ASC X12 003050 Transaction Set 832 Price/Sales Catalog (Revision 1)

Implementation Convention

U.S. DEPARTMENT OF COMMERCE
Technology Administration
National Institute of
Standards and Technology

he National Institute of Standards and Technology was established in 1988 by Congress to "assist industry in the development of technology . . . needed to improve product quality, to modernize manufacturing processes, to ensure product reliability . . . and to facilitate rapid commercialization . . . of products based on new scientific discoveries."

NIST, originally founded as the National Bureau of Standards in 1901, works to strengthen U.S. industry's competitiveness; advance science and engineering; and improve public health, safety, and the environment. One of the agency's basic functions is to develop, maintain, and retain custody of the national standards of measurement, and provide the means and methods for comparing standards used in science, engineering, manufacturing, commerce, industry, and education with the standards adopted or recognized by the Federal Government.

As an agency of the U.S. Commerce Department's Technology Administration, NIST conducts basic and applied research in the physical sciences and engineering, and develops measurement techniques, test methods, standards, and related services. The Institute does generic and precompetitive work on new and advanced technologies. NIST's research facilities are located at Gaithersburg, MD 20899, and at Boulder, CO 80303. Major technical operating units and their principal activities are listed below. For more information contact the Publications and Program Inquiries Desk, 301-975-3058.

Reports on Information Technology

The National Institute of Standards and Technology (NIST)'s Information Technology Laboratory (ITL) develops standards and guidelines, provides technical assistance, and conducts research for computers and resources. As part of the overall federal effort to establish a single face to industry for conducting electronic commerce, ITL has been designated as the organization responsible for coordinating the development of Federal Implementation Conventions (ICs) for Electronic Data Interchange (EDI). ICs are defined by functional-area experts who create and select options from standard EDI Transaction Sets to yield the implementations to be used for practical EDI. These ICs are made available to federal agencies and industry by electronic means and this Special Publication Series.

832 Price/Sales Catalog

Functional Group ID=SC

Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Price/Sales Catalog Transaction Set (832) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to furnishing or requesting the price of goods or services in the form of a catalog.

Notes:

- 1. This transaction set is used by commercial firms to submit to an agency of the Federal Government a catalog of goods and/or services available to the general public; a catalog of goods and/or services available only to Government entities; sales information that is not available within a catalog; or to identify special promotions.
- 2. This transaction set may also be used by Government agencies as a catalog of items that are for sale to other Government agencies or to the general public, e.g., the Government Printing Office.

When used, transmit the segment(s) or loop(s) containing the data to be added in their entirety. 3. If this change is the result of an approved contract modification, cite the contract modification number in the 1/REF/050 segment citing code 92 in REF01. Delete				
				1. Use only when BCT04 is used.				
				2. Use to indicate a deletion from a previously transmitted catalog. When used, this code signifies the deletion, without replacement, of an entire occurrence of a free standing segment(s) or an entire iteration of a loop(s). When used, transmit the segment(s) or loop(s) containing the data to be deleted in their entirety.				
			04	3. If this change is the result of an approved contract modification, cite the contract modification number in the 1/REF/050 segment citing code 92 in REF01. Change				
				1. Use only when BCT04 is used.				
				2. Use to indicate a change to a previously transmitted catalog that contains a combination of data additions, deletions or changes. When used, transmit all segments or loops that contain data additions, deletions or changes in their entirety. Use this code only when codes 02 or 03 do not apply.				

3. If this change is the result of an approved contract

modification, cite the contract modification number in the 1/REF/050 segment citing code 92 in REF01. 05 Replace Use to indicate a replacement for a superseded catalog. Use when BCT06, is used. 07 Use when transmitting a duplicate of a previously transmitted transaction set. 42 Temporary Record Preliminary data that will be replaced with permanent information once verification of accuracy and completeness has been performed Use to indicate a promotion or special sale. When used, there must be 1 use of the 1/REF/050 segment with REF01 citing code PD

REF Reference Numbers Segment:

Position: 050

Loop:

Level: Heading Usage: Optional 12

Max Use:

Purpose:

To specify identifying numbers.

Syntax Notes: Semantic Notes: At least one of REF02 or REF03 is required.

Comments:

Notes:

REF03

352

Description

Use this 1/REF/050 segment to identify reference numbers that apply to all of the items in the catalog. If the reference numbers vary by item, use the 2/REF/040 segment.

Data Element Summary Data Ref. Element Name Des. Attributes Reference Number Qualifier ID 2/2 Must Use REF01 128 \mathbf{M} Code qualifying the Reference Number. 92 Change Document Number Reference numbers to track changes made to a contract When BCT10 is code 02, 03, or 04, if the change is the result of a contract modification, use to indicate the contract modification number which authorized the change. GC Government Contract Number Use when the price list being transmitted applies to an existing Government contract. ME Message Address or ID Use to indicate the World Wide Web Uniform Resource Locator (URL) where the originator's catalog may be found. When used, cite the address in REF03. PD Promotion/Deal Number When BCT10 is code 42, use to indicate a unique promotion or deal number. TN Transaction Reference Number 1. Use to indicate the unique reference number of a transaction set that is transmitting images of the items or data relating to the items identified in this transaction set. 2. When used, cite the related transaction set's unique number in REF02 and cite the X12 transaction set designator of the related transaction set, e.g., 841, in REF03. W6 Federal Supply Schedule Number Identifies an item with a two-digit group number, twodigit part number, and one-character section letter Use when the price list being transmitted applies to an existing Federal Supply Schedule (FSS). 127 AN 1/30 REF02 Reference Number Reference number or identification number as defined for a particular

Transaction Set, or as specified by the Reference Number Qualifier.

AN 1/80

A free-form description to clarify the related data elements and their content

- 1. When REF01 is code ME, use to identify the World Wide Web URL.
- 2. When REF01 is code TN, use to identify the X12 transaction set designator, e.g., 841.

Segment: ITD Terms of Sale/Deferred Terms of Sale

Position: 110

Loop:

Level: Heading
Usage: Optional

Max Use: 2

Purpose: To specify terms of sale

Syntax Notes: 1 If ITD03 is present, then at least one of ITD04 ITD05 or ITD13 is required.

2 If ITD08 is present, then at least one of ITD04 ITD05 or ITD13 is required.

3 If ITD09 is present, then at least one of ITD10 or ITD11 is required.

Semantic Notes: 1 ITD15 is the percentage applied to a base amount used to determine a late payment

charge.

Comments: 1 If the code in ITD01 is "04", then ITD07 or ITD09 is required and either ITD10 or

ITD11 is required; if the code in ITD01 is "05", then ITD06 or ITD07 is required.

Notes: Use this 1/ITD/110 segment to identify sales terms that apply to all of the items in the

catalog.

Segment: SAC Service, Promotion, Allowance, or Charge Information

Position: 130

Loop:

Level: Heading Usage: Optional Max Use: 25

Tax Use: 2

Purpose: To request or identify a service, promotion, allowance, or charge; to specify the amount

or percentage for the service, promotion, allowance, or charge

Syntax Notes: 1 At least one of SAC02 or SAC03 is required.

2 If either SAC03 or SAC04 is present, then the other is required.

3 If either SAC06 or SAC07 is present, then the other is required.

4 If either SAC09 or SAC10 is present, then the other is required.

5 If SAC11 is present, then SAC10 is required.

6 If SAC13 is present, then at least one of SAC02 or SAC04 is required.

7 If SAC14 is present, then SAC13 is required.

Semantic Notes:

- 1 If SAC01 is "A" or "C", then at least one of SAC05, SAC07, or SAC08 is required.
- 2 SAC05 is the total amount for the service, promotion, allowance, or charge. If SAC05 is present with SAC07 or SAC08, then SAC05 takes precedence.
- 3 SAC08 is the allowance or charge rate per unit.
- 4 SAC10 and SAC11 is the quantity basis when the allowance or charge quantity is different from the purchase order or invoice quantity.

 SAC10 and SAC11 used together indicate a quantity range, which could be a dollar amount, that is applicable to service, promotion, allowance, or charge.
- 5 SAC13 is used in conjunction with SAC02 or SAC04 to provide a specific reference number as identified by the code used.
- 6 SAC14 is used in conjunction with SAC13 to identify an option when there is more than one option of the promotion.

Comments:

- 1 SAC04 may be used to uniquely identify the service, promotion, allowance, or charge. In addition, it may be used in conjunction to further the code in SAC02.
- In some business applications, it is necessary to advise the trading partner of the actual dollar amount that a particular allowance, charge, or promotion was based on to reduce ambiguity. This amount is commonly referred to a "Dollar Basis Amount". It is represented in the SAC segment in SAC10 using the qualifier "DO" Dollars in SAC09.

Notes:

- 1. Use this segment to identify charges, allowances, no charge services and discounts (including "free goods") that apply to all of the items in the catalog. The charge, allowance or discount can be either a dollar rate or a percentage and can be applied to the item unit price, the line item total amount, the total order amount, a specified amount, or various quantities. This information can also be associated with a zone to which deliveries will be made.
- 2. When BCT10 is code 42, discount information identified in this segment refers to promotional discounts.
- 3. Use also to identify taxes that are applicable to all of the items in the catalog. If the taxes differ by item or are not applicable to all the items, use the 2/TXI/166 segment to provide the information.

	Ref.	Data			
	Des.	Element	<u>Name</u>		Attributes
Must Use	SAC01	248	Allowance or C	harge Indicator	M ID 1/1
			Code which indi	cates an allowance or charge for the service	e specified
			A	Allowance	
			С	Charge	
			N	No Allowance or Charge	

Use to indicate there is no charge for the specified service.

SAC02 1300 Service, Promotion, Allowance, or Charge Code X ID 4/4

Code identifying the service, promotion, allowance, or charge

- 1. Any code may be used but the following codes are preferred.
- 2. When BCT10 is code 42, codes C300, C310, D170, D440, F910, and I530 are used to identify promotional discounts.
- A310 Air Express Charge
- A320 Air Transportation Charge
- A480 Assembly
- A880 Cancellation Charge
- **B940** Cutting Charge
- C000 Defective Allowance
- C260 Discount Incentive

Use to indicate that the contractor offers a discount when payment is made using the government credit card.

C300 Discount - Special

Use to indicate an incremental quantity discount. An incremental quantity discount applies only to the quantity units within its specified range. Successive incremental discounts are applied against a total order quantity. For example, if different discounts are given for quantities, 1 - 10, 11 - 20, 21 - 30, etc., use of this code implies that for a quantity of 25, the first discount applies to the first 10 units, the second discount applies to the next 10 units and the third discount applies to the last 5 units. Identify the quantity in SAC10/11. Identify the percentage discount in SAC06/07 or a monetary value discount in SAC08. This is contrast to the F910 step ladder discount that applies a single discount to the total order quantity.

C310 Discount

Use to indicate a general discount. Identify the percentage discount in SAC06/07 or a monetary value discount in SAC08. This general discount is not used in combination with C300 or F910. Include any general discount within the C300 or F910 discount considerations.

- C370 Diversion Charge
- C580 Emergency Service
- C590 Emergency Surcharge
- C880 Expediting Premium.
- D170 Free Goods
- 1. Use to indicate a quantity provided at no cost if a specified quantity or monetary amount is purchased, e.g., buy 10, get 1 free. For a specified quantity, cite the "free" quantity in SAC10 and cite the "buy" quantity in SAC11. Identify the specified amount in SAC05.
- 2. If free goods are applicable to a monetary amount range, multiple repetitions of this SAC segment must be transmitted using code D170 in SAC02. In this instance, the amount transmitted represents the base amount to qualify for the number of "free goods" specified in SAC10.

D290 Full Truckload Allowance

D440 Groupage Discount

Use to indicate a discount applicable to a line item total quantity meeting or exceeding the threshold specified in SAC10 or a total line item amount meeting or exceeding the amount cited in SAC05 when SAC15 cites the word "ITEM".

CA Calculate and Add to Invoice Value of allowance or charge is to be calculated by

recipient and added to invoice total Use to indicate the taxes are additive to the unit prices if they are not included in the unit prices.

SAC13 127 Reference Number AN 1/30

> Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier. If the discount, allowance, charge, or no charge service applies to a delivery

zone, identify the zone in this data element. The delivery zones and locations within each zone are identified in the 1/N1/150 loop. **Option Number**

Not Used SAC14 770 AN 1/20

A unique number identifying available promotion or allowance options when more than one is offered

Description SAC15 352

0 AN 1/80

A free-form description to clarify the related data elements and their content

- 1. Use to provide text information related to information provided within this segment.
- 2. When it is necessary to qualify the amount cited in SAC05, use the following format:
- a. To identify the amount as a line item total amount, cite the word "ITEM"
- b. To identify the amount as a total order amount, cite the word "ORDER"
- c. To identify the amount as a specified amount, cite the word, "SPECIFIED"

Segment: FOB F.O.B. Related Instructions

Position: 140

Loop:

Level: Heading Usage: Optional

Max Use:

Purpose: Syntax Notes:

To specify transportation instructions relating to shipment

1 If FOB03 is present, then FOB02 is required.

If FOB04 is present, then FOB05 is required.
If FOB07 is present, then FOB06 is required.

3 If FOB07 is present, then FOB06 is required.4 If FOB08 is present, then FOB09 is required.

Semantic Notes: 1 FOB01 indicates which party will pay the carrier.

2 FOB02 is the code specifying transportation responsibility location.

3 FOB06 is the code specifying the title passage location.

FOB08 is the code specifying the point at which the risk of loss transfers. This may be different than the location specified in FOB02/FOB03 and FOB06/FOB07.

Comments:

Notes:

1. Use this 1/FOB/140 segment if the Shipment Method of Payment and the FOB point applies to all of the items in the catalog.

2. If the FOB point varies by delivery zone or destinations within a delivery zone, use the 1/N1/150 loop citing code DZ in N101, identify the delivery zone in N103/104 citing code ZN in N103 and identify the FOB point in N405/406.

3. If the FOB point varies by item, use the 2/FOB/160 segment.

N1 Name Segment:

150 Position:

> Loop: N1 Optional (Must Use)

Heading Level:

Optional (Must Use) Usage:

Max Use:

Purpose:

To identify a party by type of organization, name, and code

Syntax Notes:

At least one of N102 or N103 is required.

If either N103 or N104 is present, then the other is required. 2

Semantic Notes:

Comments:

1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

N105 and N106 further define the type of entity in N101.

Notes:

1. Use this 1/N1/150 loop to identify parties that apply to all items in the catalog. If the information varies by item, use the 2/N1/230 loop.

- 2. Use also to associate entities with delivery zones, if applicable.
- 3. Whenever possible, identification and address information should be provided using code values contained in a combination of N101, N103, and N104. Use N102 and segments N2 through N4, as applicable, when address information cannot be provided using one of the codes listed in N103.
- 4. One N1 segment is REQUIRED citing code SE in N101.

			Data l	Element Summary
	Ref.	Data Element	Name	Attributes
Must Use	N101	98	Entity Identif	
			•	ng an organizational entity, a physical location, or an individual
			40	Receiver
				Entity to accept transmission
				Use to indicate the entity to receive the catalog.
			56	Servicing Dealer
				Use to indicate a dealer who services a product. This is the location to obtain service such as a repair.
			CT	Country of Origin
				1. Use to indicate the country of origin, as defined in the Buy American Act, when all items in this catalog are other than a United States domestic end product and the country of origin is the same for the items. If the country of origin differs by item, use code CH in the 2/LIN/010 segment.
				2. When used, cite code 38 in N103 and the two position ISO 3166 country code in N104.
			DL	Dealer
				Use to indicate a dealer or reseller of products.
			DS	Distributor
				Use to indicate the distributor of the item(s) contained in the catalog.
			DZ	Delivery Zone

Area where the product was delivered

- 1. Use to indicate a geographic delivery area for which there is a set price. Specify the zone in N104 (e.g., 10, 11, 12, etc.) using code ZN in N103 and identify the states or countries that comprise the zone in N402 or N404. The zone number will be cited in CTP10 when specifying a price for delivery to this zone.
- 2. Multiple repetitions of this N1 loop may be necessary to identify all delivery zones and all locations within a delivery zone. When identifying all locations within a zone, cite the same zone designator in N104 for each repetition of this N1 loop.
- 3. If the FOB point varies by delivery zone or by locations within a delivery zone, identify the FOB point in the 1/N4/180 segment. If the FOB point is the same for all locations within a delivery zone, use one repetition of this N1 loop to identify the FOB point and additional repetitions to identify locations within the zone.

KX Free on Board Point

Use to indicate the FOB point when it has to be described by a specific address rather than as a code value indicating either origin or destination. Use in conjunction with FOB02 code ZZ.

MF Manufacturer of Goods

Use to indicate the manufacturer of the item(s) contained in the catalog.

PL Party to Receive Purchase Order

Use to indicate the location to which an order is to be sent if different than the address of the selling party, dealer, or distributor.

Remit To

RI

Use to indicate a specific remit-to address when multiple remit-to addresses were provided as part of the trading partner registration process or a new remit-to address is to be used. Do not use when only a single remit-to address was provided as a part of the registration process.

SE Selling Party

Use to indicate the selling party (i.e., the party originating the price sales catalog).

SF Ship From

Use to indicate a location from which items will be shipped.

SV Service Performance Site

When services are contracted for, this describes the organization for whom or location address at which those services will be performed

Use to indicate a location where a service is provided.

66

Code designating the system/method of code structure used for Identification

1	D-U-N-S Number, Dun & Bradstreet				
	Use of the DUNS or DUNS+4 number is preferred				
0	over other codes to identify an entity.				
9	D-U-N-S+4, D-U-N-S Number with Four Character Suffix				
	Use of the DUNS or DUNS +4 number is preferred				
	over other codes to identify an entity.				
10	Department of Defense Activity Address Code				
	(DODAAC)				
	Use to indicate either a Department of Defense or				
21	Civilian Agency Activity Address Code.				
	Health Industry I.D. Number (HIN)				
33	Commercial and Government Entity (CAGE)				
38	Country Code				
	When used, cite the two position ISO 3166 country				
ZN	code in N104. Zone				
ZIV					
	When N101 is code DZ, use to indicate a delivery zone.				
dentification	the state of the second of the				
	ing a party or other code				
	s code ZN, cite one of the following::				

N104

67

Segment: N2 Additional Name Information

Position: 160

Loop: N1 Optional (Must Use)

Level: Heading Usage: Optional

Max Use: 2

Purpose: To specify additional names or those longer than 35 characters in length

Syntax Notes: Semantic Notes: Comments:

Notes:

This segment is not necessary when the entity cited in N101 is described by a code in

N103/N104.

	Ref. Des.	Data <u>Element</u>	Name	<u>Attributes</u>
Must Use	N201	93	Name Free-form name	M AN 1/35
	N202	93	Name	O AN 1/35
			Free-form name	

Segment: N3 Address Information

Position: 170

Loop: N1 Optional (Must Use)

Level: Heading Usage: Optional

Max Use:

Purpose:

To specify the location of the named party

Syntax Notes: Semantic Notes:

Comments:

Notes: This segment is not necessary when the entity cited in N101 is described by a code in

N103/N104.

	Ref. Des.	Data <u>Element</u>	Name	<u>Attributes</u>
Must Use	N301	166	Address Information Address information	M AN 1/35
	N302	166	Address Information	O AN 1/35
			Address information	

N4 Geographic Location Segment:

Position: 180

> N1 Optional (Must Use) Loop:

Level: Heading Usage: Optional

Max Use:

Purpose: To specify the geographic place of the named party **Syntax Notes:** If N406 is present, then N405 is required.

Semantic Notes:

Comments: A combination of either N401 through N404, or N405 and N406 may be adequate to specify a location.

N402 is required only if city name (N401) is in the USA or Canada.

Notes: 1. This segment is not necessary when the entity cited in N101 is described by a code in N103/N104.

> 2. When N101 is code DZ and N104 does not cite the words "CONUS" or "WORLD", this segment may be used to identify locations within a delivery zone and the FOB point if it varies by delivery zone or locations within a delivery zone.

Data Element Summary

Ref.	Data			
Des.	Element	Name	Att	<u>ributes</u>
N401	19	City Name	O	AN 2/30
		Free-form text for city name		
N402	156	State or Province Code	0	ID 2/2
		Code (Standard State/Province) as defined by appropriate	govern	ment agency
N403	116	Postal Code	O	ID 3/11
N404	26	Code defining international postal zone code excluding put (zip code for United States) Country Code	nctuat	ion and blanks ID 2/3

		0 1 11 1101 1 11 11		

Code identifying type of location

1. When N101 is code DZ and the 1/FOB/140 segment is not used to identify the FOB point, use to specify the FOB point for a delivery zone or for a location within a zone.

2. If the FOB point is the same for all locations within a delivery zone, one repetition of the N1 loop should be used to identify the FOB point.

DE	Destination (Shipping)
OA	Origin (After Loading on Equipment)
	Use to indicate FOB Origin with transportation
	charges prepaid by the seller and added as a separate
	item to the invoice.
OR	Origin (Shipping Point)
	Use to indicate FOB Origin with transportation
	charges paid by a Government Bill of Lading (GBL).
ZN	Zone Code
	Qualifies a code that identifies a geographic area where

transportation rates apply

When it is necessary to associate the entity identified in N101 with a delivery zone, use this code in conjunction with an appropriate N101 code (e.g., DL, DS, SV, etc.).

ZZ Mutually Defined

Use to indicate an FOB point other than origin or destination. Identify the FOB point in N406.

N406 310 Location Identifier

O AN 1/30

Code which identifies a specific location

- 1. When N405 is code ZZ, use to identify the location of the Other FOB point. Cite the 5 position United Nations code for ports and other locations (UN/LOCODE) in accordance with the United Nations Location Code Manual.
- 2. When N405 is code ZN, use to identify a delivery zone associated with the entity identified in N101. Identify the delivery zone using the same zone number or keyword specified in establishing the zone.

Segment: REF Reference Numbers

Position: 190

Loop: N1 Optional (Must Use)

Level: Heading Usage: Optional

Max Use: 12

Purpose: To specify identifying numbers.

Syntax Notes: 1 At least one of REF02 or REF03 is required.

Semantic Notes:

Comments:

Notes: Use, if applicable, to identify the personal identification number assigned to the

submitting contractor by the agency receiving this transaction set.

PER Administrative Communications Contact Segment:

200 Position:

> Loop: N1 Optional (Must Use)

Level: Heading Usage: Optional

Max Use: 3

Purpose:

To identify a person or office to whom administrative communications should be directed

Syntax Notes: If either PER03 or PER04 is present, then the other is required. 2 If either PER05 or PER06 is present, then the other is required.

3 If either PER07 or PER08 is present, then the other is required.

Semantic Notes:

Comments:

Notes:

This segment will be used when the point of contact is related to an entity identified in N101.

Data Element Summary

Ref. Data Element Des. Name **Attributes Contact Function Code** Must Use PER01 366 ID 2/2

Code identifying the major duty or responsibility of the person or group named

Review/Repricing Contact

Use to indicate the party authorized to provide lower prices, e.g., when the maximum order is reached on

Federal Supply Schedule (FSS) contracts.

Administrative Contracting Officer AC

> Use to indicate the originating party's Contracts Manager for Federal Supply Schedule (FSS)

contracts.

CR **Customer Relations**

Use to indicate a customer service contact.

EA **EDI** Coordinator Order Department OD SE Service Organization

When N101 is code SV, use to indicate the

communication numbers for a service location. Use of PER02 to identify an individual by name is optional.

TR Technical Marketing Representative

Use to indicate a technical information contact.

PER02 93 Name 0 AN 1/35

Free-form name

Use to identify the name of a point of contact. Last name followed by first name is preferred. If the whole name is longer than 35 characters, the use of initials for the first name is recommended. PER09 may be used to cite the party's title.

PER03 365 Communication Number Qualifier X ID 2/2

Segment: LIN Item Identification

Position: 010

Loop: LIN Optional

Level: Detail Usage: Optional

Max Use: 1

Purpose: To specify basic item identification data

Syntax Notes:

- 1 If either LIN04 or LIN05 is present, then the other is required.
- 2 If either LIN06 or LIN07 is present, then the other is required.
- 3 If either LIN08 or LIN09 is present, then the other is required.
- 4 If either LIN10 or LIN11 is present, then the other is required.
- 5 If either LIN12 or LIN13 is present, then the other is required.
- 6 If either LIN14 or LIN15 is present, then the other is required.
- 7 If either LIN16 or LIN17 is present, then the other is required.
- 8 If either LIN18 or LIN19 is present, then the other is required.
- 9 If either LIN20 or LIN21 is present, then the other is required.
- 10 If either LIN22 or LIN23 is present, then the other is required.
- 11 If either LIN24 or LIN25 is present, then the other is required.
- 12 If either LIN26 or LIN27 is present, then the other is required.
- 13 If either LIN28 or LIN29 is present, then the other is required.
- 14 If either LIN30 or LIN31 is present, then the other is required.

Semantic Notes: Comments:

- 1 LIN01 is the line item identification
- 1 See the Data Dictionary for a complete list of ID's.
- 2 LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Notes:

- 1. Use this segment to identify all the items in the catalog that can be purchased, including items provided with a system or kit that can be purchased separately.
- 2. When BCT10 is code 42, use also to identify ALL promotional items. Specify the prices, discounts, restrictions, promotional periods and other necessary information in the applicable segments within this LIN loop.
- 3. This segment is also used to identify a system, kit, etc., that is comprised of multiple items. When used in this manner, identify the items that comprise the system or kit in the 2/SLN/020 segment. If the item can be purchased separately, it MUST also be identified in this LIN segment.
- 4. Promotional items associated with a system, kit, or other items in this catalog MUST be identified in this segment; not in the 2/SLN/020 segment. In this instance, use of the 2/REF/040 segment is REQUIRED citing code 2S in REF01 and the number from LIN01 of the associated system, kit or item in REF02.

Data Element Summary

	Ref.	Data		
	Des.	Element	Name	<u> Attributes</u>
Rec	LIN01	350	Assigned Identification	AN 1/11
			Alphanumeric characters assigned for differentiation within a	transaction set
			Use of this data element is RECOMMENDED to specify a cequivalent identifier to differentiate among items in the cata 1001, etc. This identifier is essential to associate specific items.	log, e.g., 1, 001,

Must Use LIN02 235 Product/Service ID Qualifier M ID 2/2

Code identifying the type/source of the descriptive number used in Product/Service ID (234)

1. Data elements 235 and 234 are used in 15 pairs in this segment. Use as many pairs as necessary to identify the item. When working with an identifying pair of data elements, any applicable code can be used with data element 235.

2. Use any code to describe the item. The following is a preferred code list.

AK Refined Product Code

CH Country of Origin

Use to indicate the country of origin, as defined in the Buy American Act, when the item is other than a United States domestic end product. When used, cite the 2 position ISO 3166 country code in the following DE 234.

CG Commodity Grouping

Use to indicate a commodity code, the 2 position Federal Supply Group code.

CL Color

DP Discontinued Part Number

Use to indicate an item that has been discontinued and replaced by the item identified in this LIN loop.

EN European Article Number (EAN)(2-5-5-1)

F7 End-Item Description.

Use to indicate the end item to which the item applies.

F8 Next Higher Used Assembly

Use to indicate the next higher assembly to which the item applies.

FS National Stock Number

The NSN shall be transmitted without dashes.

FT Federal Supply Classification

Use to indicate the 4 position Federal Supply Classification code or Product Service code.

HI HIBC (Health Care Industry Bar Code)

KM Shelf-Life Code

KN Shelf-Life Action Code

MF Manufacturer

When used, cite the DUNS number of the manufacturer in the following 234 data element.

MG Manufacturer's Part Number

When used, a second 235/234 pair must be used citing code MF, ZB, or ZZ.

MN Model Number

N1 National Drug Code in 4-4-2 Format

N2 National Drug Code in 5-3-2 Format

N3 National Drug Code in 5-4-1 Format

N4 National Drug Code in 5-4-2 Format

ND National Drug Code (NDC).

PA Pattern Number

PD Part Number Description

Use to indicate the noun nomenclature of the item.

PI Purchaser's Item Code

Use to indicate a GSA Special Item Number

RR Replacement Product Number

Use to indicate an item number in this catalog that will replace the item identified in this LIN loop when stock is exhausted.

SR Substitute Product Number

Use to indicate an item number in this catalog that is a suggested substitute for the item identified in this LIN loop.

SV Service Rendered

Use to indicate (in clear text) a service.

SN Serial Number

SS Superseded Part Number

Use to indicate an item that is still available but has been superseded by the item identified in this LIN loop.

SZ Vendor Alphanumeric Size Code (NRMA)

Use to indicate the size of the item. (No X12 Code Source is associated with this code). Cite a readily understood size applicable to the item, e.g., size for clothing, shoes, rings, etc.

UA U.P.C./EAN Case Code (2-5-5)

UI U.P.C. Consumer Package Code (1-5-5)

UP U.P.C. Consumer Package Code (1-5-5-1)

VA Vendor's Style Number

VC Vendor's (Seller's) Catalog Number

Use to indicate the number of the item within the catalog.

VP Vendor's (Seller's) Part Number

Use to indicate a part number assigned by a contractor other than the manufacturer.

ZB Commercial and Government Entity (CAGE) Code

Use to indicate a manufacturer who can be identified by a CAGE code.

ZZ Mutually Defined

Use to indicate a clear text name of a manufacturer

G53 Maintenance Type Segment:

Position: 015

LIN Optional Loop:

Level: Detail Optional Usage:

Max Use:

To identify the specific type of item maintenance Purpose:

Syntax Notes: Semantic Notes: Comments:

> Notes: When BCT10 is code 02, 03, or 04, use to identify the action applicable to the item

identified in the same LIN loop.

Data Element Summary

Must Use	Ref. <u>Des.</u> G5301	Data Element 875	Name Maintenance Typ Code identifying t	oe Code he specific type of item maintenance	<u>Attı</u> M	ributes ID 3/3
			001	Change		
			002	Use only when the codes 002 or 021 When used, the entire LIN loop mus containing ALL information applica identified in LIN01. Delete	t be tro	ansmitted
			021	Use only when an item identified in a is being deleted from the catalog. Addition	the san	ne LIN loop
				Use only when the item identified in	the sa	me LIN

loop is being added to the catalog.

Segment: SLN Subline Item Detail

Position: 020

Loop: LIN Optional

Level: Detail
Usage: Optional
Max Use: 100

Purpose:

To specify product subline detail item data

Syntax Notes: 1 If SLN07 is present, then SLN06 is required.
2 If SLN08 is present, then SLN06 is required.

- 3 If either SLN09 or SLN10 is present, then the other is required.
- 4 If either SLN11 or SLN12 is present, then the other is required.
- 5 If either SLN13 or SLN14 is present, then the other is required.
- 6 If either SLN15 or SLN16 is present, then the other is required.
- 7 If either SLN17 or SLN18 is present, then the other is required.
- 8 If either SLN19 or SLN20 is present, then the other is required.
- 9 If either SLN21 or SLN22 is present, then the other is required.
- 10 If either SLN23 or SLN24 is present, then the other is required.
- 11 If either SLN25 or SLN26 is present, then the other is required.
- 12 If either SLN27 or SLN28 is present, then the other is required.

Semantic Notes:

- 1 SLN01 is the identifying number for the subline item.
- 2 SLN02 is the identifying number for the subline level. The subline level is analogous to the level code used in a bill of materials.
- 3 SLN03 is the configuration code indicating the relationship of the subline item to the baseline item.
- 4 SLN08 is a code indicating the relationship of the price or amount to the associated segment.

Comments:

- 1 See the Data Dictionary for a complete list of ID's.
- 2 SLN01 is related to (but not necessarily equivalent to) the baseline item number. Example: 1.1 or 1A might be used as a subline number to relate to baseline number 1.
- 3 SLN09 through SLN28 provide for ten (10) different product/service ID's for each item. For example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Notes:

Ref.

Data

- 1. Use this 2/SLN/020 segment only to identify items that:
 - a. Are provided with a system or kit (SLN03 code I)
- b. Can be added to or deleted from a kit or system (SLN03 is code A or SLN08 is code D)
- c. Items that can be substituted for other items provided with a system or kit (SLN03 code S)
- d. Items that can be selected as "free goods" when a system or kit is purchased (SLN03 code 0)
- 2. DO NOT USE this segment to identify promotional items associated with a system, kit or another catalog item. Use the 2/LIN/010 segment and the 2/CTP/170 loop (citing code PRP in CTP02) to identify these promotional items.

8 October 1997

003050F832_1

Code identifying the type of unit price for an item

SLN08 662 Relationship Code

0 ID 1/1

Code indicating the relationship between entities Delete

When SLN03 is code I use to indicate that the item can be deleted for a credit. Specify the credit amount in SLN06.

SLN09 235 Product/Service ID Qualifier

ID 2/2

Code identifying the type/source of the descriptive number used in Product/Service ID (234)

- 1. Data elements 235 and 234 are used in 10 pairs in this segment. Use as many pairs as necessary to identify the item. When working with an identifying pair of data elements, any applicable code can be used with data element 235.
- 2. Use any code to describe the item. The following is a preferred code list.

AK Refined Product Code

BL Brand/Label

Use to indicate the product's brand or model name, e.g., Trinitron is the Sony brand name for a TV or computer monitor.

CH Country of Origin

Use to indicate the country of origin, as defined in the Buy American Act, when the item is other than a United States domestic end product. When used, cite the 2 position ISO 3166 country code in the following DE 234.

CG Commodity Grouping

Use to indicate a commodity code, e.g., the 2 position Federal Supply Group code.

CL Color

CN Commodity Name

Use to indicate a class or category of products or services, e.g., furniture, hand tools, monitors, accessories, painting, landscaping, etc.

DP Discontinued Part Number

Use to indicate an item that has been discontinued and replaced by the item identified in this LIN loop.

EN European Article Number (EAN)(2-5-5-1)

F7 End-Item Description.

Use to indicate the end item to which the item applies.

F8 Next Higher Used Assembly

Use to indicate the next higher assembly to which the item applies.

FS National Stock Number

The NSN shall be transmitted without dashes.

FT Federal Supply Classification

Use to indicate the 4 position Federal Supply Classification code or Product Service code.

HI HIBC (Health Care Industry Bar Code)

KM Shelf-Life Code

KN Shelf-Life Action Code

MF Manufacturer

When used, cite the DUNS number of the manufacturer in the following 234 data element.

MG Manufacturer's Part Number

When used, a second 235/234 pair must be used citing code MF, ZB, or ZZ.

MN Model Number

- N1 National Drug Code in 4-4-2 Format
- N2 National Drug Code in 5-3-2 Format
- N3 National Drug Code in 5-4-1 Format
- N4 National Drug Code in 5-4-2 Format
- ND National Drug Code (NDC).
- PA Pattern Number
- PD Part Number Description

Use to indicate the noun nomenclature of the item.

PI Purchaser's Item Code

Use to indicate a GSA Special Item Number

RR Replacement Product Number

Use to indicate an item number in this catalog that will replace the item identified in this LIN loop when stock is exhausted.

SR Substitute Product Number

Use to indicate an item number in this catalog that is a suggested substitute for the item identified in this LIN loop.

SV Service Rendered

Use to indicate (in clear text) a service.

SN Serial Number

SS Superseded Part Number

Use to indicate an item that is still available but has been superseded by the item identified in this LIN loop.

SZ Vendor Alphanumeric Size Code (NRMA)

Use to indicate the size of the item.

UA U.P.C./EAN Case Code (2-5-5)

- UI U.P.C. Consumer Package Code (1-5-5)
- UP U.P.C. Consumer Package Code (1-5-5-1)
- VA Vendor's Style Number
- VC Vendor's (Seller's) Catalog Number

Use to indicate the number of the item within the catalog.

VP Vendor's (Seller's) Part Number

Use to indicate a part number assigned by a contractor other than the manufacturer.

ZB Commercial and Government Entity (CAGE) Code

Use to indicate a manufacturer who can be identified by a CAGE code.

ZZ Mutually Defined

Use to indicate a clear text name of a manufacturer

Refer to 003050 Data Element Dictionary for acceptable code values.

REF Reference Numbers Segment:

Position:

LIN Loop: Optional

Detail Level: Usage: **Optional**

Max Use: 12

Purpose: To specify identifying numbers.

Syntax Notes: Semantic Notes: At least one of REF02 or REF03 is required.

Comments:

Notes:

Use this segment to identify a reference number applicable to the cited item in the same

LIN segment.

Data Element Summary

Ref. Data Des. Element Name **Attributes** Must Use REF01 128 Reference Number Qualifier ID 2/2

Code qualifying the Reference Number. 2S Catalog

Use to indicate an associated catalog item, i.e., a service or item that is applicable to another item or items. Cite the number from LIN01 of the associated

catalog item in REF02.

GC Government Contract Number

Use when the item is contained on an existing

Government contract.

ME Message Address or ID

> Use to indicate the World Wide Web Uniform Resource Locator (URL) where the item may be found. When used, cite the address in REF03.

PD Promotion/Deal Number

> Use to indicate a unique promotion or deal number assigned by the originator of the transaction set that is applicable to the item cited in the same LIN loop.

QX Old Part Number

> Use to indicate the manufacturer's part number of a discontinued item for which the service identified in the LIN segment is still available. Cite the part number in REF02 and identify the manufacturer in

REF03.

TN Transaction Reference Number

> 1. Use to indicate the unique reference number of a transaction set that is transmitting images of the items or data relating to the items identified in this

transaction set.

2. When used, cite the related transaction set's unique number in REF02 and cite the X12 transaction set designator of the related transaction set, e.g., 841, in

REF03.

Federal Supply Schedule Number

Identifies an item with a two-digit group number, twodigit part number, and one-character section letter Use when the item is contained on an existing Federal

Supply Schedule (FSS).

REF02 127 Reference Number

W6

X AN 1/30 Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.

REF03 352 Description X AN 1/80

A free-form description to clarify the related data elements and their content

- 1. When REF01 is code ME, use to identify the World Wide Web URL.
- 2. When REF03 is code QX, use to identify the manufacturer either by a DUNS number, a CAGE code or free form text.
- 3. When REF01 is code TN, use to identify the X12 transaction set designator, e.g., 841.

CTB Restrictions/ Conditions Segment:

Position: 060

> LIN Loop: Optional

Level: Detail Usage: Optional 25

Max Use:

To specify restrictions/conditions (such as shipping, ordering) Purpose: **Syntax Notes:** At least one of CTB02 CTB04 or CTB06 is required.

If either CTB03 or CTB04 is present, then the other is required. If either CTB05 or CTB06 is present, then the other is required.

Semantic Notes:

Comments:

Notes: Use this 2/CTB/060 segment when the restriction or condition applies to the item cited

in LIN01.

	D.f	Data	Data Ele	ement Summary
	Ref. <u>Des.</u>	Data <u>Element</u>	Name	<u>Attributes</u>
Must Use	CTB01	688		nditions Qualifier M ID 2/2
				the type of restriction/condition
			DW	Direct and Wholesaler
				Use only if the selling party will not accept orders from state and local governments. When used, identify in CTB02 from whom the selling party will accept orders.
			NR	Nonreturnable
				Use to indicate a non-returnable quantity and/or monetary amount.
			OR	Ordering
			CD	Use to indicate a minimum or maximum order quantity and/or monetary amount.
			SR	Shipping
				Use to indicate a minimum or maximum shipment quantity and/or monetary amount.

		KQ	Incremental Order Amount							
		MA	Use to indicate the increment, above the minimum amount, in which orders for this item will be accepted. For example, the minimum order amount may be \$100 but orders above \$100 must be in increments of \$50. Maximum Amount							
							MO	Minimum Order Value		
								Minimum value of order allowed		
				Use code "MO" to represent the min amount.						
CTB06	610	Amount		X	N2 1/15					
		Monetary amount								

PID Product/Item Description Segment:

070 Position:

> LIN Loop: **Optional**

Level: Detail Usage: Optional Max Use: 200

Purpose:

To describe a product or process in coded or free-form format

Syntax Notes:

- If PID04 is present, then PID03 is required. At least one of PID04 or PID05 is required. 3 If PID07 is present, then PID03 is required.
- 4 If PID08 is present, then PID03 is required.

Semantic Notes:

- 1 Use PID03 to indicate the organization that publishes the code list being referred to.
- PID04 should be used for industry-specific product description codes.
- 3 PID08 describes the physical characteristics of the product identified in PID04. A "Y" indicates that the specified attribute applies to this item. A "N" indicates it does not apply. Any other value is indeterminate.

Comments:

- If PID01 = "F", then PID05 is used. If PID01 = "S", then PID04 is used. If PID01 = "X", then both PID04 and PID05 are used.
- Use PID06 when necessary to refer to the product surface or layer being described in the segment.
- PID07 specifies the individual code list of the agency specified in PID03.

Notes:

- 1. Use to describe a product or service in a coded format, in free form text, or in both a coded format and free form text.
- 2. Use also to provide information related to the product or service, e.g., warranty conditions, shipping information, material condition, etc.

Data Element Summary

	Ref.	Data	Data En	ement Summar y		
	Des.	Element	<u>Name</u>		Att	ributes
Must Use	PID01	349	Item Descriptio	n Type	\mathbf{M}	ID 1/1
			Code indicating	the format of a description		
			F	Free-form		
				Use only when a free-form text desc carried in PID05.	ription	will be
			S	Structured (From Industry Code List)	
			X	Use when a code from an industry c qualified and carried in PID03/04. Semi-structured (Code and Text)	ode lis	t will be
				Use when a code and a free-form tende be carried in the segment.	xt desc	ription will
	PID02	750	Product/Process	s Characteristic Code	O	ID 2/3

Code identifying the general class of a product or process characteristic Any code may be used.

08 Product

When PID03 is code GS, use to indicate that the value cited in PID04 is the Federal Supply Schedule (FSS) Product Code (Pcode).

12 Type/and/or Process

When PID03 is code GS, use to indicate that the value cited in PID04 is a code assigned by GSA to indicate special properties of the item, e.g., environmental features such as Low VOC, Recyclable, etc.

Shipping Unit Component

Use to indicate the item comes in a reusable shipping container. Identify the

type of container in PID05 using either text or an applicable number, e.g., an NSN. MAC Material Classification Use to indicate the item is other than new/unused. When used, cite the appropriate code in PID04 to indicate the material classification WD Warranty Description Use to indicate warranty conditions. Specify the general conditions in PID05, e.g., factory warranty, shop warranty, etc. Use the 2/MEA/080 segment to identify the length of the warranty Refer to 003050 Data Element Dictionary for acceptable code values. PID03 559 Agency Qualifier Code ID 2/2 Code identifying the agency assigning the code values 1. Use any code, other than code ZZ. 2. When PID02 is code MAC, cite code AS Refer to 003050 Data Element Dictionary for acceptable code values. PID04 751 **Product Description Code** AN 1/12 A code from an industry code list which provides specific data about a product characteristic 1. An actual code from an agency code list when the agency is specified in PID03. 2. When PID02 is code MAC, cite the material classification of the item using the following: cite the letter R for reconditioned, cite the letter M for modified, or cite the letter U for used. PID05 352 Description AN 1/80 X A free-form description to clarify the related data elements and their content 1. Use to provide free form text information applicable to the item cited in the same LIN loop. 2. When PID02 is code 93, identify the type of reusable container using either text or an applicable number, e.g., an NSN. Not Used PID06 752 Surface/Layer/Position Code ID 2/2 Code indicating the product surface, layer or position that is being described Not Used Source Subqualifier PID07 822 AN 1/15 A reference that indicates the table or text maintained by the Source Qualifier Not Used PID08 1073 Yes/No Condition or Response Code **ID 1/1** Code indicating a Yes or No condition or response

MEA Measurements Segment:

Position: 080

Loop: LIN Optional

Level: Detail Usage: Optional

Max Use: 40 Purpose:

To specify physical measurements or counts, including dimensions, tolerances, variances,

and weights (See Figures Appendix for example of use of C001)

At least one of MEA03 MEA05 MEA06 or MEA08 is required. **Syntax Notes:**

> If MEA05 is present, then MEA04 is required. 3 If MEA06 is present, then MEA04 is required.

4 If MEA07 is present, then at least one of MEA03 MEA05 or MEA06 is required.

5 Only one of MEA08 or MEA03 may be present.

Semantic Notes:

Comments:

MEA04 defines the unit of measure for MEA03, MEA05, and MEA06. 1

When citing dimensional tolerances, any measurement requiring a sign (+ or -), or any measurement where a positive (+) value cannot be assumed, use MEA05 as the negative (-) value and MEA06 as the positive (+) value.

Notes:

1. Use this segment to identify measurements applicable to the item identified in the

LIN segment.

2. Use also to identify the length of a warranty period.

Data Element Summary

Ref. Data Des. Element Name **Attributes** MEA01 737 Measurement Reference ID Code ID 2/2 Code identifying the broad category to which a measurement applies

Use any code.

CT Counts

Use to indicate variations in quantity, when expressed as a discrete quantity, that can be expected when orders are delivered. Specify the quantity under and/or over in MEA05/06.

DE Defects

Use to indicate a warranty period.

Refer to 003050 Data Element Dictionary for acceptable code values.

MEA02 738 Measurement Qualifier ID 1/3

Code identifying a specific product or process characteristic to which a measurement applies

Use any code other than code ZZZ.

PO Percent of Order (-,+)

Use to indicate variations in quantity, when expressed as a percent of the quantity ordered, that can be expected when orders are delivered. Specify the percent under and/or over in MEA05/06.

TT Time

Use to indicate the length of a warranty period. Specify the number or days, weeks, months, years in MEA03 and the time period in MEA04-C00101.

Refer to 003050 Data Element Dictionary for acceptable code values.

MEA03 739 Measurement Value X R 1/20

The value of the measurement

PO4 Item Physical Details Segment:

Position:

100

LIN Optional Loop:

Level: Detail Optional Usage:

Max Use:

Purpose: **Syntax Notes:**

To specify the physical qualities, packaging, weights, and dimensions relating to the item

- If either PO402 or PO403 is present, then the other is required.
- 2 If PO405 is present, then PO406 is required.
- 3 If either PO406 or PO407 is present, then the other is required.
- 4 If either PO408 or PO409 is present, then the other is required.
- 5 If PO410 is present, then PO413 is required.
- If PO411 is present, then PO413 is required.
- If PO412 is present, then PO413 is required.
- If PO413 is present, then at least one of PO410 PO411 or PO412 is required.

Semantic Notes: Comments:

- PO403 The "Unit of Measure Code" (Element #355) in this segment position is for purposes of defining the pack (PO401) /size (PO402) measure which indicates the quantity in the inner pack unit. Example: If the carton contains 24 12-Ounce packages, it would be described as follows: Element 356 = 24; Element 357 = 12; Element 355 = OZ.
- PO413 defines the unit of measure for PO410, PO411, and PO412.

Notes:

- 1. This segment can be used to specify the weight, cube, or dimensions of the unit or intermediate pack; or the unit pack quantity or intermediate container quantity applicable to the item identified in LIN01. To specify the unit pack quantity, use PO401, and PO404 (code UNT). If there are 50 pairs in a unit container, PO401 would cite 50, and PO404 would cite code UNT.
- 2. If it is necessary to specify not only the quantity of items in a unit container, but also the size and unit of measure of those items, use PO401, PO402, PO403 and PO404. In this instance, if there are 24, 12 ounce bottles in the unit container, PO401 would cite 24, PO402 would cite 12, PO403 would cite code OZ and PO404 would cite code UNT. In either of these examples, the number of unit containers in an intermediate container would be carried in PO414. If only the quantity per intermediate container is required, use code INT in PO404 and cite the quantity in PO414.

SAC Service, Promotion, Allowance, or Charge Information Segment:

150 Position:

> Optional Loop: LIN

Detail Level: Usage: **Optional**

Max Use: 25

Purpose: To request or identify a service, promotion, allowance, or charge; to specify the amount

or percentage for the service, promotion, allowance, or charge

At least one of SAC02 or SAC03 is required. **Syntax Notes:**

- If either SAC03 or SAC04 is present, then the other is required. 3 If either SAC06 or SAC07 is present, then the other is required.
- 4 If either SAC09 or SAC10 is present, then the other is required.
- 5 If SAC11 is present, then SAC10 is required.
- 6 If SAC13 is present, then at least one of SAC02 or SAC04 is required.
- If SAC14 is present, then SAC13 is required.

Semantic Notes:

- If SAC01 is "A" or "C", then at least one of SAC05, SAC07, or SAC08 is required. 1
- SAC05 is the total amount for the service, promotion, allowance, or charge. If SAC05 is present with SAC07 or SAC08, then SAC05 takes precedence.
- 3 SAC08 is the allowance or charge rate per unit.
- SAC10 and SAC11 is the quantity basis when the allowance or charge quantity is different from the purchase order or invoice quantity. SAC10 and SAC11 used together indicate a quantity range, which could be a dollar amount, that is applicable to service, promotion, allowance, or charge.
- SAC13 is used in conjunction with SAC02 or SAC04 to provide a specific reference number as identified by the code used.
- SAC14 is used in conjunction with SAC13 to identify an option when there is more than one option of the promotion.

Comments:

- 1 SAC04 may be used to uniquely identify the service, promotion, allowance, or charge. In addition, it may be used in conjunction to further the code in SAC02.
- In some business applications, it is necessary to advise the trading partner of the actual dollar amount that a particular allowance, charge, or promotion was based on to reduce ambiguity. This amount is commonly referred to a "Dollar Basis Amount". It is represented in the SAC segment in SAC10 using the qualifier "DO" - Dollars in SAC09.

Notes:

- 1. Use this segment to identify charges, allowances, no charge services and discounts (including "free goods") that apply to the item identified in the LIN segment. The charge, allowance or discount can be either a dollar rate or a percentage and can be applied to the item unit price, the line item total amount, some specified amount, or various quantities. This information can also be associated with a zone to which deliveries will be made.
- 2. When BCT10 is code 42, discount information identified in this segment refers to promotional discounts.

Must Use	Ref. Des. SAC01	Data Element 248	Name Allowance or Char Code which indicate	ge Indicator es an allowance or charge for the service	M	ributes ID 1/1 cified
			A	Allowance		
			С	Charge		
			N	No Allowance or Charge		
				Use to indicate there is no charge for service.	the s	pecified
	SAC02	1300	Service, Promotion	, Allowance, or Charge Code	X	ID 4/4
			Code identifying the	service, promotion, allowance, or char	ge	

- 1. Any code may be used but the following codes are preferred. It is recommended that taxes applicable to line items be identified in the 2/TXI/166 segment.
- 2. When BCT10 is code 42, codes C300, C310, D170, D440, and F910 are used to identify promotional discounts.
- A310 Air Express Charge
- A320 Air Transportation Charge
- A480 Assembly
- A880 Cancellation Charge
- **B940** Cutting Charge
- C000 Defective Allowance
- C300 Discount Special

Use to indicate an incremental quantity discount. An incremental quantity discount applies only to the quantity units within its specified range. Successive incremental discounts are applied against an item's purchase quantity. For example, if different discounts are given for quantities, 1 - 10, 11 - 20, 21 - 30, etc., use of this code implies that for a quantity of 25, the first discount applies to the first 10 units, the second discount applies to the next 10 units and the third discount applies to the last 5 units. Identify the quantity in SAC10/11. Identify the percentage discount in SAC06/07 or a monetary value discount in SAC08. This is contrast to the F910 step ladder discount that applies a single discount to the total item purchase quantity.

C310 Discount

Use to indicate a general discount applicable to the item identified in the LIN segment. Identify the percentage discount in SAC06/07 or a monetary value discount in SAC08. This general discount is not used in combination with C300 or F910. Include any general discount within the C300 or F910 discount considerations.

- C370 Diversion Charge
- C580 Emergency Service
- C590 Emergency Surcharge
- C880 Expediting Premium.
- D170 Free Goods
- 1. Use to indicate a quantity provided at no cost if a specified quantity or monetary amount is purchased, e.g., buy 10, get 1 free. For a specified quantity, cite the "free" quantity in SAC10 and cite the "buy" quantity in SAC11. Identify the specified amount in SAC05.
- 2. If free goods are applicable to a monetary amount range, multiple repetitions of this SAC segment must be transmitted using code D170 in SAC02. In this instance, the amount transmitted represents the base amount to qualify for the number of "free goods" specified in SAC10.
- D290 Full Truckload Allowance
- D440 Groupage Discount

Use to indicate a discount applicable to a line item total quantity meeting or exceeding the threshold specified in SAC10 or a total line item amount meeting or exceeding the amount cited in SAC05 when SAC15 cites the word "ITEM".

- D500 Handling
- D530 Hazardous Cargo Charge
- D660 Hook-up Charge
- D820 Inside Delivery

A free-form description to clarify the related data elements and their content

- 1. Use to provide text information related to information provided within this segment.
- 2. When it is necessary to qualify the amount cited in SAC05, use the following format:
- a. To identify the amount as a line item total amount, cite the word "ITEM"
- b. To identify the amount as a specified amount, cite the word, "SPECIFIED"

FOB F.O.B. Related Instructions Segment:

160 Position:

> LIN Loop: Optional

Level: Detail Usage: Optional

Max Use: Purpose:

To specify transportation instructions relating to shipment

Syntax Notes: If FOB03 is present, then FOB02 is required.

If FOB04 is present, then FOB05 is required. 3 If FOB07 is present, then FOB06 is required.

4 If FOB08 is present, then FOB09 is required.

FOB01 indicates which party will pay the carrier. **Semantic Notes:** 1

2 FOB02 is the code specifying transportation responsibility location.

3 FOB06 is the code specifying the title passage location.

FOB08 is the code specifying the point at which the risk of loss transfers. This may be different than the location specified in FOB02/FOB03 and FOB06/FOB07.

Comments:

Use this 2/FOB/160 segment when the Shipment Method of Payment and or the FOB Notes:

point varies by item.

		Data Element Summary		
	Ref. Des.	Data Element	Name	<u>Attributes</u>
Must Use	FOB01	146	Shipment Method of Payment M ID 2/2 Code identifying payment terms for transportation charges	
			BP	Paid by Buyer
				The buyer agrees to the transportation payment term requiring the buyer to pay transportation charges to a specified location (origin or destination location) Use to indicate the buyer is to pay the transportation charges by issuance of a Government Bill of Lading (GBL).
			PP	Prepaid (by Seller)
				Use to indicate that transportation charges are not included in the unit price but will be prepaid and added as a separate item on the invoice.
			PS	Paid by Seller
				The seller agrees to the transportation payment term requiring the seller to pay transportation charges to a specified location (origin or destination location) Use to indicate transportation charges are included in the unit price.

Segment: TXI Tax Information

Position: 166

Loop: LIN Optional

Level: Detail
Usage: Optional

Max Use:

Purpose: To specify tax information

Syntax Notes: 1 At least one of TXI02 TXI03 or TXI06 is required.

2 If either TXI04 or TXI05 is present, then the other is required.

3 If TXI08 is present, then TXI03 is required.

Semantic Notes: 1 TXI07 is a code indicating the relationship of the price or amount to the associated

segment.

Comments: 1 TXI02 is the monetary amount of the tax.

2 TXI03 is the tax percent expressed as a decimal.

3 If TXI02 is not used, then the application of the percent (TXI03) is between trading

partners.

Notes: Use this segment to identify taxes that apply to the item and whether they are included

in the unit price or are to be added to the unit price of the item.

Segment: CTP Pricing Information

Position: 170

Loop: CTP Optional

Level: Detail
Usage: Optional

Max Use: 1

Purpose: To specify pricing information

Syntax Notes: 1 If either CTP04 or CTP05 is present, then the other is required.

If CTP06 is present, then CTP07 is required.
If CTP09 is present, then CTP02 is required.

4 If CTP10 is present, then CTP02 is required.

Semantic Notes: 1 CTP07 is a multiplier factor to arrive at a final discounted price. A multiplier of .90 would be the factor if a 10% discount is given.

2 CTP08 is the rebate amount.

Comments: 1 See Figures Appendix for an example detailing the use of CTP03 and CTP04.

See Figures Appendix for an example detailing the use of CTP03, CTP04 and

CTP07.

Notes: 1. Use this segment to specify various prices for the item identified in the LIN segment.

These include the item's unit price, unit prices for step ladder quantities or purchase values, or the unit price for delivery to various geographic locations (zones). The unit prices can be expressed by various attributes, e.g., discounted price, Government price,

catalog price, etc.

2. Example of step ladder quantity prices for quantities 1-10, 11-20, 21-30, and 31 and

above:

CTP**PBQ**1*EA n/l

Data Element Summary

	Ref.	Data			
	Des.	Element	Name	Att	ributes
Not Used	CTP01	687	Class of Trade Code	0	ID 2/2
			Code indicating class of trade		
	CTP02	236	Price Identifier Code	X	ID 3/3

Code identifying pricing specification

1. Use to identify an attribute of the unit price cited in CTP03.

2. Use also to identify additional prices applicable to the item, e.g., labor rate price, lease to purchase price, etc.

ALT	Alternate Price
	Use to indicate a lease-to-purchase price.
CAT	Catalog Price
	Use to indicate a standard commercial price, i. e., the price offered to the general public or the standard dealer price.
D01	Federal Supply Schedule (FSS) Price
DPR	Discount Price
	Use to indicate the price of the item is already discounted.
GOV	Government Price

Use to indicate this is the price to the government.

Temporary Price Reduction Price

Use to indicate this is a temporary discounted price.

ICL Unit Price Through Quantity

> 1. Use to indicate the end of a quantity range or an item purchase value range applicable to step ladder pricing. Identify the quantity in CTP04 or the value in CTP08.

2. Use in conjunction with codes PBQ and MAX for step ladder pricing. Step ladder pricing is defined as the price specified for the range containing the quantity or dollar value purchased, applying to all the items purchased. Use of codes ICL, MAX and PBQ is in contrast to use of code PAQ which identifies quantities at which different prices are applied.

LAR Labor Rate

> Use when the item identified in the LIN loop is a labor category and there is one set labor rate for the category.

Maximum Order Quantity Price

1. Use for step ladder pricing to indicate the quantity or item purchase value above which the price will not change. Identify the quantity in CTP04 or the value in CTP08.

2. Use in conjunction with codes ICL and PBQ for step ladder pricing. Step ladder pricing is defined as the price specified for the rauge containing the quantity or dollar value purchased, applying to all the items purchased. Use of codes ICL, MAX and PBQ is in contrast to use of code PAQ which identifies quantities at which different prices are applied.

Manufacturer's Suggested Retail

Use to indicate the base price from which the government price is calculated.

Price Break Quantity(s)

Use to indicate a quantity where an incremental price break occurs. For example, if price breaks occur at quantities 11, 21, 31, etc., then for a purchase quantity of 25, the first 10 units are at the first price, the next 10 units are at the second price and the last 5 units are at the third price. This is in contrast to step ladder prices where all 25 units are one price.

Unit Price Beginning Quantity

- 1. Use to indicate the beginning of a quantity range or item purchase value range applicable to step ladder pricing. Identify the quantity in CTP04 or the value in *CTP08*.
- 2. Use in conjunction with codes ICL and MAX for step ladder pricing. Step ladder pricing is defined as the price specified for the range containing the quantity or dollar value purchased, applying to all the

SAC Service, Promotion, Allowance, or Charge Information Segment:

228 Position:

CTP Loop: Optional

Level: Detail Optional Usage:

Max Use: 25

Purpose:

To request or identify a service, promotion, allowance, or charge; to specify the amount or percentage for the service, promotion, allowance, or charge

At least one of SAC02 or SAC03 is required. **Syntax Notes:**

- 2 If either SAC03 or SAC04 is present, then the other is required. 3 If either SAC06 or SAC07 is present, then the other is required.
- 4 If either SAC09 or SAC10 is present, then the other is required.
- 5 If SAC11 is present, then SAC10 is required.
- If SAC13 is present, then at least one of SAC02 or SAC04 is required.
- 7 If SAC14 is present, then SAC13 is required.

Semantic Notes:

- If SAC01 is "A" or "C", then at least one of SAC05, SAC07, or SAC08 is required.
- 2 SAC05 is the total amount for the service, promotion, allowance, or charge. If SAC05 is present with SAC07 or SAC08, then SAC05 takes precedence.
- 3 SAC08 is the allowance or charge rate per unit.
- SAC10 and SAC11 is the quantity basis when the allowance or charge quantity is different from the purchase order or invoice quantity. SAC10 and SAC11 used together indicate a quantity range, which could be a dollar amount, that is applicable to service, promotion, allowance, or charge.
- SAC13 is used in conjunction with SAC02 or SAC04 to provide a specific reference number as identified by the code used.
- SAC14 is used in conjunction with SAC13 to identify an option when there is more than one option of the promotion.

Comments:

- SAC04 may be used to uniquely identify the service, promotion, allowance, or 1 charge. In addition, it may be used in conjunction to further the code in SAC02.
- In some business applications, it is necessary to advise the trading partner of the actual dollar amount that a particular allowance, charge, or promotion was based on to reduce ambiguity. This amount is commonly referred to a "Dollar Basis Amount". It is represented in the SAC segment in SAC10 using the qualifier "DO" - Dollars in SAC09.

Notes:

- 1. Use this segment to identify charges, allowances, no charge services and discounts (including "free goods") that apply to the item identified in the LIN segment. The charge, allowance or discount can be either a dollar rate or a percentage and can be applied to the item unit price, the line item total amount, some specified amount, or various quantities. This information can also be associated with a zone to which deliveries will be made.
- 2. When BCT10 is code 42, discount information identified in this segment refers to promotional discounts.

Must Use	Ref. Des. SAC01	Data Element 248	Name Allowance or Charge Indicator Code which indicates an allowance or charge for the service		M	ributes ID 1/1 cified
			A	Allowance		
			С	Charge		
			N	No Allowance or Charge		
				Use to indicate there is no charge j service.	for the s	pecified
	SAC02	1300	Service, Promotion	, Allowance, or Charge Code	X	ID 4/4
•			Code identifying the	e service, promotion, allowance, or cl	harge	

- 1. Any code may be used but the following codes are preferred. It is recommended that taxes applicable to line items be identified in the 2/TXI/166 segment.
- 2. When BCT10 is code 42, codes C300, C310, D170, D440, and F910 are used to identify promotional discounts.
- 3. Use in conjunction with an appropriate CTP02 code.
- 4. Use in conjunction with CTP02 code ZNP if the allowance or charge applies to a delivery zone. In this instance, the charge is additive to the zone price and the allowance is deducted from the zone price.
- A310 Air Express Charge
- A320 Air Transportation Cluarge
- A480 Assembly
- A880 Cancellation Charge
- **B940** Cutting Charge
- C000 Defective Allowance
- C300 Discount Special

Use to indicate an incremental quantity discount. An incremental quantity discount applies only to the quantity units within its specified range. Successive incremental discounts are applied against an item's purchase quantity. For example, if different discounts are given for quantities, 1 - 10, 11 - 20, 21 - 30, etc., use of this code implies that for a quantity of 25, the first discount applies to the first 10 units, the second discount applies to the next 10 units and the third discount applies to the last 5 units. Identify the quantity in SAC10/11. Identify the percentage discount in SAC06/07 or a monetary value discount in SAC08. This is contrast to the F910 step ladder discount that applies a single discount to the total item purchase quantity.

C310 Discount

Use to indicate a general discount applicable to the item identified in the LIN segment. Identify the percentage discount in SAC06/07 or a monetary value discount in SAC08. This general discount is not used in combination with C300 or F910. Include any general discount within the C300 or F910 discount considerations.

- C370 Diversion Charge
- C580 Emergency Service
- C590 Emergency Surcharge
- C880 Expediting Premium.
- D170 Free Goods
- 1. Use to indicate a quantity provided at no cost if a specified quantity or monetary amount is purchased, e.g., buy 10, get 1 free. For a specified quantity, cite the "free" quantity in SAC10 and cite the "buy" quantity in SAC11. Identify the specified amount in SAC05.
- 2. If free goods are applicable to a monetary amount range, multiple repetitions of this SAC segment must be transmitted using code D170 in SAC02. In this instance, the amount transmitted represents the base amount to qualify for the number of "free goods" specified in SAC10.
- D290 Full Truckload Allowance
- D440 Groupage Discount

Use to indicate a discount applicable to a line item total quantity meeting or exceeding the threshold specified in SAC10 or a total line item amount meeting or exceeding the amount cited in SAC05 when SAC15 cites the word

			"ITEM".		
			D500 Handling D530 Hazardous Cargo Charge D600 Hook-up Charge D820 Inside Delivery D890 Installation and Training D900 Installation E930 One - Day Service F560 Premium Transportation F910 Quantity Discount Use to indicate a step ladder discount applicable to the quantity of the item purchase quantity is the discount to item. Identify the percentage discount in SAC06/07 or a discount in SAC08. This is contrast to the C300 incrementage to that portion of the item purchase quantity with	uantity be app i monei ental di	range lied to the tary value iscount that
			G470 Restocking Charge G600 Same-Day Service G610 Saturday Delivery G740 Service Charge Use to indicate a basic charge for a service call. If the c distance, e.g., a set price within a 25 mile range, another mile range, etc. use SAC09/10/11 to provide that information	r price	
			G760 Set-up G870 Shrink-Wrap Charge H000 Special Allowance H110 Special Packaging I330 Two - Day Service I380 Unloading (Labor Charges) I590 Warranties Use to indicate the price for a warranty ZZZZ Mutually Defined

- 1. Use to provide text information related to information provided within this segment.
- 2. When it is necessary to qualify the amount cited in SAC05, use the following format:
- a. To identify the amount as a line item total amount, cite the word "ITEM" b. To identify the amount as a specified amount, cite the word, "SPECIFIED"

Segment: N1 Name

Position: 230

Loop: N1 Optional

Level: Detail
Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name, and code

Syntax Notes: 1 At least one of N102 or N103 is required.

2 If either N103 or N104 is present, then the other is required.

Semantic Notes:

Comments:

1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

N105 and N106 further define the type of entity in N101.

Notes:

1. Use this 2/N1/230 loop to identify parties that apply to the cited item in LIN01 or SLN01.

2. Whenever possible, identification and address information should be provided using code values contained in a combination of N101, N103, and N104. Use N102 and segments N2 through N4, as applicable, when address information cannot be provided using one of the codes listed in N103.

			Data	Element Summary

			DL	Dealer
				Use to indicate a dealer or reseller of products.
			DS	Distributor
				Use to indicate the distributor of the cited item.
			KX	Free on Board Point
				Use to indicate the FOB point when it has to be described by a specific address rather than as a code value indicating either origin or destination. Use in conjunction with FOB02 code ZZ.
			MF	Manufacturer of Goods
				Use to indicate the manufacturer of the cited item.
			PL	Party to Receive Purchase Order
				Use to indicate the location to which an order is to be sent if different than the address of the selling party, dealer, or distributor.
			RI	Remit To
				Use to indicate a specific remit-to address that is unique for the item or service identified in the LIN segment.
			SF	Ship From
				Use to indicate a location from which all items will be shipped.
			SV	Service Performance Site

When services are contracted for, this describes the organization for whom or location address at which those services will be performed

Use to indicate a location where a service is provided.

3 If either PER07 or PER08 is present, then the other is required.

Semantic Notes: Comments:

Notes: This segment will be used when the point of contact is related to an entity identified in

N101.

Data Element Summary

Ref. Data

Des. Element Name

Must Use PER01 366 Contact Function Code

Attributes

M ID 2/2

Code identifying the major duty or responsibility of the person or group named

SE Service Organization

When N101 is code SV, use to indicate the communication numbers for a service location. Use of

PER02 to identify an individual by name is optional.

TR Technical Marketing Representative

Use to indicate a technical information contact.

PER02 93 Name O AN 1/35

Free-form name

Use to identify the name of a point of contact. Last name followed by first name is preferred. If the whole name is longer than 35 characters, the use of initials for the first name is recommended. PER09 may be used to cite the party's title.

PER03 365 Communication Number Qualifier X

Code identifying the type of communication number

While any code from the list in this implementation convention can be used, there must be at least one use of code "TE" to provide the telephone number of the party transmitting the price sales catalog.

EM Electronic Mail
FX Facsimile

IT International Telephone

Include the country code.

TE Telephone

Use to indicate the commercial telephone number of the individual cited in PER02. Include the area code.

PER04 364 Communication Number X

Complete communications number including country or area code when applicable

All numbers, other than those associated with code EM, shall be transmitted as a continuous number with no extraneous characters.

PER05 365 Communication Number Qualifier X ID 2/2

Code identifying the type of communication number

Use to identify a second communications number for the party cited in PER02. For example, if PER03/04 cites a telephone number, PER05/06 can

AN 1/80

ID 2/2

		be used to cite	a FAX number.

Periodical

Journal of Research of the National Institute of Standards and Technology—Reports NIST research and development in those disciplines of the physical and engineering sciences in which the Institute is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Institute's technical and scientific programs. Issued six times a year.

Nonperiodicals

Monographs—Major contributions to the technical literature on various subjects related to the Institute's scientific and technical activities.

Handbooks—Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

Special Publications—Include proceedings of conferences sponsored by NIST, NIST annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

National Standard Reference Data Series—Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a worldwide program coordinated by NIST under the authority of the National Standard Data Act (Public Law 90-396). NOTE: The Journal of Physical and Chemical Reference Data (JPCRD) is published bimonthly for NIST by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements are available from ACS, 1155 Sixteenth St., NW, Washington, DC 20056.

Building Science Series—Disseminates technical information developed at the Institute on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

Technical Notes—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NIST under the sponsorship of other government agencies.

Voluntary Product Standards—Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The standards establish nationally recognized requirements for products, and provide all concerned interests with a basis for common understanding of the characteristics of the products. NIST administers this program in support of the efforts of private-sector standardizing organizations.

Order the following NIST publications—FIPS and NISTIRs—from the National Technical Information Service, Springfield, VA 22161.

Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. The Register serves as the official source of information in the Federal Government regarding standards issued by NIST pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

NIST Interagency Reports (NISTIR)—A special series of interim or final reports on work performed by NIST for outside sponsors (both government and nongovernment). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service, Springfield, VA 22161, in paper copy or microfiche form.
