax:  (301) 396-9929

**Founded:** 1955

**Type of Organization**
Trade Association

**Works through other organizations to develop standards**

**Representation**
ASTM, ISO, and ANSI

**Scope**
Manufacturers and distributors of orthopedic devices and instrumentation used in reconstructive surgery done by orthopedic surgeons. Established to promote the patient's best interest by standardization of materials and sizing. Develops guidelines, fosters research, disseminates knowledge and information relating to scientific and practical problems, cooperates with professional health associations, interfaces with governmental agencies, and promotes high ethics in all phases of the surgical supply industry.

**Standardization Activities**
Twenty-four member firms have employees active in development of medical device standards. Representatives serve as officers and members of various standards development organizations including ASTM, ISO, and ANSI. They participate in policy making decisions and in the content of test methods and standards pertaining to medical devices.

**Keywords**
orthopedic surgery; medical devices;
OUTDOOR POWER EQUIPMENT INSTITUTE, INC.

John Beary, M.D., Senior Vice President for Science and Technology

1100 15th Street, NW
Washington, DC 20005
(202) 835-3400

Founded: 1958
Telex: TWX-7108229494-PMA-WSH

**Type of Organization**
Trade Association

**Representation**
Works through other organizations to develop standards

**Scope**
A nonprofit scientific and professional organization representing firms that discover, develop, and produce prescription drugs, biological products, and diagnostic products. The Association's members produce most of the prescription drugs and a large part of the world's medical devices and diagnostic products. The Association's principal objectives are: (1) to encourage high standards in the research, development, production and marketing of drug products and diagnostic products; (2) to develop and disseminate information about the pharmaceutical industry to the public, all levels of government, the media, international organizations, and other groups; (3) to help keep industry abreast of government actions and public concerns; and (4) to work with member companies, other health related organizations, government and consumer entities, and the public to advance medical science and improve health-care services.

**Standardization Activities**
Participates in developing methods of analysis and standards for drugs and biologicals and methods of testing and standards for in vitro diagnostic products. Participation is either by staff (approximately one to two person years per year) or representatives of member companies drawn from PMA's Biological, Medical, Production, Engineering and Materials Management, Quality Control, and Research and Development Sections.

**Formerly**
American Drug Manufacturers Association and American Pharmaceutical Manufacturers Association (merged in 1958)

**Keywords**
drugs; pharmaceuticals; biologicals; medical devices; in vitro diagnostic products; health care;
**PHOTO CHEMICAL MACHINING INSTITUTE**

Judith Ginsberg, Executive Director

4113 Barberry Drive  
Lafayette Hill, Pennsylvania  19444  
(215) 825-2506

Founded:  1968

443
Scope

A nonprofit organization, international in scope. Promotes the arts and sciences of photography and furthers public education in the field. Interests of members include the uses of all types of photographic materials, their applications, and characteristics of their manufacturer.

Standardization Activities

Through its Technical Standards Committee, formulates technical standards. Affiliated with ANSI and has representatives on PH sectional committees on photography, as well as membership on the Photographic Technical Advisory Board. Representatives selected to represent its interests are chosen on the basis of their competence as users and their technical knowledge in the field. Establishes practices and requirements for judging and exhibition, safe handling, and other rules which contribute to the success of international photographic and camera events on a worldwide basis.

PIPE FABRICATION INSTITUTE

Lois A. Moore, Executive Director

P.O. Box 173
612 Lenore Avenue
Springdale, Pennsylvania 15144
(412) 274-4722

Founded: 1913

Type of Organization

Technical Society

Standards Developer

Scope

Producers and designers of high pressure/high temperature piping systems for chemical plants, refineries, central power stations, and ships; concerned with technical and economic problems of the piping industry.

Standardization Activities

The standards and technical bulletins developed by the Engineering Committee cover the design, fabrication and erection of industrial and high pressure/high temperature piping to meet the requirements of power plants including nuclear, fossil, chemical, petroleum, and process piping. Through its members, the institute is officially represented on various code bodies and national engineering societies.

**PIPE LINE CONTRACTORS ASSOCIATION**

Hailey A. Roberts, Managing Director

1700 Pacific Avenue, Suite 4100
Dallas, Texas 75201-4675
(214) 969-2700

Founded: 1947

**Type of Organization**
Trade Association
Works through other organizations to develop standards

**Representatives**
Four contractor members serve on the API-AGA 1104 Joint Welding Committee composed of industry representatives sponsored by the American Petroleum Institute and the American Gas Association.

**Scope**
Association of contractors, equipment manufacturers, suppliers, and dealers of main-line pipe line. Represents the industry in labor negotiations. Promotes cooperation, efficiency, and safety in the main-line pipe line construction industry.

**Standardization Activities**
Reviews and revises API Standard 1104, Standard for Welding Pipelines and Related Facilities.

**Keywords**
petroleum pipe lines; construction;

**PLASTICS PIPE INSTITUTE**
A division of The Society of the Plastics Industry, Inc.

Stanley A. Mruk, Executive Director

Wayne Interchange Plaza II
155 Route 46 West
Wayne, New Jersey 07470
(201) 812-9076

Founded: 1949

**Type of Organization**
Trade Association
Standards Developer

**Scope**
A division of the Society of the Plastics Industry, Inc. (1275 K Street, NW, #400, Washington, DC, 20005). Dedicated to creating broader markets and market opportunities for plastics pipe and related products.
Maintains a Technical Committee which represents its members in Standards Writing and Code Writing organizations, including: ASTM F-17, Thermoplastic Piping Systems; ANSI B31.3, Chemical and Petroleum Piping Code; American Petroleum Institute, (oil and gas production piping); American Water Works Association, (water distribution piping); the National Sanitation Foundation (potable water quality).

Maintains a Hydrostatic Stress Board which writes standard policies and procedures for the forecasting of the long-term strength of plastic piping products and plastics piping thermoplastic materials. The Board also issues listings of Hydrostatic Design Stress recommendations for thermoplastics materials. These recommendations are referenced by many ASTM and other standards.

The Fuel Gas Division develops educational material used by gas companies and federal and state agencies for the training of operators and inspectors in proper and safe use of plastics gas piping; maintains close liaison with Department of Transportation and other government agencies which regulate the use of plastics piping for fuel gas; maintains close liaison with user group technical committees such as those of the American Gas Association and the American Petroleum Institute.

The Municipal and Industrial Division develops technical information, guides and manuals related to the use of plastics piping for municipal and industrial applications; it represents members before appropriate associations and organizations.

The Municipal and Industrial Division assists AWWA in development of appropriate standards and maintains liaison with key government agencies including EPA, HUD, etc.

**POLYURETHANE MANUFACTURERS ASSOCIATION**

Richard Church, Executive Director

800 Roosevelt Road, Building C
Suite 20
Glen Ellyn, Illinois 60137
(708) 858-2670

Founded: 1971

| Type of Organization | Trade Association Standards Developer |
### Scope
A private, nonprofit trade association of companies involved in the manufacture of solid polyurethane thermosetting elastomers and their related chemical and equipment suppliers. Promotes and maintains an organization for the mutual advancement and welfare of its members and the polyurethane industry.

### Standardization Activities
Maintains a Standards Committee whose purpose is to select and standardize physical test procedures suitable for use with solid polyurethane elastomers, and to promote and disseminate these recommended practices throughout the industry. The two phase program consists of evaluation and selection of existing specifications suitable for use with solid polyurethane; and modification of new test procedures suitable for use as an educational tool. Specifications booklet being revised to include new standards for cast urethanes and specifications for RIM processing of urethanes.

### PORCELAIN ENAMEL INSTITUTE

John C. Oliver, Executive Vice President

1101 Connecticut Avenue NW, Suite 700
Washington, DC 20036

Founded: 1930

### Type of Organization
Trade Association

Standards Developer

### Standards Designation
PEI, ASTM, and ANSI prefixes

### Scope
Manufacturers of major appliances and sanitaryware with porcelain enamelling facilities contract porcelain enamel companies and suppliers to the industry. Conducts market development programs, develops test methods for evaluation of porcelain enamel properties.

### Standardization Activities
Works primarily through the voluntary standards development system utilizing the committee system of ASTM and ANSI. Also develops and maintains standards and specifications for specialized sectors of the porcelain enameling industry. In addition, serves as conduit of industry input into government-initiated standards.

### Availability
Distributed directly

| **PORTABLE SANITATION ASSOCIATION** | |
| **T.C. Anderson, Executive Director** | 7800 Metro Parkway, Suite 104  
Bloomington, Minnesota 55425  
(612) 854-8300 |
| **Founded:** 1971 | Standards Staff: 2 |
An international trade association that represents U.S. and foreign firms engaged in the leasing, renting, selling, and manufacturing of portable sanitation equipment, services and supplies for construction, recreation, emergency, and other uses. Devoted to the proper handling of human waste by the most modern, sanitary means, giving the greatest concern to the preservation of an unspoiled environment.

Develops standards directed toward providing clean, sanitary restroom facilities for any gathering of people that do not have adequate permanent facilities close at hand. Assists manufacturers supplying the industry in market research and types and kinds of equipment which will fill these needs.

Recommends standards to BOCA, SBCCI, OSHA, Council of American Building Officials (CABO), IAPMO, and various other state, county, and local health departments.

Standards include minimum sanitation requirements for temporary labor camps to protect the health and safety
of persons residing in the camps or in the vicinity of the camps. Also provides standards for adequate toilet facilities in places of employment.

PORTLAND CEMENT ASSOCIATION

John P. Gleason, Jr., President
5420 Old Orchard Road
Skokie, Illinois 60077
(312) 966-6200

Founded: 1916 Standards Staff: 11

Type of Organization
Trade Association
Works through other organizations to develop consensus standards

Representation
Staff members are active in three model codes organizations and eight standards organizations, serving on seventy committees of ASTM, ANSI, ACI, ASCE, AASHTO, AREA, NFPA, ASHRAE, and others.

Certification
Construction Technology Laboratories (CTL), a contract research facility wholly owned by PCA, provides compliance certifications to clients in the form of test and/or investigative reports on a project by project basis. CTL does not have a product labeling program, nor associated product qualification programs.

Secretariats
Secretary for the American Concrete Institute's (ACI) 318 Committee which writes the Building Code Requirements for Reinforced Concrete referenced in building codes throughout the nation and used by all structural design professional.

Scope
Represents the cement manufacturing industry. Serves the industry by extending and improving the uses of cement and concrete through research and development, market promotion, educational programs, and public affairs activities including representation with government. Cooperates with other concrete industry associations and national organizations representing business and industry. Provides a range of services to its members as well as to those private and public segments of the economy that serve the needs of the construction community in the United States and Canada.

Standardization Activities
Develops new standards and updates existing standards to reflect the latest findings in scientific research

451
and test programs in the fields of cement and concrete technology, advanced engineering developments in all areas of concrete design and construction, and results of structural investigations and field experiences in the uses of concrete.

Does not write proprietary standards, but works with national standards-writing organizations to develop building codes, design standards, and material and test standards. The Research and Development/Construction Technology Laboratories group, and the Market Development group of PCA participate in this activity.

Keywords
cement; concrete; test laboratories; fire protection;

POST-TENSIONING INSTITUTE

Clifford Freyermuth, Executive Director/RETD
1717 West Northern Avenue, Suite 218
Phoenix, Arizona 85021
(602) 870-7540

Founded: 1976 Standards Staff: 1

Type of Organization
Trade Association
Works through other organizations to develop standards.

Representation
ACI, AASHTO

Scope
Membership consists of post-tensioning material fabricators, manufacturers of prestressed steel, concrete construction organizations, professional engineers, and architects. Promotes the use of post-tensioning materials through research.

Standardization Activities
Publishes "Guide Specifications for Post-Tensioning Materials" and "Recommendations for Grouping of Post-Tensioned Prestressed Concrete Members." Generally works through committees of the American Concrete Institute and American Association of State Highway Officials for standards development.

Availability
PTI publications; ACI 318 Standard Building Code; AASHTO Specifications for Highway Bridges.

Formerly
Post-Tensioning Division of the Prestressed Concrete Institute

Keywords
construction; concrete; post-tensioning; prestressed concrete;

**PRESSURE SENSITIVE TAPE COUNCIL**

Glen R. Anderson, Executive Vice President

104 Wilmot Road, Suite 201
Deerfield, Illinois 60015
(708) 940-8800

Founded: 1953

**Type of Organization**

Trade Association
Standards Developer

**Scope**

An organization of American manufacturers of pressure sensitive tape (excluding surgical tape and label stock). Works with code and specification writing agencies.

**Standardization Activities**

Maintains research on test methods and standards of nomenclature, and on characteristics of products under all conditions of temperature and humidity. Publishes Test Methods booklet consisting of thirty-one testing procedures for pressure sensitive tapes. Each test has been developed, revised, and edited by the Technical and Safety Committee of the Council in cooperation with interested government agencies over an extended period of time.

Also publishes an annual tape products directory designed to inform industrial, commercial and retail consumers of the variety of pressure sensitive tapes and the applications in which they have been successfully used. The tapes are listed by company,
giving the tape identification number, description, principle uses, and manufacturer's values. The values given are in accordance with the PSTC Test Methods are for tensile strength, adhesion, thickness and elongation.

PRINTING INDUSTRIES OF AMERICA

Ray Roper, CAE; President and CEO
1730 North Lynn Street
Arlington, Virginia 22209
(703) 841-8100

Founded: 1887

Type of Organization
Trade Association
Standards Developer

Scope
Represents the graphic arts industry as a federation of national, state, and regional associations. Performs a primary role in industrial relation, management development, public relations, and government affairs for its industry.

Standardization Activities
Maintains a continuing interest in the development of standards for promoting technical progress and production efficiencies. Activities include development of industry specifications for production and inventory control applications; computer specifications for inter-industry communication and electronic data interchange; publication of Virgin Vinyl and Related Standards for Loose Leaf Binders through its affiliate, Binding Industries of America; preparation of standards for printing plate sizes through its National Association of Lithographic Platemakers Section; participation with Magazine Publishers Association and others in the development of standard specifications for advertising reproduction material for magazine web offset printing; and others through its Graphic Communications Association and International Business Forms Industries affiliates.

PROJECT MANAGEMENT INSTITUTE

Richard Colosi, Executive Director
P.O. Box 43
Drexel Hill, Pennsylvania 19026
Founded: 1969

Type of Organization
Professional Society

Representation
ANSI

Scope
A nonprofit organization devoted exclusively to the field of project management. Foster recognition of the need for professionalism in project management; provides a forum for free exchange for project management problems, solutions, and applications; coordinates industrial and academic research efforts; develops common terminology and techniques to improve communications; provides interface between users and suppliers of hardware and software systems; and provides guidelines for instruction and career development in the field of project management.

Standardization Activities
Functions are performed through the Professional Liaison Committee which coordinates with the Technology, Research Policy and Education Committees. Participates in national activities through the American National Standards Committee XK36.3 and internationally, through liaison with an appointed observer to Internet. Does not deal with the federal government directly. Several members are federal employees in agencies involved with project management.

Standards Development:

- Standards developer since 1958.
- 33 member companies participating in standards activities.
- 4 active standards.
- Two being processed through ANSI.

Scope:

Consists of firms engaged in the design and manufacture for sale of industrial steel storage racks. Active in standardization and fire protection of high rack storage areas.

Standardization Activities:

Publishes standards and nomenclature including:
- Specification for the Design, Testing and Utilization of Industrial Steel Storage Racks;
- Minimum Design Standards for Pallet Stacking Framer;
- Manual of Safety Practices;
- and Stacker Rack Nomenclature.

Availability:

Distributed directly and through the Material Handling Institute, Inc.

RADIO TECHNICAL COMMISSION FOR AERONAUTICS

David S. Watrous, Executive Director

One McPherson Square
1425 K Street NW, Suite 500
Washington, DC 20005
(202) 682-0266

Founded: 1935 Standards Staff: 7

Type of Organization: Voluntary Consensus Standards Developer

Standards Development:

- Standards developer since 1935.
- Approximately 2,000 participants in standards development.
- 59 active standards.
- One document accepted as the international standard for airborne equipment environmental testing.

Standards Designation:

Minimum Operational Performance Standards (RTCA/DO-XXX).

Government Adoption:

The Federal Aviation Administration has adopted the majority of the airborne equipment standards as Technical Standard Orders (TSO).
Certification
None

Scope
An association of aeronautical organizations of the United States from both government and industry representing the commercial and private airspace users, aircraft manufacturers, and airborne and ground electronic system manufacturers.

Active in the field of aviation electronics and telecommunications, and other closely allied fields. Areas of interest include: determination of common operational requirements; state-of-art developments and applications; Minimum Operational Performance Standards for airborne systems; environmental test procedures for airborne equipment; operational and technical characteristics of systems; aeronautical frequency spectrum utilization; and other problems associated with air traffic control, navigation, communications and efficient use of airports and airspace.

Standardization Activities
Seeks solutions to problems involving the application of electronics and telecommunications to aeronautical operations. These solutions are frequently in the nature of recommended technical standards and common operational requirements which are acceptable to government, industry, and users. Cooperates with European Organizations for Civil Aviation Electronics (EUROCAE).

Availability
Sold directly, and distributed through IHS, NSA, and Avionics Magazine.

Keywords
avionics; aeronautical; telecommunications; MOPS; electronics.

**REDWOOD INSPECTION SERVICE**  
A division of California Redwood Association

Keith Lanning, General Manager

405 Enfrente Drive, Suite 200  
Novato, California 94949  
(415) 382-0662

Founded: 1961 Standards Staff: 5  
Merged into the CRA in 1986

**Type of Organization**  
Trade Association  
Standards Developer

**Standards Development**  
Developed standard for California Redwood Lumber through authorization of the American Lumber Standards Committee and PS-20-70.
Standards Designation

Certification
Adopts official grademarks signifying that products so marked have been graded in accordance with standard specifications of the Redwood Inspection Service. Grademarks are applied by qualified graders of member companies or by cooperating grading agencies operating within requirements established by the American Lumber Standards Committee.

Scope
A non-profit organization for the primary purpose of establishing uniform grades of redwood lumber, consultation with government agencies concerning grades and grading of redwood and other species of lumber. Promulgates rules for the redwood lumber industry. Membership includes 85 percent of the redwood producers. Rules are developed by a Quality Standards Committee and approved by Board of Directors.

Standardization Activities
Adopts standard specifications for grades, sizes, patterns, and grademarks for redwood lumber; planing mill products; special purpose uses for redwood lumber including tank stock, stadium seat stock, foundation sills, structural grades, structural glue laminating grades, and miscellaneous products including railroad ties, cooling tower material, shingles and shakes. Cooperates with other lumber organizations and with the American Lumber Standards Committee in keeping current the American Lumber Standards set forth in the US Department of Commerce Product Standard 20-70. Grading rules for redwood lumber are in accordance with these standards and approved by ALSC.

Availability
Sold directly

Keywords
wood products; shingles; grading rules; inspection; lumber; building; railway ties;

REFRACTORIES INSTITUTE

Charles G. Marvin, Vice President
301 Fifth Avenue, Suite 326

RESILIENT FLOOR COVERING INSTITUTE

Walter D. Anderson, Managing Director
966 Hungerford Drive, Suite 128
Rockville, Maryland 20850
(301) 340-8580 Fax: (301) 340-7283

Founded: 1929

Type of Organization | Trade Association
Standards Development | Standards developer since 1929
Standards Designation | RFCI prefix

Scope | Represents resilient floor covering producers of tile and sheet vinyl flooring products in the United States.
Standardization Activities | Developed standards for tile and sheet vinyl products, including adhesives and installation and maintenance instructions. Works with the federal government in developing standards for resilient tile and sheet vinyl for use by the government.
Availability | Distributed directly
Keywords | floor covering; vinyl tile; building
RESISTANCE WELDER MANUFACTURERS ASSOCIATION

Meg Morgan, Executive Director

1900 Arch Street
Philadelphia, Pennsylvania 19103
(215) 564-3484 Fax: (215) 564-2175

Founded: 1931

Type of Organization
Trade Association
Standards Developer

Scope
A trade association representing North American companies engaged in manufacturing resistance welding machines, electrodes and components (controls, transformers, etc.) Engages in a varied program of activities embracing the development of standard specifications for numerous types of resistance welding equipment, research and development work and cooperation with other associations and industries with mutual or parallel interests and problems.

Standardization Activities
Developed specifications for resistance welding machines: spot, press, portable, seam, upset butt, flashbutt, etc.; electrode alloy materials; nomenclature, definitions, etc. Developed standard classification for resistance welding electrode alloys, stating minimum permissible physical and electrical qualities. Identified and classified trade names and numbers. Also developed standards for spot welding electrode holders welding electrodes (spot and seam), together with recommended electrode alloys for spot welding of similar and dissimilar metal combinations. Developed standard nomenclature and definitions on resistance welding equipment and techniques. Cooperates with the National Electric Manufacturers Association and the American Welding Society to develop standards.

Availability
Distributed directly

Keywords

Over 250 representatives participate in the seven R15 Standards Subcommittees. Most of RIA standards are processed through ANSI Subcommittees. Draft Standards available for review.

Standards Designation
RIA/R15.x

Government Adoption
The Occupational Safety and Health Administration references ANSI/RIA R15.06-1986 in its Guidelines for Robotic Safety.

Secretariats
Domestic: R15.01, R15.02, R15.03, R15.04, R15.05, R15.05WG1, R15.06, and R15.07
International: USTAG/ISO/TC 184/SC 2
The Robotic Industries Association provides leadership for the responsible advancement of the entire robotics industry in North America. Some of the Association's objectives include providing mutual communications and organization of groups within the robotic industry to initiate and pursue programs of common technical, marketing, or management interest; and developing robotic industry and robotic system standards which will enhance the use and application of automation equipment.

Standardization in the field of robotics, including activities within the following technical committees: Electrical Interface (R15.01), Human Interface (R15.02), Mechanical Interface (R15.03), Communication/Information (R15.04), Performance (R15.05), Reliability (R15.05-WG1), Safety (R15.06), and Simulation/Offline Programming (R15.07).

Draft standards available from RIA. ANSI-approved standards available from RIA and ANSI.

robotics; robot systems; flexible manufacturing system; automation;

RUBBER MANUFACTURERS ASSOCIATION

Steven Butcher, Secretary, Hose Technical Committee

1400 K Street, NW

**SAFETY GLAZING CERTIFICATION COUNCIL**

Robert L. Brown, President

ETL Testing Lab Inc.  
Industrial Park 3933 Route 11  
P.O. Box 2040  
Cortland, New York 13045-0950

Founded: 1971

**Type of Organization**

Certification Organization

**Certification**

Products complying with established safety characteristics can be marked with a label signifying
certification by the SGCC. A number is also assigned to the safety glazing material.

Scope

A not-for-profit organization of manufacturers of safety glazing products, building code administrators, and others. Established and maintained a program to administer periodic testing related to the Consumer Product Safety Commission standard for safety glazing in buildings (16 CFR 1201), and as outlined in ANSI Z97.1-1984. Also approves and registers the manufacturers label with the ability to withdraw certification if deemed appropriate.

Standardization Activities

Administers a safety glazing certification program which is operated in compliance with ANSI Practice for Certification Procedures and the Code of Federal Regulations. Uses independent testing laboratories to sample and evaluate products. Publishes Certified Products Directory which lists all certified products, label requirements, and procedural guidelines for manufacturers seeking certification.

SALT INSTITUTE

Bruce M. Bertram, Technical Director

700 North Fairfax Street, Suite 600
Alexandria, Virginia 22314
(703) 549-4648

Founded: 1914 Standards Staff: 1

Type of Organization

Trade Association

Works through other organizations to develop standards

Scope

A nonprofit association supported by the world's major salt producers. Its 8 U.S. members produce 95% of the dry salt produced in the United States. Activities include information services, government relations, member services, and field services.

Standardization Activities

Serves as the national and the international standards representative for the salt industry. Cooperates with the National Academy of Sciences and the Department of Labor, General Services Administration, and the U.S. Army Natick Laboratories. Also works with the American National Standards Institute, the American Society for Testing and Materials, the American Water Works Association, the United States Pharmacopeia, the American Association of State Highway and
Transportation Officials, and the American Feed Manufacturers Association.

Formerly
The Salt Producers Association (1963)

230 active standards
Draft Standards available for review
None processed through ANSI
With 1,350 corporate members, SEMI serves the international semiconductor community by fostering the advancement of knowledge about equipment, materials, and services distinct to the production and use of semiconductor devices. Founded in 1970 to develop the SEMICON trade shows, SEMI activities have expanded to include technical symposiums, market research seminars, trade issues, and standards development.

The SEMI Standards Program encompasses virtually every facet of semiconductor manufacturing and has established specifications and test methods in six critical areas: chemicals, equipment (including automation and communications), materials, packaging, micropatterning and safety. Emphasis in standards development is placed upon: communication between producers and users; interchangeability of products and components; technology transfer; safety; and efficiencies in design, production, and inventory.

Nearly 3,000 engineers, scientists, and technicians volunteer to serve on standards setting technical committees in Japan, Europe, and the United States. Many committees have established a liaison with one or more of the following standards organizations: ASTM, ANSI, CGA, JEDEC, IEEE, and NIST. Membership in SEMI standards programs is open to all interested companies.

A balloting procedure designed to allow maximum fair participation precedes the approval of any specification. Procedural reviews of all standards ensure that the formal balloting process has been properly performed.

The SEMI Standards, a six-volume publication, is revised annually for publication in April.

Nonprofit research corporation
Standards developer

Approves manufacturers products meeting its standards and other criteria for certification under contractual agreements, providing, among other matter, ongoing random sample testing of helmets taken from dealer shelves.

ANSI Z90, Vehicular Head Protection

A nonprofit corporation whose primary purpose is to conduct research in brain trauma and head protective devices and to develop and utilize advanced techniques for related critical measurements. Establishes upper level standards for protective devices, maintains an ongoing research program in head injury and a program in education related to vehicular safety. Linked with European counterpart, Snell Memorial Foundation (UK).

Promulgated in 1959 the first standard for road user crash helmets in the United States. Its helmet Standards are generally recognized as carrying the most stringent safety performance requirements for road user protective headgear in the world today. Has also established standards of safety performance criteria for skier, bicyclists, and equestrian protective helmets. Standards are not minimum standards but, rather, represent the upper levels of protective
criteria which the manufacturing are is capable of meeting, and as that capability increases, the level of the standard is raised. Through its certification program, the Foundation is able to keep in the forefront of improvements in the state of the manufacturing art, both as to methodology and materials, and to obtain data useful in its research program and its development of more sophisticated test procedures.

Standards Developer

Standards Development
Standards developer since 1974
3 manufacturers participate in standards activities
29 active standards
Standards processed by SAE
Draft standards available for review

Standards Designations
SSCC/10, Safety Standards for Snowmobile Product Certification

Government Adoption
All or portions of the standard accepted by Connecticut, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, New Hampshire, Oregon, Pennsylvania, Rhode Island, Vermont, Wisconsin and Canada.

Certification
Certification program administered since 1975. Each conforming machine bears a Certification Label which signifies that the United States Testing Company, has independently confirmed that the vehicle has been manufactured in compliance with SSCC safety standards. In the area of operator education, provincial and state safety training programs are certified by the SSCC as being in compliance with uniform standards. To date, the instructional programs of sixteen states and provinces have been certified.
A nonprofit membership association organized to promote, foster, and encourage by any and all lawful means safe, enjoyable opportunities for snowmobiling through operator safety training and education programs; safe trail, use area and facility development; development of voluntary snowmobile machine safety standards and the independent certification thereof.

Has established a comprehensive machine standards program for snowmobile manufacture. Since February 1, 1975, all snowmobiles produced by participating manufacturers conform to the minimum safety standards for snowmobile product manufacture in effect on the date of their manufacture. Incorporated in the standards are requirements for seats, controls, brake and fuel systems, shields and guards, electrical and lighting systems, reflectors, hand grips, general hazard requirements and emergency starting.

Founded: 1943

Scientific Society
Standards Developer

Standards developer since 1980
Forty firms participate in standards activity
One active standard pending through ANSI

Strain Gage Bridge Designation and Color Code of Terminal Connections for Portable Strain Indicators

No certification, qualification, or accredited programs in United States. SEM is affiliated with the British Society for Strain Measurements which does certify and accredit.

Specialists in experimental mechanics in this country and overseas active in academic, government, and industrial research and development and include engineers, manufacturers, consultants, user and vendors
of plant equipment, services, and systems. Maintains close contact with professional groups in Europe, Japan, Korea and in the United States through joint meetings and combined memberships.

Standardization Activities

Represents a broad range of activities in experimental mechanics. Various Technical Division Committees serve professional interests in areas such as composite materials, fracture, modal analysis, structural testing, residual stresses, optical methods, strain gages, and transducers. Members active in non-destructive testing are currently part of the Modal Analysis Committee but are expected to form an independent unit.

SOCIETY FOR INFORMATION DISPLAY

Lawrence E. Tannas, Jr., President

8055 West Manchester Avenue, Suite 615
Playa del Rey, California 90293
(213) 305-1502

Founded: 1962

Type of Organization

Technical engineering professional society. Volunteer professional organization devoted to the understanding of displays

Standards Development

Joint standards with Electronic Industries Associations through joint committees with SID writing standards and EIA administrating standards written by SID. SID Definitions and Standards Committee maintains liaison with other standards formulating groups within the industry.

Standards Designation

SID/EIA prefixes

Scope

SID is international in scope with membership in academic, commercial and government organizations. Display theory, display device and systems development and psychological and physiological effects of displays are all within the area of activities performed by the society.
Standardization Activities: Flat panel, cathode-ray and other display devices and systems definitions, test methods and tutorial documents. Two joint SID/EIA committees are currently active in writing standards. These are JT20 for Cathode-Ray Display Devices and JT33 for Flat Panel Displays.

Availability: Directly through EIA or SID

Keywords: displays; definitions; characterization; viewability; data processing; electronics; television; communications;

SOCIETY FOR TECHNICAL COMMUNICATION

William C. Stolgitis, Executive Director

901 N. Stuart Street
Arlington, Virginia 22206
(703) 737-0035

Founded: 1957

Type of Organization: Technical Society Standards Developer

Scope: A nonprofit, educational membership organization whose purpose is to advance the theory and practice of technical communication in all media. It has chapters in the United States, Canada, and other countries.

Activities include chapter programs, an annual international technical communication conference, publication of a journal, and standards and reference material used in technical documentation, manuals, reports, and writings.

Standardization Activities: Maintains a Standards Council which is interested primarily in guidelines which bear directly upon the profession of technical communications, and data and procedural standards for science, engineering, and the arts that must be applied, interpreted, or referenced in technical communication. Cooperates with the American National Standards Institute, the Metric Association, and others concerned with publication of technical information.

Formerly: Merger of Association of Technical Writers and Editors, and Society of Technical Writers (1957)

Keywords: technical writing; technical information; communications; metric;
## Type of Organization
Professional Society

## Standards Development
Standards developer since 1902
14,000 members participating in standards activities
1,300 ground vehicle documents published in SAE Handbook
1,700 aerospace documents published in looseleaf form
2,200 Aerospace Material Specifications published in looseleaf form and microfiche
Approximately 500 documents annually are processed through ANSI

## Standards Designations
J-Reports, Ground Vehicle Industry Standard, Recommended Practice and Information Report
AMS, Aerospace Material Specification
MAM, Metric Aerospace Material Specification
AS, Aerospace Standard
MA, Metric Aerospace Standard
ARP, Aerospace Recommended Practice
MAP, Metric Aerospace Recommended Practice
AIR, Aerospace Information Report
HIR, Hydrospace Information Report

## Government Adoption
The Department of Defense has adopted 1,300 SAE documents. SAE standards are recognized in government publications as methods for measuring or testing for minimum technical requirements in areas where government regulatory control has been established.

## Accreditation
SAE operates several accreditation programs under the sponsorship of industry and government. The Lubricants Review Program and Oil Labelling Assessment Programs are operated for the U.S. Army. The JGES Verification Program operated under a contract for NIST. A new Defense Contractor Accreditation (NADCAP) program will audit and approve suppliers to the aerospace industry.

## Secretariats
Scope

A not-for-profit educational, scientific, and engineering society dedicated to advance the arts, sciences, standards, and engineering practices connected with the design, construction, and utilization of self-propelled mechanisms, prime movers, components thereof, and related equipment to preserve and improve the quality of life.

Prime objectives are to provide educational opportunities for engineers and to provide a medium through which they can advance the arts and science of engineering and promote public welfare. There are only individual memberships in SAE. Therefore, members perform their SAE functions as individuals, not as representatives of their employers. SAE interfaces with every agency of the government concerned with the design, manufacture, or regulation of vehicles. Because of the government's interest in regulatory activities relating to transportation equipment, and as a large volume purchaser of vehicles of all types, government agencies have historically drawn upon SAE and its Cooperative Engineering Program for information and assistance.

Develops and publishes technical literature and formulates engineering standards, specifications, and test procedures that are used in the design and manufacture of ground and aerospace vehicles.

Standardization Activities

Engages in technical standardization work for the motor vehicles, aircraft, airline, space vehicles, farm tractor, earthmoving, and roadbuilding machinery, and other manufacturing industries using internal combustion engines. Standards are the product of 600 Technical Committees. The SAE Handbook includes more than 1,300 ground vehicle industry standards. Standards are revised as needed to keep them up to date with new engineering developments. Obsolete standards are discontinued. Standards in the SAE Handbook include safety performance test codes, material specifications, and dimensional requirements on such subjects as vehicle lighting, tires, brakes, ride and vibration, steels, non-metallic materials, screw threads, and involute splines. Although voluntary, SAE standards are widely used throughout industry and many federal and state regulations reference them for minimum performance on safety items.

SAE Aerospace Standards, Recommended Practices, and Information Reports are design and/or parts standards applicable to missile, airframe, ground-support equipment, propulsion, propeller, accessory equipment, and airline industries. Aerospace Recommended Practices give dimensional, design and/or performance recommendations intended as guides for standard
engineering practice. The Aerospace Information Reports contain useful engineering data and information.

SAE Aerospace Material Specifications cover materials, material tolerances, quality control procedures and processes. They list chemical composition, detailed technical requirements, and cross-reference similar specifications and materials for corrosion and heat resistant steels, wrought low-alloy steels, cast iron and low-alloy steels; aluminum, magnesium, copper, titanium and miscellaneous nonferrous alloys; nonmetallics, special property materials, and refractory and reactive materials.

SOCIETY OF MOTION PICTURE AND TELEVISION ENGINEERS

Lynette Robinson, Executive Director
Sherwin G. Becker, Director of Engineering

595 W. Harsdale Avenue
White Plains, New York 10607
(914) 761-1100

Founded: 1916

Type of Organization
Technical Society
Standards Developer

Standards Development
Standards developer since 1916
650 members participating in standards activities
50% processed through ANSI
Draft standards available for review

Standards Designation
SMPTE/RP prefix; ANSI PH22.x; ANSI V98.x

Government Adoption
DoD adopts these standards regularly

Certification
No certification, qualification, or accreditation programs

Scope
A nonprofit organization concerned with the engineering aspects of motion pictures, television, instrumentation, high-speed photography, and the allied arts and sciences. Develops technical standards for motion picture engineering and television.

Standardization Activities
Activities divided among eight parent technology committees. Cooperates with national and international organizations such as AES, EIA, IEEE, International Radio Consultative Committee (CCIR), and major foreign national standards bodies.

Availability
Distributed directly or through ANSI

Formerly

Founded: 1893

Type of Organization
Professional Society
Works through other organizations to develop standards

Representation
ASTM F-25

Scope
A technical, professional society of individual members serving the maritime and offshore industry and its suppliers. Activities include all aspects of research, design, production, maintenance and operation of ships, submersibles, yachts, boats, offshore and ocean bottom structures, and other advanced marine vehicles. Provides a forum for exchange of technical information and administers a research program involving 100 individuals as voluntary members and permanent staff in cooperation with government and regulatory agencies, scientific and research laboratories, academic institutions, and the marine industry.

Standardization Activities
Although not a standards developing organization, one of its technical panels has the responsibility of initiating standards and specification for the Shipbuilding Standards Committee F-25 of the American Society for Testing and Materials (ASTM). This is Panel SP-6 (Standards and Specifications) of the Ship Production Committee. In this way, SNAME interfaces directly with the F-25 standards development activity. F-25 draws upon the expertise in the SNAME Technical and Research Program by soliciting the need for certain shipbuilding standards and by using these same panels when conducting the necessary consensus review under the ASTM process. These standards are published periodically by ASTM.

Standards developed to date include various shipbuilding parts, such as cable brackets, hangars, pipe fittings and flanking, certain containers, angle irons, etc. Panel SP-6 is also involved in a program for the redrawing of selected Naval military specifications into commercial ASTM standards. SNAME members are called upon to review much of this standards writing along with the standards committees of ASTM.
Certain panels of the Society are also called upon to comment on the Standards development for small boats undertaken by Underwriters Laboratories (UL).

**Keywords**
marine; shipbuilding; boats; transportation;

**SOCIETY OF THE PLASTICS INDUSTRY**

Larry L. Thomas, President

1275 K Street, NW, Suite 400
Washington, DC 20005
(202) 371-5200

Founded: 1937

**Type of Organization**
Trade Association
Standards Developer

**Certification**
Vinyl windows complying with ASTM D4099 are listed in the Vinyl Window and Door Institute Certified Products Directory.

**Scope**
A trade and technical society of 1,200 companies in the plastics industry interested in quality standards, research, uniform accounting, traffic rates, wage rate survey, tariffs, codes, public relations, informative labeling, safety, fire prevention, and food packaging. Membership consists of injection, compression, and transfer molders; laminators; extruders; fabricators; calenderers; printers; embossers; reinforced plastics processors; raw material suppliers; machinery and equipment manufacturers; tool, die and mold makers; research, development; and testing laboratories.

**Standardization Activities**
Cooperates and supports the preparation of standards for plastics products through organizations such as the American Society for Testing and Materials, the American National Standards Institute, and the National Sanitation Foundation. Financially supports ANSI which holds the secretariat to International Organization for Standardization, ISO/TC 61, Plastics, and participates in its activities.

Two divisions of the society have their own standardization programs: the Vinyl Siding Institute, and the Vinyl Window and Door Institute. These organizations develop product performance standards, and test methods which are processed through the American Society for Testing and Materials. These activities maintain liaison with code and regulatory agencies and work to have vinyl building components accepted as generic products in code standards.
Keywords: plastic; laminate; molding; machinery; materials; building products;

**SOLAR RATING AND CERTIFICATION CORPORATION**

Scott Sklar, Executive Director

777 North Capitol Street, #805
Washington, DC 20002
(202) 408-0306

Founded: 1974

**Type of Organization**
Rating and Certifying Body

**Standards Designations**
SRCC prefix

**Certification**
The Solar Rating and Certification Corporation (SRCC) certifies several independent testing laboratories for solar collector and solar domestic hot water systems tests, SRCC randomly selects equipment for testing, interprets test data, and publishes a certified product rating directory.

**Scope**
Manufacturers and installers of solar energy systems and components, and distributors, contractors, and engineers whose purpose is to accelerate and foster commercialization of solar energy conversion for economic purposes. Compiles statistics and offers computerized services.

**Standardization Activities**
The Solar Rating and Certification Corporation develops solar industry certification standards for heating and cooling equipment. Members are also involved in international standards development activities.

Approximately 25-50 member companies are involved at different times in several standards organizations.

**Availability**
Distributed directly

**Keywords**
solar collectors; heating; air conditioning; testing; energy;

</tr>
<tr>
<td><strong>Certification</strong></td>
<td>Maintains a certification program in which it licenses subscribers to use its registered grade-mark when subscribers meet the necessary qualifications. The Bureau maintains a similar program for companies that treat lumber by a pressure process for protection against insect and decay attack with approved chemicals in accordance with the standards of the American Wood Preservers Association.</td>
</tr>
<tr>
<td><strong>Scope</strong></td>
<td>An autonomous nonprofit agency and the recognized organization in the Southern Pine industry for the formulation and maintenance of grading standards. Has carried on a standardization program since 1940 developing grading rules for Southern Pine lumber in conformance with the American Lumber Standards Voluntary Products Standard PS 20-70 published by the National Institute of Standards and Technology. Certified as a supervisory grading agency by the board of review of the American Lumber Standards Committee.</td>
</tr>
<tr>
<td><strong>Standardization Activities</strong></td>
<td>Actively participates in the formulation and maintenance of the American Lumber Standards for Softwood Lumber. Maintains representation on the Committee on Wood of the American Society for Testing and Materials and American Wood Preservers Association. Member of ANSI. Maintains standards of size and grade classifications for the benefit of the lumber using public and the lumber manufacturing industry. These include domestic and export grade rules and standards for glued lumber and machine stress rated lumber. Provides inspection facilities. These inspection facilities are used not only as a means of adjudicating disputes between buyers and sellers but also for the certification of Southern Pine lumber before shipment from the mill. Grading and manufacture are under the supervision of Bureau Quality 491</td>
</tr>
</tbody>
</table>
Supervisors. Those mills which prove their proficiency in grading and agree to maintain the established standards of size and grade moisture content are licensed to grade-mark their lumber with a Bureau mark.

The quality of treatment of lumber treated by the pressure process is also under the supervision of Bureau Quality Supervisors and those treating plants which prove their proficiency and capability of maintaining the required level of treatment are licensed to quality mark their lumber with a Bureau mark indicating the quality and symbolizing such supervision.

SOUTHWEST RESEARCH INSTITUTE

Joseph S. Kittle, Director

Program Development Office
Post Office Drawer 28510
San Antonio, Texas 78284
(512) 684-5111 Telex: 244846

Type of Organization
Nonprofit Research Institute
Works through other organizations to develop standards

Representation
ANSI, ASME, API, ASTM, IEEE, NFPA, SAE, National Marine Manufacturers Association

Scope
Performs contract research and development for commercial, industrial and governmental agencies in a wide range of technologies. Some of this work specifically supports development of standards.

Standardization Activities
Works with SAE and API under sponsorship of the Coordinating Research Council, Inc. in the development of rating standards used to subjectively rank the results of an engine oil test. These rating standards evaluate sludge, varnish, rust, and other visible phenomenon, such as ring sticking, scuffing, and wear. These standards are the only recognized subjective rating techniques used by industry in the evaluation of engine lubricants. In a similar capacity, develops standardized test procedures and performs certification testing to evaluate two-cycle engine lubricants for the National Marine Manufacturers Association. Worked with ASTM and automobile manufacturers in the development of the industry-recognized Sequence Tests for diesel and gasoline engine lubricants. Participated in
development of standards for electromagnetic compatibility which resulted in SAE J1338 and J1113.

Founded: 1989

**Type of Organization**
Vendor Consortium  
Standards Developer

**Standards Development**
Development of the SPARC microprocessor architecture standard and compliance definitions and testing suites

**Government Adoption**
Government agencies world-wide are evaluating adoption of next generation 32-bit RISC (reduced instruction set computer) architectures, including SPARC.

**Certification**
SPARC International provides certification testing against the SPARC Compliance Definition for chip, systems and software vendors, and administers the licensing of the SPARC trademark to vendors of compatible products.

**Scope**
An international not-for-profit vendor consortium dedicated to the expansion of the SPARC UNIX, real-time, embedded systems and ISV software markets, and to the promotion of the SPARC architecture as an open standard. Member companies participate in decisions affecting the evolution of the architecture, and contribute to establishing the SPARC architecture as the only open 32-bit microprocessor standard.

**Standardization Activities**
Focuses on activities that support the growth of the SPARC market infrastructure and expand opportunities for SPARC vendors. Develop and evolve compatibility testing suites and procedures for use by SPARC vendors. Cooperate with other standards organizations whose activities further SPARC International goals.

**Keywords**
SPARC; RISC; UNIX systems; embedded control; real-time systems; open systems; information processing;
SPECIAL LIBRARIES ASSOCIATION

David Bender, Executive Director

1700 18th Street, NW
Washington, DC  20009
(202) 234-4700

Founded: 1909  Standards Staff:  1

Type of Organization
Professional Society
Works through other organizations to develop standards

Representation
Represented on ANSI committees concerned with
development of standards in the following areas:
library/information science and publishing practices,
photographic reproduction, and library equipment.

Scope
An international organization of more than 12,000
librarians and information managers. Serves industry,
business, government agencies, research, educational,
and technical institutions requiring or providing
specialized information.

Standardization Activities
Participates in the work of ANSI accredited
organizations including PH5, Photographic Reproduction
of Documents; Z39, Library/Information Science and
Related Publishing Practices; Z85, Library Equipment
and Supplies. The SLA Standards Committee provides
guidance in these areas. Publishes "Objectives for
Special Libraries" which sets forth standards for
objectives, staff, collection, services, physical
facilities, and budgets for special libraries.

processing; office products;

SPONGE AND CHAMOIS INSTITUTE

Jules Schwimmer, Executive Secretary

60 East 42nd Street
New York, New York 10165
(212) 867-2290

Founded: 1933

Type of Organization
Trade Association
Standards Developer

Scope
Represents dealers and suppliers of natural sponges and
genuine chamois. Seeks to increase public awareness of
the distinctive properties and qualities of genuine
chamois.
### Standardization Activities
Works with the government and other organizations to develop standard characteristics for genuine chamois. Developed Chamois Standard CS 99-1970, which defines the general and performance characteristics of genuine chamois skin.

### Availability
Distributed directly

### Keywords
sponge; chamois; materials; consumer products;

### SPORTING ARMS AND AMMUNITION MANUFACTURERS INSTITUTE

Robert T. Delfay, Executive Director

555 Danbury Road
Wilton, Connecticut 06897
(203) 262-5463

Founded: 1926 Standards Staff: 1

### Type of Organization
Trade Association
Standards Developer

### Standards Development
Standards developer since 1926
41 representatives active in standards activity
Draft standards available for review

### Standards Designation
ANSI/SAAMI and SAAMI prefixes

### Government Adoption
Used by Department of Defense in relation to manufacturing, testing, and performance specifications of commercial ammunition purchased by the U.S. government.

### Scope
Serves the mutual interests of the U.S. sporting firearms and ammunition industry with emphasis on activities to assure safe use of these products by sportsmen and others having a lawful need for them.

### Standardization Activities
Maintains a Technical Committee which reviews industry test methods, procedures, and recommended manufacturing safety practices; two subcommittees work in the areas of ammunition and firearms. Establishes definitive proof loads recommended for factory tasting of U.S. made sporting firearms, thus assuring greater safety to the user of such arms. Maintains liaison with the Department of Defense in relation to manufacturing, testing, and performance specifications of commercial ammunition purchased by the government.

### Availability
Sold directly and through ANSI

**SPORTS CAR CLUB OF AMERICA**

Nicholas Craw, President
9033 E. Easter Place
Englewood, Colorado 80112
(303) 694-7222

**Founded:** 1944

**Type of Organization**  | Recreational/Technical Society Standards Developer

**Scope**  | A nonprofit organization with 52,000 members. Sanctions national and regional races and ten major professional racing series listed on the International Calendar. Sanctions rallies (precision driving tests over a given route at an exact speed), solo events (intricate driving maneuvers in a cleared area), concours d'elegance (rating cars by a correlation of age, condition, and equipment of the vehicle), and numerous international events and world championship races.

**Standardization Activities**  | Develops safety standards for competitions, and standards and procedures for speed events for automobiles which may take part in events, for issuance of competition licenses, and for the organization and conduct of its events. These standards and procedures are published in General Competition Rules; Rally and Solo Rules; and Professional Racing Regulations.

Participates in American National Standards Committee Z90, Vehicular Head Protection, concerned with safety requirements for head protection for automobile drivers engaged in high hazard activities or occupations, as well as crash helmets for motorcyclists, American National Standard Z90.1.

**Availability**  | Distributed directly

Dayton, Ohio 45401-2307  
(513) 223-2410

**Type of Organization**  
Professional Society

**Representation**  
Approximately 50% of the members are active in standardization activities of a standards developers ranging from international organizations to trade associations.

**Certification**  
Certification program exists in Standards Engineering; over 200 members currently certified.
## Scope
A professional technical society of 800 standards practitioners for companies and government agencies. Members are organized into 20 local sections throughout the United States and Canada. Objectives include providing a forum for the interchange of information in the field of standardization and promoting the knowledge and use of national and international standards.

### Standardization Activities
SES does not generally develop standards as a society but members represent their organizations on numerous national and international standards-making committees. However, the Society is developing a proposed American National Standard for designations, titles, keywords, abstracts and formats for standards, as well as a proposed American National Standard for standards indexes and catalogs.

# STEEL JOIST INSTITUTE

E. T. E. Sprague, Managing Director

1205 48th Avenue North, Suite A
Myrtle Beach, South Carolina 29577
(803) 449-0487

Founded: 1928

| Type of Organization | Standalone Association
|----------------------|-------------------------|
| Standards Development | Standards developer since 1928

| Certification | Established certificate procedures are required for member companies.

**Scope**

A nonprofit organization of manufacturers engaged in the manufacture and distribution of steel joists. Objectives are to establish and standardize methods of design and construction for steel joists, to provide test and research data for public dissemination, to assist in the development of appropriate building code regulations and to publish information relative to the proper use of steel joists in the interest of safety and public welfare.

**Standardization Activities**

Current standard specifications are recognized throughout the industry and include Load Tables for Open Web, Longspan, and Deep Longspan Steel Joists comprising K-Series, LH-Series and DLH-Series. In addition, the Institute has developed standard specification and weight tables for Joist Girders, which are primary structural members.

Two safety specialists from member companies serve as voting delegates on ANSI B11 Committee.

**Scope**

A voluntary trade association representing the interests of some 80 percent of the metal service center industry which serves the metal supply needs of some 300,000 manufacturers and fabricators through 1,000 outlets.

**Standardization Activities**

Participates in the development of safety standards for powerdriven machines used by the industry as developed through Committee B11.

STEEL SHIPPING CONTAINER INSTITUTE

Malcolm M. Anderson, Executive Director

2204 Morris Avenue
Union, New Jersey 07083
(201) 688-8750

Founded: 1944

Type of Organization
Trade Association
Standards Developer

Standards Development
SSCI serves as the Secretariat for the American National Standards Institute's ANSI MH2 Committee on new steel drums and pails. The current standards are issued in ANSI MH2-1985 which contains 24 separate standards for steel containers in common use.

Standards Designation
ANSI MH2-1985

Government Adoption
By reference in military and federal specifications

Secretariat
ANSI Committee MH2, Steel Drums and Pails

Scope
The Steel Shipping Container Institute is the Secretariat for this committee which comprises representatives of groups directly affected by the consensus standards for steel drums and pails. These groups include carriers, manufacturers, user groups and regulators who agree on the rules and regulations which are covered by these standards. Public canvass is conducted by ANSI after the committee agrees to content. Once any comments resulting from the canvass are resolved, the edited standards are published by ANSI showing the members of the committee including the SSCI Secretariat.

Availability
Distributed through ANSI

STEEL STRUCTURES PAINTING COUNCIL

Dr. Bernard R. Applemer, Executive Director

4400 Fifth Avenue
Pittsburgh, Pennsylvania 15213
(412) 268-3327

Founded: 1950
Technical Society Standards Developer

Standards developer since 1950
85 active standards
No current standards processed through ANSI
Draft standards available for review

SSPC prefix

27 standards adopted by DoD

Painting Contractor Certification Program

Scope

Determines and outlines the best methods developed for cleaning and painting steel; issues specifications covering practical and economical methods of surface preparation and painting of steel structures; and evaluates through long-range research programs involving field and laboratory work the various methods, coatings, and costs necessary to prevent or reduce corrosion on steel structures.

35 committees with 1,000 members participating in standards activities. Assimilates the newest technology into usable and effective specifications for the coatings industry. Develops standards through a comprehensive voluntary consensus process. Issues standards for surface preparation, paint application, painting systems, and paints. Surface preparation specifications describe hand and power tool cleaning, chemical cleaning, and all levels of blast cleaning. Develops visual standards for surface appearance after cleaning as an optional supplement to the surface preparation specifications. Paint application specifications include standards for shop, field, and maintenance painting; measurement of paint film thickness, guides for safety in paint application, and a guide for maintenance repainting. Also has visual standards for evaluating the degree of rusting on painted steel surface.

Northbrook, Illinois 60062
(312) 498-1980

Founded: 1916

Type of Organization
Trade Association
Standards Developer

Standards Designations
sti prefix

Government Adoption
The STI-P3 specification is referenced in the final technical requirements (40 CFR 280) for underground storage, as promulgated by the U.S. Environmental Protection Agency.

Certification
No certification, qualification, or accreditation programs, although manufacturers are "licensed" to fabricate in accordance with sti-P3 specifications. Strict quality assurance programs are administered by STI.

Scope
A trade association representing steel tank manufacturers and suppliers in the United States and Canada. Functions primarily on a national level, representing its members in a wide range of technical, code, and related areas.

Standardization Activities
Developed STI-P3 standards for exterior corrosion protection of underground steel storage tanks. A limited number of recommended practices also developed by the institute for both underground and aboveground tanks.

Availability

Founded:  1956

Type of Organization
Trade Association

Certification
Standards Developer

Provides a certification and labeling program for all products which conform to specified standards.

Scope
A national trade organization representing the manufacturers of domestic sump sewage and effluent pumps, together with component and accessory suppliers. Activities include development and promulgation of quality standards, spelling out design and performance criteria for sump sewage and effluent pumps used in homes; development and dissemination of statistical information designed to describe market size and activity; promotion of improved provisions in building codes on the use of such pumps; and education efforts designed to encourage proper and safe installation, maintenance, and use of domestic sump sewage and effluent pumps.

Standardization Activities
Developed the Domestic Sump Effluent and Sewage Pump Standards which are national in scope and designed to supply the purchaser and user with accurate performance data and to assist in the determination of proper application and selection of this equipment. They provide a uniform method of testing and rating, and include a specification system covering basic materials of construction for all major components. They also detail minimum specifications for motors, nameplate data, service cords, and control switches.

Test Method Developer

**Standards Development**

Test methods developer since 1915
268 Official, Provisional, and Classical Test Methods

**Standards Designations**

T -- Official, Provisional, and Classical Test Methods
UM -- Useful Test Methods, which are published by TAPPI but have not been through the regulated review process; no new UMs will be published after 1989.

**Scope**

Purposes are to further the application of the sciences in the pulp and paper industry; to promote investigation, research, and interchange of ideas among its members in the field of pulp and paper manufacture and use; to promote education in the science and practice of pulp and paper manufacture; to arrange for the collection and dissemination of information; to provide technical facts, data, and testing procedures fundamental to pulp and paper manufacture and use; to promote the professional, social, and economic welfare of its members.

**Standardization Activities**

Publishes testing procedures which include Official, Provisional, Classical, and Useful Methods prepared by technical committees and approved by the various divisions of TAPPI in accordance with rules and regulations prescribed by the Test Methods Management Committee. Classical Methods are former Official or Provisional methods which have been superseded by advanced technology. Useful Methods are those found useful in the industry but not worthy of consideration as Official or Provisional Methods.

Cooperates with the American Society for Testing and Materials, the Intersociety Color Council in developing color standards, and the American National Standards Institute in promoting American and International Standards.

Standards Development

TPI, PCT, DSB, and QST prefixes

Standards Designations

Provides an in-plant inspection service for manufacturers of metal plate connected wood trusses in accordance with Uniform Building Code (UBC) Standards under its Quality Control Inspection Program. TPI is recognized as an approved quality control agency for the inspection of metal plate connected wood trusses.

Certification
Scope
A nonprofit organization of manufacturers engaged in the production and distribution of metal connector plates for the trussed rafter industry; maintains the industry on a sound engineering basis by establishing methods of design and construction for wood trussed rafters using metal connector plates; provides test and research data for public dissemination; assists in the development of proper building code regulations; and disseminates information relative to the proper use of wood trussed rafters in the interest of safety and public welfare.

Standardization Activities
Develops design standards for metal plate connected wood trusses, metal plate connected parallel chord wood trusses, and temporary bracing of metal plate connected wood trusses. Publishes a quality control standard, and a commentary on handling, installation and bracing of wood trusses. Promotes product acceptance with code authorities. Also publishes design criteria.

<table>
<thead>
<tr>
<th>Standards Designation</th>
<th>UL Standards for Safety</th>
</tr>
</thead>
</table>

| Government Adoption | The Department of Defense has adopted more than 100 Underwriters Laboratories Inc. (UL) Standards for Safety. In addition, other government agencies, including the General Services Administration and the United States Coast Guard, either require compliance with UL Standards for Safety or accept UL certification as constituting compliance with applicable regulations. |

| Representation | UL personnel contribute to standards and code-making activities by serving as members of over 500 committees of national and international organizations including ANSI, NFPA, ASTM, IEC, ISO, and others. |

| Certification | UL offers five services by which products or systems may be identified as complying with the requirements of UL or other organizations or regulating agencies, or as otherwise having been investigated by UL in accordance with specified methods or procedures. These services, their applicability, and the method of identification are: |

1. **Listing** -- Products that have been investigated with respect to reasonable foreseeable risks to life and property and for which the risks have been reduced to an acceptable degree. Products are identified by the UL Listing Mark. |
2. Classifications -- Products that have been investigated with respect to one or more of the following: (a) specific risks only, (b) performance under specified conditions, (c) regulatory codes, or (d) standards of organizations other than UL, including international standards. This service is generally applicable to industrial and commercial products. Products are identified by the UL Classification Marking.

3. Recognition -- Products that have only been investigated for use as components of equipment Listed or Classified by UL. Products are identified by the manufacturer's identification and a model number or the equivalent. Products may also be identified by the UL Recognized Component Mark.

4. Certificate -- Products that comprise a field installed system investigated at a specific location, or specific quantities of certain products, under such conditions that it is impractical to apply the Listing Mark or Classification Mark to each product. Products or systems are identified by a Certificate issued by the manufacturer or installer under UL's authorization.

5. Registered Firm -- Facility Quality Assurance Systems, by means of assessment and subsequent surveillance, providing assurance of a firm's capability of working to their specifications. Facilities so registered are permitted to use the Registered Firm Mark in advertising, but not in connection with any product.

As an integral part of each of these five services, UL maintains a Follow-Up Service under which UL conducts factory inspections and counterchecks of manufacturers' inspection and test procedures for determining continued compliance with the requirements under which the product or system was initially investigated.

In cooperation with EIA, UL serves as the National Supervising Inspectorate (NSI) of the IEC Quality Assessment System for Electronics Components (IECQ-System) for the United States. The IECQ-System is designed to encourage international trade in electronic components. It is intended that components certified by an approved manufacturer in one participating country be acceptable to users in other participating countries without further testing. The NSI is the national organization responsible for the surveillance of all quality assessment necessary for the system, including
these responsibilities: approval of manufacturers, independent distributors, and independent laboratories; supervision of the Certificate of Conformity; and audit testing of approves components.

Secretariats

ANSI C101.1, Leakage Current for Electrical Appliances

IEC/TC 74, Safety of Data Processing Equipment and Office Machines

Scope

Objectives are to evaluate products and systems or to conduct scientific investigations, studies, experiments, and tests to determine the relation of various materials, devices, construction, and methods to life, fire, and casualty hazards; to ascertain, define, and publish standards, classifications, and specifications for materials, devices, constructions, and methods affecting such hazards; and to provide other information tending to reduce or prevent damage from fire, crime, and casualty.

Standardization Activities

The primary business of UL is product safety through Facility Registration Product Certification, and UL's Standards for Safety play an important part of this process of investigation, identification, and audit. Each of UL's engineering departments has prepared standards for use in this work. A catalog listing all available UL Standards for Safety is published twice yearly. Members of UL's five Engineering Councils assist and advise UL engineers in an effort to provide safety requirements that reflect realistic considerations of field experience and practical judgements, as well as sound engineering technology. UL Engineering Councils currently serve in the areas of Burglary Protection, Casualty, Electrical, Fire, and Marine.

The Consumer Advisory Council members advise UL in establishing levels of safety for consumer products. They also provide additional user field experience and information in the area of product safety and assist in educating the general public in the limitations and safer use of specific consumer products.

UL Standards for Safety are developed under procedures that provide for participation, review, and comment.
from industry, government, insurance groups, consumers, other interested parties, and the general public. These procedures take into consideration the needs and opinions of a wide variety of interests concerned with the subject of the standard and afford due process to all those who will be affected by the standard.

UL's Technical Assistance to Exporters (TATE) program offers help to exporters in getting information about international and foreign national standards and information about foreign laboratories and certification programs. UL will investigate a product in accordance with a published foreign national standard or an international standard. UL-generated data may then be submitted to a foreign test station for considerations as a part of their investigation. UL also maintains a Technical Information Center (TIC) for providing access to information about standards, regulations, and submission procedures of foreign countries. The Technical Information Center also includes selected translations of foreign specifications.

Availability
Distributed directly and through ANSI, Global Engineering Documents, the British Standards Association, and the Standards Association of Australia. Translations of some UL Standards for Safety into languages other than English are available from the following organizations: French -- AFNOR; Japanese -- JMI Institute and the Japan Standards Association; and Korean -- Korea Institute of Machinery and Metals. UL Standards for Safety are available in three microform formats from IHS and NSA.

UNITED LIGHTNING PROTECTION ASSOCIATION

Nina Lancaster, Secretary
2 Richey Avenue
Collingswood, New Jersey 08107
(609) 854-7005

Founded: 1935
Type of Organization | Trade Association  
| Works through other organizations to develop standards  
  
Representation | 100 members active in lightning protection activities of standards developers such as UL and NFPA.  
  
Scope | Provides reliable educational materials on the hazards of lightning and what constitutes proper lightning protection. Members must conform to the highest standards of lightning protection systems, engineering, installation, and service to maintain membership.  
  
Standardization Activities | Members serve on numerous committees and in other key roles in helping to establish various standards and codes, such as the Lightning Protection Code of the National Fire Protection Association and the Lightning Protection Installation Requirements Code of Underwriters Laboratories. Consulted frequently by building supply manufacturers, insurance firms, safety groups, and power companies to advise on potential hazards and proper lightning protection.  
  
Keywords | lightning protection; building; safety;  
  
UNITED SHIPOWNERS OF AMERICA

William P. Verdon, President  
1627 K Street, NW  
Suite 1200  
Washington, DC 20006  
(202) 466-5388  
Telex: TWX 7108221163

Type of Organization | Trade Association  
| Works through other organizations to develop standards  
  
Representation | ANSI MH5  
ISO/TC 104  
  
Scope | Supports development of a statutory and regulatory framework within which all ocean carriers in the international trade of the United States will compete on an equal basis and the promotion of U.S. flag shipping through close cooperation with shippers, government agencies, and various international organizations, such as the International Chamber of Shipping and the Maritime Consultative Organization.  
  
Standardization Activities | Participates in domestic and international standards development involving multi-modal cargo containers and related equipment. Representatives are active on ANSI
committee MH5, U.S. TAG to ISO/TC 104, American Bureau of Shipping, and other relevant organizations.

**UNITED SKI INDUSTRIES ASSOCIATION**

Chris Stoddard, Committee Administrator

20 Maple Street
P.O. Box 2883
Springfield, Massachusetts 01101
(413) 781-4732 Fax: (413) 781-6105

**Type of Organization**
Trade Association

**Standards Development**
Standards developer since 1963

**Government Adoption**
U.S. Department of Agriculture Forest Service, and states where skiing exists.

**Secretariat**
ANSI B77.1

**Scope**
A trade association of ski area operators, manufacturers, and suppliers of ski equipment. Twelve hundred members located in all states and several foreign countries. Aims are to promote skiing and safety in skiing, to protect natural resources in meeting the needs of the skiing public and ski area operators, and to ensure legitimate interests of ski area operators.

**Standardization Activities**
Maintains committee composed of operators, users, authorities having jurisdiction, designers, and manufacturers of aerial tramways. Developed American National Standard B77.1, Safety Requirements for Passenger Tramways and Lifts, Surface Lifts, and Tows. Promotes this safety standard for the ski lift industry, used by ski lift manufacturers, ski area personnel, ski area insurance programs, and state and federal authorities having jurisdiction.

**Availability**
Distributed directly and through ANSI

UNITED STATES COUNCIL FOR INTERNATIONAL BUSINESS

Abraham Katz, President
1212 Avenue of the Americas
New York, New York 10036
(212) 354-4480
Telex: US COUNCIL 14-8361 NYI
Fax: (212) 575-0327

Founded: 1945

Type of Organization
Trade Association
Works through global business organizations to develop international standards

Representation
U.S. National Committee of the International Chamber of Commerce (ICC)
U.S. Committee of the International Organization of Employers (IOE)

Secretariats
U.S. Secretariat for the Business and Industry Advisory Committee (USA-BIAC) to the Organization for Economic Cooperation and Development (OECD); U.S. Secretariat for the U.S. Coordinating Group on European Community Affairs (USICG)

Scope
A trade association of 300 U.S. based multinational corporations. Represents its members by keeping them informed of international business development having a major impact on their operations.

Standardization Activities
Works with ICC to harmonize trade practices and terminology resulting in Universal Standards and the Uniform Customs and Practice for Documentary Credits. Serves as the business voice in the International Labor Organization which is active in establishing international labor standards in the form of conventions, which are binding on states which ratify them, and nonbinding recommendations. Works with OECD to provide models for national legislation, such as tax provisions, and voluntary standards of behavior for multinationals.

UNITED STATES TELEPHONE ASSOCIATION

Paul K. Hart Executive Director, Technical Disciplines

900 19th Street, NW, Suite 800
Washington, DC 20006
(202) 835-3100

Founded: 1897

Type of Organization
Trade Association

Works through other organizations to develop standards

Representation
Members participate on their own behalf in committees of the IEEE, EIA, and ANSI. In some cases the Association is represented directly.

Secretariats
Protection Engineers Group (PEG)

Scope
USTA is the association of the United States wireline telephone companies. Until 1983, membership of the Bell Companies was not permitted by the Association's by-laws and the fact that the Bell operating companies were part of AT&T. With divestiture the Association has dropped the word "independent" from its name and the seven regional telephone companies created after divestiture have joined the Association.

Standardization Activities
While not currently a standards developer the Association reserves the right to sponsor standardization activities which it may deem necessary. With formation of the Exchange Carriers Standards Association, USTA will likely support those efforts. The PEG secretariat will not be affected. The association and its members participate at the working group level of various standards developing organizations and provide the secretariat for the Protection Engineers Group which is a standards developer.

<tbody>
<tr>
<td>Certification</td>
<td>The association has developed a voluntary Builder Certification Program. To become a certified builder, a member must pass a written examination that demonstrates a high level of knowledge of tennis court construction.</td>
</tr>
<tr>
<td>Scope</td>
<td>Represents tennis court and track builders in the United States and internationally. Members include builders of tennis courts, game courts, and running tracks; manufacturers of court and track surface materials, fencing, lighting systems, and court accessories; and professionals involved in the tennis and track industries.</td>
</tr>
<tr>
<td>Standardization Activities</td>
<td>Developed Tennis Court and Running Track Guide Specifications. Maintains technical committees to draft and update specifications. Also publishes a maintenance and Repair Specification Guide for tennis courts and Lighting and Fencing Specifications. The latest publications program includes a series of technical data bulletins on tennis court dimensions (with metric equivalents), windscreens, and site investigation for tennis courts and tracks. The series also includes site preparation, earthwork drainage, base/court construction, guidelines for reconditioning fast-dry tennis courts, tennis court orientation, and soil sterilization; also covers color finish systems for tennis courts and resurfacing of asphalt courts. A track data series has also been initiated. The first bulletin covers the conversion of 440 yard tracks to 400 meters. Publishes a 400 meter even track markings layout in cooperation with the National Federation of State High Schools Association. Participates in liaison committees with the U.S. Tennis Association, National Tennis Association, National Sporting Goods Association, Illuminating Engineers Society, National Federation of State High Schools Association, and the U.S. Track &amp; Field Federation.</td>

**UNITED STATES TESTING COMPANY**

Diane Fuller, Vice President

1415 Park Avenue
Hoboken, New Jersey 07030
(201) 792-2400
Founded: 1880

**Type of Organization**
Independent Test Laboratory
Standards Developer

**Certification**
Conducts testing for certification and labeling to assure products meet specified standards.

**Scope**
An independent commercial laboratory engaged in product testing for quality assurance.

**Standardization Activities**
Develops standard test procedures including instrumentation for consumer appliances, toys, home entertainment equipment, garden and lawn equipment, recreational goods, textiles, chemicals, cosmetics, drugs, paint, construction materials, plastics, paper, metals, and foods. Cooperates with ASTM and ANSI.
Assists government agencies, manufacturers, and trade associations by product testing to ascertain whether specifications and standards are met and to establish national standards.

**Formerly**
Also known as Nationwide Consumer Testing Institute, Inc.

**Keywords**
quality assurance; testing; consumer products; materials; food; textiles;

**VACUUM CLEANER MANUFACTURERS ASSOCIATION**

Clifford J. Wood, Executive Secretary

P.O. Box 2642
North Canton, Ohio 44720
(216) 499-5998

Founded: 1913

**Type of Organization**
Trade Association
Works through other organizations to develop standards

**Scope**
Formed to promote the common business interests of vacuum cleaner manufacturers. Services include government affairs, industry statistics, engineering/technical and publicity.

**Standardization Activities**
Individual member companies of the association, along with general interest representatives, develop United States vacuum cleaner standards through the ASTM F-11 Vacuum Cleaner Committee. Individual member companies also work with the Canadian Standards Association. Maintains a representative on the vacuum
cleaner technical committee of the International Electrotechnical Committee involved in the development of international standards.

Keywords vacuum cleaners; floor care; appliances; consumer products;

VALVE MANUFACTURERS ASSOCIATION OF AMERICA

Malcolm E. O'Hagan, President

1050 17th Street, NW, Suite 701
Washington, DC 20036
(202) 331-8105

Founded: 1938

Type of Organization Trade Association
Works through other organizations to develop standards

Representation Members active in MSSVFI, API, AWWA, SME, ISA, NACE, ANSI, and ISO

Scope Represents the flow control industry. Members comprise 85 percent of U.S. production of industrial valves and actuators used in oil and gas, power, chemical, construction, water, and process industries.

Standardization Activities Although not a standards making body, VMA is a member of ANSI and a strong advocate of U.S. and international standards. Members of the industry are active in a variety of standards activities. VMA is represented on ASME B-16, ISO/TC 153, AWWA C504, and develops standards policy through its Technical Committee and Product Committees.

Keywords valves; actuators; flow control; industrial equipment;

VARIABLE RESISTIVE COMPONENTS INSTITUTE

Stan J. Kukawka, Executive Director

P.O. Box 1070
Vista, California 92083
(619) 727-3011 Fax: (619) 727-6555

Founded: 1960 Standards Staff: 1

Type of Organization Trade Association
Standards Developer
Standards Development

Standards developer since 1960
35 member companies participating in standards activities
5 active standards
Draft standards available to VRCI members and applicable organizations

Standards Designation

VRCI and ANSI prefixes

Certification

No certification, qualification, or accreditation programs

Scope

An international trade association representing manufacturers and users of variable resistive devices such as precision potentiometers, trimmers, and panel potentiometers.

Standardization Activities

Has made significant contributions to the field of standardization and the improvement of quality of variable voltage or resistive devices used in consumer, industrial, and military type applications. Standards cover wirewound and non-wirewound precision, trimming, and industrial potentiometers, potentiometer mounted switches, and surface mount trimming potentiometers.

Availability

Distributed directly and through ANSI

WATER POLLUTION CONTROL FEDERATION

Quincalee Brown, Ph.D., CAE, Director

601 Wythe Street
Alexandria, Virginia 22314-1994
(703) 684-2400 Fax: (703) 684-2492

Founded: 1928

Type of Organization

Technical Professional Society
Works through other organizations to develop standards
Scope

Federation of 65 state, regional, and foreign associations and technical societies. Advances fundamental and practical knowledge of the water environment with emphasis on the technology, design, construction, operation, and management of water quality control systems and facilities. Seeks to: disseminate technical knowledge and information through publications and conferences; promote good public relations and sound regulations aimed toward proper water quality improvements; and improve the status of those working in this field.

Standardization Activities

In cooperation with the American Public Health Association and the American Water Works Association, produces Standard Methods for the Examination of Water and Wastewater. Develops and publishes education, training, design and operation and maintenance materials on: wastewater collection; wastewater treatment; sampling and testing; safety; hazardous waste; microbiology; disinfection; wetlands; air pollution; industrial wastes; financing; sludge processing and handling; regulations.

Keywords

environment; wastewater; pollution; water pollution; industrial wastes; hazardous wastes; air pollution; solid waste; safety;

WATER QUALITY ASSOCIATION

Joseph F. Harrison, P.E., Technical Director

4151 Naperville Road
Lisle, Illinois 60532
(708) 505-0160

Founded: 1948

Type of Organization

Trade Association
Standards Developer

Standards Designations

S-100
S-200

Certification

Certifies water softeners and filters complying with Association standards. Sponsors voluntary certification programs for water treatment specialists and water treatment equipment installers.

Scope

A trade association of water conditioning equipment manufacturers and suppliers to the water conditioning industry. Conducts a national public relations program, and serves as the industry's liaison with the public, private, and government sectors. Fosters the
further development of equipment, products, and services in the industry.

**Standardization Activities**

Developed two equipment standards, S-100 for Household, Commercial and Portable Exchange Water Softeners, and S-200 for Household and Commercial Water Filters. A testing program for both standards is conducted by an independent testing laboratory, and certification is made through the association following laboratory validation. These standards have national application, and the voluntary testing program is open to manufacturers of water softeners and water filters. In addition to intra-industry promotion of the use of the equipment validation program, the association uses its public relations channels to inform consumers of the integrity of certified equipment. S-100 and S-200 have been developed through consultation with the National Institute of Standards and Technology; U.S. Department of Commerce; Federal Housing Administration; and other government agencies, as well as quasi-public and private organizations concerned with equipment standards. The association is currently developing standards for reverse osmosis and chemical feeding equipment.

Chicago, Illinois 60605
(312) 922-6222

Founded: 1932

**Type of Organization**

Technical Society

**Standards Development**

6 active standards

**Scope**

Represents and serves leading manufacturers of domestic and farm water systems equipment.
Standardization Activities

Develops Testing and Rating Standards which are established in the public interest, and are designed to supply the purchaser and user of automatic, electric water systems with accurate performance data and to assist in the determination of proper application and selection of this equipment. The standards cover shallow well water system pumps; deep well water system pumps; deep well submersible pump motor standards; and hydropneumatic tank volume standards.

WEST COAST LUMBER INSPECTION BUREAU

Ray L. Todd, Executive Vice President

P.O. Box 23145
Portland, Oregon 97223
(503) 639-0651

Founded: 1911 Standards Staff: 2

Type of Organization

Trade Association
Standards Developer

Standards Development

Develops lumber grading rules
Drafts not available for review

Standards Designation

West Coast Lumber - Standard Grading Rules, No. 16

Certification

Provides official grade stamps to mark lumber conforming to West Coast Grading Rules.

Scope

An industry owned, nonprofit corporation that provides lumber quality control services at its approximate cost. Serves the area west of the summit region of the Cascade Mountains in the States of Washington and Oregon and the entire State of California. Services available to any producer, user, distributor, or dealer handling West Coast lumber products. Maintains uniform standards of lumber grading and manufacture, promotes the use of grade stamped lumber as an assurance to the buyer, seller, and consumer that the interests of each are fully protected, and assists in the efficient use of West Coast lumber products.
Standardization Activities

One of the three major rules writing agencies in the United States, in addition to the Western Wood Products Association and Southern Pine Inspection Bureau. Responsible for the principal part of all the quality control programs for softwood lumber production in the United States. Supervises or grades four and one-half to six billion feet of lumber per year, which is the bulk of all production west of the Cascades.

Bureau activities include the publication and distribution of West Coast Grading Rules, supervision of the grading manufacturing practices of subscriber plants, grade stamping of West Coast lumber with official Bureau stamps, certificate inspection of lumber shipments, reinspection of lumber in dispute at destination, and assistance to specification agencies, buyers and consumers of West Coast products. Participates in ASTM and Department of Commerce Voluntary Product Standard Programs.

WESTERN WOOD PRODUCTS ASSOCIATION

Howard A. Roberts, President

Yeon Building
522 SW Fifth Avenue
Portland, Oregon 97204-2122
(503) 224-3930

Founded: 1964 (predecessors early 1900)

Trade Association

Standards Developer

Type of Organization

Standards Development

Standards developer since early 1900's

Prepared under the umbrella of the National Institute of Standards and Technology Voluntary Product Standard PS 20-70 and the American Lumber Standards Committee.

Standards Designation

Western Lumber Grading Rules
Machine Stress-Rated Western Lumber C/QC Procedures 102.86
Glued Products C/QC Procedures 101.86
North American Export Standard for MSR Lumber
| **Government Adoption** | All building code writing and purchasing agencies (federal and state and local) accept lumber graded pursuant to WWPA grading rules. Additionally, WWPA rules are accepted worldwide. |
| **Certification** | WWPA and its Western Lumber Grading Rules are approved by the Board of Review of the American Lumber Standards Committee. WWPA provides member companies with grade stamps to mark lumber graded under Association rules and supervision. A symbol indicates that the piece is graded under WWPA rules and the provisions of NIST Voluntary Products Standard PS 20-70. |
| **Scope** | WWPA consists of member companies throughout the 12 contiguous Western states. WWPA maintains a lumber grade inspection bureau to assure grading standards on a uniform basis. WWPS provides promotion, advertising, technical, safety, export and statistical services; promotes forest conservation. |
| **Standardization Activities** | Writes rules for Western lumber that conform to the National Institute of Standards and Technology Voluntary Product Standard PS 20-70, American Softwood Lumber Standard. Also writes rules for machine stress-rated lumber and glued lumber products in accordance with PS 20-70. Supervises member company grading procedures and practices through periodic sampling inspections of company graded lumber. Actively involved in writing and reviewing standards approved by the American Society for Testing and Materials (ASTM) and CEN Standards (European Community for Standardization). |
| **Availability** | Sold directly |
| **Keywords** | wood products; lumber; grading rules; inspection; building; machine stress-rated; finger joint; |

**WIRE REINFORCEMENT INSTITUTE**

Milton R. Sees, President

(202) 857-1181

Founded: 1974

Type of Organization: Trade Association
Certification: Standards Developer

Certification
The Alliance maintains a certification program for wood heater performance and accredits laboratories to run tests according to Alliance standards.

Scope
A national trade association for the solid fuel (wood and coal) home heating industry. Members include manufacturers, distributors, retailers, laboratories, manufacturers representatives, and chimney sweeps. Represents members in government affairs, code and technical areas. Services include statistical reports, trade information, newsletters, and conferences.

Standardization Activities
Concentrates on standardizing methods to measure the heating performance of fireplaces, wood stoves, and fireplace inserts.

WOOD MACHINERY MANUFACTURERS OF AMERICA

Don White, Executive Vice President

1900 Arch Street
Philadelphia, Pennsylvania 19103
(215) 564-3484

Founded: 1899 Standards Staff: 1

Type of Organization: Trade Association
Secretariats: Standards Developer

Secretariats
American National Standards Committee 01
**Scope**

110 manufacturers of machinery and equipment used in the production of lumber, veneer, millwork, and other wood products, but not including hand portable tools and equipment. Serves the industry by providing a forum to address technical and business issues and improve markets for U.S. made machinery.

**Standardization Activities**

Develops standards that enhance the safety and operability of woodworking machinery. Current publications include the widely recognized Noise Test Code and the Cutting Tool Safety Guidelines. Resources have been applied through ANSI to develop and maintain the voluntary consensus standard Safety Requirements for Woodworking Machinery, ANSI 01.1, which defines standards for safe installation, operation, and maintenance of woodworking machinery and accessory equipment.

**WOOD MOULDING AND MILLWORK PRODUCERS**

Bernard J. Tomasko, Executive Vice President

P.O. Box 25278
1730 Southwest Skyline
Portland, Oregon 97225
(503) 292-9288

*Founded: 1963*

**Type of Organization**

Trade Association

**Standards Development**

7 active standards

**Standards Designation**

WM prefix

**Scope**

Manufacturers of wood moulding and millwork. Provides promotion, standardization, and marketing information services.

**Standardization Activities**

Standards are initiated through a standing committee and administered by the association staff. Available standards include the WM/Series Moulding Patterns catalog of accurate, full scale renderings of the most popular wood moulding profiles used nationwide. This may be used as a standard basis for
all U.S. moulding producers. Included in the current catalog are grading rules for standard mouldings and finger joint and priming standards.

Other available standards include: Industry Standard WM 1-79, Wood Interior Door Jambs and Frames; WM 2-82, Vinyl Wrapped Interior Moulding and Millwork Products standard; WM 3-79, Exterior Wood Door Frames; WM 4-85, Wood Moulding Requirements; WM 5-81, Standard Certified Non-Structural Laminated or Finger Jointed Wood; and WM 8-89, Industry Standard 20-Minute Fire-Rated Wood Door Frames.

**Availability**
Distributed directly and through members

**WOODWORK INSTITUTE OF CALIFORNIA**

Bernard B. Barber, Jr., Executive Secretary

P.O. Box 11428
1833 Broadway
Fresno, California 93773
(209) 233-9035 Fax: (209) 237-7304

Founded: 1951 Standards Staff: 5

**Type of Organization**
Trade Association

**Certification**
The W.I.C. has established a Certification Licensing Procedure available to firms in California and Nevada.

**Scope**
A statewide trade association in California and Nevada of independent and competing producers of millwork and allied products, the particular purpose of which is the development and dissemination of information relative to uses, advantages, and utility of wood products.

**Standardization Activities**
Standards have been developed for materials and methods of fabrication for all types of architectural woodwork in California by the Woodwork Institute since 1951. The standards are developed by a Technical Committee and approved by the Board of Directors. Standards designation is the Manual of Millwork, M/M. Several governmental agencies have adopted the Woodwork Institute's Standards.

3. FEDERAL GOVERNMENT

3.1 FEDERAL VOLUNTARY STANDARDS POLICY (OMB CIRCULAR A-119)

On October 26, 1982, the Office of Management and Budget (OMB) issued Circular A-119, entitled "Federal Participation in the Development and Use of Voluntary Standards." This establishes a policy for all federal executive branch agencies concerning the use of voluntary standards and participation of federal employees in their development. It sets forth "the policy of the federal government in its procurement and regulatory activities to rely on voluntary standards, both domestic and international, whenever feasible and consistent with law and regulation pursuant to law." Voluntary standards should be adopted and used by federal agencies "in the interests of greater economy and efficiency" and should be given preference over non-mandatory government standards unless use of such voluntary standards would adversely affect performance or cost, reduce competition, or have other significant disadvantages.

Participation by federal agency employees in voluntary standards activities is encouraged when it would be "in the public interest and is compatible with agencies missions, authorities, priorities, and budget resources." Such participation should be aimed at contributing to the development of voluntary standards that will eliminate the necessity for the development and maintenance of separate government standards.

The Circular requires the coordination of agency participation so that (1) the most effective use is made of agency resources and representatives, and (2) the views expressed by those representatives are in the public interest, and, at minimum, do not conflict with the interests and established views of the agencies. Agencies must establish procedures to ensure that their representatives who participate in voluntary standards activity "will, to the extent possible, ascertain the views of the agency on matters of paramount interest, and will, as a minimum, express views that are not inconsistent or in conflict with established agency views."

The Circular also requires that agencies responsible for developing Government standards review their existing standards at least every five years and cancel those for which adequate and appropriate voluntary standards can be substituted.

3.2 ROLE OF INTERAGENCY COMMITTEE ON STANDARDS POLICY

The Interagency Committee on Standards Policy was established in 1968 to encourage coordination and liaison among federal agencies on matters relating to standards. In response to the provisions of OMB Circular A-119, it is composed of policy-level representatives of the 13 federal cabinet departments, 12 independent federal agencies, and two offices in the Executive Office of the President, including the Office of Management and Budget. The National Institute of Standards and Technology provides the Chairman and the Secretariat.
The Committee meets at least once a year to establish new task groups of standards experts from agencies with specific interest in selected topics and to review work carried out by similar, previously established ad hoc groups. Recommendations are generally in the form of guideline documents and are transmitted to the Secretary of Commerce for distribution to the heads of agencies and departments represented on the Committee. They may also be published in the Federal Register. Typical task group assignments cover participation in international standardization activities, certification programs, and other standards-related activities.

3.3 FEDERAL GOVERNMENT ORGANIZATIONS

This section includes 77 entries for federal departments, agencies, and other organizational elements, most of which are standards developers. It should be noted that some federal standards are voluntary, though the majority are mandatory by reason of being referenced in legislation or regulations, or are invoked in contracts as a condition of sale to Government agencies. Many nongovernment standards are mandated in the same way.

Government organizations were asked to cite the means by which their standards are implemented or promulgated. Usually this is accomplished by incorporating the standards in applicable Parts of the Code of Federal Regulations (CFR). How the agency usually applies standards is summarized in the paragraph "Application." Authority for an agency's standardization activity is also included and is usually a citation of the United States Code (U.S.C.), a Public Law (P.L.), or a Part of the CFR. Most organizations have indicated the extent to which they adopt nongovernment standards and participate in government and private sector standards committees.

The following organizations are listed in this section:

P.O. Box 96456
Washington, DC 20250
(202) 447-5115 FAX: (202) 447-8477

Authority
Agricultural Marketing Service (AMS) carries out standardization activities under the Agricultural Marketing Act of 1946, the U.S. Cotton Standards Act of 1923, the Tobacco Inspection Act of 1935, the Federal Seed Act of 1939, and the Egg Products Inspection Act (EPIA).

Implementation
U.S. grade standards for food and farm products are contained in the Code of Federal Regulations, Section 7. Standards for cotton, linters, wool, tobacco, live animals, raisins, turpentine, fresh fruits and vegetables, processed fruits and vegetables, dairy products, meat, poultry, and poultry products are promulgated under 7 CFR, Part 26-209.

The purpose of the standards is to identify the degrees of quality in food and farm products and thereby aid in marketing by establishing the usability or value of these products.

The standards, in most cases, are for voluntary use by industry. There are 39 standards for cotton, Upland cotton, 7 for Pima cotton and 8 for linters; 13 standards for dairy products; over 150 standards for fresh fruits, vegetables, nuts, and specialty products; over 150 standards for processed fruits and vegetables, honey, and miscellaneous processed products; 7 standards for meat; 11 standards for live animals and wool; 7 standards for shell eggs; one standard for poultry and rabbits; and 15 standards for tobacco and naval stores. Within each standard, there are a number of levels of quality-grades- for the product.

AMS sets standards for agricultural and vegetable seed purity, germination, and variety certification. The standards are found in 7 CFR, Part 201.

Under the EPIA, AMS specifies the conditions under which egg products and "restricted eggs" are handled.

Application
Grading, inspection, or classing services, to certify the quality of products according to the U.S. grade standards, are provided by Department of Agriculture (USDA) to producers, packers, wholesalers or others, on
request, and usually for a fee to cover the cost of the service.

Egg products plants must operate under continuous inspection of USDA, and these plants must apply for the service, submit blueprints of their plant, complete any necessary remodeling and equipment installation, submit labels, and have their water supply approved. Egg products plants are those which manufacture liquid, frozen, or dried egg products.

Businesses that handle shell eggs must register with USDA. They must also destroy eggs that are in any way unsuitable for human consumption eggs. Dirty eggs and eggs with cracked shells but with the contents not leaking, must be shipped only to officially inspected egg products processing plants for proper segregation and processing.

In addition, AMS approves or disapproves for importation egg products from foreign countries.

AMS has cooperative agreements with each state to regulate interstate commerce for agricultural and vegetable seeds. Under these agreements, the States refer apparent violations of the Federal Seed Act interstate provisions to AMS for verification and appropriate action. In addition, AMS conducts a voluntary seed certification program.

| Qualification, Certification, or Calibration | Services to certify the quality of products according to the U.S. grade standards are provided for a fee to cover the cost of the service. The Tobacco Inspection Act provides for free and mandatory inspection of tobacco based on official grades, after a referendum in which two-thirds of the growers supplying an auction market vote approval. Tobacco may also be inspected on a voluntary, fee-for-service basis. |
| Committee Activity | AMS officials participate in committees of trade, technical, and academic organizations -- both national and international --related to AMS commodities and functions as appropriate. |
| Standardization Activities | Standardization specialists in each commodity area develop new U.S. grade standards and revise current standards as necessary to promote orderly marketing. Market surveys and other studies are conducted, and proposed standards and revisions are published for public comment before implementation. |
| Availability | Information on the AMS activities described here is available from the AMS, Information Staff, P.O. Box 96456, Room 3510-S, Washington, DC 20090-6456. |

DEPARTMENT OF AGRICULTURE

FEDERAL GRAIN INSPECTION SERVICE

Standards and Procedures Branch
Field Management Division
Room 1661-South
P.O.Box 96454
Washington, DC 20250
(202) 382-0252 FAX: (202) 447-4628

Authority

The Federal Grain Inspection Service (FGIS) carries out standardization activities under the U.S. Grain Standards Act (USGSA), as amended (P.L. 94-582) and under the Agricultural Marketing Act of 1946 (AMA), as amended.

Implementation

Standards for grains are promulgated under 7 CFR, Part 810. Standards for rice, dry beans, lentils, and dry peas are promulgated under 7 CFR, Part 68. Standards for hay and straw are promulgated under 7 CFR, Part 57.

Nineteen U.S. Standards are currently in effect. Use of the standards under the USGSA is mandatory for grain exports, except to Mexico and Canada, by land carriers. Inspections of grains moving in domestic commerce are voluntary. As provided by the AMA, all inspection services (including export) are voluntary on the part of the trade.

Application

The amended U.S. Grain Standards Act requires FGIS to provide: (1) mandatory inspection and weighing services at export ports by federal or delegated state agency personnel; and (2) permissive inspection and weighing services at domestic locations by designated state and private agency personnel. The USGSA also requires FGIS to supervise all official inspection and weighing activities whether performed by federal personnel. Further, on a request basis, federal personnel perform inspection of rice and related commodities under the AMA and provide nationwide appeal inspection services.

Qualification, Certification, or Calibration

The Standards and Procedures Branch within the Field Management Division develops and implements grain inspection procedures to assure uniformity and reliability.

The Research and Development and Quality Control
Branches, of the Quality Assurance and Research Division, conducts research to develop, evaluate, approve, and monitor new grain inspection methods and equipment.

The Division participates in the following standards related committees:
- FGIS Advisory Committee
- Codex Committee on Cereals, Pulses and Legumes
- International Organization for Standardization
- National Conference on Weights and Measures
- NC-151 Committee
- Rice Millers' Association -- Grades Committee
- American Dry Pea and Lentil Association -- Grades Committee
- National Dry Bean Council -- Grades Committee
- National Grain and Feed Dealers Association -- Grades Committee
- PNW Grain Standards and Quality Committee
- Grain Elevator and Processing Society -- Grades Committee
- National Alfalfa Hay Quality Committee
- Western Regional Coordinating Committee for Predicting Nutritive Value of Alfalfa Hay
- National Infrared Reflectance Project on Forages
- National Sunflower Association -- Grades Committee
- American Soybean Association -- Grades Committee
- American Farm Bureau Federation -- Wheat Advisory Committee
- North American Export Grain Association, Inc. -- Grades Committee
- National Hay Association -- Grades Committee

FGIS standardization activities aid orderly marketing of grain, oilseeds, rice, and related commodities. This is accomplished through the development, promulgation, and uniform application of new and revised U.S. standards for grain, oilseeds, rice, dry beans, dry peas, lentils, hay, straw, hops, and related processed commodities. Activities include establishment, review, and revision of U.S. Grain Standards to reflect the latest inspection techniques and marketing needs. The agency also evaluates instruments and equipment used in the inspection and weighing process to ensure accuracy. In addition, the agency maintains an international monitoring program which interacts with foreign governments and trade teams to exchange information and to respond to complaints concerning quality and quantity of grain shipments.

Copies of the standards are available through the Management Improvement and Information Programs Branch, Department of Agriculture (USDA), FGIS, Room 1626, South Building, 1400 Independence Avenue, SW,
Washington, DC 20250, telephone (202) 475-3428.

Office of the Administrator
331-E Administration Building
Washington, DC 20250
(202) 447-8217 FAX: (202) 472-4437

Authority

(1) 21 U.S.C. 601-695, March 4, 1907, the Federal Meat Inspection Act, as amended in 1967, to authorize the examination of animals and meat products used in interstate or foreign commerce, and inspection of slaughter and packing establishments.

(2) 21 U.S.C. 451-469, August 28, 1957, the Poultry Products Inspection Act, as amended in 1968, to provide for the compulsory inspection of poultry and poultry products at slaughter and processing plants.

(3) 7 U.S.C. 1901-1906, the Humane Slaughter Act, to require humane methods of slaughter in federally inspected plants.

Implementation

9 CFR, III-A and C, Parts 301-335 and 381, Mandatory Meat Inspection and Mandatory Poultry Products Inspection.

Application

Mandatory continuous on-site inspection of domestic meat and poultry. Periodic reviews of foreign country inspection systems eligible to export meat and poultry to the United States.

Qualification, Certification, or Calibration

Standards have been developed to cover the ingredients, methods of processing, and labeling of meat and poultry products; the materials and design of plant facilities and equipment; inspection methods; and chemical compounds permitted in the formulation, packaging or processing of meat and poultry products.

In FY 1988, 154,570 labels were approved; 3,783 plant blueprints were reviewed; 3,861 equipment drawings were reviewed; 11,051 packaging materials and compounds were reviewed; and the inspection systems of 29 countries that export products to the United States were reviewed.

555
Committee Activity
Standards are developed by appropriate staffs within the program in consultation with the National Meat and Poultry Inspection Advisory Committee.

Standardization Activities
The Food Safety and Inspection Service (FSIS), Department of Agriculture (USDA), administers a comprehensive inspection system to assure that meat and poultry is safe, wholesome, and accurately labeled. Inspection begins with review of a slaughtering or processing plant's plans for facilities, equipment, and procedures to assure that the plant will have a safe and sanitary operation. Animals are inspected both before and after slaughter. Veterinary supervisors monitor the procedures and work with the inspectors to assure uniformity in the inspection process and to provide expertise in detecting animal diseases. Inspection also includes examination for drug and chemical residues, and inspectors regularly take tissue samples from slaughtered animals and send them to FSIS laboratories. FSIS reviews the procedures, recipes, and labels used to manufacture processed meat and poultry products to assure they will be safe to eat and accurately labeled.

More than 7,600 inspectors and veterinarians oversee inspection in 6,910 plants nationwide. Scientific testing to support the inspection program is carried out in three field laboratories, augmented by certified state and private laboratories. FSIS compliance officers make over 56,000 reviews annually of approximately 10,000 meat and poultry product handlers. FSIS regularly reviews the inspection systems operated by foreign countries to ensure they enforce requirements at least equal to those of the U.S. system. Imported products are re-inspected on a sample basis at the port-of-entry.

556
Authority

Implementation

Committee Activity

The Foreign Agricultural Service (FAS), Department of Agriculture (USDA), Technical Office participates in two intra-agricultural committees, the National Agricultural Pesticide Impact Assessment Program (NAPIAP), which is a policy committee, and Technical Advisory Group (TAG), which is an advisory committee to NAPIAP. In addition, the Technical Office is represented on the inter-governmental agency Trade Policy Staff Committee (TPSC) — Subcommittee on Standards. The Technical Office is also involved with two non-governmental committees, the National Agricultural Chemicals Association (NACA) — International Committee and the Association of Official Analytical Chemists (AOAC) Committee on Laboratory Accreditation.

Standardization Activities

Participated in the development of the General Agreement on Tariffs and Trade (GATT) Agreement on Technical Barriers to Trade (Standards Code) and currently participates in twice-yearly Standards Code meetings in Geneva. Receives, through the GATT Secretariat and U.S. diplomatic posts in foreign capitals, notifications of proposed foreign mandatory standards and their requirements concerning agricultural products. Publishes proposed standards in Export Briefs (a weekly trade paper published by FAS) and also notifies them in Agnet (a computerized agricultural reporting system of the University of Nebraska). Comments, when appropriate, are sent to other governments or signatories to the Code on their proposed mandatory standards and related tests or certification systems, when their proposals are seen as potential barriers to trade. Assists in representations to foreign governments on standards-related trade policy activities. Provides information to U.S. exporters on existing standards in foreign countries. Provides advice to state and local governments on foreign trade aspects of their activities.

In accordance with provisions of the Trade Agreements Acts, nineteen committees have been established: ten Agricultural Policy Advisory Committees, and nine Agricultural Technical Advisory Committees for Trade. These committees address trade issues in the areas of cotton, diary, fruits and vegetables, grain and feed,
livestock and products, oilseeds and products, poultry and eggs, sweeteners and tropical products, and tobacco and provide advice to Secretary of Agriculture and U.S. Trade Representative on standards-related trade policy activities of the United States.

DEPARTMENT OF AGRICULTURE

FOREST SERVICE

Engineering Staff
3rd floor CEN, Auditors Building
201 14th Street, SW
Washington, DC 20250
(703) 453-9400  FAX: (202) 447-3610

Implementation
The United States Department of Agriculture Forest Service (USDA/FS) prepares standards for internal use; it does not promulgate standards for general use and prefers to reference existing voluntary standards.

Application
Application is usually decided by the sponsoring organization. For example, USDA/FS technical input on the strength of wood members was used by ladder manufacturers and was published by the American National Standards Institute and the National Safety Council. OSHA and CPSC adopt all or parts of these standards.

Committee Activity
USDA/FS technical experts participate in organizations including: ALSC, ASTM, AASHTO, ANSI, NFPA, HUD ( FHA), FmHA, etc. They participate as technical authorities and represent the general interest category rather than producer or user.

Standardization Activities
USDA/FS technical experts participate in standards activities as individuals, and occasionally, when required, pay membership dues themselves.

Availability
Standards are obtainable through the sponsoring organization (e.g., ASTM, ANSI).

INFORMATION RESOURCES MANAGEMENT

Planning, Review, and Standards Division
Room 447-W Administration Building
Washington, DC 20250-7600
(202) 447-6275  FAX: (202) 382-1031

Authority

PL 89-306 and resulting Federal Information Processing Standards (FIPS PUBS); PL 93-579; PL 96-511; Federal Property and Administrative Services Act of 1949, companion letter of August 14, 1972 from the Administrator of GSA delegating federal telecommunications standards development responsibilities to the Executive Agent of the National Communications System and recently confirmed and amplified by Executive Order 12472.

Implementation

The Office of Information Resources Management (OIRM) is responsible in USDA for standards that cover information processing management and operations for office automation, data processing, data administration and telecommunications environments, related data and security. The specifications are promulgated in the Departmental Directives System, in regulations, and in the Departmental standards and mandatory procedures which must be followed. Voluntary federal and Departmental procedures and guidelines are to be used unless an alternative specification is superior.

Application

The specifications are used in acquisition documents to control products and services brought into the Department's inventory. They apply to all information processing units, resources, and activities in USDA.

Adoption

The majority of the Departmental standards are incorporated from those specified in the FIPS PUBS of the National Institute of Standards and Technology (NIST). A few are from other standards bodies such as the American National Standards Institute (ANSI).

Qualification, Certification, or Calibration

Certification is required of computer software pursuant to the requirements of Office of Management and Budget Circular A-71. Certification is required of all sensitive systems. Conformance of products to FIPS PUBS is tested in accordance with tests or procedures developed by NIST or OIRM.

Committee Activity

OIRM participates in standardization activities (committees, user workshops, etc.) of the National Institute of Standards and Technology, the United Nations, and the National Communication System.
Standardization
Activities
OIRM coordinates the review of draft FIPS PUBS by Agriculture agencies, consolidates comments and works with NIST to ensure that standards meet the Department's requirements. New specifications are adopted automatically if they are federal standards and after review if they are procedures or guidelines. OIRM lends assistance to the agencies in developing interim standards to address areas where no formal federal standard exists.

DEPARTMENT OF AGRICULTURE

PACKERS AND STOCKYARDS ADMINISTRATION

Livestock Marketing Division
Scales and Weighing Branch
Room 3414, South Agriculture Building
Washington, DC 20250
(202) 447-3140

Authority

Implementation
Subject livestock dealers, market agencies, stockyards, meat packers and poultry dealers are required by regulations promulgated under the authority of the Packsers and Stockyards Act to install, maintain, and use scales which conform to the specifications, tolerances, and other technical requirements set out in NIST Handbook 44.

Application
The Packers and Stockyards Administration monitors the selection, installation, maintenance, testing and use of livestock, monorail, and vehicle scales operated by subject firms to assure that such devices conform to NIST Handbook 44 requirements. The Agency also participates in the testing of such devices when newly installed and in connection with training and investigative activities.

Adoption of Nongovernment Standards
None

Qualification Certification or Calibration
Scale testing agencies must be competent and must use properly calibrated test weights in sufficient amounts to properly test scales in accordance with requirements set out in NIST Handbook 44.
The Packers and Stockyards Administration has a participating membership on the Technical Committee on National Type Evaluation, Weighing Industry Sector, of the National Conference on Weights and Measures.

The Packers and Stockyards Administration is an active participant in the National Training Program of the National Conference on Weights and Measures. In that capacity the agency participates in the development of test procedures and instructional material and furnishes instructors to provide training and certification under the National Training Program.

NIST Handbook 44 is available from the Government Printing Office. Testing and weighing procedure memorandums are available from the Packers and Stockyards Administration.

DEPARTMENT OF AGRICULTURE

RURAL ELECTRIFICATION ADMINISTRATION

Room 4051 South Building
Washington, DC 20250
(202) 382-9540

Authority

Implementation

Through printed bulletins and lists of Rural Electrification Administration (REA) accepted materials and equipment.

Application

Electric and Telecommunications Staff Divisions work with area offices to maintain and make available to borrowers construction, maintenance, and operating standards and lists of materials accepted as meeting those standards.

Adopted of Nongovernment Standards

REA incorporates new and revised nongovernment standards into REA's lists.

Qualification, Certification, or Calibration

Borrowers must submit work plans to REA defining the proposed construction. REA does not become directly involved in bidding and letting contracts to manufacturers, but borrowers have the responsibility of using those on approved list.

Committee Activity

REA sits on appropriate committees with IEEE, ANSI, and others with activities which relate directly to electric and telecommunications borrowers.
### Standardization Activities

REA has issued 385 Bulletins detailing requirements for organizing, financing, designing, constructing, and operating electric generation and distribution systems and telephone facilities. Nearly half of these define technical requirements for equipment, materials, design, testing, safety, and maintenance. The remainder include lists of acceptable materials as well as standards for financial and statistical reports, loan agreements, model contracts and related business matters.

Standards and specifications of national standardizing organizations are utilized to the maximum practicable extent. Where they are not adequate or where they do not exist, REA prepares standards and specifications to be used by its borrowers which construct and operate rural electric and telephone systems. Standards and specifications are also prepared where it appears that such specifications and standards will result in reduced costs, improved materials and equipment, or the more effective use of engineering services. Standards and guides are also prepared which relate to the management and operation of rural electric and telephone systems.

REA standards are utilized by 2,000 rural electric and telephone systems to which loans have been made in 47 states, The Virgin Islands, Guam, Puerto Rico, Saipan, Tinian, and Rota. The standards are also utilized by other organizations in this country and abroad.

### Availability

Information on REA standards and copies of most standards are available upon request to the Rural Electrification Administration, U.S. Department of Agriculture (USDA), Washington, DC 20250. Several REA publications which include specifications, standard construction drawings and contract forms are available from the U.S. Government Printing Office.

### DEPARTMENT OF COMMERCE

**FEDERAL COORDINATOR FOR METEOROLOGY**

6010 Executive Blvd., Room 900
Rockville, Maryland 20852
(301) 443-8704

### Authority

(1) Section 304 of the Department of Commerce (DOC) Appropriation Act of 1963.

(2) OMB Circular A-62 dated November 13, 1963 which outlines policies and procedures for the coordination of federal meteorological services.

(3) Comptroller General Report to the Congress of the United States dated October 16, 1979, states, "The Federal Weather Program must have stronger central direction."

### Implementation

Meteorological program standards and guidelines are developed within the federal interdepartmental committee structure for meteorological services and supporting research. The guidelines, standards and plans are approved by the Interdepartmental Committee for Meteorological Services and Supporting Research (ICMSSR) for implementation by agencies.

### Application

The plans, standards, and guidelines are implemented through procurement specifications, approved inter-agency plans and procedures, and through cooperative adoption.
### Adoption of Nongovernment Standards

Extensive use is made of general standards and guidelines provided by NIST (Federal Information Processing Standards), DoD, ANSI, ISO, World Meteorological Organization (WMO). They are refined to meet the special needs for meteorological operations, services, and supporting research.

### Committee Activity

The ICMSSR and its subsidiary interagency committees and groups are the developers and approvers of meteorological program plans, standards and guidelines. Members of these groups and of the Office of the Federal Coordinator for Meteorology maintain liaison directly and indirectly with other federal and non-federal standards bodies, including international organizations, such as WMO.

### Availability

Office of the Federal Coordinator for Meteorology.

### Keywords

weather; meteorology; instrumentation; satellites; aviation; space environment; communications; weather reconnaissance; weather radar; solar-terrestrial; data processing;

### DEPARTMENT OF COMMERCE

### INTERNATIONAL TRADE ADMINISTRATION

Office of Multilateral Affairs/GATT Affairs Division 14th Street and Constitution Avenue, NW, Room 2062 Washington, DC 20230 (202) 377-1810 FAX: (202) 377-5939

### Authority

Title IV of the Trade Agreements Acts of 1979 (P.L. 96-39), the U.S. legislation which implements the GATT Agreement on Technical Barriers to Trade (Standards Code) for the United States and establishes rules for federal agencies engaged in standards-related activities.

### Implementation

The Standards Code is implemented in the United States by the Interagency Trade Policy Staff Committee, Subcommittee on Standards. Within the Department of Commerce (DOC), International Trade Administration (ITA) shares responsibility with the National Institute of Standards and Technology (NIST) for Standards Code implementation. ITA is primarily responsible for standards trade policy matters while NIST has the lead in Code-related technical and informational activities.

### Application

Commerce application of Title IV has centered on three areas: 1) publicity of the Code's rights and benefits to U.S. exporters, particularly of the Code's technical
information network and notification/comment provisions; 2) raising standards-related trading problems of U.S. business in bilateral negotiations with key trading partners under Code auspices; and 3) representing U.S. industry's interests in GATT Standards Code Committee deliberations.

Committee Activity

Represents the Commerce Department in the following committees: Committee on Technical Barriers to Trade of the General Agreement on Tariffs and Trade (GATT); the U.S. Trade Policy Staff Committee, Subcommittee on Standards; and the U.S. Industry Functional Advisory Committee (IFAC) on Standards Trade Policy Matters.

Availability

Information to assist U.S. companies in taking advantage of the benefits of the GATT Standards Code is available from the GATT Affairs Division.

Keywords

GATT; Standards Code; technical barriers to trade; non-tariff barriers; trade; business; general;

DEPARTMENT OF COMMERCE

NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY

National Computer Systems Laboratory (NCSL) Program Coordination and Support, Bldg. 225, B151 Gaithersburg, Maryland 20899 (301) 975-2833 FAX: (202) 975-2128

Authority

Implementation

The National Computer Systems Laboratory (NCSL) of the National Institute of Standards and Technology performs computer and related telecommunications research, develops standards and guidelines for computer systems, and provides technical assistance and advisory services to federal government agencies.

Application

NCSL's research and standards activities advance the efficient use of computer technology and support the development of off-the-shelf, commercial products for computer system users. The Computer Security Act specifies NCSL's role in protecting sensitive information that is processed in federal computer systems, and designates NCSL as the lead agency for standards, guidelines, and technology for the security of unclassified, sensitive information throughout the federal government.
| Committee Activity | NCSL supports national and international voluntary standards-developing organizations, and broad-based industry and user consortia that complement the voluntary standards process. NCSL staff members participate in technical committees of organizations accredited by the American National Standards Institute, and other groups to foster the development of standards that will meet federal government requirements for applications portability, for the interoperability of hardware, software and communications systems, for the exchange of information between systems, and for the protection of information from threats of all kinds. |
|---------------------| Standards and guidelines that are developed through government/industry cooperative efforts are issued as Federal Information Processing Standards Publications (FIPS PUBS) to help federal agencies buy off-the-shelf commercial equipment and systems, and to follow accepted good practices in managing information resources. Major areas of focus include: Open systems interconnection (OSI); user interfaces to operating systems, graphics systems, and database management systems; information security; information exchange formats; computer storage media; programming languages; document and image exchange. FIPS PUBS include standards, guidelines, and program information documents for hardware, software, data, and computer systems operations. FIPS PUBS are listed in NIST Publications List 58 which is available from NCSL, National Computer Systems Laboratory, Rm. B64, Gaithersburg, Maryland 20899, telephone: (301) 975-3587. |
| Availability        | FIPS are available from the National Technical Information Service, (NTIS) 5285 Port Royal Road, Springfield, Virginia 22161, telephone: (703) 487-4650 |

DEPARTMENT OF COMMERCE

NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY

National Engineering Laboratory
Law Enforcement Standards Laboratory, Bldg. 224, B116
Gaithersburg, Maryland 20899
(301) 975-2757  FAX: (301) 948-7434
Authority

(1) Title 1, Section 402(b) of the Omnibus Crime Control and Safe Streets Act of 1968, P.L. 90-351
(2) 42 U.S.C. 3701, Justice System Improvement Act of 1979, P.L. 96-157

Implementation

The Law Enforcement Standards Laboratory (LESL) develops standards for the U.S. Department of Justice, National Institute of Justice (NIJ), and the National Highway Traffic Safety Administration (NHTSA).

The standards developed by LESL are performance oriented insofar as possible. They are not consensus standards but are subjected to extensive technical and editorial review within NIST, as well as other government agencies, manufacturers, users, and independent experts. The standards are given a final review by the sponsor (NIJ or NHTSA) and promulgated by them.

The NIJ has elected to publish all LESL-developed standards as voluntary national standards. Law enforcement agencies are encouraged to use the NIJ standards to achieve cost-effective procurement of equipment through competitive bid. In recent years, under a separate NIJ grant, Aspen Systems Corporation has operated a limited equipment testing program through the Technology Assessment Program Information Center (TAPIC). The TAPIC contracts with two independent testing laboratories to conduct tests of equipment in accordance with NIJ standards. Complete test results are then published by TAPIC in a consumer information report series to assist state and local law enforcement agencies in selecting equipment that is suitable for their needs. Test reports published to date include police body armor, hand-held personal/portable transceivers, handcuffs, riot and crash helmets, narcotic test kits, batteries for hand-held transceivers, 12-Gauge shotguns, 9 mm and 45 caliber revolvers, vehicle tracking devices, body-worn transmitters, and an annual report of police vehicle test results. Subsequent to publication of the initial test report, manufacturers may have their equipment tested to the NIJ standard by either of the two independent testing laboratories, and TAPIC will issue supplemental data sheets for the new products and retest.

In addition to the TAPIC testing program, certain manufacturers choose to use the NIJ standards as the benchmark for product design and certify compliance to the NIJ standards in their equipment specifications.
Prior to 1983, the NHTSA mandated the use of LESL-developed standards for state and local government procurement of evidential breath testers. Commercial products were tested by the U.S. Department of Transportation Systems Center in accordance with LESL-developed standards, and those devices which passed were placed on the NHTSA qualified products list. In 1983, the LESL-developed standard for speed measuring radar devices was issued by NHTSA as a voluntary model equipment specification. In 1983, the International Association of Chiefs of Police undertook testing of speed measuring radar devices in the same manner as the NIJ equipment testing program and issued a consumer report on the results of those tests. It is anticipated that all future LESL-developed standards for breath alcohol instruments will be promulgated by NHTSA as voluntary model equipment specifications for use by state and local governments, and not mandated as in the past.

The standards that are developed by LESL are scheduled consistent with the priorities of the other-agency sponsors and available funds from those agencies. To ensure that the LESL program is relevant to the needs of the law enforcement community, the NIJ has established, through TAPIC, an advisory council that reviews LESL program plans and recommends research and equipment testing priorities, including the mission of NHTSA.

The standards that are developed by LESL are based upon laboratory evaluation of commercially-available products to devise precise test methods that can be universally applied by any qualified testing laboratories, and to establish minimum performance requirements for each attribute of an item of equipment that is essential to the manner in which it functions. The LESL-developed standards can serve as design criteria for the manufacturers or as the basis for equipment evaluation. The application of the standards, which are highly technical in nature, is augmented through the publication of technical reports and user guides. Individual jurisdictions may use the standards in their own laboratories to test equipment, have equipment tested on their behalf using the standards, or cite the standards in procurement specifications.

To the extent possible, LESL utilizes pre-existing industrial and trade association standards during the development of standards for NIJ and NHTSA, which may be directly cited or adapted to specialized testing methods in the final standard. Nongovernment standards utilized in the LESL program include those of the American Society for Testing and Materials, the
American National Standards Institute, the Institute of Electrical and Electronics Engineers, Electronic Industries Association, and the Society of Automotive Engineers, among others as appropriate.

In those instances when NIJ and NHTSA sponsor the testing of specific items of equipment, LESL assists in the preparation of the request for proposal from testing laboratories and the evaluation of the resulting bids to tentatively select two independent testing laboratories for each item of equipment. Following the award of the two contracts, LESL, TAPIC/IACP, and members of the National Institute of Standards and Technology (NIST) National Voluntary Laboratory Accreditation Program visit the laboratories for an on-site facility investigation and witness the complete testing of one item of equipment.

When the inspection team is satisfied that the laboratory personnel are proficient in testing to the LESL-developed standards, that all test equipment is properly calibrated, maintained and operated, and that appropriate test records are maintained, the TAPIC/IACP classifies the laboratory as a TAPIC/IACP-certified laboratory for that item of equipment. The laboratory is then allowed to proceed with the main-quantity testing. In the event that a laboratory does not demonstrate appropriate testing proficiency or lacks essential facilities during the on-site inspection, the contract is terminated and another laboratory is selected for the testing program. In those instances when the private sector, state and local government agencies wish to apply the LESL-developed standards in their own laboratories, LESL remains available for consultation on the application of the standards. However, certification or accreditation is not provided.

The LESL participates in pertinent committees of the American National Standards Institute, the American Society for Testing and Materials, Electronic Industries Association, and the Institute of Electrical and Electronics Engineers.

The LESL program includes research in the broad range of equipment that is used by the entire law enforcement community. The NHTSA-sponsored activities are limited to speed measuring devices (radar and vascar).

The NIJ-sponsored activities are part of an overall Technology Assessment Program that includes both the development of standards and other documents and the actual testing of equipment and publication of the test results. The Communication Systems Program has
resulted in the development of standards for nearly all items of such systems -- transceivers, base stations, control heads, digital transmission systems, and tracking devices, to mention a few. The Security Systems Program has developed standards for all components of intrusion alarm systems, and standards for the physical security of door and window assemblies. The Weapons and Protective Equipment Program has developed standards for revolvers and automatic pistols, body armor, protective helmets, and tear gas devices. The Investigative Aids Program has developed standards for weapons and explosives detectors, arson accelerant detectors, and narcotic test kits. Other studies have centered on emergency vehicle warning systems and police clothing.

In addition, LESL has developed reference collections for use by forensic laboratories of automobile paints and synthetic fibers, and standard reference materials (refractive index glass and refractive index silicone liquids).

The LESL provides a complete publication list of documents available from the program upon request. This list is updated periodically as new documents are published. For the past several years, new documents have become available at an average of 10 documents per year, which is expected to continue for the next several years.

**DEPARTMENT OF COMMERCE**

**NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY**

Technology Services
Gaithersburg, Maryland  20899
(301) 975-4500  FAX: (202) 975-2183

**Authority**
| Implementation | Voluntary Product Standards are developed under Department of Commerce (DOC) procedures (15 CFR, Part 10) for softwood lumber (PS 20-70), construction and industrial plywood (PS 1-83), and carbonated soft drink bottles (PS 73-89). |
| Application | Voluntary Product Standards are voluntarily used by manufacturers, distributors, purchasers, specifiers, and others in producing, marketing, and specifying products. Voluntary Product Standards are very often adopted as American National Standards (ANS) after being processed under the procedures of the American National Standards Institute (ANSI). Some Voluntary Product Standards are referenced in local and state building codes and are used in product certification programs. |
| Qualification, Certification, or Calibration | The National Voluntary Laboratory Accreditation Program (NVLAP), associated with the office, provides a voluntary mechanism for evaluating and recognizing the technical expertise and ability of private testing laboratories to perform specific nationally recognized tests for selected product areas or testing. Laboratories must meet minimum requirements for equipment, personnel, and quality control to be accredited under this program. |
| Committee Activity | Technology Services coordinates and monitors the National Institute of Standards and Technology (NIST) activities in standards committees. NIST staff members hold more than 1,250 memberships on 844 standards committees of some 81 organizations (national as well as international) involved in standards activities. During 1988, 521 trips were taken to domestic standards committee meetings and 124 foreign trips were made. The Institute's staff participate in many standards programs as part of its responsibilities for maintaining and advancing national standards of measurement. |
| Standardization Activities | Technology Services monitors the Institute's total involvement in private sector standards activities. The Office is the focal point for coordinating standards activities throughout the Department of Commerce, and assists other agencies in implementing federal standards policy as enunciated in OMB Circular A-119. It operates the Interagency Committee on Standards Policy and uses that committee to implement the provisions of Circular A-119 in a uniform and effective manner throughout all federal executive branch agencies. Technology Services also serves as the principal point of contact between the federal government and the... |
voluntary standards community. Institute staff persons serve on the boards and councils of many voluntary standards organizations, including ANSI, ASTM, ASHRAE, CBEMA, IEEE, NFPA, and UL, and thereby have the opportunity to influence national standards policy.

There are four major standards-related programs at NIST:

- The National Voluntary Laboratory Accreditation Program provides a mechanism for nationally recognizing the competency of U.S. testing laboratories in evaluating selected products for conformance with specific standards. This program also represents U.S. interests in the International Laboratory Accreditation Conference (ILAC) and provides the basis for bilateral agreements with other countries for acceptance of test data produced in U.S. laboratories.

- The Office of Weights and Measures develops recommendations for performance and test requirements for weighing and measuring devices used commercially and develops test methods to be used in evaluating these devices. This office sponsors the National Conference on Weights and Measures (a national organization made up of federal, state, and local weights and measures officials and appropriate industry representatives), which promotes uniformity in weights and measures programs through the adoption of model laws, regulations, specifications, and tolerances for weights and measures.

- The Standards Management Program manages the U.S. participation in the International Organization for Legal Metrology (OIML), an intergovernmental body concerned with the harmonization of national legal requirements pertaining to measurements in commerce, industry, and public health. This program is responsible for administering the Department of Commerce Voluntary Product Standards Procedures (15 CFR Part 10). Three standards are maintained under these procedures: PS 1-83, Construction and Industrial Plywood; PS 20-70, American Softwood Lumber Standard; and PS 73-89, Glass Bottles for Carbonated Soft Drinks.

- The Standards Code and Information Program is responsible for providing information on 1) U.S. voluntary standards, 2) government regulations and specifications, 3) U.S. certification programs, 4) foreign and international standards, and 5) proposed foreign regulations relating to standards and certification programs. The program operates the
National Center for Standards and Certification Information (NCSCI) (See Sources of Standards and Information); serves as the U.S. "inquiry point" for information on proposed regulations which might significantly affect trade, as sent to and received from the Secretariat of the General Agreement on Tariffs and Trade (GATT), thus complying with the GATT Agreement on Technical Barriers to Trade, the "Standards Code;" and conducts technical office activities for non-agricultural products as required by the U.S. Trade Agreements Act of 1979. Under this program, NIST provides technical standards-related support for the International Trade Administration (Department of Commerce) and other federal agencies engaged in policy-making and negotiations with other governments.

The standardization activities of all NIST units are summarized in a NIST report, issued annually. This publication provides statistical as well as narrative information about the participation of NIST staff in standardization activities.

Availability

Voluntary Product Standards are available from the National Technical Information Service and/or the Government Printing Office.

DEPARTMENT OF COMMERCE

NATIONAL MARINE FISHERIES SERVICE

Office of Trade and Industry Services
1335 East-West Highway, Room 6490 MOB
Silver Spring, Maryland 20910
(301) 427-2351

Authority

(2) 16 U.S.C. 742e, Fish and Wildlife Act of 1956, to promote fair trade standards.
Implementation

23 voluntary standards are codified as regulations in 50 CFR, Parts 261-266. They establish U.S. Standards for Grades for fish and fishery products.

Application

Inspectors certify, at the request of the seafood processor, that the product meets the criteria established in these standards. The inspection is conducted at the processing facility.

Adoption of Nongovernment Standards

No nongovernment standards have been adopted.

Qualification, Certification, or Calibration

To be eligible to use the official Department of Commerce (DOC) grade or identification marks as specified in 50 CFR Part 260.86, the processor must participate in the voluntary National Seafood Inspection Program. The marks may appear on the product label and/or the certificate. The processor pays for participation in the Program. Seafood processors that do not participate in the Program may use the U.S. Standards for Grades as guidelines but must not display the official marks.

Committee Activity

The following committees of the Codex Alimentarius Commission:
-Committee on Fish and Fishery Products
-Committee on Food Hygiene
-Committee on Food Labeling
-Committee on Pesticide Residues
-Committee on Methods of Analysis and Sampling
-Committee on Residues of Veterinary Drugs in foods

Standardization Activities

The National Marine Fisheries Service (NMFS) is actively involved in the preparation of U.S. Standards for Grades for seafood products which establish the criteria for the measure of quality of those seafood products (U.S. Grade A, B, and C). The standards currently pertain to various fresh and frozen seafood products. These standards, the use of which is voluntary, are prepared at the request of the seafood processing industry and are available to all interested parties in this country and abroad.

This agency's participation on the various committees of the Codex Alimentarius Commission, specifically the Committee on Fish and Fishery Products, is critical to ensure that the recommended international standards which establish a minimum standard of quality are...
reflective of this country's commercial practices.

This agency also is responsible for preparing specifications for seafood purchased for USDA's various feeding programs (school children, elderly, needy, American Indians).

**Availability**

National Seafood Inspection Laboratory, National Marine Fisheries Service, P.O. Drawer 1207, Pascagoula, Mississippi 39567-0112.

**DEPARTMENT OF COMMERCE**

**NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION**

National Environmental Satellite, Data, and Information Service (NESDIS)

Data Collection and Direct Broadcast Branch

E/SP21, Room 806 World Weather Building

Washington, DC 20233

(301) 763-8325

**Authority**

15 U.S.C. 3.3, 49 U.S.C. 1483 provides the Secretary of Commerce with the authority to develop an international basic meteorological network.

**Implementation**

Regulations on the administration and operation of a Geostationary Orbiting Environmental Satellite Data Collection System (GOES-DCS) is codified at 15 CFR, Part 911.

**Application**

The National Oceanic and Atmospheric Administration (NOAA) GOES Data Collection System utilizes geostationary satellites to collect environmental data from remote locations. Standards on UHF transmitters and related equipment are established to ensure system integrity.

**Qualification, Certification, or Calibration**

Manufacturers submit plans for in-plant testing of Data Collection Platform Radio Sets. If the plans are approved, a NOAA representative visits the manufacturer's testing facility and witnesses the tests. If a representative unit meets all of the established standards a type certificate is issued to the manufacturer.

**Committee Activity**

National Environmental Satellite, Data, and Information Service (NESDIS) participates in the Coordinating Group for Geostationary Meteorological Satellites (CGMS) to
establish compatible standards for international use. CGMS is sponsored by the World Meteorological Organization (WMO).

**Standardization Activities**

Periodic meetings with industry are conducted to review the adequacy and applicability of the standards. Revisions to the existing standards are proposed in response to: technological developments; cost effectiveness considerations; operational difficulties observed within the GOES-DCS; and the need to clarify and improve measurement techniques.

**Availability**

Four standards for self-timed, random reporting, international and interrogated Data Collection Platform Radio Sets are available from: Chief, Data Collection and Direct Broadcast Branch (E/SP21), NOAA/NESDIS, Washington, DC 20233

**Keywords**

satellites; environment; electronic equipment; data processing; aerospace;

**DEPARTMENT OF COMMERCE**

**NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION**

National Weather Service
Test and Evaluation Division
Route 1, Box 105
8060 13th Street
Sterling, Virginia 22170
(703) 471-5302

**Authority**

(1) 15 U.S.C. 311 and 313, the original acts establishing the United States Weather Bureau. (2) 49 U.S.C. 1463 and Title 8, Section 803, of the Federal Aviation Act of 1958.

**Implementation**

Standards for producing weather information are included in the series of federal meteorological handbooks, federal specifications for meteorological equipment, and operational directives from the National Weather Service.

**Application**

Observers are certified by examination and experience and observatories are certified by periodic on-site inspection. Standards for federal specifications are applied by the purchase orders for the equipment, and Operational Directives are applied by on-site inspection of the affected installation.

**Adoption of Nongovernment Standards**

Excluding those that are produced by intergovernmental agreement within the United Nations, nongovernment generated standards are relatively rare within the
Qualification, Certification, or Calibration Committee Activity

Meteorological observatories are certified if they conform to the performance standards detailed in federal meteorological handbooks, and National Weather Service operational directives.

Committee Activity

Standardization Activities

The development of standard methods for producing meteorological observations and measurements and the development and use of standard test methods for meteorological equipment is being actively pursued by the National Weather Service. Most standards are those produced within the government and contained within the federal meteorological handbooks and by cooperation with other governments as published by the World Meteorological Organization in its guide to good practice. Nongovernment voluntary standards development organizations such as the American Society for Testing and Materials have been encouraged to develop standards for use in the field of meteorology but to date very few such standards exist.

Availability

The federal meteorological handbooks are sold by the Government Printing Office. Federal specifications for equipment and testing are available through the GSA Specification Unit.

Voluntary adoption

ANSI Z39

Two projects are underway:

1. A study to develop standards for the form and format
of patent applications to facilitate data conversion to machine-readable form. The proposed standards will cover all elements of an application from bibliographic data and text to the specification for drawings and tabular information, and will specify form and formats conducive to optical character recognition processing of the application.

The standards will permit easy data reduction of thousands of patent applications for automated processing in the Patent and Trademark Office.

2. Development of a proposal for data base and data access standards for chemical structures and related expressions. Standards will cover data base content as well as procedures for expressing chemical compound structures, classifications, indexing, and other search and retrieval standards necessary.

These standards will increase data base scope and facilitate database exchange. They will also make possible joint system and database development with public and private developers of technological databases.

Implementation

Subcommittee H of American National Standards Committee Z39 specializes in patent matters and sets guidance standards therefore.

Application

Voluntary adoption

Adoption of Nongovernment Standards

Z39 meets with representatives of the U.S. Patent and Trademark Office (USPTO) and other related organizations to discuss and set standards to be used by the USPTO on a voluntary basis.

Committee Activity

The USPTO actively participates in Subcommittee H of Z39.

Standardization Activities

Z39 Subcommittee H (Patent Standards) gives special consideration to the publishing policies and practices of the USPTO in the development of U.S. standards as a result of the position of the USPTO as the primary publisher of U.S. patent literature. Z39 Subcommittee H addresses the practices of foreign publishers of patent data and those organizations in the United States who repackage and republish foreign patent data.
Authority 15 U.S.C. 1112, July 15, 1946, Lanham Act Section 30, gives the Commissioner the authority to establish a system of classification of goods and services.

Implementation 37 CFR 2.85 and Part 6, implement the adoption of the International Schedule of classes for goods and services. Classification is the basis for determining the fee which must be paid per application.

Committee Activity U.S. Patent and Trademark Office (USPTO) is a member of the Committee of Experts which is the acting body established by the Nice Agreement. The Committee of Experts meets periodically to revise the International Classification.

Standardization Activities The classification of specific goods and services is set forth in the Alphabetical List entitled "International Classification of Goods and Services for Purposes of the Registration of Marks Under the Nice Agreement", published by the World Intellectual Property Organization (WIPO). This classification list contains the name of each class and the basic contents of the class. The Alphabetical List also comprises explanatory notes which serve as guidelines for determining the appropriate International Class for a specific product or service.

The primary purpose of the International Alphabetical List is to provide a written source for determining proper identifications and classifications of goods and services. The classification lists consist of:

(1) a list of classes, together with explanatory notes; and

(2) an alphabetical list of goods and services with an indication of the class into which each of the goods or services falls.
### CONGRESS OF THE UNITED STATES

**JOINT COMMITTEE ON PRINTING**

SH-818 Hart Senate Office Building  
Washington, DC 20510  
(202) 224-5241  
FAX: (202) 224-1176

### Authority

The Joint Committee on Printing (JCP), created by act of August 3, 1846 (9 Stat. 114), is responsible for establishing specification standards for papers used in public printing and binding (44 U.S.C. 509), including federal government printing procured from the private sector.

### Implementation

The Government Paper Specification Standards include approximately 85 individual specifications for writing and printing papers, together with testing information, color standards, and acceptance criteria.

### Application

All the Government Paper Specification Standards must be used by all departments of the federal government and their field activities in the preparation of procurement documents for paper stocks and in specifying paper stocks to be used in printing, binding, copying, and duplicating, unless otherwise authorized by the Joint Committee on Printing.

### Standardization Activities

Administered by a Committee on Paper Specifications and its Technical Subcommittee, under the chairmanship of a Joint Committee staff member. Participating agencies include U.S. Government Printing Office, General Services Administration, National Institute of Standards and Technology and the Department of Defense.

### Availability

U.S. Government Printing Office

CONSUMER PRODUCT SAFETY COMMISSION

For Information on Mechanical, Electrical, and Thermal Hazard-Related Standards for Consumer Products:

DIRECTORATE FOR ENGINEERING SCIENCES
5401 Westbard Avenue, Room 738
Bethesda, Maryland 20207
(301) 492-6504

For Information on Chemical Hazard-Related Standards for Consumer Products:

DIRECTORATE FOR HEALTH SCIENCES
5401 Westbard Avenue, Room 712
Bethesda, Maryland 20207
(301) 492-6957

Authority

Implementation

Application
The Commission enforces all regulations and standards published in 16 CFR Chapter II, Parts 1000 to end. The Directorate for Compliance and Administrative Litigation is the Commission organization responsible for this activity. This Directorate is located at 5401 Westbard Avenue, Bethesda, Maryland. Telephone requests for information on regulatory standards enforcement may be obtained by calling (301) 492-6400. This Directorate is also responsible for enforcement activities under Section 15 of the Consumer Product Safety Act. Reports of information which reasonably supports the conclusion that a product contains a defect which could create a substantial product hazard, as required under Section 15 of the Consumer Product Safety Act, should be made by calling (301) 492-6608 with concurrent notification, in writing, to: Division of Corrective Actions, U.S. Consumer Product Safety Commission, Washington, DC 20207.
| Qualification, Certification, or Calibration Activity | Product certification is specifically required by Section 14 of the Consumer Product Safety Act (CPSA) (15 U.S.C. 2063). Manufacturers or private labelers must issue certificates stating that their product meets any applicable consumer product safety standard issued under the CPSA. The Commission may also prescribe testing and labeling requirements by regulation under the authority of Section 14 of the CPSA. |
| Committee Activity | CPSC participates in a variety of nongovernment and government standardization committees. For specific information on committees with which the Commission is working contact either the Directorate of Engineering Sciences or the Directorate for Health Sciences. |
| Standardization Activities | The U.S. Consumer Product Safety Commission, an independent federal regulatory agency, was officially activated on May 14, 1973, to implement the Consumer Product Safety Act, P.L. 92-573. The Commission's primary goal is to substantially reduce injuries associated with consumer products. The Act granted broad authority to issue and enforce safety standards for more than 10,000 consumer products. The Act specifically excludes certain products from the Commission's jurisdiction. Among the excluded products are foods, drugs, cosmetics, boats, aircraft, motor vehicles, and pesticides, most of which are regulated by other federal agencies. Amendments to the Consumer Product Safety Act enacted in 1981 encourage the development of voluntary consumer product safety standards by industry. The Commission may adopt voluntary standards issued by nongovernmental organizations as mandatory standards or issue mandatory requirements independently. The Commission may ban products which present an unreasonable risk of injury if no safety standard is feasible. The Directorate for Engineering Sciences and the Directorate for Health Sciences serve as the focal points for standards development within CPSC. |

OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE
(PRODUCTION AND LOGISTICS) (OASD(P&L))

Defense Quality and Standardization Office (DQSO)
Suite 1403
5203 Leesburg Pike
Falls Church, Virginia 22041-3466
(703) 756-2340

Authority
Title 10, U.S. Code, Chapter 145, Cataloging and Standardization and implemented by DoD Directive 4120.3

Implementation
Military and federal specifications, standards handbooks, and engineering practices -- over 37,000. Commercial Item Descriptions (CIDs) -- over 3,900. Adoption of nongovernment standards -- over 4,900.

Application
Department of Defense (DoD) standardization documents are used as procurement documents for all types of equipment and commodities, as well as documents that provide selection criteria for items, equipment, engineering practices, etc., used in new design.

Adoption of Nongovernment Standards
By mid 1990, DoD had adopted over 4,900 nongovernmental standards to be used instead of military documents. These private sector documents were developed by a number of nongovernment standards organization including ASTM, SAE, AIA, UL, and others.

Qualification, Certification, or Calibration
DoD has developed over 1,100 Qualified Products Lists which describe products that have been examined, tested, and approved as meeting the requirements of applicable specifications.

Committee Activity
The Department of Defense participates in numerous intergovernmental and nongovernmental committees to share in the development of both policy and acquisition standardization documents.

Standardization Activities
The Defense Standardization Program (DSP) is a single, integrated defense-wide program to achieve optimum uniformity among the variety of systems, equipment, materials, engineering practices, operations, and manufacturing processes developed for or used by the DoD. Standards and specifications developed by (or in concert with) nongovernment standards groups are utilized to the maximum extent possible. The adoption of nongovernment standards avoids the preparation of duplicative or overlapping military documents. It is DoD policy to cooperate with the standards organizations operating in other government agencies, as well as, those in the private sector.
Standards and specifications are developed in approximately 120 offices of the DoD whose addresses are listed in the Standardization Directory, SD-1, which is available from the Standardization Document Order Desk, 700 Robbins Avenue, Building 4, Section D, Philadelphia, Pennsylvania 19111-5094.

Also see citation for Interdepartmental Screw Thread Committee.

**DEPARTMENT OF ENERGY**

**ASSISTANT SECRETARY FOR DEFENSE PROGRAMS**

DOE, DP-13.1
Washington, DC 20545
(301) 353-3169

**Authority**
(1) The Atomic Energy Act of 1954
(2) Energy Reorganization Act of 1974
(3) Department of Energy (DOE) Reorganization Act of 1977

**Implementation**
The implementation of standards activities for Defense Programs is through the policy statement of the Assistant Secretary for Defense Programs (ASDP) dated May 28, 1982, and the individual implementation plans prepared by the DOE field organizations. Responsible program officials also involve the use of standards noted under qualification, certification, or calibration.

**Application**
Standards are used to qualify High Efficiency Particulate Air (HEPA) filters prior to use in DOE facilities.

**Standards Qualification, Calibration**
The following program known as the HEPA filter program is an example of Defense Program requirements or (standards) for the qualification, certification, and calibration of a manufactured product important to Defense Program activities:

Calibration standard: F 3-45, Specification for HEPA filters used by DOE Contractors; Certification standard: F 3-43, Quality Assurance Testing for HEPA
filters and canisters; Monitoring and testing: NF 3-42, Operating policy for DOE Filter Test facilities, and NF 3-44, DOE HEPA Test Facilities Quality Control Plans

Standardization Activities
The above referenced standards are developed and maintained internal to the Department.

Availability
Referenced standards are internal DOE documents.

Keywords

Washington, DC 20585
(202) 586-9445

Authority
42 U.S.C. 6831 et. seq., The Energy Conservation Standards for New Buildings Act of 1976, as amended, requires the Department of Energy (DOE) to issue voluntary performance standards for the design of new commercial, federal and non-federal buildings. Mandatory compliance with the standards is only required for the design of new federal buildings.

Implementation
A draft voluntary guideline for energy conservation in manufactured housing was published by DOE and a Notice of Inquiry (NOI) requesting public review and comment was published in the Federal Register May 9, 1983 (48 FR 20866). On February 22, 1984; a draft guide of Affordable Housing Through Energy Conservation (49 FR 6537) was issued as an NOI in the Federal Register. On October 31, 1985; a Notice of Inquiry and public briefing (50 FR 45469) on Modification to Affordable Housing Through Energy Conservation was published in the Federal Register. On August 20, 1986; a Notice of Proposed Interim Rule and Public Hearings and Finding of No Significant Impact (FONSI) (54 FR 4538 et seq.) on proposed Energy Conservation Standards for New Federal Residential Buildings was published in the Federal Register. On May 6, 1987; a Notice of Proposed Rulemaking (NOPR) (52 FR 17051 et seq.) was published in the Federal Register announcing DOE's intention to promulgate interim voluntary standards for new federal commercial and multi-family high rise residential buildings and also requesting public review and comment. On August 25, 1988, the Final Interim Rule and Proposed Modification of Final Interim Rule (53 FR 32536) on Energy Conservation Mandatory Performance Standards for

587
New Federal Residential Buildings was published in the Federal Register. The proposed modifications came as a result of further research that was performed by DOE in response to public comment on the proposed interim standards. On January 30, 1989; the Interim Rule for Energy Conservation Voluntary Performance Standards for Commercial and Multi-Family High Rise Residential Building (54 FR 4538) was published in the Federal Register. These standards are mandatory for new federal buildings. On November 30 1989; the Preliminary Statement of Reasons for Adoption of Standby Loss Criteria for storage water heaters relative to the commercial standards (54 FR 49724) was published in the Federal Register.

<table>
<thead>
<tr>
<th>Application</th>
<th>The guidelines for energy conservation in new manufactured housing, new non-federal residential, and new commercial buildings are expected to be implemented as a result of voluntary adoption by manufacturers, builders and state and local governments. The guidelines and standards will be applied to new federal buildings by regulations under the Federal Energy Management Program (10 CFR 436).</th>

Authority

Implementation

Test procedures have been established for 13 categories of appliances in 10 CFR Part 430, Subpart B. The 13 categories of appliances are: refrigerators, refrigerator-freezers, and freezers; furnaces; central air conditioners and central air conditioning heat pumps; room air conditioners; water heaters; dishwashers; clothes washers; clothes dryers; direct heating equipment; pool heaters; kitchen ranges and ovens; television sets; and fluorescent lamp ballasts. Standards have been established, by legislation, for 12 of the 13 categories of appliances in 10 CFR Part 430, Subpart C.

Application

The established test procedures are required, under regulations issued by the Federal Trade Commission (FTC), to be used by manufacturers in the preparation of labels and other representations concerning the energy efficiency of covered products. In addition, the manufacturer's certification of compliance with a standard is to be based on manufacturer testing of covered products in accordance with the applicable test procedure. Selective government tests may be performed for enforcement purposes.

Adoption of Nongovernment Standards

The established test procedures adopt, by reference, some nongovernment test procedures; including, but not limited to, procedures established by ANSI, ASHRAE, ASTM, and the Association of Home Appliance Manufacturers (AHAM).

Qualification, Certification, or Calibration

Consumer product manufacturers are responsible for the application of the established test procedures, although FTC or DOE may perform independent tests to verify manufacturers claims.
Committee Activity

The appropriate staff of DOE and the National Institute of Standards and Technology (NIST) participate in several relevant committees of ASHRAE and the Air-Conditioning and Refrigeration Institute (ARI).

Standardization Activities

DOE, with the support of the NIST, is active in the preparation, review, and updating of energy efficiency test procedures for all 13 covered appliances. In addition, DOE in accordance with the law, reviews the standards on a regular basis to determine if updates are justified. With respect to the test procedures, every effort is made to utilize private consensus standards, if appropriate. Federal energy efficiency standards preempt State-established energy efficiency standards. States may apply to DOE for exemptions from this rule.

DEPARTMENT OF ENERGY

ENERGY INFORMATION ADMINISTRATION

Office of Statistical Standards (EI-70)
1000 Independence Avenue, SW
Washington, DC 20585
(202) 586-2222

Authority

Both the Federal Energy Administration Act and the Department of Energy Organization Act, which established the Energy Information Administration (EIA) as an independent statistical agency, require that the information collected by the agency be evaluated and assessed internally and that the collection methods used be audited. (See P.L. 93-275 and 95-91).

Implementation

To evaluate the data and procedures used to collect, process and publish the data, performance standards are needed. A standards program has existed since EIA's inception; however, in 1981 it was reorganized and resulted in the adoption of 19 standards and two orders on model documentation and model archiving.

Application

Standards implementation is monitored by the Office of Statistical Standards (OSS) through the various activities of the office, including the forms clearance process, pre-publication reviews, state-of-the-data reports, quality audits, and documentation reviews of data collection and processing systems. OSS monitors order implementation through reviews of

590
the documentation and model archival packages prior to release, and quality audits.

Committee Activity

OSS participates in pertinent committees of the Office of Management and Budget (OMB), the American Statistical Association, and other statistical organizations.

Standardization Activities

Twenty-four standards have been developed covering various aspects of data collection, processing and dissemination. They are divided into the following groups: interagency, data systems, data collection, and data presentation. Specific standards cover: the adoption of Federal Information Processing and OMB standards; standardized codes, abbreviations, and acronyms; contract clauses for data collection and processing; data systems development; non-response handling; respondent contact records; batch entry procedures; edit message handling; survey performance statistics; publication of energy statistics, revisions and estimates; data accuracy; graphs; nondisclosure; rounding; freezing data files; and documentation of public use tapes and diskettes. The orders cover proper documentation of EIA models, procedures for preparing model archival packages, and uniform practices for the use of applications support software.

These mandatory standards and orders are intended to assure the quality and consistency of EIA's data and models, increase the efficiency and responsiveness to EIA's data users, and avoid duplication of effort.

These standards and orders will be modified and new ones developed as conditions warrant. (A new standard on model acceptance is currently being tested.) The primary focus is on ensuring compliance with the existing standards and orders and providing technical assistance to offices requesting it.

ENVIRONMENT, SAFETY, AND HEALTH

Safety and Quality Assurance, Rm 7A-097
1000 Independence Avenue, SW
Washington, DC 20585
(202) 586-4710

Authority
(1) Atomic Energy Act of 1954, as amended
(2) Energy Reorganization Act of 1974
(3) Department of Energy Organization Act of 1977

Implementation
Prescribed and recommended Environment, Safety, and Health (ES&H) standards (approximately 300) are listed in Order DOE 5480.4, Attachments 1, 2 and 3.

Application
Department of Energy (DOE) Headquarters ES&H program personnel appraise DOE field operations and contractors to evaluate conformance with the prescribed ES&H standards. DOE field operations personnel also evaluate DOE contractors to ascertain compliance with the standards. As appropriate, recommendations for improved conformance are made and ameliorative actions are implemented.

Adoption of Nongovernment Standards
Approximately 65 nongovernment ES&H standards have been adopted as prescribed standards and approximately 135 nongovernment ES&H standards have been adopted as recommended standards. These are primarily from ANSI, NFPA, IEEE, and ANS.

Committee Activity
American National Standards Institute, American Nuclear Society, and National Fire Protection Association

Standardization Activities
Adoption of appropriate voluntary standards for use in DOE activities.

(16) Asbestos Information Act, (P.L. 100-577)
(18) Indoor Radon Abatement Act, (P.L. 100-551)

Implementation

Environmental Protection Agency (EPA) standards are published in Part 40 of the Code of Federal Regulations (40 CFR). Some standards are mandatory, others voluntary. State and local governments usually have the right to impose standards that are more stringent than those EPA sets.

Application

Standards are applied in various ways including individual permits establishing emissions or effluent limits, product registration, state and local implementation plans, direct reporting to EPA, recordkeeping, on-site inspections, voluntary adoption, etc.

Adoption of Nongovernment Standards

40 CFR refers readers to nongovernmental standards it accepts in lieu of incorporating the standards in the CFR.

Qualification, Certification, or Calibration

EPA samples products and the environment for compliance with its standards. Examples include monitoring motor vehicle emissions, wastewater discharges, new chemicals
and pesticides, land fills, ambient air, and drinking water systems. The Agency also reviews manufacturers' requests to label products as "certified to EPA standards."

Committee Advisory Commission on Intergovernmental Relations; Council on Environmental Quality; Interagency Testing Committee (ITC); National Air Pollution Control Techniques Advisory Committee; National Drinking Water Advisory Council; Environmental Committee of the Organization for Economic Cooperation and Development; Science Advisory Board; U.S. Canada International Joint Commission (on air and water); Stratospheric Ozone Protection Advisory Committee; Volatile Organic Chemical Equipment Leak Rule Negotiated Rule Making Committee; Biotechnology Science Advisory Committee; FIFRA Scientific Advisory Panel;

Standardization EPA environmental standards apply to individuals; businesses; federal, state and local governments; and other organizations. They are intended to ensure clean air and water, safe containment of toxic wastes, protection from excessive radiation, protection of the nation's waters for fish/wildlife and human use, undue exposure to toxic substances, etc. The following offices are directly involved in standards development and application: Office of Air Radiation, (202)382-7400; Office of Pesticides and Toxic Substances, (202)382-2902; Office of Research and Development, (202)382-7676; Office of Solid Waste and Emergency Response, (202)382-4610; Office of Water, (202)382-5700. These Offices exercise responsibility for standards dealing with water quality, solid and hazardous wastes, pesticides and toxic substances, ambient air, research and development practices, and radiation. The Administrative Procedures Act mandates publication of proposed rules (standards) followed by public comment/hearings prior to promulgating the rule. Usually, once a standard is set, states and other jurisdictions must submit, by a certain date, implementation plans for meeting these standards or face the alternative of having EPA write and impose its own plan. 

Authority

Title IV of the Trade Agreements Act of 1979 (P.L. 96-39, July 26, 1979) on approval of the Agreement on Technical Barriers to Trade (Standards Code) which sets forth disciplines on standards-related activities. USTR does not itself develop standards, test methods or rules of certification.

Implementation

Through the Trade Policy Committee structure, chaired by the Office of the U.S. Trade Representative (USTR), U.S. Government coordination of the implementation and administration of the Standards Code is achieved. USTR works primarily with the Departments of Agriculture, Commerce, and State in this area.

Application

The Trade Policy Staff Committee (TPSC) Subcommittee on Standards meets regularly to approve U.S. positions for meetings of the Committee on Technical Barriers to Trade (established by the Standards Code). The TPSC also approves positions for bilateral standards-related discussions with governments who are signatories to the Agreement on Technical Barriers to Trade.

Adoption of Nongovernment Standards

USTR coordinates with the private sector through the Industry Functional Advisory Committee on Standards Trade Policy Matters (IFAC-2) and the Trade Policy Staff Committee (TPSC) Subcommittee on Standards, for coordination of trade policy within the U.S. government.

Qualification, Certification, or Calibration

USTR coordinates closely with nongovernmental certification bodies directly and through the IFAC on Standards Trade Policy Matters.

Committee Activity

Keywords
standards code; gatt; international trade; business; general; 1979 trade act;
Authority

The Communications Act of 1934, as amended (47 U.S.C. 151) established the Federal Communications Commission (FCC) to regulate interstate and foreign commerce in communications by wire and radio in the public interest.

Implementation

The FCC rules and regulations are contained in Title 47 CFR. The standards are located in the various Parts: 0, 1, 2, 5, 13, 15, 17, 18, 19, 21, 22, 23, 25, 31, 33, 34, 35, 41, 42, 43, 51, 52, 61, 62, 63, 64, 66, 67, 68, 73, 74, 76, 78, 81, 83, 87, 90, and 94.

Application

Since there are many different kinds of standards throughout the rules, various methods are used to enforce the rules or standards. The methods used are: on-site inspections, FCC laboratory testing, review of test data submitted by applicants, and self verification.

Adoption of Nongovernment Standards

The Commission has adopted nongovernment standards and will continue to do so whenever it is in the public interest. These standards are referenced in the appropriate parts of the rules, and in many cases voluntary standards become mandatory standards when referenced in the rules and regulations.

Qualification, Certification, or Calibration

Applicants wishing to establish a radio station, whether it be a broadcast, private, common carriers, or experimental, must submit information showing compliance with the rules. If the requirements (standards) are met, a license is issued. As of 1988 the Commission has issued approximately 3 million radio licenses. The Commission also has STGT equipment authorization programs which issue equipment approvals. The Commission issues approximately 6,000 equipment approvals each year.

Committee Activity

The Commission participates in pertinent organizations and committees which deal with telecommunications standards. Some of these are: Institute of Electrical and Electronics Engineers, American National Standards Institute, Electronic Industries Institute, Radio Technical Commission for Aeronautics, Radio Technical Commission for Maritime Services, International Radio

596
Consultative Committee, CISPR, Safety of Life At Sea Convention, etc.

**Standardization Activities**
The Commission participates in international and national standards organizations developing communication systems and equipment. The Commission provides technical analysis and testing of systems and equipment.

Service Industry Practices, Bureau of Consumer Protection
Sixth Street and Pennsylvania Ave., NW, Room 294
Washington, DC 20580
(202) 326-3303

**Authority**
Section 5 of the Federal Trade Commission Act declares unfair methods of competition, and unfair or deceptive acts and practices, in or affecting commerce, to be unlawful.

**Adoption of Nongovernment Standards**
In preventing unfair or deceptive acts or practices in commerce, the Federal Trade Commission (FTC) may reference standards in trade regulation rules or guides. For example, the Commission incorporated several nongovernment standards by reference in its rule relating to labeling and advertising of home insulation (R-value rule, 16 CFR, part 460).

**Standardization Activities**
The Commission's Bureau of Competition (BC) and Bureau of Consumer Protection (BCP) investigate standards and certification activities that may unreasonably result in a substantial lessening of competition in violation of the Federal Trade Commission Act. One example would be allegations that a standard or a seal of approval program unreasonably excluded innovative products from the marketplace. They would also investigate allegations that standards or seals of approval are being used deceptively in the sale of products. If the
used deceptively in the sale of products. If the Commission finds reason to believe that the law may have been violated, it may commence a law enforcement action to enjoin such anti-competitive or deceptive activities and to seek such other relief as may be appropriate. The Commission may, under appropriate circumstances: issue advisory opinions as to the legality of standards or certification practices presented for review; participate in relevant interagency or intergovernmental committees; present its views to appropriate legislative, judicial, or industry entities concerning specific standards or certification issues.

Keywords

GENERAL SERVICES ADMINISTRATION

INFORMATION RESOURCES MANAGEMENT

Office of Information Resources Procurement
18th and F Streets, NW, Room G-44
Washington, DC 20405
(202) 501-1072

Authority
1. Public Law 89-306: The Brooks Act

Implementation
The Federal Information Resources Management Regulation (FIRMR) establishes federal standards provisions and requirements for the acquisition of ADP and telecommunications resources. The Federal ADP and Telecommunications Standards Index provides terminology to incorporate standards in solicitation documents. It also provides a catalogue of all American National Standards (ANS), Federal Information Processing Standards (FIPS), and Federal Standards (FED-STD).

Application
Federal acquisition of ADP and telecommunications resources must be in compliance with established federal standards provisions of the FIRMR.

Committee Activity
The GSA is an active voting member of the X3: Information Processing System; ANSI Standards Committee T1, Telecommunications; Federal Telecommunications Standards Committee (FTSC); and the ANSI Information Systems Standards Board (ISSB).

Standardization Activity
The GSA serves as a focal point for the government-wide Federal Information Processing and Telecommunications Authority

598
Standards Program. GSA participates directly in the development of federal standards, and develops terminology to incorporate standards in solicitation documents for acquisition and use of ADP and telecommunications resources. GSA provides advice and assistance to federal agencies and private sector personnel on information systems and telecommunications standards.

**Availability**
The Federal ADP and Telecommunications Standards Index is sold by the Government Printing Office.

**Keywords**
information processing; telecommunications; terminology;

**Authority**
The Federal Standardization Program was developed in compliance with the Federal Property and Administrative Services Act of 1949, 63 STAT. 377, as amended. The program provides for coordination of civil and military standardization functions, so as to avoid unnecessary duplication, pursuant to the Act and in consonance with the Defense Cataloging and Standardization Act (Secs. 24512456, Title 10, U.S.C., superseding P.L. 436).

**Implementation**
41 CFR 101-29 describes the standardization program under Federal Product Descriptions. Included are federal specifications, standards, commercial item descriptions, purchase descriptions, and brand-name purchase descriptions. Also included in the program are Qualified Products Lists (QPL's).

**Application**
Federal product descriptions shall be used by all federal agencies in the procurement of supplies and services covered by such descriptions, except as provided in 41 CFR 101-29.402 and 41 CFR 101-29.403.

**Adoption of Nongovernment Standards**
By the end of 1982, the Federal Supply Service (FSS) had adopted approximately 300 nongovernment standards. Approximately 900 nongovernment documents are invoked by reference. The majority of these are standards developed by American Society for Testing and Materials (ASTM), American National Standards Institute (ANSI), Society of Automotive Engineers (SAE), and Underwriters Laboratories (UL).
| **Qualification, Certification, or Calibration** | The General Services Administration (GSA) Office of Quality and Contract Administration handles the inspection and testing, as necessary, of supplies procured under GSA contracts. Through the five regional control divisions and the one regional laboratory, this program provides assurance that material supplied is in compliance with contract specifications. |
| **Committee Activity** | The Federal Supply Service participates in pertinent committees of ASTM and ANSI. In addition, FSS personnel are directly involved in work with 15 other technical organizations. |
| **Standardization Activities** | GSA is responsible for establishing policies and procedures, in coordination with other agencies, for the preparation, coordination, approval, issuance, and maintenance of product descriptions in the federal series. |
| | FSS issues and maintains, on a current status, the Federal Standardization Handbook. The Handbook sets forth operating procedures and applicable definitions used in the development of federal product descriptions under the Assigned Agency Plan described therein. |
| | FSS also promulgates and maintains, on current status, the Index of Federal Specifications, Standards, and Commercial Item Descriptions. The Index lists federal product descriptions which have been printed and distributed, including those which are mandatory for use by all federal agencies and identifies the sources from which these documents may be obtained. There are approximately 6,000 federal product descriptions in use, of which 50 percent have been assigned to other agencies. |
| **Availability** | GSA Business Service Center, 7th and D Streets, SW, Washington, DC 20407 (202) 472-1804 or any of the other GSA Business Service Centers. |
| **Keywords** | federal product descriptions; standards; specifications; commercial item descriptions; qualified products lists; nongovernment documents; general; |

**GENERAL SERVICES ADMINISTRATION**

**PUBLIC BUILDING SERVICE**

Office of Design and Construction, Room 3318
Eighteenth & F Streets, NW
Washington, DC  20405
Authority

Implementation

The General Services Administration is required as one of the four standard-setting agencies, to "prescribe standards for the design construction, and alteration of buildings (other than residential structures subject to this Act and buildings, structures, and facilities of the Department of Defense and of the United States Postal Service subject to this Act) to insure whenever possible that physically handicapped persons will have ready access to, and use of, such buildings."

Application

The General Services Administration, (GSA) issued PBS, PCD, Design Guide 6, GSA Accessibility standard, on October 14, 1980. GSA and the Department of Housing and Urban Development, the Department of Defense, and the United States Postal Service jointly published the Uniform Federal Accessibility Standards on August 7, 1984 which sets standards to insure that certain buildings financed with federal funds are so designed and constructed as to be accessible to the physically handicapped.

Adoption of Nongovernment Standards

Committee Activities

GSA is a member of the Architectural and Transportation Barriers Compliance Board, 1111 18th Street, NW, Washington, DC 20036 (202) 653-7834.

Standardization Activities

GSA develops, publishes and updates accessibility standards to assure that all building designs, constructed, altered, increased by an addition, or leased with federal funds are accessible and usable by handicapped individuals. The Administrator also has the authority to waive or modify those standards on a case-by-case basis.

Availability

The Uniform Federal Accessibility Standards are available, free of charge from GSA or the Architectural and Transportation Barriers Compliance Board.

Keywords

DEPARTMENT OF HEALTH AND HUMAN SERVICES

CENTER FOR DISEASE CONTROL

National Institute for Occupational Safety and Health
1600 Clifton Road NE
Atlanta, Georgia 30333
(404) 639-3771

Authority

(1) 29 U.S.C. 651-678, December 29, 1970, Occupational Safety and Health Act (OSH Act), to assure safe and healthful conditions of working men and women; by authorizing enforcement of standards developed under the OSH Act; and for other purposes.

Implementation

Recommended Occupational Safety and Health Standards -- developed by the National Institute for Occupational Safety and Health (NIOSH) Division of Standards Development and Technology Division, 4676 Columbia Parkway, Cincinnati, Ohio 45226, telephone (513) 533-8302. Approximately 120 voluntary standards have been developed in the form of criteria documents dealing with control of toxic substances in the workplace. These criteria documents are submitted by NIOSH as recommendations to the Department of Labor (DOL) for use in the development of mandatory standards by DOL's Occupational Safety and Health Administration and DOL's Mine Safety and Health Administration.

Application

The Department of Labor is responsible for the promulgation and enforcement of occupational health and safety standards.

Qualification, Certification or Calibration

NIOSH's Safety Research Division's Certification Branch is responsible for testing and certifying personal respiratory protective equipment based upon applications submitted by the manufacturers of such equipment.
standardization Activities

NIOSH employees actively participate in voluntary standard development activities of ANSI, ASTM, and American Conference of Governmental Industrial Hygienists (ACGIH).

Keywords.respiratory protective equipment; toxic substances; workplace standards; safety; public health;

DEPARTMENT OF HEALTH AND HUMAN SERVICES

FOOD AND DRUG ADMINISTRATION

Office of Regulatory Affairs, Room 14-85
5600 Fishers Lane
Rockville, Maryland 20857
(301) 443-1594

Authority

- Public Health Service Act, as amended (42 U.S.C. 262, 263, 263b-263n, and 361), (42 U.S.C. 264 and 13951)
- Federal Import Milk Act (P.L. 69-625)
- Tea Importation Act (21 U.S.C. 41-50)
- Federal Caustic Poison Act (Note: Section 19 of the Federal Hazardous Substances Act (15 U.S.C. 401) repealed the Federal Caustic Poison Act except for any "dangerous caustic or corrosive substance" as defined by the Federal Caustic Poison Act which is subject to the Federal Food, Drug, and Cosmetic Act and not a "hazardous substance" under the Federal Hazardous Substances Act.)
- Orphan Drug Act (P.L. 97-414)
- Drug Price Competition and Patent Term Restoration Act (P.L. 98-417)
- Prescription Drug Marketing Act of 1987 (P.L. 100-293)
- Anti-Drug Abuse Act of 1988 (P.L. 100-690)
- Saccharin Study & Labeling Act
- Federal Anti-Tampering Act

Implementation

The Food and Drug Administration (FDA) Center for Food Safety and Applied Nutrition, Office of Compliance, 200 C Street, SW, Washington DC 20204, (202) 485-0160, is responsible for:

- Color Additives -- Approximately 200 mandatory regulations under 21 CFR, Parts 73, 74, and 82 prescribe identity, specifications, and other conditions under which color additives may be safely used in food, drugs, cosmetics, and devices.

603
- Food Additives -- Approximately 300 mandatory regulations under 21 CFR, Parts 172-179 prescribe identity, specifications, and other conditions under which food additives may be safely used.

- GRAS Substances -- Approximately 93 mandatory regulations under 21 CFR, Parts 184 and 186 prescribe identity, specifications, and other conditions under which substances are generally recognized as safe (GRAS) as ingredients added directly or indirectly to human food.

- Food Standards -- Approximately 293 mandatory regulations under 21 CFR, Parts 131 through 169 prescribe standards of identity, quality, and fill of container for 21 different classes of foods. Most of these are standards of identity which specify the basic composition of the food.

- Cosmetic Regulations -- Approximately 16 mandatory regulations under 21 CFR, Parts 701 and 740 prescribe standards for cosmetic labeling.

- Control of Communicable Diseases -- Approximately
19 mandatory regulations under 21 CFR, Part 1240 concern control of communicable diseases.

FDA's Center for Drug Evaluation and Research, 5600 Fishers Lane, Bethesda, Maryland 20857, (301) 443-2894 and Center for Biologics Evaluation and Research, 9000 Rockville Pike, Bldg. 29, Bethesda, Maryland 20892, (301) 496-3556, develop standards and regulations for:

- Biological Products Applicable to the Prevention, Treatment or Cure of Diseases or Injuries of Man — In addition to the regulations at 21 CFR Subchapter C and D that apply to all products, including biological products, that are applicable to the prevention, treatment or cure of diseases or injuries of man (drug products), mandatory regulations for biological products exist at Subchapter F.

- Insulin and Antibiotics — Approximately 707 mandatory regulations under 21 CFR, Parts 429-460 prescribe standards, tests, and methods of assay for insulin and antibiotic drugs.

- Over-the-Counter (OTC) Drugs — Ten mandatory regulations (monographs) under 21 CFR, Parts 331, 332, 333, 336, 338, 340, 341, 344, 349 and 357 prescribe specifications and conditions under which therapeutic categories of OTC drugs are generally recognized as safe and effective. Regulations under 21 CFR Part 310 describe conditions under which certain therapeutic categories of OTC drugs are not generally recognized as safe and effective. Regulations are under development for approximately 34 additional therapeutic categories of OTC drugs.

- Biological Product — Approximately 325 mandatory regulations appear under 21 CFR, Subchapter F concerning labeling, standards, testing, and other conditions under which bacterial and viral vaccines, toxoids, antitoxins, blood, and blood derivatives, allergenic products, and other biological products can be safely used.

FDA's Center for Devices and Radiological Health, Office of Standards and Regulations, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443-3403, prepares:

- Procedures for Performance Standards Development — Approximately 13 mandatory regulations under 21 CFR, Part 861 prescribe the procedures for initiation, development, establishment, amendment, and revocation of performance standards applicable
to devices intended for human use.

- **Device Classification Procedures** -- Approximately 14 mandatory regulations under 21 CFR, Part 860 prescribe the criteria and procedures governing the classification and reclassification of devices intended for human use into one or more of three regulatory classes: class I (general controls), class II (performance standards), and class III (premarket approval).

- **Device Classification Regulations** -- FDA is developing mandatory regulations to classify all medical devices intended for human use into one or more of these three classes depending upon the regulatory controls needed to provide reasonable assurance of their safety and effectiveness. Approximately 1,613 mandatory device classification regulations appear under 21 CFR, Parts 864-892 (approximately 70 additional mandatory device classification regulations have been published as proposed rules but have not yet been published as final regulations).

- **Other Device Regulations** -- A number of other miscellaneous mandatory device regulations appear under 21 CFR, Subchapter H (e.g., general labeling requirements under 21 CFR, Part 801; exemptions from federal preemption of state and local medical device requirements under 21 CFR, Part 808; in-vitro diagnostic products for human use under 21 CFR, Part 809; investigational device exemptions under 21 CFR, Part 812; and investigational exemptions for interocular lenses under 21 CFR, Part 813).

- **Performance Standards for Ionizing Radiation Emitting Products** -- Approximately 6 mandatory regulations under 21 CFR, Part 1020 prescribe standards to control the emission of radiation from microwave ovens.

- **Performance Standards for Light Emitting Products** -- Approximately 4 mandatory regulations under 21 CFR, Part 1040 prescribe standards to control the emission of radiation from lasers, sunlamps, and other light-emitting products.

- **Performance Standards for Sonic, Infrasonic, and Ultrasonic Radiation Emitting Products** -- One mandatory regulation under 21 CFR, Part 1050 prescribes standards to control the emission of radiation for ultrasonic therapy products.

FDA's Center for Veterinary Medicine, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443-3450, is responsible for:

- Food Additives Permitted in Feed and Drinking Water of Animals -- Approximately 49 mandatory regulations under 21 CFR, Part 573 prescribe identity, specifications, and other conditions under which food additives may be solely used in feed and drinking water of animals.

- New Animal Drugs -- Approximately 633 mandatory regulations under 21 CFR, Parts 520-555 and 558 prescribe identity, specifications, testing, and other conditions for safe use of new animal drugs.

- Tests for Specific Antibiotic Dosage Forms -- Approximately 18 mandatory regulations under 21 CFR, Part 536 prescribe tests for specific antibiotic dosage forms of new animal drugs.

- Other Animal Drugs, Feeds, and Related Products Regulations -- A number of other miscellaneous mandatory regulations concerning animal drugs, feeds, and related products appear under 21 CFR, Subchapter E (e.g., animal food labeling under 21 CFR, Part 501; and tolerances for residues of new animal drugs in food under 21 CFR, Part 556).

**Application**

To determine that FDA-regulated products are in compliance with statutes, FDA conducts inspections of manufacturing establishments (17,740 in FY89), collects and analyzes domestic samples (26,996 in FY89) and import samples (44,936 in FY89), and conducts wharf examinations of products in import channels of trade (102,617 in FY89). Samples collected are analyzed at FDA field and headquarters laboratories.

**Adoption of Nongovernment Standards**

By the end of 1989, FDA had adopted more than 300 nongovernment standards. The majority of these are ASTM, Association of Official Analytical Chemists (AOAC), Food Chemicals Codex, and American Public Health Association. In addition to these nongovernment standards, 21 U.S.C. 352(b) and 352(g) mandate that FDA
use standards in an "official compendium" such as the United States Pharmacopeia.

Qualification, Certification, or Calibration

Color additives (unless the color is specifically exempted) and insulin are batch-certified by FDA prior to marketing. Most biological products are required by regulation to be tested by FDA prior to release of each lot of product. With few exceptions (e.g. foods, cosmetics), most FDA-regulated products are subject to preclearance by FDA before they may be marketed.

Committee Activity

More than 150 FDA staff members participate with 29 standards organizations in more than 270 standardization activities. For example:

- ANSI (13 committees, 16 subcommittees)
- ASTM (5 committees, 52 subcommittees)
- AAMI (27 committees, 11 subcommittees)
- ASME (1 committee, 3 subcommittees)
- USP (6 subcommittees)
- NCCLS (10 committees, 24 subcommittees)
- American College of Radiology (6 committees)
- IEEE (4 committees, 7 subcommittees)
- Acoustical Society of America (2 committees)
- IEC (4 technical committees, 23 subcommittees)
- ISO (7 technical committees, 13 subcommittees)
- NCCLS (11 committees, 34 subcommittees)
- International Organization for Legal Metrology (OIML), U.S. Technical Advisory Group for SP26
- Codex Alimentarius (FAO/WHO) (16 committees)

Standardization Activities

The broad scope of FDA's involvement in standardization activities is reflected by the programmatic CFR listings above under Implementation and the partial listing under Committee Activities. Since May 27, 1975, FDA has regulated and encouraged participation of its employees in outside standard setting activities (the current regulation appears under 21 CFR 10.95). It is FDA policy to use and cite in its regulations nongovernment standards whenever possible and consistent with FDA's statutory mandates to protect the public health.

Availability

FDA regulations are published in the Code of Federal Regulations available from the Government Printing Office. Each FDA regulation that incorporates by reference test methods or other materials also lists the complete address from which copies may be obtained.

Keywords

food; food additives; color additives; cosmetics; human drugs; animal drugs; biologics; medical devices; radiation protection; electronic product radiation; safety; public health; consumer products;
DEPARTMENT OF THE HEALTH AND HUMAN SERVICES

HEALTH CARE FINANCING ADMINISTRATION

200 Independence Avenue, SW
Washington, DC 20201
(202) 245-6726

Authority
Titles XVIII and XIX of the Social Security Act.

Implementation
42 CFR, Subchapters B and C. Regulations addressing the survey and certification of health care facilities wishing to participate in the Medicare and Medicaid programs.

Application
State survey agencies and Health Care Financing Administration (HCFA) regional offices apply procedures set forth in these regulations in determining a facility's eligibility for certification and in making certification decisions.

Committee Activity
HCFA works closely with Association of State and Territorial Health Officials, Association of Health Facility Licensure and Certification Directors, and various consumer and industry groups in developing its standards.

Standardization Activities
HCFA standards apply to the survey and certification of all health care facilities wishing to participate in the Medicare and/or Medicaid programs. Having standard procedures assures national uniformity in approving facilities for Medicare/Medicaid reimbursement.

Availability
Standards are available from the Government Printing Office and Health Care Financing Administration's Office of Public Affairs.

Keywords
Medicare; Medicaid; survey and certification; health care providers and suppliers; state survey agencies; health care; facilities management; insurance;

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

ASSISTANT SECRETARY FOR HOUSING - FEDERAL HOUSING COMMISSIONER

Manufactured Housing and Construction Standards Division
Office of Manufacturer Housing and Regulatory Functions
451 Seventh Street, SW, Room 9158
Washington, DC 20410-8000
(202) 708-2210
Authority

(2) Technical Suitability of Products Program - Sec. 521 of the National Housing Act was added by Sec. 216 of the Housing and Urban Development Act of 1965, Public Law 89-117.

(3) Manufactured Housing - Section 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d), Title VI, Housing and Community Development Act of 1974 (42 U.S.C. 5401).

Implementation

All standards are codified as regulations and are mandatory. The MPS, which include as supplements product acceptance under Sec. 521 and the Department of Housing and Urban Development (HUD) Building Products Certification Programs, are incorporated by reference in 24 CFR, Part 200 Subpart S, Sections 200.925, 200.927, 200.929, 200.931, 200.933, 200.935 with an Appendix. Manufactured Home Construction and Safety Standards are in 24 CFR Parts 3280, 3282 and 3283.

Application

Design drawings are reviewed for compliance, and inspectors visit site development and manufacturing facilities for construction or manufacturing compliance. The MPS are only applicable for HUD mortgage or loan insurance and low-rent public housing programs. The Manufactured Home Standards are applicable for all manufacture homes which are designed to be used as dwelling units.

Adoption of Nongovernment Standards

Nongovernment standards are invoked by reference or adoption whenever possible. There are approximately 500 nongovernment standards referenced in the Minimum Property Standards and supplemental standards issued under the Technical Suitability of Products Program. The Manufactured Housing Program Standards contain 200 nongovernment standards. Principal developers of these standards include the American Society for Testing and Materials (ASTM), American National Standards Institute (ANSI), American Concrete Institute (ACI), American Plywood Association (APA), American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE), and Architectural Aluminum Manufacturers Association (AAMA).

Qualification, Certification, or Calibration

Proponents of new building products or systems submit technical data for analysis under the Technical Suitability of Products Program. Upon a determination of suitability, a Materials Release is issued for
products and a Structural Engineering Bulletin for building systems. These documents supplement the MPS, and include these products for national acceptance. Use of Materials Bulletins are issued either as an interim HUD standard for a particular class of like products, such as carpet, or as a means of promulgating a certification program for a product. There are currently Engineering Bulletins, Materials Releases, Use of Materials Bulletins, and 13 Certification Programs in effect.

Under the Manufactured Housing Program all designs, quality assurance manuals, product certifications and listings are approved by design approval agencies, accepted by HUD. All manufactured homes are inspected by in-plant inspection agencies for conformance to the approved design, and federal standards. Average yearly production of manufactured homes is 250,000 homes.

HUD encourages industry enforcement and self certification for those materials covered by product standards and federal specifications. It also requires third party certification in conformance with criteria set out in 24 CFR 200.935 for lumber, plywood, carpet, windows, plastic bathtubs, etc.

Committee Activity

HUD staff participate in pertinent committees that include the following: Council of American Building Officials (CABO), International Conference of Building Officials (ICBO), Building Officials and Code Administrators (BOCA), Southern Building Code Congress International (SBCCI), ASTM, National Conference of States on Building Codes and Standards (NCSBCS), ACI, American Lumber Standards Committee (ALSC), ANSI, ASHRAE, U.S./Japan Panel on Wind and Seismic Effects, National Academy of Sciences, and National Institute of Building Sciences (NIBS).

Standardization Activities

The Manufactured Housing and Construction Standards Division writes, updates, revises, and clarifies construction and design standards for HUD-associated residential construction. This activity grew out of the National Housing Act of 1934 and Sec. 7(d) Department of Housing and Urban Development Act, 42 U.S.C. 3535(d), Title VI, Housing and Community Development Act of 1974. The Code of Federal Regulations reference is Title 24 Housing and Urban Development.

The Minimum Property Requirements as originally established in 1935 were intended to provide the minimum essentials for a property to be considered economically sound security for Federal Housing Administration (FHA) mortgage insurance purposes. They establish and
describe those characteristics of a property which will produce continuing utility, livability, durability, marketability, economy of maintenance, safety and healthy environment.

In 1940, the FHA issued the Minimum Requirements for Rental Housing covering multifamily units, while Property Standards and Minimum Construction Requirements for Dwellings applicable to single family dwellings were published in 1942. These were reissued after World War II under the title: Minimum Property Requirements for Properties of Three or More Living Units, and Minimum Property Requirements for Properties of One or Two Living Units. Another reissue took place in 1958 for the One and Two Living Units MPS and in 1963 for the Multifamily Housing MPS. Since then, these standards have been revised numerous times to stay current with evolving technology.

In 1974 the National Mobile Home Construction and Safety Standards Act was enacted by Congress to reduce the number of personal injuries and deaths and the amount of insurance costs and property damage resulting from mobile home accidents and to improve the quality and durability of mobile homes. All mobile manufactured housing built since June 15, 1976 must be in compliance with the requirements of this Act. The standards cover all equipment and installations in the design, construction, fire safety, plumbing, heating, ventilating, and electrical systems of manufactured homes which are designed to be used as dwelling units.

Availability

Minimum Property Standards are available through HUD field offices. The Manufactured Housing Standards are available from HUD, Manufactured Housing and Construction Standards Division at HUD Headquarters.

Keywords

manufactured homes; (mobile homes); certification; residential; mortgage insurance; building; sanitation; safety; standards; construction;

INTERDEPARTMENTAL SCREW THREAD COMMITTEE (Defunct)

Replaced by

DEFENSE INDUSTRIAL SUPPLY CENTER
ATTN: DISC-ECF
700 Robbins Avenue
Philadelphia, Pennsylvania 19111
(215) 697-2735

The Defense Industrial Supply Center (DISC) replaced the Interdepartmental Screw Thread Committee (ISTC) as
preparing activity for the screw thread standards for federal services in 1976. Following this transfer, the National Institute of Standards and Technology (NIST) Handbook H28, which consisted of 3 volumes of screw thread standards, was converted to a basic cover document, FED-STD-H28, and individually issued sections FED-STD-H28/1, FED-STD-H28/2, ..., FED-STD-H28/22. Each section is coordinated with military activities, federal agencies, and industry associations prior to approval by the General Services Administration.

DISC works closely with the American National Standards Institute (ANSI) Accredited Committee B1 of the American Society of Mechanical Engineers (ASME) which produces the inch and metric screw thread standards for general use by industry. ANSI/ASME B1 and other industry standards are incorporated into equivalent sections of FED-STD-H28 rather than duplicating industry standards as had been the practice in the old Handbook H28.

Keywords
fasteners; metric; manufacturing;

DEPARTMENT OF THE INTERIOR

MINERALS MANAGEMENT SERVICE

Offshore Rules and Operations Division, Branch of Rules, Orders, and Standards, Room 3313A
381 Elden Street
Mail Stop 646
Herndon, Virginia 22070
(703) 787-1609

Authority
The Outer Continental Shelf Lands Act, 43 U.S.C. 1331 et seq., provides for the jurisdiction of the United States over the submerged lands of the Outer Continental Shelf (OCS), authorizes the Secretary of the Interior to lease such lands for the development and production of oil and gas, provides for the establishment and enforcement of safety regulations for oil and gas operations, and provides for environmental studies directed towards minimizing the impact of such operations.

Implementation
Approximately 200 mandatory requirements are codified as regulations in 30 CFR, Parts 250, 251, 252, 256, 280, 281, and 282. These regulations are for OCS minerals operations, geological and geophysical explorations, an information program, and for the management of pipeline rights-of-way. The regulations are supplemented by OCS Orders for each of the four OCS Regions.
| Application | Inspectors visit offshore operators on the OCS to see that safety requirements are followed. Minerals Management Service (MMS) personnel review required reports from lessees to ensure that drilling and production personnel are properly trained, prepared to implement safety contingencies, and that all produced oil gas is properly measured and royalties paid. |
| Adoption of Non-Government Standards | The MMS currently incorporates by reference 65 non-government standards. The majority of these standards were developed by the American Petroleum Institute and the American Society for Testing and Materials. |
| Committee Activity | The MMS participates in pertinent committees of the American Society of Mechanical Engineers, American Petroleum Institute, American Welding Society, American Society of Civil Engineers, American Concrete Institute, American Society for Quality Control, and the American Bureau of Shipping. |
| Standardization Activities | The MMS participates in the preparation of the full range of engineering material and operational standards concerning offshore drilling and production of minerals. These standards are used internationally. |
| Availability | MMS Regulations and OCS Orders are sold by Government Printing Office and MMS. |
| Keywords | offshore minerals exploration; continental shelf; offshore platforms; energy; safety; |

**DEPARTMENT OF THE INTERIOR**

**U.S. GEOLOGICAL SURVEY**

Information Systems Division  
12201 Sunrise Valley Drive, 7A210  
Reston, Virginia 22092  
(703) 648-7108

**Authority**  

**Implementation**  
A Memorandum of Understanding with the National Institute of Standards and Technology (NIST) dated February 1980 gives the U.S. Geological Survey (USGS) key agency responsibility for federal digital data standards in the earth sciences (geology, hydrology, cartography, geography).

**Application**  
The USGS Data Standards Committee decides on applicable standards and their priority and establishes work
Adoption of Nongovernment Standards

The USGS works with various professional organizations in the development of pertinent standards and uses them as much as possible. The organizations include: the American Public Health Association, American Water Works Association; Water Pollution Control Federation; American Association of Petroleum Geologists; American Society for Testing and Materials; Association of Official Analytical Chemists; Instrument Society of America; International Organization for Standardization; International Electrotechnical Commission; American Commission on Stratigraphic Nomenclature.

Committee Activity

The USGS participates in pertinent committees of ANSI, ISO, and the U.S. Geographic Names Committee.

Standardization Activities

A long-term program has been established to develop pertinent standards for data elements and their representation (name, definition, units of measure, digital coding methodology) in the earth sciences. After acceptance by the USGS and Department of the Interior, each standard is published as a USGS circular and sent to NIST as a proposed FIPS. Certain standards proposed as a FIPS are also introduced into the ANSI process as proposed national standards. The USGS recommends that established standards be used in all new and developing systems. All existing data systems should be modified in accordance with the standards at such time that future redesign or modification to the systems take place. To date, two standards have been accepted at USGS and proposed as FIPS: Codes for the Identification of Hydrologic Units in the United States and the Caribbean Outlying Areas, Geological Survey Circular 878-A, and Specifications for Representation of Geographic Point Locations for Information Interchange, Geological Survey Circular 878-B.

USGS Public Affairs Office; the USGS Branch of Distribution, 604 South Pickett Street, Alexandria, Virginia 22304; the USGS Data Administrator.

Keywords

earth sciences; geology; hydrology; cartography; topography; geography; data processing;
Authority

(1) 43 U.S.C. 31, March 3, 1879 (USGS Organic Act) and
(2) Memorandum of Understanding, signed February 1980 by the National Institute of Standards and Technology (NIST) and U.S. Geological Survey (USGS), assign to the USGS the leadership in developing and maintaining earth-science data element and representation standards for use in the federal establishment. The National Mapping Division (NMD) develops and maintains digital cartographic data standards.

Implementation

Digital cartographic data standards are promulgated by issuance of Technical Instructions when approved for use within the USGS, and by publication as a Federal Information Processing Standard (FIPS) by NIST when approved for use throughout the federal establishment.

Application

Use is mandatory (within the USGS or the federal establishment, depending upon level of approval) for all new and developing systems that utilize data elements and representations described by the standard. All existing data systems will be modified in accordance with the standards when redesign and modifications to the system take place.

Committee Activity

The NMD participates in the Federal Interagency Coordinating Committee on Digital Cartography (FICCDC) Standards Working Group which is charged with coordinating and promoting activities for exchanging digital spatial data among federal agencies.

Standardization Activities

The USGS has taken the leadership role in the development of the Spatial Data Transfer Standard (SDTS) that will be submitted to NIST for adoption as a FIPS. The SDTS has been produced to meet the need for easy transfer of spatial data from one spatial data handling system to another. It is being promoted throughout the federal community by FICCDC, and once approved as a FIPS, will be used by the federal government to distribute spatial data.

In addition to supporting the development of data exchange standards, the NMD has assembled and published Technical Instructions, including product standards and
data users guides that have been developed to govern the collection, archiving, and distribution of USGS digital cartographic data.

DEPARTMENT OF THE INTERIOR

U.S. GEOLOGICAL SURVEY

Water Resources Division
12201 Sunrise Valley Drive
Reston, Virginia 22092
(703) 648-5215

Authority

Implementation

U.S. Geological Survey (USGS) guideline documents for the collection and analysis of surface-water, ground-water, and water quality data include:

Application

Standards are voluntarily adopted by the Water Resources Division (WRD). All WRD offices and laboratories are reviewed on a scheduled basis and all quality assurance programs must reference the standards.

Adoption of Nongovernment Standards

Numerous nongovernment standards have been adopted by WRD. There is strong support for the development and use of consensus standards related to water resources data collection and analysis as developed by the International Organization for Standardization (ISO), the American Society for Testing and Materials (ASTM), and other groups.

Committee Activity

WRD participates in pertinent committees of the following: Interagency Advisory Committee on Water
Data, Coordinating Committees of U.S. Geological Survey (USGS) with each of the following federal agencies: National Oceanic and Atmospheric Administration; Bureau of Land Management; and Environmental Protection Agency; and committees for the American Water Resources Association, National Water Well Association, American Society of Civil Engineers, American Public Health Association, ASTM, ISO, and the World Meteorological Organization (WMO).

Standardization Activities

The USGS, as part of its implementation of OMB Circular A-67, has designated the Office of Water Data Coordination (OWDC) within WRD to identify methods used to acquire water data and to recommend methods for use by federal agencies. The OWDC accomplishes this with the advice and guidance of the IACWD. As of 1989, the IACWD, through OWDC, has published 10 chapters of the National Handbook of Recommended Methods for Water-Data Acquisition. The chapters include recommended methods on: 1. Surface Water, 2. Groundwater, 3. Sediment, 4. Biological and Microbiological Quality of Water, 5. Chemical and Physical Quality of Water, 6. Soil Water, 7. Drainage-Basin Characteristics, 8. Evaporation and Transpiration, 9. Snow and Ice, 10. Hydrometeorological Observations. Subcommittees of the IACWD periodically review and update the chapters.

WRD is cooperating with EPA, the Navy, and ASTM to accelerate the development of consensus standards for ground-water data collection, reporting, and analysis. WRD also develops standards, methods, and guidelines in the field of hydrology where no standards exist, to assure the reproducibility of analytical results and to give quality assurance to the programs and studies within WRD. WRD participates in the U.S. Geological Survey's interagency Data Standards Committee that identifies standards used within the agency.

MINE SAFETY AND HEALTH ADMINISTRATION

Office of Standards, Regulations and Variances
4015 Wilson Boulevard, Room 627, BT #3
Arlington, Virginia 22203
(703) 235-1910

Authority

Implementation
Several hundred safety and health regulations are codified in 30 CFR, Chapter I. These requirements include specifications for obtaining approval of certain equipment used in mines, required work practices, and maximum exposure levels to hazardous substances.

Application
Federal inspectors visit mine sites to see that the health and safety standards are followed, and the standards are also applied through voluntary compliance. The standards also establish procedures and requirements for application within the Mine Safety and Health Administration (MSHA). MSHA also tests for approval and certification of certain products for use in potentially explosive underground mine atmospheres.

Adoption of Nongovernment Standards
Whenever practicable MSHA adopts nongovernment standards. The majority of these standards have been developed by the American Conference of Governmental Industrial Hygienists (ACGIH), the American National Standards Institute (ANSI), the American Society of Mechanical Engineers (ASME), the National Fire Protection Association (NFPA), and the Society of Automotive Engineers (SAE).

Qualification, Certification, Calibration
Manufacturers of certain equipment for use in underground mines with potentially explosive or atmospheres must submit their equipment to MSHA for approval and certification.

Committee Activity
MSHA has technical experts who participate on committees of the following: American National Standards Institute; American Conference of Governmental Industrial Hygienists; Institute of Electrical and Electronics Engineers; and National Fire Protection Association.

Standardization Activities
MSHA's standards are directed at improving the occupational safety and health of workers in the mining industry. These standards concern safe work practices, maximum exposure levels to hazardous substandard or...
potentially harmful conditions, and performance criteria for the design of certain types of mining equipment. In 1983, MSHA's standards affected the working conditions of over 370,000 miners.

Availability

Sold by Government Printing Office and through a loose-leaf service offered by the Bureau of National Affairs, the Mine Safety and Health Reporter. Copies of specific standards may also be obtained directly from MSHA.

29 CFR Part 1915 -- Occupational Safety & Health Standards for Shipyard Employments;
29 CFR Part 1917-1918 -- Occupational Safety & Health Standards for Marine Terminals; Longshoring;
29 CFR Part 1926 -- Construction Safety & Health Standards;
29 CFR Part 1928 -- Occupational Safety & Health Standards for Agricultural Employments.

Application

Inspection of the workplace

Adoption of Nongovernment Standards

American National Standards Institute (ANSI)
National Fire Protection Association (NFPA)

Qualification, Certification, or Calibration

Throughout the OSHA standards, there are requirements for certain equipment to be listed, labelled, or approved by nationally recognized testing laboratories.

Committee Activity

National Advisory Committee on Occupational Safety and Health
Standards Advisory Committee on Construction Safety and Health
American National Standards Institute
The Occupational Safety and Health Administration (OSHA) develops and enforces occupational safety and health standards to provide protection to the nation's workers on their job. The standards are directed at the various hazards in which workers may be exposed. The purpose of the act is "to assure so far as possible every working man and woman in the nation safe and healthful working conditions and to preserve our human resources." OSHA adopted its initial standards on May 29, 1971 and they consisted of national consensus standards and the federal standards that were already in effect under other Department of Labor administered laws.

OSHA develops and promulgates occupational safety and health standards and issues regulations necessary for assuring compliance with its standards and regulations. The Directorates of Safety Standards Programs and Health Standards Programs have the main responsibility in carrying out these functions. When either of the Directorates determines a need, on the basis of information submitted by interested parties, scientific data from the field, or experience gained under other health and safety laws, the appropriate Directorate will develop new standards, revoke or modify existing standards using one of two procedures available. All regular proposals to promulgate, modify, or revoke an Occupational Safety and Health standard using the 6(b) procedure must be published in accordance with Administration Procedures Act (APA) requirements in the Federal Register to afford interested parties an opportunity to comment before the standard becomes effective or is revoked. A temporary emergency standards procedure (6(c) procedure) may be used to promulgate standards where the APA procedures are waived. Such a temporary emergency standard must be replaced by a 6(b) standard within 6 months.

In developing new standards or modifying standards, the Directorates of Safety or Health Standards determine whether there is a need for the establishment of a standards advisory committee to assist them in the standards-setting function. Once it is determined there is a need for a committee, one is appointed which consists of 5 to 15 members and is composed of representatives of management, labor, state and federal governments and the public. Advisory committee meetings are opened to the public and a transcript is made available for public review.

LIBRARY OF CONGRESS

COLLECTIONS SERVICES

101 Independence Ave., SE,
Room 642, Madison Bldg.
Washington, DC 20540
(202) 707-5325

Authority
Collection Services (by authority of the Library of Congress Regulation) has as its mission to develop qualitatively the Library's universal collections, which document the history and further the creativity of the American people, and which record and contribute to the advancement of civilizations and knowledge throughout the world; to acquire, organize, provide access to, maintain, secure, and preserve these collections. In achieving this mission, Collections Services takes part in the development and implementation of standards governing its technical services activities.

Implementation
Collections Services voluntarily follows OMB Circular A-119 which specifies the use of voluntary standards developed outside the government and participation in the development of voluntary standards as required for office missions.

Adoption of Non-Government Standards
The Library of Congress has adopted and applied the following guidelines and publications:

Dewey Decimal Classification: The Library of Congress Decimal Classification Division and Forest Press have agreed to develop and apply the Dewey Decimal Classification at the Library of Congress. The Dewey Decimal Classification schedule is applied on over 100,000 catalog records per year at the Library of Congress. Sixty thousand sets of the unabridged classification have been sold over the life of the edition (currently the 20th, 1989). Librarians choose
to use Library of Congress catalog records or apply the schedule themselves (primarily in public and school libraries).

Anglo-American Cataloging Rules: The standard for descriptive cataloging is developed by the international committee representing national libraries (including the Library of Congress) and the national library associations of Australia, Britain, Canada, and the United States.

Library of Congress Rule Interpretations: The second editions (1989) provides an accumulation of all currently valid Library of Congress rule interpretations issued since the Anglo-American Cataloging Rules was published in 1978.

International Standard Bibliographic Description: The standard for the part of descriptive cataloging called bibliographic description is developed by the International Federation of Library Associations and Institutions (IFLA), of which the Library of Congress is a member. It includes a variety of standard numbers, such as International Standard Book Number (ISBN), International Standard Serial Number (ISSN), etc.

Paris Principles: The quasi-standard for that part of descriptive cataloging called access points, it is a set of guidelines adopted by the International Conference on Cataloging Principles held in Paris in 1961.

Library of Congress Subject Headings: The twelfth edition (1989) and monthly updates are developed by the Subject Cataloging Division in Collections Services. It includes over 175,000 authorized subject headings and subdivisions which are accepted as a library standard of "keywords."

Subject Cataloging Manual: Subject Headings: The third edition (1988) provides guidelines for cataloging as practiced by the Subject Cataloging Division of the Library of Congress and explains the rationale for assigning subject headings to specific works.

Subject Cataloging Manual: Shelflisting: Published in 1987, the manual functions as a practical source for shelflisters and catalogers who wish to create call numbers in the spirit of Library of Congress policy and practice. It also describes the procedures to follow when assigning Cutter's.
Library of Congress classification schedules: The 45 separate schedules and updates give an authorized classification scheme for the arrangement of library materials by field of study. The Library of Congress system is used primarily by all university libraries, by some college and junior college libraries, and by some public libraries.

Standards developed by International Organization for Standardization (ISO), Technical Committee (TC) 46, Documentation, and TC 97, Computer Information Processing.

The Library of Congress together with the American Library Association develops romanization systems for the major non-Roman alphabet languages. The tables have become the de facto standard of the North American library community.

MARC Formats: The Library of Congress is instrumental in the development of MARC (machine-readable cataloging) formats, which have been adopted as national and international standards. The MARC formats incorporate standards, such as cataloging rules and principles. The formats also include de facto standards for content designators.

Computer Protocols: Assist in establishing library and information community usage profiles.

Collections Services participates in the committees or organizations responsible for the guidelines and publications listed above including:

(1) Subject Analysis Committee, Resources and Technical Services Division (RTSD), American Library Association (ALA)

(2) Committee on Cataloging: Description and Access, RTSD, ALA

(3) Forest Press Committee

(4) Decimal Classification Editorial Policy Committee
Joint Steering Committee for Revision of Anglo-American Cataloging Rules

NISO, X3, ISO/TC 46, and various related committees and councils

National Institute of Standards and Technology

International Serials Data System (ISDS), including its Governing Board and Directors

Serials Industry Systems Advisory Committee (SISAC)

Book Industry Systems Advisory Committee (BISAC)

Machine-Readable Form of Bibliographic Information Committee (MARBI)

International Federation of Library Associations and Institutions (IFLA)

Linked System Project (LSP) Committees

The Library of Congress:

- has principal responsibility for the development of standards for the interchange of bibliographic records (including the format of the data in those records, coded data such as language and country codes, character sets, and works with others on communication protocols);

- acts as the maintenance agency in the United States for the International Standard Serial Number standard and cooperates with the maintenance agency in the United States in the use of accurate International Standard Book Numbers;

- acts as maintenance agency for information retrieval protocol;

- is active in developing standards for data in bibliographic records, such as holding statements for serial publications;

- formulates official Library of Congress interpretations of cataloging rules; and

- distributes products of standardized cataloging and bibliographic activities in these formats:

  a) catalog cards
  b) MARC tapes
and bibliographic activities in these formats:

a) catalog cards
b) MARC tapes
c) book catalogs, such as the
   - National Union Catalog
   - Music, Books on Music, Sound Recordings
d) computer output microfiche catalogs, etc.
e) CD-ROM products

Availability

Many of the publications listed above are available from the Library of Congress' Cataloging Distribution Service.

The Anglo-American Cataloging Rules, 2nd edition are sold by the American Library Association.

Other standards are available from IFLA, ISO, NISO, etc.

LIBRARY OF CONGRESS

INFORMATION TECHNOLOGY SERVICES

10 First Street, SE
Washington, DC 20540
(202) 707-5114

Implementation

The Library of Congress (LC) pilot program began service operations in 1984, involving all forms of optical disks. A task was established to track the emerging standards in this area, document and identify those areas in which the lack of standards presents problems in information interchange on optical disk, and share findings with other research libraries and related institutions with which the Library would be likely to engage in such information interchange. The library has been represented on the ANSI-accredited standards committee X3B11 on Optical Digital Data Disks since its formation in April 1984 and has participated in international standards developments on the ISO SC 23 committee
| Availability | An aperiodic series of reports are planned as well as publication of findings in the open literature. |
| Keywords | optical disk; videodisc; digital storage; magneto-optical disks; information processing; optics; |

**LIBRARY OF CONGRESS**

**NATIONAL LIBRARY SERVICE FOR THE BLIND AND PHYSICALLY HANDICAPPED**

1291 Taylor Street, NW
Washington, DC 20542
(202) 707-5100

**Implementation**

(1) Published the guidance document, Published Approved Recommendations on Working Out National Standards of Library Service for the Blind, August 1983. This was compiled and adopted by the Standards Development Committee, Section of Libraries for the Blind, Int'l. Federation of Library Associations.

(2) Published the guidance document Standards of Service for the Library of Congress Network of Libraries for the Blind and Physically Handicapped, revised 1984. This was developed and adopted by the Association of Specialized and Cooperative Library Agencies, the American Library Association.

**Application**

The recommendations on Working Out National Standards are used by member countries in developing library service to the blind and in promoting international standards of service. The Standards of Service are used in evaluating the quality of library service provided by each library in a cooperating network either through self-evaluation or on-site inspections by representatives of the Library of Congress (LC), National Library Service for the Blind and Physically Handicapped (NLSBPH).

**Committee Activity**

American Library Association, Committee on Standards.

**Standardization Activities**

Reviews and approves proposed and existing standards for continued relevance to the state of library development and service for the blind and physically handicapped.

**Availability**

(1) On request from Executive Secretariat, Office of the Director, National Library Service for the...
Photographic standards are specified in various conversion programs for preservation. Bibliographic standards are followed in appropriate divisions to promote more efficient transmission of information. Standards work for permanence of paper for printed library materials is a part of the Library's National Preservation Program.

All new and revised ANSI PH1-5 standards (and those succeeded by IT9) are required for all preservation and conservation work involving photography. ANSI/AIIM standards are used for microphotography. ANSI/NISO standards are adopted for bibliographic and information-related work.

Various staff members serve on American National Standards (ANSI) committees and subcommittees, especially those dealing with photographic materials in PH1, PH4, and PH5 (some PH1 standards now are designated as IT9), as well as the Association for Information and Image Management (AIIM) which deals with microphotography and micrographics. In addition, staff members have participated in Z30 and Z39 standards activities, which involves, respectively, library work and publishing practice, and bibliographic description of microforms, serials, and technical reports, plus paper for printed library materials.

As members of the committees listed above, staff members view and vote on the adoption of standards in those areas. Because no standards existed for micrographic reproduction when the Library of Congress had need of such standards, four specifications were developed for the microfilming of newspapers, books and pamphlets, library catalog cards, and manuscripts. The newspaper specification has since become ANSI/AIIM MS111-1987, Recommended Practice for Microfilming.
Printed Newspapers on 35mm Roll Microfilm.

Availability
All Library of Congress microphotographic specifications have been reprinted and are available from the Association for Information and Image Management, 1100 Wayne Avenue, Silver Spring, MD 20910.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

SAFETY, RELIABILITY, MAINTAINABILITY AND QUALITY ASSURANCE DIVISION

Room B336, FB 10
Washington, DC 20546
(202) 453-2633

Title 10, U.S.C. Chapter 145 and Department of Defense Directive 4120.3

(1) Memorandum of Understanding Between the Department of Defense (DoD) and the National Aeronautics and Space Administration (NASA) Concerning NASA's Participation in the Defense Standardization Program.

(2) NASA Management Instruction NPD 5320.5, Basic Policy for Electronic Parts.

(3) NASA Handbook NHB 5300.4(1A), Reliability Program Provisions for Aeronautical and Space Contractors.

Implementation of NASA standards, instructions and handbook is through purchase orders, product qualifications, and manufacturing line certification.

ASTM test methods are used in MIL-STD-977 as alternates to military standard test methods and procedures for certification of microcircuit production lines.
Qualification, Certification, or Calibration

Qualification and certification to various military specifications is accomplished jointly with Defense Electronic Supply Center under the DoD Defense Standardization Program.

Committee Activity

Observer to the Department of Defense advisory group on Qualified Products Lists Policy and Procedures.

Custodian/Preparing Activity to various military specifications and standards in the Federal Supply Class 59 (Electrical).

Standardization Activities

Established a NASA Standard Parts Program (NSPP) in 1974. The program is administered by the Office of the Chief Engineer at NASA Headquarters and operated by the Marshall Space Flight Center. Standardization concentrates on extended reliability electronic parts with MIL-STD-975, NASA Standard Parts List (NSPL), as the baseline document. The Program uses the DoD specification and standards system but makes in depth analyses of part before approving for the NSPL. It has worked closely with the Air Force to develop a quality level of parts for use in critical space applications that is designated class "JAN S."

Availability

NASA handbooks are available from Government Printing Office. NASA prepared military specifications and standards are available from Naval Publications and Forms Center.

Keywords

aerospace; high reliability; parts control; electronic parts;

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Archival Research and Evaluation Staff
8th and Pennsylvania Avenue, NW, Room 14N
Washington, DC 20408
(202) 501-5540

Authority

44 U.S.C. 2101 et seq., April 1, 1985, the Archivist of the United States shall provide for the preservation of federal records of continuing value. As provided in 44 U.S.C. chapters 29 and 33, the Archivist of the United States is authorized to establish standards for the production and reproduction of records by federal agencies.

Implementation

Standards for micrographics are codified as regulations in 36 CFR, Part 1230.

Application

National Archives and Records Administration (NARA) requires agencies to produce and maintain microfilm of permanent records according to production and
| Adoption of Nongovernment Standards | NARA has adopted ANSI standards for photographic materials as the basis of regulations. |
| Qualification, Certification, or Calibration Activity | Agencies are to certify that the permanent record film they produce meets ANSI standards. |
| Committee Activity | NARA participates in pertinent committees of the following: Accredited Standards Committees PH1 (Photographic Films, Plates, and Papers) and PH4 (Photographic Processing Procedures), and Library, Documentation, and Related Publishing Practices (Z39). |
| Standardization Activities | NARA is active in the preparation of standards concerned with the manufacturing, processing, and storing of materials used to maintain permanently valuable information of the federal government. This includes paper, film, optical disk, and magnetic tape. NARA observes, analyzes, and may recommend or require data exchange standards for the transfer and storage of permanent federal records in electronic form. Standards and specifications of national standardizing groups are utilized to the maximum extent. Where they are not adequate, NARA prepares regulations for federal agencies. |

**NUCLEAR REGULATORY COMMISSION**

**NUCLEAR REGULATORY RESEARCH**

Room 154, NLBS
Washington DC 20555
(301) 492-3700

| Adoption of Nongovernment Standards | Many Nuclear Regulatory Commission (NRC) guides refer to or endorse national standards that are developed by recognized national organizations, i.e., ANSI, ASTM, ASME, often with NRC participation. NRC makes use of a national standard in the regulatory process only after an independent review by the NRC staff and after public comment on NRC's planned use of the standard has been reviewed. |
Committee Activity

NRC participates on more than 300 interagency, nongovernmental, and international standards committees. The NRC staff is active in national standards programs, particularly with respect to setting priorities. NRC participation derives from a need for national standards to define acceptable ways of implementing the NRC's basic safety regulations. Approximately 200 NRC staff members serve on working groups organized by technical and professional societies.

Standardization Activities

NRC standards are primarily of two types — Regulations and Regulatory Guides.

Regulations set forth requirements that must be met by NRC licensees in Title 10, Chapter I, of the Code of Federal Regulations. When NRC proposes new or amended regulations, they are normally published in the Federal Register to allow interested person time for comment before they are adopted. This is required by the Administrative Procedure Act. Following the public comment period, the regulations are revised, as appropriate, to reflect the comments received. Once adopted by the NRC, they are published in the Federal Register in final form, with the date they became effective. After that publication, rules are codified and included annually in the Code of Federal Regulations.

Regulatory Guides are issued to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses. Regulatory Guides are not substitutes for regulations, and compliance with them is not required.

The guides are issued in the following ten broad divisions: Power Reactors, Research and Test Reactors, Fuels and Materials Facilities, Environmental and Siting, Materials and Plant Protection, Products, Transportation, Occupational Health, Antitrust and Financial Review, and General. NRC issues the guides for public comment in draft form before an official staff position has been established. Regulatory guides may also be withdrawn when changes make them obsolete.

DEPARTMENT OF STATE

U.S. NATIONAL COMMITTEE FOR THE INTERNATIONAL TELEGRAPH AND TELEPHONE CONSULTATIVE (CCITT)

Bureau of International Communications and Information Policy, Telecommunications and Information Standards Directorate
Room 6317 N.S.
2201 C Street, NW
Washington, DC 20520
(202) 647-5220       FAX: (202) 647-7407

Application
Voluntary standards (CCITT Recommendations) for telecommunications equipments, networks and services are issued by the International Telecommunications Union, a specialized agency of the United Nations, for use by each nation, according to its needs and laws. The current CCITT Recommendations (standards) are identified as the "Blue Books." There are over 19,000 pages, covering the CCITT Plenary or study period starting in 1989 and running through the next Plenary Assembly presently scheduled for 1992.

Adoption of Nongovernment Standards
Within the United States, the vast majority of telecommunications standards are produced by industry participants and organizations. Typical of these organizations are AT&T, MCI Telecommunications, NYNEX, Bell South, the IEEE, TIA, CBEMA, and ANSI T1 Committee. Twenty-three government agencies participate in these organizations as active players and users.

Committee Activity
Industry participants with an interest in telecommunications may join the CCITT and/or the U.S. National Committee of the CCITT at their own initiative, under the authority of the Department of State which represents the United States as the telecommunications Administration in the treaty organization - the ITU. They may also petition the FCC for recognition as a Recognized Private Operating Agency and may choose to join the CCITT and/or the U.S. National Committee of the CCITT.

The U.S. National Committee develops technical, operational and accounting contributions from U.S. industry (both government and private sector) for approval and submission to the CCITT as U.S. contributions. The U.S. Delegation to the CCITT is usually chaired by a representative of the Department of State. The chair speaks for the United States at the international sessions and meetings of the CCITT.
where the final version of the standards are negotiated.

**Standardization Activities**

Telecommunications standards may be initiated by a person or company primarily through one of the U.S. technical committees such as IEEE, ANSI T1, CBEMA, TIS, etc. (many contributions - mostly non-technical - begin their process directly at the U.S. CCITT Study Group level). These contributions are developed to maturity by these bodies, and are submitted for consensus vote in their respective arenas. They are then submitted by a company, committee, or person to the U.S. National Committee for consensus at the U.S. National Committee level. With consensus, the contribution becomes a U.S. source document for the attention of the CCITT. The nations of the CCITT will develop the standard further and finally arrive at consensus at an international meeting. The contribution then becomes a CCITT standard.

**Availability**

The CCITT Standards are sold by the ITU. They are also available for local sale.

**Keywords**

telecommunications; telephone; data communications; Integrated Services Digital Network (ISDN); telematics; ITU;

**DEPARTMENT OF TRANSPORTATION**

**FEDERAL AVIATION ADMINISTRATION**

Program Management Division
800 Independence Avenue, SW
Washington, DC 20591
(202) 267-8315

**Authority**

The Federal Aviation Administration (FAA) was created under Title 6 of the Federal Aviation Act of 1958 to provide for the regulation and promotion of civil aviation in such a manner as to best foster its development and safety, and to provide for the safe and efficient use of the airspace by both civil and military aircraft. The Federal Aviation Regulations are promulgated under Title 14 of the Code of Federal Regulations. The first regulation and civil aviation standards originated with the passage of the Air Commerce Act of 1926.

**Implementation**

FAA standards are either regulatory or non-regulatory in nature. Those in the former category are found in the various numbered parts of the Federal Aviation Regulations (FAR's) and as such are subject to review in accordance with the Administrative Rulemaking
Procedures in which the public participates. Regulatory announcements and Notices of Proposed Rulemaking are published in the Federal Register. The non-regulatory standards generally contained in the FAA Advisory Circulars (AC's) serve principally as the means of providing safety information to the public with respect to aircraft operations or a related aeronautical interest. Non-regulatory circulars also provide the public with guidelines in meeting regulatory requirements.

**Standardization Activities**

Regulations and standards are developed and administered by various offices and services within FAA. The Associate Administrator for Aviation Standards is responsible for most of the regulatory material which includes the certification, operations, and maintenance of aircraft, engines, propellers, and aircraft equipment; licensing of airmen and airman aeromedical standards; for aircraft operational procedures, and the certification of schools, repair stations, and parachute lofts; and for airport and air carrier security. The Air Traffic Service is responsible for regulations and standards governing airspace utilization, air traffic control and procedures, and for the establishment and installation of navigational facilities. The Associate Administrator for Airports is responsible for regulations and standards concerning airport certification and airport grants; and the Associate Administrator for Policy and International Aviation for aircraft noise standards.

**Availability**

The Federal Aviation Administration periodically publishes a revised Advisory Circular Checklist (AC00-2) and Status of the Federal Aviation Regulations (AC00-44) which list current AC's and FAR's. These may be obtained free of charge from the address above. Regulations may be purchased from the Government Printing Office.

**Keywords**

**DEPARTMENT OF TRANSPORTATION**

**FEDERAL HIGHWAY ADMINISTRATION**

Office of Engineering, Highway Design, HNG-14
400 7th Street, SW
Washington, DC 20590
(202) 366-1327 or (202) 366-4853
**Authority**

23 U.S.C. 109, 315 and 402; 49 CFR 1.48(b) unless otherwise noted Source 43 FR16832, May 7, 1986 unless otherwise noted.

**Implementation**

23 CFR Part 625 — Design Standards for Highways

**Application**

Standards, specifications, policies, guides and references are approved by the Federal Highway Administration for application on federal-aid projects. The regulation (23 CFR 625) does not establish federal standards for work that is not federally funded; however, the safety related criteria of the referenced documents are established as goals for developing state and local Safety Programs Standard 12, 23 CFR, Part 1204.4.

**Adoption of Nongovernment Standards**

Of the 42 publications and references noted in 23 CFR, Part 625, 29 were developed by American Association of State Highway and Transportation Officials (AASHTO); one by the American Welding Society; and two by the Transportation Research Board and the remaining 10 are Federal Highway Administration publications or references.

**Committee Activity**

The Federal Highway Administration participates in pertinent committees of the American Association of State Highway and Transportation Officials.

**Standardization Activities**

The Federal Highway Administration approves the engineering standards and specifications which are used on federal-aid projects. In addition these approved references are cited as goals for developing safety programs for all public highways as required by standard 12, 23 CFR, Part 1204.4. Because of these two well established uses, numerous other state and local highway related organizations employ the referenced documents directly or extract significant portions in the development of their own standards and specifications.

The standards and specifications of the American Association of State Highway and Transportation Officials, which is an organization made up of the state highway agencies plus those agencies in Puerto Rico and the District of Columbia and thus is viewed as the national highway organization, are utilized to the maximum extent practicable. Where such standards and specifications do not exist or where they do not adequately provide for the federal interest, the Federal Highway Administration prepares new or supplemental documents to provide for the needs of its federal-aid program.

**Availability**

Federal Highway Administration
highways; bridges; traffic control; design; materials; construction; transportation;

DEPARTMENT OF TRANSPORTATION

FEDERAL HIGHWAY ADMINISTRATION

Office of Environmental Policy
400 7th Street, SW
Washington, DC 20590
(202) 366-2045

Authority

23 U.S.C 109(i) - The Federal-Aid Highway Act of 1970 requires that noise be considered in the development of new highway projects and that standards for highway noise levels compatible with various land uses be developed and implemented.

Implementation

The noise standards mandated by 23 U.S.C 109(i) are codified in 23 CFR, Part 772. The standards provide procedures for noise studies and noise abatement measures to help protect the public health and welfare, supply noise abatement criteria, and establish requirements for information to be given to local officials for use in the planning and design of highways approved pursuant to Title 23, United States Code (U.S.C.).

Application

The standards apply to any proposed federal or federal-aid highway project for the construction of a highway on new location or the physical alteration of an existing highway which significantly changes either the horizontal or vertical alignment or increases the number of through-traffic lanes. They also apply to any proposed federal or federal-aid project for noise abatement on an existing highway.

Committee Activity

The Federal Highway Administration participates in pertinent committees of the American Association of State Highway and Transportation Officials, Transportation Research Board, and Society of Automotive Engineers.

Standardization Activities

The Federal Highway Administration (FHWA) is active in the preparation and implementation of highway traffic noise and construction noise standards for the planning, design, and construction of federal-aid funded highways. These highways are constructed by state and local highway agencies.

The FHWA coordinates the preparation of the standards with the Environmental Protection Agency, other federal
agencies, the states, and the public.

The public who lives next to federal-aid funded highways receive the benefit of a substantial reduction in highway traffic noise if the states determine that noise abatement is reasonable and feasible.

FHWA standards have produced over 380 miles of noise barriers to reduce highway traffic noise in residential areas, schools, hospitals, and parks.

DEPARTMENT OF TRANSPORTATION

FEDERAL HIGHWAY ADMINISTRATION

Office of Highway Operations - HHO-1
400 7th Street, SW
Washington, DC 20590
(202) 426-0340

Authority

U.S.C. Title 23, Highways; more specifically Sections 106 (Specifications), 109 (Standards), 112 (Letting of Contracts), 114 (Construction), and 116 (Maintenance).

Implementation

23 CFR 625.3 and 49 CFR

Application

Construction, maintenance, materials, and contracting regulations, standards, and practices are applicable to all federally funded highway projects both on and off the federal-aid highway systems. Projects may be administered by the Federal Highway Administration, state highway agency, or local governments. Application and compliance of accepted standards and specifications is assured by on-site inspection, process and product reviews and other management techniques.

Adoption of Nongovernment Standards

The Federal Highway Administration actively participates with industry and state highway agency organizations in the development and implementation of highway construction, material, and maintenance standards and specifications including the American Association State Highway and Transportation Officials, American Society for Testing and Materials, and the Institute of Traffic Engineers.

639
**Qualification, Certification, or Calibration**

Actual project standards/specifications are developed by each administering agency (state or local) and are reviewed and approved by the Federal Highway Administration. The general guidance provided by the above noted standards is used as a basis for the locally developed standards/specifications.

**Committee Activity**

The Federal Highway Administration is actively involved in industry/state highway agency organizations which develop the national standards cited in the CFR. Committees include both management and technical functions of the American Association of State Highway and Transportation Officials, American Society for Testing and Materials, Institute of Traffic Engineers, American Society of Civil Engineers, National Society of Professional Engineers, and American Road and Transportation Builders Association, etc.

**Standardization Activities**

The Federal Highway Administration administers the federal-aid highway program and continuity of the national highway network from a third party approach. Although seldom the contracting authority, by serving as the nucleus for the highway industry, the Federal Highway Administration assures reasonable standardization without stymieing creativity and new methods development. This approach allows the state highway agency and local governments the maximum flexibility practical while still attaining national uniformity.

**DEPARTMENT OF TRANSPORTATION**

**FEDERAL HIGHWAY ADMINISTRATION**

Office of Motor Carriers
400 7th Street, SW
Washington, DC 20590
(202) 366-2519

**Authority**

Authority to regulate the qualifications and maximum hours of service of employees, the licensing standards for commercial drivers, and safety of operations and equipment is specified in 49 U.S.C. 3102, 3104, and 49 U.S.C. App. 2505, 2701-2716.

Authority to regulate the transportation of hazardous substances performed by motor carriers by state or local government agencies or by the Federal Highway Administration.

Authority to enforce EPA noise control standards applicable to interstate motor carriers is specified in the Noise Control Act - 42 U.S.C. 4917.

Authority to require motor carriers to maintain minimum levels of financial responsibility is specified in 49 U.S.C. 10927 note.

Authority to establish certain federal size limits for commercial motor vehicles is provided by the Surface Transportation Act of 1982 - 49 U.S.C. App.2311,2316.

Authority to penalize States that fail to enforce federal weight limits on the Interstate Highway System is specified in 23 U.S.C. 127.

Implementation

Mandatory regulations are codified in Title 49 and 23 of the Code of Federal Regulations. The rules in Title 49 range from the Federal Motor Carrier Safety Regulations (FMCSRs) [Parts 390-399], including the hours of service of drivers [Part 395], to compliance with interstate noise emission standards [Part 325], minimum levels of financial responsibilities [Part 387], and the transportation of hazardous materials [Parts 171-173, 177-178]. They cover interstate motor carriers of passengers and property, as well as their vehicles and drivers.

In addition, Commercial Driver's License (CDL) standards are codified in 49 C.F.R. Part 383 and apply to States, employers, and all drivers of commercial motor vehicles having a gross vehicle weight rating over 26,000 lbs., designed to carry 16 or more persons, or needing placarding for hazardous materials. Unlike other Parts of the FMCSRs, the CDL regulations apply without distinction to inter- and intrastate transportation. CDL provisions include a prohibition on multiple licenses; testing and licensing procedures which States and drivers must follow; employer responsibilities; mandatory driver disqualifications for alcohol, drug, and other serious traffic violations and felonies; and a nationwide information clearinghouse on commercial drivers.

Vehicle size and weight regulations and state certification requirements are codified in 23 C.F.R. 657-658. These include regulation of vehicle lengths and widths on the National Network for large trucks (published in Appendix A to Part 658) which consists of the Interstates and other designated federal-aid Primary highways.
Application

Office of Motor Carrier Safety specialists conduct safety and compliance reviews of motor carriers and hazardous materials shippers. They also conduct roadside inspections of vehicles and of drivers' required paperwork. Vehicles and/or drivers not in compliance with the FMCSRs are placed out of service where certain hazards to safety increase the likelihood of an accident.

Office of Motor Carrier transportation specialists review state compliance with the CDL program as well as States' certifications that they are enforcing federal size and weight limits and all state laws on federal-aid highways in the State.

Adoption of Standards

The FMCSR and the CDL standards have been adopted in whole or in part by most of the states. CDL program implementation is mandatory for each State, to avoid a reduction in highway funding. States are required to test and issue CDLs to all drivers of commercial motor vehicles prior to April 1, 1992. Supplemental grants to assist in CDL implementation are available to States based on the number of CDL tests given and licenses issued. Also, States applying for funding under the Motor Carrier Safety Assistance Program (MCSAP) are required to have adopted the FMCSRs or have compatible state safety regulations.

Each state must enforce the federal size and weight requirements on their Interstate highways. They must enforce the federal size requirements on their National Network highways. States are required to certify annually that they are enforcing their size and weight laws on all of their federal-aid highways. States whose enforcement efforts on federal-aid highways are inadequate may lose 10-percent of their federal-aid highway funds.

Availability

FHWA regulations are available from the Government Printing Office and several private organizations.

Keywords

commercial motor vehicles; motor carrier; commercial drivers license; hazardous materials; bus; truck; driver qualifications;

DEPARTMENT OF TRANSPORTATION

FEDERAL HIGHWAY ADMINISTRATION

Office of Traffic Operations
400 7th Street, SW
Washington, DC 20590
(202) 366-0411 or (202) 366-0372
Authority

Implementation

23 CFR 655, Subpart F, Traffic Control Devices on federal-aid and other streets and highways. A set of national standards have been developed and approved by the Federal Highway Administrator in cooperation with the state highway agencies. These standards are contained in the Manual on Uniform Traffic Control Devices (MUTCD). The Federal Highway Administration will only approve state or other federal agency MUTCDs (or supplements) that are in substantial conformance with the national MUTCD.

Application

The standards contained in the MUTCDs apply to all highways open to public travel.

Committee

The MUTCD was developed with cooperation of the:

National Committee on Uniform Traffic Control Devices
American Association of State Highway and Transportation Officials
Institute of Transportation Engineers
National Committee on Uniform Traffic Laws and Ordinances
National Association of Counties
National Association League of Cities
National Association of Governors' Highway Safety Representatives
International Association of Chiefs of Police, Inc.
National Electrical Manufacturers Association
American Road and Transportation Builders Association
International Bridge, Tunnel, and Turnpike Association

Standardization Activities

Existing Highways -- Each state, in cooperation with its political subdivisions, and federal agencies shall have a program which shall include provisions for the systematic upgrading of substandard traffic control devices and for the installation of needed devices to achieve conformity with the MUTCD.

New or Reconstructed Highways -- federal-aid projects for the construction, reconstruction, resurfacing, restoration, or rehabilitation of streets and highways shall not be opened to the public for unrestricted use until all appropriate traffic control devices, either temporary or permanent, are installed and functioning properly. Both temporary and permanent devices shall conform to the MUTCD.

Construction Area Activities -- All traffic control devices installed in construction areas shall conform to the MUTCD.
Availability

The MUTCD is available from the Government Printing Office.

Keywords

traffic control devices; curb and pavement markers; regulatory signs; warning signs; public safety; transportation;

DEPARTMENT OF TRANSPORTATION

MARITIME ADMINISTRATION

Office of Ship Construction, Division of Naval Architecture
400 Seventh Street, SW, Room 2109
Washington, DC 20590
(202) 366-5836

Authority

The development of guidance specifications for ship construction was first authorized May 20, 1960, by the Federal Maritime Board.

Implementation

There are three shipbuilding guidance specifications which are for voluntary use: (1) Standards Specifications for Merchant Ship Construction PB 290400; (2) Standards Specifications for Diesel Merchant Ship Construction PB 257261; (3) Standards Specifications for Slow Speed Diesel Merchant Ship Construction.

Application

The guidance specifications are for voluntary use by shipbuilders.

Adoption of Nongovernment Standards

Those referred to include: American Society for Testing and Materials (ASTM), American Society of Mechanical Engineers (ASME), Heat Exchange Institute, and American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE).

Qualification, Certification, or Calibration

There are no specific requirements for use of the guidance specifications.

Committee Activity

American Society for Testing and Materials

Standardization Activities

Active in the preparation of consensus shipbuilding standards through ASTM.

RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION

Office of Pipeline Safety, Standards Division
400 7th Street, SW
Washington, DC 20590
(202) 426-2392

Authority
Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. 1671 et seq.)

Implementation
Standards for pipelines that carry natural gas or gas that is flammable, toxic, or corrosive are in 49 CFR, Part 192.

Standards for liquified natural gas (LNG) plants are in 49 CFR, Part 193.

Standards for interstate pipelines carrying hazardous liquids, such as petroleum, petroleum products, or anhydrous ammonia are in 49 CFR, Part 195.

Regulations to require an anti-drug program for pipeline & LNG plant employees that perform operation, maintenance and emergency-response functions are in 49 CFR, Part 199.

Application
Standards are binding on pipeline operators by law. Federal and state inspectors visit operators' facilities to check on compliance.

Adoption of Nongovernment Standards
The federal standards incorporate by reference parts of nongovernment developed standards, principally API, ASTM, ANSI and NFPA.

Committee Activity
The Office of Pipeline Safety sponsors two advisory committees: The Technical Pipeline Safety Standards Committee and the Technical Hazardous Liquid Pipeline Safety Standards Committee. These committees advise on
proposed rule making activities.

Staff members participate in or are members of various nongovernment standards setting committees, including those of the ASME, API, and NFPA.

**Standardization Activities**

Standards cover design, construction, operation, and maintenance of pipelines. Benefits derive from savings in life and property damage, including environmental damage in the case of oil spill prevention. Original standards were based on standards widely followed by industry. Subsequent efforts have been directed toward improvements needed for safety as demonstrated by accident statistics, and toward changing regulations that are not cost beneficial.

**Availability**

Sold by Government Printing Office, and very small quantities available from Office of Pipeline Safety

**Keywords**

safety; gas; hazardous liquids; pipeline; LNG plants; design; construction; operation; maintenance; corrosion control; transportation; drugs; petroleum;

**DEPARTMENT OF TRANSPORTATION**

**UNITED STATES COAST GUARD**

Office of Marine Safety, Security and Environmental Protection
2100 Second Street, SW
Washington, DC 20593-0001
(202) 267-2200

**Authority**

Maritime shipping laws related to vessels and seamen are codified and enacted into positive law as Subtitle II of Title 46, United States Code, 2101 through 13110.

**Implementation**

Mandatory standards for commercial vessel construction and operation, as well as manning and personnel licensing, are codified in 46 and 33 CFR. Program is administered under the direction of the Chief, Office of Merchant Marine Safety, U.S. Coast Guard (USCG) Headquarters. A system of district and local port offices (marine safety offices/officers in charge, marine inspection) provide inspection and licensing services to assure compliance with the standards and regulations by shipyards, vessel operators, and merchant mariners.

**Application**

USCG inspectors periodically inspect commercial, foreign, and domestic vessels to assure compliance.
Adoption of Nongovernment Standards

USCG commercial vessel safety regulations incorporate a wide variety of nongovernment standards by reference.

Committee Activity

The Office of Merchant Marine Safety, Security and Environmental Protection participates in those standards developing committees whose standards are used by, or affect, the merchant marine. These include the International Maritime Organization (IMO), ISO, and IEC, as well as the Society of Naval Architects and Marine Engineers (SNAME), American Bureau of Shipping (ABS), ASTM, ASME, API, UL, and a dozen other domestic organizations.

Standardization Activities

USCG commercial vessel safety standards are incorporated into the United States Code of Regulations, Titles 46 and 33. The marine inspection program's regulatory approach includes active participation in voluntary standards programs. By actively participating in voluntary standards, the Coast Guard raises issues of public interest and can speak for the public in matters of safety. Also, where industry or owners have not set necessary safety requirements, the Coast Guard can catalyze their development.

UNITED STATES COAST GUARD

Recreational Boating Product Assurance Branch (G-NAB-6) Auxiliary, Boating, and Consumer Affairs Division Washington, DC 20593-0001 (202) 267-0984

Authority

Implementation

Standards issued to date are in 33 CFR Part 183 and include:

(1) Display of Capacity Information
(2) Safe Loading
(3) Safe Powering
(4) Basic Flotation
(5) Level Flotation
(6) Electrical Systems
(7) Fuel Systems

647
### Application

Boating safety standards are published as mandatory rules in accordance with the Administrative Procedures Act (APA). Final rules become a part of the Code of Federal Regulations. Each proposed rule and each final rule is published in the Federal Register.

### Committee Activity

Staff members serve on various committees of the American Boat and Yacht Council, Society of Automotive Engineers, National Fire Protection Association, and American Bureau of Shipping.

### Standardization Activities

The Auxiliary, Boating, and Consumer Affairs Division is responsible for the development of regulations related to boating safety. The Recreational Boating Product Assurance Branch of the division is responsible for the development of safety standards for recreational boats and associated equipment. Safety standards must be based upon a demonstrated need. This need is frequently related to research involving actual boating safety problem areas. Problem areas are identified from sources such as the Boating Accident Reports, State Accident Reports, Coast Guard District Reports, Defect Notification Reports, and consumer complaints. Specific problems are identified, categorized, and subdivided into specific project areas for standards development.

**DEPARTMENT OF THE TREASURY**

**BUREAU OF ALCOHOL, TOBACCO, AND FIREARMS**

National Laboratory Center  
1401 Research Boulevard  
Rockville, Maryland 20850  
(301) 294-0410

### Authority

Various laws relating to the production, storage, and taxation of alcohol and tobacco products, firearms, and explosives.

### Implementation and Application

Standards have been established by the Bureau of Alcohol, Tobacco and Firearms (BATF) Laboratories, which apply to hydrometers, thermometers, and William's...
test tubes supplied to the Bureau for testing the alcoholic content of beverages. Although these standards are not usually published, they are supplied to bidders for manufacturing contracts.

In cooperation with various industry segments, BATF prescribes and enforces standards of identity for alcoholic beverages. These standards are established by regulations applicable to all such beverages produced in or imported into the United States. Standards for the various classes of wines are published at 27 CFR, Part 4; those for distilled spirits are published at 27 CFR, Part 5.

The BATF Laboratories set specifications for ethyl alcohol, denatured alcohol, proprietary solvents, and special industrial solvents. These are incorporated in Federal Specification O-E-760B, issued by the General Services Administration. Through regulations issued by BATF at 27 CFR, Parts 211 and 212, these specifications are applicable to the production of these products in the United States.

The standards of identity for small cigars, as defined in 26 U.S.C. 5702 and in regulations issued by BATF at 27 CFR, Part 270, are further established by laboratory test procedures set up by the BATF Laboratories. These analytical tests are utilized to enforce these standards for small cigars, as differentiated from cigarettes, upon all such products consumed within the United States.

Additionally, the Bureau sets specifications relating to construction of storerooms for explosive materials. These specifications are published in 27 CFR, Part 181.

**Availability**

National Laboratory Center, BATF. The CFR is available from the Government Printing Office

Office of Standards and Data Administration (ISD:I:S)
Room 802, BXR-5
1111 Constitution Avenue, NW
Washington, DC 20224
(703) 756-6381

**Authority**

Treasury Directive 87-01 (TD 87-01), Information Systems Standards Program, states that it is the policy
of the Department of Treasury to comply with all mandatory Federal Information Processing Standards (FIPS) and Federal Telecommunications Standards (FED-STDs) and other information systems standards and guidelines to the extent they are determined to be cost-effective and appropriate for the intended use.

Implementation

The Office of Standards and Data Administration (ISD:I:S) is responsible for researching, adopting, and promoting federal standards to ensure portable applications and systems. This includes ensuring that the automated tools procured for use in systems development comply with established FIPS and IRS standards. The Office is developing the System Development Methodology (SDM) which is a set of integrated guidelines that provide a standard framework for the development of automated information systems (AIS) within IRS. Software development within and for IRS must follow the Software Development Life Cycle (SDLC) methodology which was developed in accordance with Treasury Directives and FIPS and is being updated to include communication standards.

Adoption of Nongovernment Standards

The majority of the IRS standards are incorporated from Treasury Directives, FIPS publications, FED-STDs, American National Standards Institute (ANSI), Institute of Electrical and Electronics Engineers (IEEE) and International Telegraph and Telephone.

Qualification, Certification, or Calibration

Treasury Directive 85-02 (TD 85-02), Automated Information Systems Security and Risk Management Program, establishes the policy with respect to ensuring adequate security for automated information systems, applications, and facilities within the Department of Treasury. This Treasury Directive is intended to fulfill the requirements of Office of Management and Budget (OMB) Circulars A-130 and A-123, and National Security Decision Directive (NSDD)-145.

Committee Activity

IRS is in the process of identifying and standardizing data for electronic interchange through participation in ANSI Accredited Standards Committee X.12, Electronic Data Interchange (EDI). IRS and the state tax agencies which are represented through the Federation of Tax Administrators are working together to standardize data for EDI.

Standardization Activities

Periodically task groups are formed to revise existing IRS standards. The Office is working with applications systems developers, within IRS, to test, evaluate and refine the standards. Also, the Office is evaluating and assessing emerging database related technologies such as image-based processing and object-oriented data
base management systems to determine their feasibility within IRS.

U.S. CUSTOMS SERVICE

Office of Commercial Operations
1301 Constitution Avenue, NW, Room 3117
Washington, DC 20229
(202) 566-5868 or (202) 566-5497

Authority United States accession to the Customs Cooperation Council Convention. Instruments of ratification deposited on November 5, 1970.

Implementation The Harmonized Tariff Schedule was implemented on January 1, 1989, as a result of the Omnibus Trade & Competitiveness Act of 1988.

Application The Harmonized System is applied for the impost of customs duties upon the entry of merchandise into the United States and other countries, and for the collection of international trade data.

Committee Activity The U.S. Customs Service (USCS) serves as chairman of the Inter-agency Advisory Committee on Customs Cooperation Council Matters, participates on the Trade Policy Staff Committee and its task force on the Harmonized System, and serves as chairman of the United States delegation of the Harmonized System Committee of the Customs Cooperation Council.

Standardization Activities The Harmonized System Committee of the Customs Cooperation Council developed a standardized system of nomenclature for use in international trade. This is essentially a commodity classification system used as a basis for customs tariffs and the foreign-trade statistical systems of the United States and its trading partners. The system is devised such that it is used as a basis for various other international trade facilitation measures, for example, freight tariffs.

Availability A copy of the Harmonized Tariff Schedule of the United States Annotated is available from the United States International Trade Commission, 701 E Street, NW Washington, DC
DEPARTMENT OF THE TREASURY

Office of Laboratories and Scientific Services, Research DIvision
1301 Constitution Avenue, NW
Washington, DC 20229
(202) 566-5853

Authority
Title 19, Code of Federal Regulations

Implementation
Mandatory laboratory methods are developed and implemented within the U.S. Customs Service (USCS) laboratory system (presently seven laboratories) for the analysis of imported commodities. This effort requires special analyses to obtain information to meet legal requirements for assessing customs duties as legislated or as required internationally by the Harmonized Tariff Schedules. These methods are frequently released to the public through Freedom of Information Act procedures and thereby may also be in use in the private sector.

Application
The application of these methods is to meet specific tariff requirements as legislated.

Adoption of Nongovernment Standards
U.S. Customs laboratories most frequently use standards developed by industry groups or other nongovernment organizations such as: API, ASTM, ANSI, etc.

Qualification, Certification, or Calibration
Samples are selected by Customs inspectors or import specialists on a random or specified basis and sent to the laboratories for analyses. Compliance with legal requirements is determined and the results determine the duty paid by importers. Over 50,000 samples are analyzed annually in this effort.

Committee Activity
The U.S. Customs laboratory managers and scientists participate in pertinent committees of the American Petroleum Institute, American Society for Testing and Materials, Customs Cooperation Council, American National Standards Institute, International Commission for Uniform Methods of Sugar Analysis, Association of Official Analytical Chemists, the National Voluntary Laboratory Accreditation Program, and the American Chemical Society.

633 3rd Street, NW
Washington, DC 20220
(202) 376-0453

Authority

31 U.S.C. 317 and 391

Implementation

The U.S. Mint, Department of the Treasury, develops and administers the technical standards for United States coinage. Nominal diameter and weight standards are established by statute. Deviations allowed in the weight of minor coins are established by 31 U.S.C. 350. Thickness standards and other tolerances are developed by the Office of Process and Quality Control, Office of the Director.

Application

These standards are only imposed internally on the coin manufacturing processes. However, their importance in the development of coin handling and coin operated equipment so commonly found throughout the nation warrants their publication upon request.

Availability

Written inquiries should be directed to the Director of the Mint, Attention, Office of Process and Quality Control.

U.S. POSTAL SERVICE

Marketing Department
475 L'Enfant Plaza, SW
Washington, DC 20260-6300
(202) 268-2222

Implementation
Standards for producing letter size mail which is properly designed and addressed for successful sorting on automated processing equipment are contained in two publications from the U.S. Postal Service; Publication 25, A Guide to Business Mail Preparation, and Publication 28, Postal Addressing Standards.

Application
All business mailers are encouraged to follow the recommendations contained in both documents. Compliance with the standards is strictly voluntary, except in connection with certain postage discount programs.
Qualification, Certification, or Calibration

Assistance in determining compliance with the standards is available through all large city post offices. Requests for assistance and testing on automated equipment should be directed to a postal Automation Readability Specialist or Account Representative at those locations.

Availability

Publications 25 and 28 are available, without cost, through all city post offices. Requests for the documents may be directed to any postal marketing representative.

Keywords

addressing; address format; OCR readability; pre-barcoding; information processing; business; communications;

U.S. POSTAL SERVICE

Technology Resource Department
475 L'Enfant Plaza, SW
Washington, DC 20260-8100
(202) 268-3850

Authority

Implementation

Standards for mail are included in the Domestic Mail Manual and the International Mail Manual, published by the U.S. Postal Service.

Application

Mail standards are applied by trained postal employees verifying compliance at the point the mail enters Postal Service custody. Trained postal employees also provide information on mail standards to mailers who produce large mailings and to suppliers of mailing materials to the public.

Adoption of Nongovernment Standards

There are no nongovernment generated standards for mail. Standards for international mail generally are produced through agreement according to procedures set by the international postal body, the Universal Postal Union (UPU). Standards for domestic mail generally are developed in consultation with the mailing industry body, the Mailers Technical Advisory Committee (MTAC), and may be subject to approval by the independent Postal Rate Commission prior to implementation. Mail standards have a direct relationship to postal rates: standards are used to define mail classes and rates are set according to mail classes.

Qualification, Certification, or Calibration

There are no requirements for qualification, certification, or calibration related to mail standards.
Committee Activity

The U.S. Postal Service participates in UPU and MTAC committees involved in mail standards.

Standardization Activities

The U.S. Postal Service standardization activities involve the UPU, MTAC and the Postal Rate Commission.

Availability

The Domestic Mail Manual and the International Mail Manual are available as a subscription sold by the Government Printing Office.

Keywords

mail; classification; rates; communications; business;

see EXECUTIVE OFFICE OF THE PRESIDENT
4. SOURCES OF STANDARDS AND INFORMATION

Standards usually are obtained directly from the developing organization or from commercial distributors or government repositories. A number of libraries and standards organizations maintain major collections of standards that are open to the public. This section lists distributors of standards in this country and abroad and libraries and information centers. Union Lists detailing collections of standards at libraries within various geographic areas are also presented.

This information is provided as a service to readers seeking local sources for standards and related materials. It should be emphasized that no endorsement of comprehensiveness, quality, or cost should be inferred, and that potential users must perform their own evaluations.

- Catalogs of foreign national and regional standards organizations.

**Related Standards Services**

ANSI is the coordinator of the U.S. voluntary standards system. Its membership consists of over 1,100 companies, 250 professional, technical, trade, labor, and consumer organizations; and 30 government agencies. It is the official U.S. representative to the two major non-treaty international standardizing bodies - The International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC) through the U.S. National Committee (USNC). ANSI serves both the private and public sector's need for voluntary standardization.

**Type of Organization**

Governmental

**Types of Standards**

Neither the GPO nor the Superintendent of Documents issues or publishes standards per se. However, as the
principal sales agency for Government publications, the Superintendent of Documents' inventory of available publications contains hundreds that relate to standards or which contain standards issued by the various Departments and agencies of the Government. A few examples of the publications available are: The Department of Defense Index of Specifications and Standards; Standards for Specifying Construction of Airports; Standard Specifications for Construction of Roads and Bridges on Federal Highway Projects; Government Paper Specifications Standards.

The DOD's Military Specifications and Standards and GSA's Federal Specifications and Standards are not available from GPO. Only the indexes for these publications are distributed by GPO. The standards and specifications are available from Naval Publications and Forms Center and the GSA Specifications Unit, respectively.

**UNITED STATES:**  
- industry (voluntary)  
- federal agency (voluntary and regulations)  
- federal purchasing  

**FOREIGN:**  
- national  
- international  
- regional

### Medium

Paper, microfilm cartridges and microfiche.

### Related Standards Services

Standards can be viewed from the collection which is in paper, microfilm cartridges, and microfiche. Product subject listings are provided in response to inquiries, but copies of standards are not distributed. NCSCI responds to the needs of government, industry, and the general public for information on domestic and foreign standards, regulations, certification, and other standards-related activities and foreign requests for information on existing U.S. standards and certification information. The objectives are accomplished by: maintaining a microform and hard copy collection of engineering standards and specifications, regulations, certification rules, directories, reference books and special publications; responding to inquiries on the existence, source, and availability of standards and related documents; developing and publishing directories of standards, certification, testing and related information; to the degree possible, responding to trade-related queries regarding regulations and other requirements of foreign countries for the export of U.S. manufactured products.

The NCSCI Reference Collection is open to visitors Monday through Friday from 8:30 a.m. to 5:00 p.m.

</tbody>
</table>
4.3 UNION LISTS OF STANDARDS

The Engineering Division of the Special Libraries Association is attempting to identify various collections of standards within geographic regions and to compile a "union list" of that information. Although some of these union lists are out of print, the participating libraries will have copies.

California

Illinois

1986 Union List of Standards, Metropolitan Chicago Science and Technology Libraries.

Minnesota

1979 Twin Cities Standards Cooperative Card Index at the James J. Hill Reference Library, St. Paul, MN.

New York

New York

Tennessee

Texas

United States

Wisconsin

5. SUBJECT INDEX AND RELATED LISTINGS

5.1 SUBJECT INDEX (ORGANIZATIONS BY MAJOR SUBJECTS)

Government and nongovernment organizations are listed in alphabetic order in their respective sections, and are listed here within forty-two subject categories. These categories were selected after reviewing the keywords of all entries.

National Pest Control Association
National Standards Educators Association
Office of Procurement (GSA)
Portland Cement Association
Radio Technical Commission for Aeronautics
Society for Experimental Mechanics
Solar Rating and Certification Corporation
Southwest Research Institute
Underwriters Laboratories
United States Customs Service (Treasury)
United States Testing Company

RECREATION AND SPORTS

American Alliance for Health, Physical Education, Recreation and Dance
American Boat and Yacht Council
American Bowling Congress
American Fishing Tackle Manufacturers Association
American Society for Testing and Materials
Archery Manufacturers Organization
Billiard Council of America
Color Association of the United States
Eastern Bird Banding Association
National Association of Rocketry
National Federation of State High School Associations
National Model Railroad Association
National Operating Committee for Standards in Athletic Equipment
National Rifle Association of America
Recreation Vehicle Industry Association
SEMA Foundation
Snell Memorial Foundation
Snowmobile Safety and Certification Committee
Sporting Arms and Ammunition Manufacturers Institute
Sports Car Club of America
Trailer Hitch Manufacturers Association
Underwriters Laboratories
United Ski Industries Association
United States Coast Guard (DOT)
United States Golf Association
U.S. Tennis Court and Track Builders Association

SAFETY, FIRE PROTECTION, AND PUBLIC SAFETY

Alliance of American Insurers
American Association of Motor Vehicle Administrators
American Automobile Association
American Brush Manufacturers Association
American Bureau of Shipping
American Conference of Governmental Industrial Hygienists
American Fiber Manufacturers Association

705
Mechanical Contractors Association of America
Mine Safety and Health Administration (DOL)
Minerals Management Service (DOI)
National Arborist Association
National Burglar and Fire Alarm Association
National Conference of States on Building Codes and Standards
National Cotton Council of America
National Council on Radiation Protection and Measurements
National Electrical Manufacturers Association
National Elevator Industry
National Federation of State High School Associations
National Fertilizer Solutions Association
National Fire Protection Association
National Fire Sprinkler Association
National Highway Traffic Safety Administration (DOT)
National Institute of Standards and Technology (Commerce)
National Kerosene Heater Association
National Propane Gas Association
National Rifle Association of America
National Safety Council
National Spa and Pool Institute
Nuclear Regulatory Commission
Occupational Safety and Health Administration (DOL)
Painting and Decorating Contractors of America
Portland Cement Association
Powder Actuated Tool Manufacturers Institute
Printing and Decorating Contractors of America
Program Management (Consumer Product Safety Commission)
Public Buildings Service (GSA)
Robotic Industries Association
Safety Glazing Certification Council
Scaffolding, Shoring and Forming Institute

Wood and Synthetic Flooring Institute
Wood Machinery Manufacturers of America

SANITATION

American Association of Cereal Chemists
American Dairy Products Institute
American Public Health Association
American Society of Plumbing Engineers
American Society of Sanitary Engineering
American Water Works Association
Baking Industry Sanitation Standards Committee
Cast Iron Soil Pipe Institute
Ductile Iron Pipe Association
Environmental Protection Agency
Housing and Urban Development, Department of
International Association of Milk, Food and Environmental Sanitarians
National Association of Plumbing-Heating-Cooling Contractors
National Automatic Merchandising Association
National Clay Pipe Institute
National Environmental Health Association
National Pest Control Association
National Sanitation Foundation
National Solid Wastes Management Association
National Spa and Pool Institute
Plumbing and Drainage Institute
Portable Sanitation Association
Textile Rental Services Association of America
Water Pollution Control Federation

SOCIAL WELFARE

American Association of Poison Control Centers
National Accreditation Council for Agencies Serving the Blind and Visually Handicapped
National Easter Seal Society
National Library Service for the Blind and Physically Handicapped
(Library of Congress)
National Safety Council
National Society to Prevent Blindness
Public Buildings Service (GSA)
Snell Memorial Foundation
Standards Engineering Society
United States Council for International Business

TEXTILES AND CLOTHING

American Association of Textile Chemists and Colorists
American Fastener and Closure Association
American Fiber Manufacturers Association
American Furniture Manufacturers Association
American Home Economics Association
American Society for Testing and Materials
American Textile Machinery Association
Color Association of the United States
Consumer Product Safety Commission
Department of Defense
Elastic Fabric Manufacturers Council of Northern Textile Association
Felt Manufacturers Council of Northern Textile Association
Industrial Fabrics Association International
International Association of Wiping Cloths Manufacturers
International Fabricare Institute
National Cotton Council of America
Program Management (Consumer Product Safety Commission)
Tanners Council of America
Textile Rental Services Association of America
United States Testing Company

TRANSPORTATION

Aeronautical Radio, Incorporated
Aerospace Industries Association of America
Aircraft Locknut Manufacturers Association
Aircraft Owners and Pilots Association
Air Transport Association of America
American Association of Motor Vehicle Administrators
American Association of State Highway and Transportation Officials
American Automobile Association
American Boat and Yacht Council
American Bureau of Shipping
American Bus Association
American Helicopter Society
American Institute of Aeronautics and Astronautics
American Petroleum Institute
American Railway Engineering Association
American Road and Transportation Builders Association
Animal Health International
Association of American Railroads
Certified Automotive Parts Association
Compressed Gas Association
Containerization and Intermodal Institute
Electronic Data Interchange Association
Environment, Safety and Health (DOE)
Federal Aviation Administration (DOT)
Federal Highway Administration (DOT)
Flight Safety Foundation
General Aviation Manufacturers Association
Helicopter Association International
Institute of Nuclear Materials Management
Institute of Transportation Engineers
International Bridge, Tunnel and Turnpike Association
International Cargo Gear Bureau
International Mobile Air Conditioning Association
Maritime Administration (DOT)
Materials Transportation Bureau (DOT)
Motor Vehicle Manufacturers Association of the United States
National Association of Chain Manufacturers
National Automobile Theft Bureau
National Cargo Bureau
National Institute of Standards and Technology (Commerce)
National Safe Transit Association
National Tire Dealers and Retreaders Association
Occupational Safety and Health Administration (DOL)
Railway Tie Association
Recreation Vehicle Industry Association
Society of Automotive Engineers

709
Society of Naval Architects and Marine Engineers
Steel Shipping Container Institute
Tire and Rim Association
Trailer Hitch Manufacturers Association
Truck Trailer Manufacturers Association
United Shipowners of America
United States Coast Guard (DOT)

WOOD AND WOOD PRODUCTS

American Institute of Timber Construction
American Ladder Institute
American Lumber Standards Committee
American Plywood Association
American Wood Preservers Bureau
American Wood-Preservers Association
Architectural Woodwork Institute
Cedar Shake and Shingle Bureau
Department of Housing and Urban Development
Fine Hardwood Veneer Association
Forest Service (USDA)
Hardwood Lumber Manufacturers Association
Hardwood Plywood Manufacturers Association
Housing and Urban Development, Department of
Maple Flooring Manufacturers Association
National Dimension Manufacturers Association
National Forest Products Association
National Hardwood Lumber Association
National Oak Flooring Manufacturers Association
National Particleboard Association
National Sash and Door Jobbers Association
National Woodwork Manufacturers Association
Northeastern Lumber Manufacturers Association
Redwood Inspection Service
Southern Cypress Manufacturers Association
Southern Forest Products Association
Southern Pine Inspection Bureau
Technical Association of the Pulp and Paper Industry
Truss Plate Institute
West Coast Lumber Inspection Bureau
Western Wood Products Association
Wood and Synthetic Flooring Institute
Wood Heating Alliance
Wood Machinery Manufacturers of America
Wood Moulding and Millwork Producers
Woodwork Institute of California
5.2 **ACRONYMS AND INITIALS**

This list of acronyms and initials serves to identify organizations, however, there is no exclusivity: there are four NFPA's, two EIA's and other duplications.

now: International Sleep Products Association

National Association of Furniture Manufacturers
now: American Furniture Manufacturers Association

National Association of Plastic Fabricators
now: Decorative Laminate Products Association

National Automatic Sprinkler and Fire Control Association
now: National Fire Sprinkler Association

National Bark Producers Association
now: National Bark and Soil Producers Association

National Crushed Stone Association
now: National Stone Association

National Machine Tool Builders Association
now: NMTBA - The Association for Manufacturing Technology
National Municipal League
now: National Civic League Inc.

National Ski Areas Association
now: United Ski Industries Association

National Soybean Processors Association
now: National Oilseed Processors Association

Prestressed Concrete Institute
now: Precast/Prestressed Concrete Institute

Pulverized Limestone Association
now: National Stone Association

Red Cedar Shingle and Handsplit Shake Bureau
now: Cedar Shake and Shingle Bureau

Slide Fastener Association
now: American Fastener and Closure Association

Society for Experimental Stress Analysis
now: Society for Experimental Mechanics

Society of Die Casting Engineers
now: North American Die Casting Association

Solar Energy Industries Association
now: Solar Rating and Certification Corporation

Southern Hardwood Lumber Manufacturers Association
now: Hardwood Lumber Manufacturers Association

Tanners Council of America
now: Leather Industries of America

Transportation Data Coordinating Committee
now: Electronic Data Interchange Association

Whey Products Institute
now: American Dairy Products Institute
5.4 ORGANIZATIONS NO LONGER INVOLVED IN STANDARDIZATION

Organizations that had developed standards or were listed in the 1984 Directory and that are

(a) no longer active in standardization;
(b) defunct or merged with another organization; or
(c) cannot be located.

Air Diffusion Council (a)
American Dental Trade Association (a)
American Mining Congress (a)
American Society of Lubrication Engineers (a)
American Trucking Association (a)
Barley and Malt Institute (b)
Barre Granite Association (b)
Bicycle Manufacturers Association (a)
Commission on Accreditation of Rehabilitation Facilities (c)
Council of National Library and Information Association (b)
Diesel Engine Manufacturers Association (b)
Facing Tile Institute (b)
Fire and Hemlock Door Association (b)
Fragrance Materials Association (a)
Garage Door Council (b)
Hardwood Lumber Manufacturers of Pennsylvania (b)
Institute of Scrap Iron and Steel (b)
International Database Association (b)
International Silo Association (b)
International Society for Terrain-Vehicle Systems (b)
Mill Mutual Fire Prevention Bureau (b)
National Association of Elevator Contractors (a)
National Association of Recycling Industries (b)
National Association of Standard Medical Vocabulary (b)
National Knitwear Manufacturers Association (a)
Noise Control Products and Materials Association (b)
Northern Hardwood and Pine Manufacturers Association (b)
Optical Manufacturers Association (a)
Product Safety Association (b)
Scientific Apparatus Makers Association (a)
Society of Manufacturing Engineers (a)
Thread Institute (b)
Truck Body and Equipment Association (c)
Western Electric Company (a)
Zinc Institute (b)
This directory is a guide to mandatory and voluntary standards activities in the United States at the national level - both governmental and nongovernmental (trade associations, technical and other professional societies). It excludes proprietary (company standards) and state and local levels of government (i.e., county and municipal). It supersedes the 1984 edition (NBS SP 681), "Standards Activities of Organizations in the United States." It includes standards distributors, libraries, and information centers, and union lists of standards repositories by regional areas. It also lists organizations that no longer develop standards or have become defunct since previous directory was issued.

Over 750 current descriptive commentaries are formatted, with subject headings to facilitate access to specific information. The main sections cover nongovernment; federal government; sources of standards documents and information; a subject index and related listings covering acronyms and initials, defunct bodies, and those organizations with name changes. Organizations have been included if they develop standards or contribute to the standardization process, whether voluntary or mandatory, or are sources of standards documents or information. An introductory section provides general information on federal (including military) standards activities, a list of 20 major nongovernment standards developers, some historical notes, and an overview of U.S. (national) standardization activities.
**NIST Technical Publications**

**Periodical**

*Journal of Research of the National Institute of Standards and Technology*—Reports NIST research and development in those disciplines of the physical and engineering sciences in which the Institute is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Institute's technical and scientific programs. Issued six times a year.

**Nonperiodicals**

**Monographs**—Major contributions to the technical literature on various subjects related to the Institute's scientific and technical activities.

**Handbooks**—Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

**Special Publications**—Include proceedings of conferences sponsored by NIST, NIST annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

**Applied Mathematics Series**—Mathematical tables, manuals, and studies of special interest to physicists, engineers, chemists, biologists, mathematicians, computer programmers, and others engaged in scientific and technical work.

**National Standard Reference Data Series**—Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a worldwide program coordinated by NIST under the authority of the National Standard Data Act (Public Law 90-396). NOTE: The Journal of Physical and Chemical Reference Data (JPCRD) is published quarterly for NIST by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements are available from ACS, 1155 Sixteenth St., NW., Washington, DC 20036.

**Building Science Series**—Disseminates technical information developed at the Institute on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

**Technical Notes**—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NIST under the sponsorship of other government agencies.

**Voluntary Product Standards**—Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The standards establish nationally recognized requirements for products, and provide all concerned interests with a basis for common understanding of the characteristics of the products. NIST administers this program as a supplement to the activities of the private sector standardizing organizations.

**Consumer Information Series**—Practical information, based on NIST research and experience, covering areas of interest to the consumer. Easily understandable language and illustrations provide useful background knowledge for shopping in today's technological marketplace.

*Order the following NIST publications—FIPS and NISTIRs—from the National Technical Information Service, Springfield, VA 22161.*

**NIST Interagency Reports (NISTIR)**—A special series of interim or final reports on work performed by NIST for outside sponsors (both government and non-government). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service, Springfield, VA 22161, in paper copy or microfiche form.
