ANNOUNCEMENT

THE STANDARDS YEARBOOK represents an effort to present an adequate picture of the diversification and ramification of the standardization movement which has spread throughout the world with astonishing vitality during the 25 years that have elapsed since the establishment of the National Bureau of Standards. It contains outlines of the activities and accomplishments of not only this bureau and other agencies of the Federal Government and the States and municipalities, but also of the American societies and associations of which standardization is a major or very important activity. Descriptions and illustrations are presented of all the fundamental national standards of the United States. Moreover, outlines are given of the various foreign national and the several international standardizing agencies.

In a general review of the standardization movement in America attention is directed to the remarkable growth in the activities of the trade associations, the development of "mass-production," method of factory production, and to the vital interest now being shown in standardization by industrial executives.

Noteworthy in the trend of the development of standards is the process based on the elimination of excess varieties and sizes which is supplementary to the slower process involving technical consideration. A development of no little importance is the substitution of performance, or service, requirements for composition specifications in certain lines of manufacture.

To manufacturers, industrial experts, engineers, and purchasing agents, both governmental and general; to all officers and agencies concerned with standardization, the Standards Yearbook will be most valuable. It will inform the manufacturer of the current standardization movements affecting his industry. It will inform purchasing agents of new standard specifications and will inform the scientist engaged in research as to current research projects which may lead to standardization. To the average reader it will prove a mine of information on the present status and trend of standardization in all fields of industry, commerce, science, and Government, with references to sources of further information.

DIRECTIONS FOR OBTAINING THE STANDARDS YEARBOOK 1927

Copies of the Standards Yearbook, 1927, may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., by sending with the order a remittance either in the form of post office money order, coupons (issued for the specific purpose of purchasing Government publications), express money order, New York draft, or cash—at the sender's risk. It is important to follow these directions explicitly to avoid delay and confusion. An order blank is given for your convenience. Add one-third, if to be shipped to a foreign country (other than Mexico and Canada).

FEDERAL SPECIFICATIONS BOARD

In 1921 the Federal Specifications Board was established for the purpose of coordination and economy in the procurement of material and services used by the Government under specifications prepared in the various branches thereof, to avoid duplication of effort, and for the better utilization of resources and industries. To this board was assigned the duty of compiling and adopting standard specifications for materials and services and of bringing the specifications into harmony with the best commercial practice

wherever conditions permit, bearing in mind the desirability of broadening the field of supply.

SPECIFICATIONS PROMULGATED BY THE FEDERAL SPECIFICATIONS BOARD

The following specifications have been officially adopted and promulgated by the Federal Specifications Board as United States Government Master Specifications for the mandatory use of all departments and independent establishments of the Government.¹

HOW TO OBTAIN SPECIFICATIONS

SOME MUST BE PURCHASED FROM THE SUPERINTENDENT OF DOCUMENTS; OTHERS CAN BE OBTAINED, UPON REQUEST, FROM THE FEDERAL SPECIFICATIONS BOARD

Specifications bearing only a Federal Specifications Board number are in mimeograph form and can be obtained, upon request, from the Federal Specifications Board, care of Bureau of Standards, Washington, D. C.

Specifications bearing Bureau of Standards circular numbers or other bureau publication numbers in addition to the Federal Specifications Board number are in printed form and must be purchased direct from the Superintendent of Documents at the prices indicated. In

requesting specifications from the Superintendent of Documents the bureau publication number *must be stated.*²

Do not send purchase orders to Bureau of Standards or Federal Specifications Board. Address request, accompanied by cash or money order, to the Superintendent of Documents, Government Printing Office, Washington, D. C.

The price of each printed specification is 5 cents per copy, unless otherwise noted.

¹ Use of specifications indicated by (*) are mandatory on the War Department, Navy Department, and Marine Corps only, and optional with other departments and establishments of the Government.

² The latest revision is shown by small letters, a, b, c, etc. The complete Federal Specifications Board number should be given, thus, 243a ("a" indicates a first revision, "b" a second revision, and so on).

*Mackerel, salted (sea food)	365a		Oil, olive (edible grade)	77	
Magnesia asbestos plaster	211		Oil, road, for hot application (type OH-1-25)	275	
Magnesia cement, plastic (magnesia-oxychloride) used as flooring, bases, wainscots, etc.	445	C323	Oilcloth, table, white	498	
Magnesia molded pipe covering and blocks	212		Oils, burning, electric switch, fuel, lubricating, and mineral (lubricants and liquid fuels) (price, 15 cents)	2c	(1)
Manganese bronze castings	370		*Oleomargarine (dairy products)	381a	
Manganese bronze ingots (for remelting)	89		*Onions, green, staple (vegetables)	271	
Manganese, ferro	138		*Oranges (fruits and fruit products)	270	
Manganese ore	142		Ore, chrome, ground	125	
Manholes (plumbing fixtures for land use) (price, 15 cents)	448	C310	Ore, manganese	142	
*Marmalade (fruits and fruit products)	270		Oxide, leaded zinc, dry and paste	9	C88
Matches, safety (full size in boxes)	428	C318	Oxide, zinc, dry and paste	8	C87
Matting, rubber	382	C306	(Oxychloride, magnesia), plastic (magnesia cement, used as flooring, bases, wainscots, etc.)	445	C323
Matting, rubber, for use around electrical apparatus or circuits not exceeding 3,000 volts to ground	414	C312	*Oysters, fresh (sea food)	363a	
Meal, alfalfa, corn (feeds and forage)	25b		Packing, asbestos high pressure rod	103a	C238
Measuring devices, liquid, retail type	362		Packing, asbestos metallic cloth sheet	94b	C243
*Meat and meat food products	267		Packing, asbestos sheet, compressed	96b	C241
Metals, general specification for	339		Packing, asbestos valve stem	95	
Metol (monomethyl-para aminophenol sulphate)	421		Packing, asbestos wick and rope	487	C334
Middlings, standard and flour (feeds and forage)	25b		Packing, diaphragm	98a	C240
*Milk, fresh, evaporated, dried, and malted, condensed (dairy products)	381		Packing, fabric condenser tube	99	
Millboard, asbestos	54		Packing, fiber, for lubricating and fuel oil	100	
*Mincedmeat (miscellaneous provisions)	389		Packing, flax	101b	C239
Mineral filler for sheet asphalt or asphaltic concrete pavements (Portland cement, limestone dust, and dolomite dust)	463		Packing, hard fiber sheet	486	C335
Molybdenum, ferro	143		Packing, hydraulic, leather (vegetable tanned)	496	
*Mustard, ground (condiments)	364		Packing, low-pressure spiral gland	104a	C237
*Mutton, fresh (meat and meat food products)	267		Packing, metallic (fixed ring type)	105	
Nail pullers	418		Packing, metallic, flexible	102	
Nickel, for remelting	371		Packing, metallic, plastic	106	
Nickel silver, rods, bars, shapes, plates, sheets, and strips (German silver)	468		Packing, semimetallic	107	
Nickel steel, structural	372		Packing, metallic, solid (floating ring type)	108	
*Nutmeg (condiments)	364		Packing rings for boiler blow-off valves	109	
			Packing, rubber, cloth insertion	110a	C236
			Packing, rubber, wire insertion	112a	C234
			Packing, tucks	113a	C233
			Packings, rubber, and gaskets (molded, sheet, and strip)	111a	C235
			Padlocks	413	
			Pads and stands, calendar	366	
			Pads, surgical operating	230a	C245

A DIRECTORY OF LABORATORIES

COMMERCIAL TESTING AND COLLEGE RESEARCH

IN recognition of the desirability under present conditions of independent commercial testing service and in anticipation of a marked increase in the demand for such service in both domestic and export trade, there has been compiled by the National Bureau of Standards a list of laboratories throughout the country that are prepared to test various kinds of commodities to determine whether or not they comply with purchase specifications. This list is being issued as Bureau of Standards Miscellaneous Publication No. 90.

207 COMMERCIAL TESTING LABORATORIES

In accordance with the law the National Bureau of Standards makes tests and carries out investigations for other Government departments. Because of the large amount of this official work, it is impracticable for the bureau to make tests for private individuals if other laboratories can do the work. To inform interested persons of the location of other laboratories, the bureau has compiled a list of the 207 commercial testing laboratories throughout the country, together with indications of the types of commodities which they are prepared to test. Special care has been exercised to make this list complete.

143 COLLEGE RESEARCH LABORATORIES

To accompany the list of commercial testing laboratories there has been compiled a list of 143 colleges which are used not only for the purposes of instruction, but also to a considerable extent for research work. In fact, many important industrial research problems are being solved in the college laboratories.

The existence of a thoroughly classified list of testing laboratories will have a number of beneficial effects in promoting the use of specifications, not the least important of which will be the inducement offered to the large number of purchasers who have hitherto hesitated to buy on specifications, because of their inability to determine whether or not commodities delivered correspond to the specification requirements.

For the purpose of minimizing the disadvantages incident to the use of specifications, the bureau has inaugurated a so-called "certification plan" in accordance with which there are compiled lists of manufacturers who have expressed

their desire to supply material complying with certain selected nationally recognized specifications and willing to certify to the purchaser, upon request, that the material thus supplied is guaranteed to meet the requirements and tests of the specifications. This plan has already been applied to 48 United States Government master specifications. Copies of any of the 48 lists of manufacturers, to which additions are being made from time to time, can be obtained upon request.

A DIRECTORY OF SPECIFICATIONS

Considerable economy can be realized in the purchase of commodities by the use of specifications. Real competitive bidding can be invited, and the delivery of satisfactory material can be insisted upon. To an ever-increasing extent State and city governments, public utilities, and the better organized industries of the country are adopting the use of specifications, which has been a feature of Federal Government purchasing for many years.

Information regarding the best known specifications for more than 6,000 commodities is given in convenient form in the National Directory of Commodity Specifications, which has been issued by the Bureau of Standards with the cooperation of the Bureau of Foreign and Domestic Commerce of the Department of Commerce. The book tells not only what specifications are in general use, but also by whom they were prepared and where copies can be obtained. In it are conveniently indexed for ready finding about 27,000 specifications prepared by the Federal Specifications Board and the separate departments of the Federal Government, by State and city purchasing agents, public utilities, technical societies, and trade associations. At the request of Secretary Hoover an advisory board was selected by these interests to represent them in supervising the preparation of the Directory.

The contents include: A statement and indorsement by the advisory board, a foreword by Secretary Hoover, a thoroughly classified list of specifications for all types of commodities. There are also included an alphabetical list of commodities, which serves as an index to the specifications, and directions for obtaining copies of specifications listed in the Directory.

Summary of commodities and specifications therefor

Decimal class	Commodity groups	Commodities indexed	Approximate number of specifications
000	Animal and animal products.....	350	1,600

900	Miscellaneous.....	650	2,400
	Total.....	6,650	27,100

Whether you are a producer or a consumer, a seller or a buyer of commodities; whether you are interested in the preparation or in the use of specifications, the Directory contains for you information which you can not afford to do without. It is printed in small, but legible type, and thus the number of pages has been kept at the minimum, 385, without sacrificing the usefulness of the Directory. It is bound in cloth. The cost of printing and binding the book at the Government Printing Office is \$1.25.
