A BIBLIOGRAPHY OF FOREIGN DEVELOPMENTS IN MACHINE TRANSLATION AND INFORMATION PROCESSING

JOSEPHINE L. WALKOWICZ

U. S. DEPARTMENT OF COMMERCE
NATIONAL BUREAU OF STANDARDS

THE NATIONAL BUREAU OF STANDARDS

Functions and Activities

The functions of the National Bureau of Standards are set forth in the Act of Congress, March 3, 1901, as amended by Congress in Public Law 619, 1950. These include the development and maintenance of the national standards of measurement and the provision of means and methods for making measurements consistent with these standards; the determination of physical constants and properties of materials; the development of methods and instruments for testing materials, devices, and structures; advisory services to government agencies on scientific and technical problems; invention and development of devices to serve special needs of the Government; and the development of standard practices, codes, and specifications. The work includes basic and applied research, development, engineering, instrumentation, testing, evaluation, calibration services, and various consultation and information services. Research projects are also performed for other government agencies when the work relates to and supplements the basic program of the Bureau or when the Bureau's unique competence is required. The scope of activities is suggested by the listing of divisions and sections on the inside of the back cover.

Publications

The results of the Bureau's research are published either in the Bureau's own series of publications or in the journals of professional and scientific societies. The Bureau publishes three periodicals available from the Government Printing Office: The Journal of Research, published in four separate sections, presents complete scientific and technical papers; the Technical News Bulletin presents summary and preliminary reports on work in progress; and the Central Radio Propagation Laboratory Ionospheric Predictions provides data for determining the best frequencies to use for radio communications throughout the world. There are also five series of nonperiodical publications: Monographs, Applied Mathematics Series, Handbooks, Miscellaneous Publications, and Technical Notes.

A complete listing of the Bureau's publications can be found in National Bureau of Standards Circular 460, Publications of the National Bureau of Standards, 1901 to June 1947 (\$1.25), and the Supplement to National Bureau of Standards Circular 460, July 1947 to June 1957 (\$1.50), and Miscellaneous Publication 240, July 1957 to June 1960 (includes Titles of Papers Published in Outside Journals 1950 to 1959) (\$2.25); available from the Superintendent of Documents, Government Printing Office, Washington 25, D.C.

NATIONAL BUREAU OF STANDARDS

Technical Note 193

ISSUED JULY 10, 1963

A BIBLIOGRAPHY OF FOREIGN DEVELOPMENTS IN MACHINE TRANSLATION AND INFORMATION PROCESSING

Josephine L. Walkowicz

NBS Technical Notes are designed to supplement the Bureau's regular publications program. They provide a means for making available scientific data that are of transient or limited interest. Technical Notes may be listed or referred to in the open literature.

BIBLIOGRAPHY OF FOREIGN DEVELOPMENTS IN
MACHINE TRANSLATION AND INFORMATION PROCESSING

Josephine L. Walkowicz

The bibliography presents 714 references to the literature translated in the Joint Publications Research Service series on foreign developments in machine translation and information processing. In addition to a conventional subject index to the literature cited, a permuted title index is provided as an experiment in the comparative efficiency of two methods of indexing. Also provided are an author index, an index to conferences and organizations cited, and a listing of the original source documents.

INTRODUCTION

This report is a revised edition of a previous, unpublished report from the Research Information Center and Advisory Service on Information Processing to the National Science Foundation, and is one of a series intended as contributions to the improvement of cooperation in the fields of information processing and machine translation.

The bibliography was prepared in order to provide author and subject indexes to the Joint Publications Research Service translation series on foreign developments in machine translation and information processing. The JPRS publications covered by this report are listed in the Bibliography section and are identified by an asterisk placed to the right of the JPRS number. Each asterisked or "mother" entry is followed immediately by its component items, listed in page-number order of appearance. This combination of JPRS number plus initial page number identifies each item in the series. A JPRS number without an asterisk and without a specific page number indicates an item which comprises the entire contents of that particular JPRS document. In the few instances where two items appear on one page, both items have the same number, both as to JPRS identification and as to page. Hopefully, the resultant ambiguity will be negligible. The 3-digit number preceding the JPRS designation is the Research Center's own collection accession number (from 101 to 814) and has no other significance.

Asterisked items are not included in the permuted title index provided with this bibliography as an experiment in the comparative efficiency of automatic and manual methods of indexing. The permuted title index was obtained as a by-product from paper tapes generated in the processing of data for accessioning and bibliographic control operations at the Center. The paper tapes were produced on a Friden Flexowriter and converted to punched cards by a Systematics C-750 Universal Code Tape-to-Card Converter. The punched cards were then converted to magnetic tape by an IBM-1401 for permutation by an IBM-7090 and for IBM 1401 printout.

Organizations and conferences cited are listed in separate indexes; original source documents translated in the series are listed in the last section of the bibliography. Efforts to resolve translation and transliteration ambiguities were not entirely successful; therefore some variant spellings may be encountered.

JPRS reports are regularly listed in the MONTHLY CATALOG OF U. S. GOVERNMENT PUBLICATIONS which is available on subscription from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

Scientific and technical reports in the JPRS series, specifically including those covered by this bibliography, are available from the Sales and Distribution Section, Office of Technical Services, U. S. Department of Commerce, Washington 25, D. C. These reports together with their prices are listed in that organization's biweekly publication TECHNICAL TRANSLATIONS, also available on a subscription basis from the Superintendent of Documents.

The Photoduplication Service of the Library of Congress provides photocopies of all JPRS reports; prices are quoted upon request.

Several members of the Data Processing Systems Division cooperated in the preparation of this report. Miss Doretha I. Bates converted the bibliographic data to computer input, Mr. William L. Golemon guided the input through its numerous processing stages, Mr. William W. Youden wrote the computer programs used for the title permutations, and Mrs. Anna E. Upperman provided editorial and clerical assistance. Their contributions are gratefully acknowledged.

INDEX TO CONFERENCES

- All-Union Conference on Computer Mathematics
and Computer Techniques, 16-21 November
1959 8026 p.1; 13543 p.503
- All Union Conference on Mathematical
Linguistics, Leningrad University,
April 1959 621 p.10; 893 (all
items); 3502 p.4;
3758 p.66
- Conference on Information Theory, Statistical
Decision Functions, and Random Processes,
Liblice (Czechoslovakia), November 1956. 3502 p.40
- Conference on Machine Translation Research,
Stockholm (Sweden), 1 December 1959. 3629 p.17
- Conference on Problems of Scientific
Research Work in Formal Logic, Moscow
State University, 27 October-3 November
1958 863
- Conference for the Processing of Information,
Machine Translation, and Automatic Reading
of Texts, Moscow, 21-30 January 1961 14318 p.1
- Conference on Speech Statistics, Leningrad
State University; sponsored by Leningrad
University and the Speech Section of the
Commission on Acoustics, Academy of
Sciences USSR. 6445 p.1; 6543 (all
items)
- Conference on Utilization of Technical
Equipment in Teaching Foreign Languages,
First Moscow Pedagogical Institute of
Foreign Languages, 11-15 May 1959. 3597 p.8
- Conference of Young Specialists of the
ITMiVT, 1957 387; 1130
- First All-Union Conference on Machine
Translation, 15-21 May 1958; sponsored by
the First Moscow State Pedagogical Institute
of Foreign Languages
abstracts 241 (all items)
program, documents, recommendations,
participating institutions. 1006
selected papers 925 (all items)
summary 487 p.21

Intervuz Scientific Conference on Applied Linguistics, Chernovtsy State University, 22-28 September 1960.	8132 p.1; 13761 p.118
Leningrad All-University Seminar on Machine Translation, 28 November- 3 December 1957 report on.	1145 p.44 no. 11A
Scientific and Technical Conference on the Complex Problems Concerned with the Development and Construction of an Infor- mation Machine with a Large Durative Memory, 28-31 May 1957. (Also referred to as the Scientific and Technical Conference on Cybernetics.)	662 p.1 conference 68 p.68; 1145 p.1; socialized 2150 p.6; 3502 p.4; 11483 p.2, 150, 154, 171.
program.	1145 p.44 no. 11A
summaries, papers.	1145 p.44 no. 11A
Seminar on Application of Mathematical Research Methods to Linguistics, Moscow State University, 9 June 1958	487 p.27 conference
Seminar on Reading Machines, Cybernetic Machines Section of the Scientific Council on Cybernetics, Academy of Sciences USSR, 13-14 June 1960.	6507 p.11 in 11A
Seminar on the Theoretical Principles of Scientific Information, All-Union Institute of Scientific and Technical Information, 1958.	8372 p.16
Symposium on Machine Translation and Linguistic Statistics, Zagreb (Yugoslavia) 1959	6732 p.46 in 11A
Symposium on Methods of Spectral Analysis of Speech Sounds; sponsored by the Acoustics Commission, Academy of Sciences USSR, Moscow, 1-4 December 1959	6094 p.13; 113543 p.481
Symposium on Problems of Speech Discrimination; sponsored by the Acoustics Commission, Academy of Sciences USSR, Moscow, 26-30 May 1958. . . .	3502 p.4; 6445 p.15

Luther H. Hodges, *Secretary*

NATIONAL BUREAU OF STANDARDS

A. V. Astin, *Director*

THE NATIONAL BUREAU OF STANDARDS

The scope of activities of the National Bureau of Standards at its major laboratories in Washington, D.C., and Boulder, Colorado, is suggested in the following listing of the divisions and sections engaged in technical work. In general, each section carries out specialized research, development, and engineering in the field indicated by its title. A brief description of the activities, and of the resultant publications, appears on the inside of the front cover.

WASHINGTON, D. C.

Electricity. Resistance and Reactance. Electrochemistry. Electrical Instruments. Magnetic Measurements. Dielectrics. High Voltage. Absolute Electrical Measurements.

Metrology. Photometry and Colorimetry. Refractometry. Photographic Research. Length. Engineering Metrology. Mass and Volume.

Heat. Temperature Physics. Heat Measurements. Cryogenic Physics. Equation of State. Statistical Physics.

Radiation Physics. X-ray. Radioactivity. Radiation Theory. High Energy Radiation. Radiological Equipment. Nucleonic Instrumentation. Neutron Physics.

Analytical and Inorganic Chemistry. Pure Substances. Spectrochemistry. Solution Chemistry. Standard Reference Materials. Applied Analytical Research. Crystal Chemistry.

Mechanics. Sound. Pressure and Vacuum. Fluid Mechanics. Engineering Mechanics. Rheology. Combustion Controls.

Polymers. Macromolecules: Synthesis and Structure. Polymer Chemistry. Polymer Physics. Polymer Characterization. Polymer Evaluation and Testing. Applied Polymer Standards and Research. Dental Research.

Metallurgy. Engineering Metallurgy. Metal Reactions. Metal Physics. Electrolysis and Metal Deposition.

Inorganic Solids. Engineering Ceramics. Glass. Solid State Chemistry. Crystal Growth. Physical Properties. Crystallography.

Building Research. Structural Engineering. Fire Research. Mechanical Systems. Organic Building Materials. Codes and Safety Standards. Heat Transfer. Inorganic Building Materials. Metallic Building Materials.

Applied Mathematics. Numerical Analysis. Computation. Statistical Engineering. Mathematical Physics. Operations Research.

Data Processing Systems. Components and Techniques. Computer Technology. Measurements Automation. Engineering Applications. Systems Analysis.

Atomic Physics. Spectroscopy. Infrared Spectroscopy. Far Ultraviolet Physics. Solid State Physics. Electron Physics. Atomic Physics. Plasma Spectroscopy.

Instrumentation. Engineering Electronics. Electron Devices. Electronic Instrumentation. Mechanical Instruments. Basic Instrumentation.

Physical Chemistry. Thermochemistry. Surface Chemistry. Organic Chemistry. Molecular Spectroscopy. Elementary Processes. Mass Spectrometry. Photochemistry and Radiation Chemistry.

Office of Weights and Measures.

BOULDER, COLO.

CRYOGENIC ENGINEERING LABORATORY

Cryogenic Processes. Cryogenic Properties of Solids. Cryogenic Technical Services. Properties of Cryogenic Fluids.

CENTRAL RADIO PROPAGATION LABORATORY

Ionosphere Research and Propagation. Low Frequency and Very Low Frequency Research. Ionosphere Research. Prediction Services. Sun-Earth Relationships. Field Engineering. Radio Warning Services. Vertical Soundings Research.

Troposphere and Space Telecommunications. Data Reduction Instrumentation. Radio Noise. Tropospheric Measurements. Tropospheric Analysis. Spectrum Utilization Research. Radio-Meteorology. Lower Atmosphere Physics.

Radio Systems. Applied Electromagnetic Theory. High Frequency and Very High Frequency Research. Frequency Utilization. Modulation Research. Antenna Research. Radiodetermination.

Upper Atmosphere and Space Physics. Upper Atmosphere and Plasma Physics. High Latitude Ionosphere Physics. Ionosphere and Exosphere Scatter. Airglow and Aurora. Ionospheric Radio Astronomy.

RADIO STANDARDS LABORATORY

Radio Standards Physics. Frequency and Time Disseminations. Radio and Microwave Materials. Atomic Frequency and Time-Interval Standards. Radio Plasma. Microwave Physics.

Radio Standards Engineering. High Frequency Electrical Standards. High Frequency Calibration Services. High Frequency Impedance Standards. Microwave Calibration Services. Microwave Circuit Standards. Low Frequency Calibration Services.

Joint Institute for Laboratory Astrophysics-NBS Group (Univ. of Colo.).
