Reports on Information Technology

The National Institute of Standards and Technology (NIST)'s Information Technology Laboratory (ITL) develops standards and guidelines, provides technical assistance, and conducts research for computers and resources. As part of the overall federal effort to establish a single face to industry for conducting electronic commerce, ITL has been designated as the organization responsible for coordinating the development of Federal Implementation Conventions (ICs) for Electronic Data Interchange (EDI). ICs are defined by functional-area experts who create and select options from standard EDI Transaction Sets to yield the implementations to be used for practical EDI. These ICs are made available to federal agencies and industry by electronic means and this Special Publication Series.

805 Contract Pricing Proposal

Functional Group ID=CP

Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Contract Pricing Proposal Transaction Set (805) cover sheet and pricing support detail for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set enables the transmission of cost and pricing data for a given contract action and provides pricing support detail data or references where that data can be found in the proposal.

Notes:

1. This transaction set is used by a contractor to provide "cost or pricing data" or "information other than cost or pricing data" (hereafter referred to by the term data) requested by a contracting officer in accordance with the provisions of the Federal Acquisition Regulation 15.8
2. This transaction set can be used to provide data for a solicitation or for a single award instrument, e.g., a contract, a delivery order, etc.; for a modification to an award instrument; or for several modifications to an award instrument when the data does not need to be identified to a specific modification.
3. Supporting data that is not contained in this transaction set shall be provided in the 251 transaction set.
4. All numbers cited in this transaction set shall be transmitted as a continuous number without extraneous characters except where such characters are a part of the number.

Transaction Set Notes

1. When the N1 loop is used, it will carry the name and address of a party pertinent to the proposal, such as the proposing party, the place(s) of performance, the contract administration, and auditing offices.
2. When CB101 is code ``01," ``05," ``08," ``10," ``11," ``12," ``14" or ``17," discussion will be carried in the MSG segment in the CB1 loop; numbers and their text descriptions will be carried in the N9 segment of the CB1 loop.
3. When the N1 loop is used, it will carry the name and address of a party needed to clarify a response to a question answered in the CB1 loop, such as party for whom the same or a similar item as the one being proposed, has been previously produced.

4. PD03 is the unit of measurement for the data contained in the PD loop.
5. When the N1 loop is used, it will carry the name and address of a party related to the proposal data such as a major subcontractor whose cost or price information has been rolled up into this price proposal.
6. When the AMT segment is used, it can carry amounts such as the proposed cost, total proposed fee, total proposed profit, total cost of money, total proposed price or alternate proposed price.

Segment: **ST** Transaction Set Header

PD Part Number Description

Use to indicate a clear text description of an item that cannot be identified by a number, e.g., transportation.

PN Company Part Number

PU Part Reference Number

Use to indicate a part number assigned by an industry (not related to a specific manufacturer). Do not use for National Drug Codes.

RC Returnable Container No.

Use to indicate an NSN, manufacturer's part number, or other identifying number (except a serial number) of a returnable container.

SN Serial Number

Use to indicate the serial number of the item cited in JIL02. For example, the serial number of an aircraft engine that is to be repaired.

SV Service Rendered

Use to indicate (in text) the service being ordered.

SW Stock Number

Use to indicate a local stock number.

SZ Vendor Alphanumeric Size Code (NRMA)

Use to indicate the size of an item being ordered.

UK U.P.C./EAN Shipping Container Code (1-2-5-5-1)

VP Vendor's (Seller's) Part Number

Use to indicate a part number assigned by a contractor other than a manufacturer.

ZB Commercial and Government Entity (CAGE) Code
Use to indicate a manufacturer who can be identified by a CAGE code.

Level: Heading
Usage: Optional
Max Use: 1
Purpose: To specify the geographic place of the named party
Syntax Notes: 1 If N406 is present, then N405 is required.
Semantic Notes:
Comments: 1 A combination of either N401 through N404, or N405 and N406 may be adequate to specify a location.
 2 N402 is required only if city name (N401) is in the USA or Canada.

Segment: **PL** Proposal Cost Logic
Position: 010
Loop:
Level: Detail
Usage: Optional
Max Use: >1
Purpose: To describe the cost logic used when pricing a particular aspect of a proposal
Syntax Notes:
Semantic Notes:

- 1 PL01 is the logic sequence number.
- 2 PL03 is the name of the cost element being proposed.
- 3 PL05 is a text description of the cost element contained in PL03.
- 4 PL06 is an occurrence counter that indicates the order of items to appear in a cost summary data display.

Comments:

- Notes:**
1. This segment is *REQUIRED* in original, duplicate or revised transaction sets, e.g., when BCP01 is code 00, 07 or 15.
 2. The PL Segment should be used in a "bottom-up" approach, (e.g., if total direct labor dollars is composed of engineering labor dollars plus manufacturing labor dollars, then the calculation formula for these must be presented in the transaction set before the calculation for the direct labor dollars).

EXAMPLE:

```

PL*1*DO*DEL*E*DIRECT ENGINEERING LABOR*2 N/L
PL*2*HR*DELH*M*DIRECT ENGINEERING LABOR HOURS N/L
PL*3*A8*ELR*F*ENGINEERING LABOR RATE N/L
PL*4*DO*DML*E*DIRECT MANUFACTURING LABOR*3 N/L
PL*5*HR*DMLH*M*DIRECT MANUFACTURING LABOR HOURS N/L
PL*6*A8*MLR*F*MANUFACTURING LABOR RATE N/L
PL*7*DO*TDL*E*TOTAL DIRECT LABOR*1 N/L
PL*8*DO*TDEL*A N/L
PL*9*DO*TDML*F N/L

```

3. If the proposed labor rates are at a lower level, e.g., by engineering labor category or by department, then the PL Segments must start at that lower level to conform to the "bottom-up" convention.
4. If the formula provided in this segment is for a total, the PD/PDD segments shall be used to provide the total.
5. Use of the number "1" in PL06 of the first iteration of the PL Segment in the example above, indicates its order on the summary table; i.e., it would be displayed first.

1. The "short-hand" name given to the value that appears in a cost or price proposal.

2. The source of the data, (e.g., DLH or the number 24680 might be the "short-hand" name for direct labor hours). These unique short-hand names are assigned by the originator of the transaction set and should have a basis in the originator's accounting system.

PL05

352

Description

O AN 1/80

A free-form description to clarify the related data elements and their content
The "long-hand" description for the "short-hand" name carried in PL03, (e.g., if the proposing party carries "DLH" in PL03, then PL05 will carry Direct Labor Hours in free form text. This now identifies that "DLH" equals Direct Labor Hours in the proposing party's accounting system. The description is only required when the "NAME" data element (PL03) is first used within the flow of segments within the transaction set. After that, the value may be referred to by its "short-hand" name only.

PL06

609

Count

O NO 1/9

Occurrence counter

When PL02 is code DO and PL04 is code E, use to identify where dollar amounts are to be displayed on the summary table, e.g., if the number 7 was cited, that would indicate that the dollars for the specified category appear as the 7th item on the summary table.

Segment:	HL Hierarchical Level

Usage:	Optional
Max Use:	1
Purpose:	To identify dependencies among and the content of hierarchically related groups of data segments
Syntax Notes:	
Semantic Notes:	
Comments:	<ol style="list-style-type: none"> 1 The HL segment defines a top-down/left-right ordered structure. 2 HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction. 3 HL02 identifies the hierarchical ID number of the HL segment to which the current HL segment is subordinate. 4 HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information. 5 HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

Must Use	AMT02	782	Monetary Amount	M R 1/15
			Monetary amount	
			1. The actual amount represented by the qualifier code.	
			2. When AMT01 is code TF, the amount will equal the sum of the amounts representative of the AMT01 qualifier codes TC, TD or TE, and MC.	

Segment: **SE** Transaction Set Trailer
Position: 040
Loop:
Level: Summary
Usage: Mandatory
Max Use: 1
Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).
Syntax Notes:
Semantic Notes:
Comments: 1 SE is the last segment of each transaction set.

Data Element Summary

	<u>Ref.</u> <u>Des.</u>	<u>Data</u> <u>Element</u>	<u>Name</u>	<u>Attributes</u>
Must Use	SE01	96	Number of Included Segments Total number of segments included in a transaction set including ST and SE segments	M N0 1/10
Must Use	SE02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set <i>The same unique control number cited in ST02.</i>	M AN 4/9

NIST Technical Publications

Periodical

Journal of Research of the National Institute of Standards and Technology—Reports NIST research and development in those disciplines of the physical and engineering sciences in which the Institute is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Institute's technical and scientific programs. Issued six times a year.

Nonperiodicals

Monographs—Major contributions to the technical literature on various subjects related to the Institute's scientific and technical activities.

Handbooks—Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

Special Publications—Include proceedings of conferences sponsored by NIST, NIST annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

National Standard Reference Data Series—Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a worldwide program coordinated by NIST under the authority of the National Standard Data Act (Public Law 90-396). NOTE: The Journal of Physical and Chemical Reference Data (JPCRD) is published bimonthly for NIST by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements are available from ACS, 1155 Sixteenth St., NW, Washington, DC 20056.

Building Science Series—Disseminates technical information developed at the Institute on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

Technical Notes—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NIST under the sponsorship of other government agencies.

Voluntary Product Standards—Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The standards establish nationally recognized requirements for products, and provide all concerned interests with a basis for common understanding of the characteristics of the products. NIST administers this program in support of the efforts of private-sector standardizing organizations.

Order the following NIST publications—FIPS and NISTIRs—from the National Technical Information Service, Springfield, VA 22161.

Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. The Register serves as the official source of information in the Federal Government regarding standards issued by NIST pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

NIST Interagency Reports (NISTIR)—A special series of interim or final reports on work performed by NIST for outside sponsors (both government and nongovernment). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service, Springfield, VA 22161, in paper copy or microfiche form.
