[^0]$T$ he National Institute of Standards and Technology was established in 1988 by Congress to "assist industry in the development of technology . . . needed to improve product quality, to modernize manufacturing processes, to ensure product reliability . . . and to facilitate rapid commercialization . . . of products based on new scientific discoveries."

NIST, originally founded as the National Bureau of Standards in 1901, works to strengthen U.S. industry's competitiveness; advance science and engineering; and improve public health, safety, and the environment. One of the agency's basic functions is to develop, maintain, and retain custody of the national standards of measurement, and provide the means and methods for comparing standards used in science, engineering, manufacturing, commerce, industry, and education with the standards adopted or recognized by the Federal Government.

As an agency of the U.S. Commerce Department's Technology Administration, NIST conducts basic and applied research in the physical sciences and engineering, and develops measurement techniques, test methods, standards, and related services. The Institute does generic and precompetitive work on new and advanced technologies. NIST's research facilities are located at Gaithersburg, MD 20899, and at Boulder, CO 80303. Major technical operating units and their principal activities are listed below. For more information contact the Publications and Program Inquiries Desk, 301-975-3058.

## Reports on Information Technology

The National Institute of Standards and Technology (NIST)'s Information Technology Laboratory (ITL) develops standards and guidelines, provides technical assistance, and conducts research for computers and resources. As part of the overall federal effort to establish a single face to industry for conducting electronic commerce, ITL has been designated as the organization responsible for coordinating the development of Federal Implementation Conventions (ICs) for Electronic Data Interchange (EDI). ICs are defined by functional-area experts who create and select options from standard EDI Transaction Sets to yield the implementations to be used for practical EDI. These ICs are made available to federal agencies and industry by electronic means and this Special Publication Series.

## 843 Response to Request for Quotation

Functional Group ID= $\mathbf{R R}$

## Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Response to Request for Quotation Transaction Set (843) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide potential buyers with price, delivery schedule, and other terms from potential sellers of goods and services, in response to a request for such information.

|  | Pos. <br> No. | Seg. <br> ID | Name | Req. Des. | Max.Use | Loop Repeat | Notes and Comments |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Must Use | 010 | CTT | Transaction Totals | M | , |  | n3 |
|  | 015 | AMT | Monetary Amount | O | 1 |  |  |
| Must Use | 020 | SE | Transaction Set Trailer | M | 1 |  |  |

## Transaction Set Notes

1. If segment LIN is used, do not use LIN01.
2. The SCH segment is used to specify various quantities of items ordered that are to be scheduled. When this segment is used the unit of measurement code (SCH02) should always be identical to the unit of measurement code in the associated PO1 segment ( PO 103 ) and the sum of values of quantity ( SCH 01 ) should always equal the quantity ordered ( PO 102 ) in the PO 1 segment.
3. Number of line items (CTT01) is the accumulation of the number of PO1 segments. If used, hash total (CTT02) is the sum of the value of quantities ordered (PO102) for each PO1 segment.

## Date/Time Reference

Position: 150
Loop:
Level: Heading
Usage: Optional
Max Use: 10
Purpose: To specify pertinent dates and times
Syntax Notes: 1 At least one of DTM02 DTM03 or DTM06 is required.
2 If either DTM06 or DTM07 is present, then the other is required.
Semantic Notes:

Comments:

Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where $\mathrm{H}=$ hours $(00-23), \mathrm{M}=$ minutes ( $00-$ 59), $\mathrm{S}=$ integer seconds ( $00-59$ ) and $\mathrm{DD}=$ decimal seconds; decimal seconds are expressed as follows: $\mathrm{D}=$ tenths $(0-9)$ and $\mathrm{DD}=$ hundredths ( $00-99$ )

Code identifying the time. In accordance with International Standards Organization standard 8601 , time can be specified by a + or - and an indication in hours in relation to Universal Time Coordinate (UTC) time; since + is a restricted character, + and - are substituted by P and M in the codes that follow CT Central Time
ET Eastern Time

## Segment: M1NA Measurements

Position: 200
Loop:
Level: Heading
Usage: Optional
Max Use: 40
Purpose: To specify physical measurements or counts, including dimensions, tolerances, variances, and weights (See Figures Appendix for example of use of C001)
Syntax Notes: 1 At least one of MEA03 MEA05 MEA06 or MEA08 is required.
2 If MEA05 is present, then MEA04 is required.
3 If MEA06 is present, then MEA04 is required.
4 If MEA07 is present, then at least one of MEA03 MEA05 or MEA06 is required.
5 Only one of MEA08 or MEA03 may be present.
Semantic Notes: 1 MEA04 defines the unit of measure for MEA03, MEA05, and MEA06.
Comments: 1 When citing dimensional tolerances, any measurement requiring a sign (+ or - ), or any measurement where a positive $(+)$ value cannot be assumed, use MEA05 as the negative ( - ) value and MEA06 as the positive ( + ) value.

| :--- | :--- | :--- | :--- | :--- | :--- |
| Not Used | PKG06 | 400 | Unit Load Option Code <br> Code identifying loading or unloading a shipment | X | ID 2/2 |

Segment: P 01 Baseline Item Data
Position: 010
Loop: PO1
Level: Detail
Usage: Optional
Max Use: 1
Purpose: To specify basic and most frequently used line item data
Syntax Notes: 1 If PO103 is present, then PO102 is required.
2 If PO105 is present, then PO104 is required.
3 If either PO106 or PO107 is present, then the other is required.
4 If either PO108 or PO109 is present, then the other is required.
5 If either PO110 or PO111 is present, then the other is required.
6 If either PO112 or PO113 is present, then the other is required.
7 If either PO114 or PO115 is present, then the other is required.
8 If either PO116 or PO117 is present, then the other is required.
9 If either PO118 or PO119 is present, then the other is required.
10 If either PO120 or PO121 is present, then the other is required.
11 If either PO122 or PO123 is present, then the other is required.
12 If either PO124 or PO125 is present, then the other is required.

## Semantic Notes:

Comments: 1 See the Data Dictionary for a complete list of ID's.
2 PO 101 is the line item identification.
3 PO106 through PO125 provide for ten (10) different product/service ID's per each item. For example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

## Data Element Summary

Refer to 003050 Data Element Dictionary for acceptable code values.

| PO107 | 234 | Product/Service ID X | AN 1/40 |

Code identifying the type/source of the descriptive number used in Product/Service ID (234)
Refer to 003050 Data Element Dictionary for acceptable code values.
$X \quad$ AN 1/40
Identifying number for a product or service

## Segment: P 3 Additional Item Detail

Position: 030
Loop: PO1
Level: Detail
Usage: Optional
Max Use: 25
Purpose: To specify additional item-related data involving variations in normal price/quantity structure
Syntax Notes: Semantic Notes: Comments:

1 Some examples of price/quantity variations are: price in different units from the PO1 segment, price changes by date, or price changes by quantity (break and level).
2 PO307 defines the unit of measure for PO306.

## Data Element Summary

## Segment: CTP Pricing Information

Position: 040
Loop: PO1
Level: Detail
Usage: Optional
Max Use: >1
Purpose: To specify pricing information
Syntax Notes: 1 If either CTP04 or CTP05 is present, then the other is required.
2 If CTP06 is present, then CTP07 is required.
3 If CTP09 is present, then CTP02 is required.
4 If CTP10 is present, then CTP02 is required.
Semantic Notes: 1 CTP07 is a multiplier factor to arrive at a final discounted price. A multiplier of 90 would be the factor if a $10 \%$ discount is given.
2 CTP08 is the rebate amount.
Comments: 1 See Figures Appendix for an example detailing the use of CTP03 and CTP04. See Figures Appendix for an example detailing the use of CTP03, СTP04 and CTP07.

| Segment: | MEA Measurements |
| :---: | :---: |
| Position: | 049 |
| Loop: | PO1 |
| Level: | Detail |
| Usage: | Optional |
| Max Use: | 40 |
| Purpose: | To specify physical measurements or counts, including dimensions, tolerances, variances, and weights (See Figures Appendix for example of use of C001) |
| Syntax Notes: | 1 At least one of MEA03 MEA05 MEA06 or MEA08 is required. |
|  | 2 If MEA05 is present, then MEA04 is required. |
|  | 3 If MEA06 is present, then MEA04 is required. |
|  | 4 If MEA07 is present, then at least one of MEA03 MEA05 or MEA06 is required. |
|  | 5 Only one of MEA08 or MEA03 may be present. |
| Semantic Notes: | 1 MEA04 defines the unit of measure for MEA03, MEA05, and MEA06. |
| Comments: | 1 When citing dimensional tolerances, any measurement requiring a sign ( + or - ), or any measurement where a positive $(+)$ value cannot be assumed, use MEA05 as the negative ( - ) value and MEA06 as the positive ( + ) value. |

## Segment: PID Product/Item Description

Position: 050
Loop: PID
Level: Detail
Usage: Optional
Max Use: 1
Purpose: To describe a product or process in coded or free-form format
Syntax Notes: 1 If PID04 is present, then PID03 is required.
2 At least one of PID04 or PID05 is required.
3 If PID07 is present, then PID03 is required.
4 If PID08 is present, then PID03 is required.
Semantic Notes: 1 Use PID03 to indicate the organization that publishes the code list being referred to.
2 PID04 should be used for industry-specific product description codes.
3 PID08 describes the physical characteristics of the product identified in PID04. A " Y " indicates that the specified attribute applies to this item. A " N " indicates it does not apply. Any other value is indeterminate.
Comments: 1 If PID01 $=`{ }^{`}{ }^{\prime}$, then PID05 is used. If PID01 $=~ " ~ ' S ", ~ t h e n ~ P I D 04 ~ i s ~ u s e d . ~ I f ~ P I D 01 ~=~$ ' X ", then both PID04 and PID05 are used.
2 Use PID06 when necessary to refer to the product surface or layer being described in the segment.
3 PID07 specifies the individual code list of the agency specified in PID03.

937 Department of Labor Wage Determination Date
992 Date Requested

| DTM02 | 373 | Date <br> Date (YYMMDD) <br> DTM03 | 337 | Time |
| :--- | :--- | :--- | :--- | :--- |

Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where $\mathrm{H}=$ hours $(00-23)$, $\mathrm{M}=$ minutes $(00-$ 59), $\mathrm{S}=$ integer seconds ( $00-59$ ) and $\mathrm{DD}=$ decimal seconds; decimal seconds are expressed as follows: $\mathrm{D}=$ tenths $(0-9)$ and $\mathrm{DD}=$ hundredths ( $00-99$ )

Code identifying the time. In accordance with International Standards Organization standard 8601, time can be specified by a + or - and an indication in hours in relation to Universal Time Coordinate (UTC) time; since + is a restricted character, + and - are substituted by P and M in the codes that follow

CT Central Time

Max Use: 3
Purpose: To identify a person or office to whom administrative communications should be directed
Syntax Notes: 1 If either PER03 or PER04 is present, then the other is required.
2 If either PER05 or PER06 is present, then the other is required.
3 If either PER07 or PER08 is present, then the other is required.
Semantic Notes:
Comments:

Code identifying the type of communication number

# Segment: SCH Line Item Schedule 

Position: 485
Loop: N1
Level: Detail
Usage: Optional
Max Use: 200
Purpose: To specify the data for scheduling a specific line-item
Syntax Notes: 1 If SCH03 is present, then SCH04 is required.
2 If SCH 08 is present, then at least one of SCH 09 or SCH 10 is required.
3 If SCH 09 is present, then SCH 08 is required.
4 If SCH 10 is present, then SCH 08 is required.
Semantic Notes:
1 SCH 12 is the schedule identification.
Comments: 1 SCH05 specifies the interpretation to be used for SCH 06 and SCH 07 .

| Segment: | LDT Lead Time |  |
| ---: | :--- | :--- |
| Position: | 550 |  |
| Loop: | LDT |  |
| Level: | Detail |  |
| Usage: | Optional |  |
| Max Use: | 1 |  |
| Purpose: | To specify lead time for availability of products and services |  |
| Syntax Notes: |  |  |
| Semantic Notes: | $\mathbf{1}$ | LDT04 is the effective date of lead time information. |
| Comments: | $\mathbf{1}$ | LDT02 is the quantity of unit of time periods. |

## Data Element Summary

Must Use | Ref. |
| :---: |
| $\underline{\text { Des. }}$ |

Must Use LDT02

Must Use LDT03

| Segment: | MAN Marks and Numbers |
| :---: | :---: |
| Position: | 560 |
| Loop: | LDT |
| Level: | Detail |
| Usage: | Optional |
| Max Use: | 10 |
| Purpose: | To indicate identifying marks and numbers for shipping containers |
| Syntax Notes: | 1 If either MAN04 or MAN05 is present, then the other is required. |
|  | 2 If MAN06 is present, then MAN05 is required. |
| Semantic Notes: | 1 MAN01/MAN02 and MAN04/MAN05 may be used to identify two different marks and numbers assigned to the same physical container. |
|  | 2 When both MAN02 and MAN03 are used, MAN02 is the starting number of a sequential range and MAN03 is the ending number of that range. |
|  | 3 When both MAN05 and MAN06 are used, MAN05 is the starting number of a sequential range, and MAN06 is the ending number of that range. |
| Comments: | 1 When MAN01 contains code UC (U.P.C. Shipping Container Code) and MAN05/MAN06 contain a range of ID numbers, MAN03 is not used. The reason for this is that the U.P.C. Shippping Container code is the same on every carton that is represented in the range in MAN05/MAN06. |
|  | 2 MAN03 and/or MAN06 are only used when sending a range(s) of ID numbers. When both MAN02/MAN03 and MAN05/MAN06 are used to send ranges of ID numbers, the integrity of the two ID numbers must be maintained. |

# NIST Technical Publications 

## Periodical

Journal of Research of the National Institute of Standards and Technology-Reports NIST research and development in those disciplines of the physical and engineering sciences in which the Institute is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Institute's technical and scientific programs. Issued six times a year.

## Nonperiodicals

Monographs-Major contributions to the technical literature on various subjects related to the Institute's scientific and technical activities.
Handbooks-Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.
Special Publications-Include proceedings of conferences sponsored by NIST, NIST annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.
National Standard Reference Data Series-Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a worldwide program coordinated by NIST under the authority of the National Standard Data Act (Public Law 90-396). NOTE: The Journal of Physical and Chemical Reference Data (JPCRD) is published bimonthly for NIST by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements are available from ACS, 1155 Sixteenth St., NW, Washington, DC 20056.

Building Science Series-Disseminates technical information developed at the Institute on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.
Technical Notes - Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NIST under the sponsorship of other government agencies.
Voluntary Product Standards-Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The standards establish nationally recognized requirements for products, and provide all concerned interests with a basis for common understanding of the characteristics of the products. NIST administers this program in support of the efforts of private-sector standardizing organizations.
Order the following NIST publications-FIPS and NISTIRs-from the National Technical Information Service, Springfield, VA 22161.
Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. The Register serves as the official source of information in the Federal Government regarding standards issued by NIST pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 ( 38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).
NIST Interagency Reports (NISTIR)-A special series of interim or final reports on work performed by NIST for outside sponsors (both government and nongovernment). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service, Springfield, VA 22161, in paper copy or microfiche form.
