This concluded the section, the current wording being that of the 1916 reenactment found in that year's session laws.

Sec. 29. Bushel weight for tomatoes; scales and weigher for Center Market of Baltimore City; method of weighing; fees.

The standard of weights of tomatoes in the State of Maryland shall be sixty pounds to the bushel; and for the purpose of ascertaining the true weight thereof, there shall be appointed by the Governor a weigher, who shall be chargeable with the duty of weighing all tomatoes and other vegetables sold by weight brought to Center Market of Baltimore City for sale by the wagon-load on the scales now located at said market when applied to, to have said tomatoes or other vegetables weighed; and who shall receive therefor the sum of ten cents per wagon-load for performing such services, two cents of which shall be paid by him quarterly to the Comptroller to whom he shall give bond in the penalty of one thousand dollars, and the balance he shall retain as his own compensation for the services hereby imposed and performed; provided that besides the two cents he shall pay all excess over one thousand dollars to the Comptroller, it being the intent of this Section that he shall only receive one thousand dollars *per annum* as his salary to be paid entirely from his fees, at eight cents net per load. The said tomatoes and other vegetables shall be weighed in the wagons, and after delivery to the purchasers the wagons and empty boxes shall be returned to the said scales and the weight thereof shall be deducted from the gross weight as shown by the first weighing, and the said packers or purchasers shall be required to pay for said vegetables at the weight certified by

said weigher. In case the boxes, in which the tomatoes or other vegetables are contained, shall not be returned, said weigher shall weigh ten empty boxes, and the average weight shall be established as the weight of all boxes contained in any wagon or wagons so weighed by him, and any packer or purchaser who shall refuse to pay for the same according to the certificate of said weigher shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined not less than ten dollars, nor more than fifty dollars for each offense; and any driver of any wagon who shall sell, dispose of, or barter any of the produce in his wagon which has been sold to a packer or other purchaser between the time of the weighing of the same and the delivery to said packer or purchaser, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined twenty-five dollars for each offense. [1914]

Sec. 30. Giving short weight or measure; penalty.

Any person, firm or corporation, or agent, employee or officer of any person, firm or corporation who shall knowingly and willfully give short weight or short measure to any one purchasing any article or commodity shall be guilty of a misdemeanor and shall on conviction be fined not less than twenty-five dollars nor more than five hundred dollars. A warrant for the arrest of any person, or agent, employee or officer of any person, firm or corporation may be issued at the instance of the purchaser receiving the short weight or measure or at the instance of any inspector of weights and measures in the State of Maryland. [1920]

Sec. 31. Penalties, how recoverable.

All fines, forfeitures and penalties imposed by the several Sections of this Article [Secs. 1-65], except as otherwise hereinbefore provided, shall be recoverable as now provided by the laws of the State of Maryland for the recovery of fines, forfeitures and penalties; one-half of said fines, forfeitures and penalties, except as otherwise hereinbefore provided, to be paid to the informer,¹ and the other half to the City of Baltimore or the County in which the offense shall have been committed. [1914]

¹ As to abolition of informer's fees, see Sec. 3, Art. 38, Flack's Annotated Code 1939, which reads as follows: "No portion of any fine, penalty or forfeiture shall be paid to any informer."

Sec. 57. Solid fuel: Definitions.

Whenever used in this sub-title [Secs. 57-64]:

(a) "Solid Fuel" shall mean and include anthracite, semi-anthracite, bituminous or semi-bituminous coal, lignite coal, briquettes, boulets, coke, gas house coke, petroleum coke, petroleum carbon or any other manufactured or patented fuel not sold by liquid or metered measure except charcoal.

(b) "Person" shall mean and include an individual, partnership, association of individuals or corporation. [1937]

Sec. 57A. Same: Transfer of general supervision over weighing and licensing from bureau of mines to state comptroller.

General supervision over licensing of persons engaged in the business of selling solid fuel in Maryland, and of persons weighing solid fuel in connection with the issuance of delivery tickets is hereby transferred from the Bureau of Mines to the State Comptroller. Whenever the words "Chief Engineer of the Bureau of Mines", "Chief Mine Engineer", "Director of the Bureau of Mines", "Bureau of Mines", or "Bureau" appear in this sub-title, there shall be substituted therefor the words "State Comptroller". The records of the Bureau of Mines relating to its duties under this sub-title prior to the effective date of this June 1, 1949 shall be transferred to the State Comptroller. This section applies only to supervision of the licensing of, or weighing in connection with, the sale of solid fuel as broker, dealer or otherwise in the State of Maryland, and nothing herein is intended to affect the jurisdiction of the Bureau of Mines over weighing for the purpose of determining compensation for the labor of miners, as provided in Chapter XXIII (Compensation to Workmen for Labor) of sub-title "Bureau Mines" of Article 89 of the Annotated Code Maryland (1939 Edition, as amended in 1947 Supplement). [1949]

Sec. 58. Same: Registration and oath of dealers; penalty; exception.

No person shall engage in the business of selling solid fuel as broker, dealer or otherwise, in the State of Maryland, unless he shall first obtain a certificate of registration as a solid fuel dealer. Application for such certificate of registration shall be made to the Clerk of the Court of Common Pleas in the City of Baltimore, or to the Clerk of the Circuit Court for any county, upon a blank to be furnished by the said Clerk in such form as shall be determined by the Chief Inspector of Licenses of the State License Bureau, and shall be made in duplicate, one copy shall be filed with the clerk to whom such application is made, and a duplicate copy shall be filed by said clerk with the State License Bureau. Such application shall be verified by the oath of the applicant or, if the applicant is a corporation, by the oath of some officer thereof, and upon payment of the registration fee herein-after provided and a filing fee of fifty cents, the clerk shall issue to the applicant a certificate of registration as a solid fuel dealer for an annual period beginning on the first day of July in each year. The fee for such registration shall be Ten Dollars (\$10) for each annual period, payable in advance. Any person selling solid fuel in the State of Maryland, unless he has first obtained a certificate of registration, as herein provided, shall be deemed guilty of a violation of the provisions of this section, and upon conviction thereof, shall be

punished by a fine of not more than Fifty Dollars (\$50) or by imprisonment for not more than thirty days, or by both such fine and imprisonment. This section shall not apply to operators who have mines located in this State, and who sell coal at the tipple either in car loads or by truck. [1937]

Sec. 59. Same: Revocation of certificate of registration.

The Chief Inspector of Licenses shall revoke any certificate of registration issued pursuant to the provisions of this sub-title [Secs. 57-64], upon proof that the applicant has made false statements in his application for said certificate of registration, or upon proof that the person to whom such a certificate of registration has been issued has been guilty of a violation of any provision of this sub-title, and a conviction of such violation by any court or magistrate shall be conclusive evidence of such violation. Such revocation shall be made only upon complaint of some person and after hearing upon due notice to the holder of such certificate of registration.

* * * Any person selling solid fuel in the State of Maryland during the time that his certificate of registration as a solid fuel dealer has been revoked, shall be deemed guilty of a violation of the provisions of this section and upon conviction thereof shall be punished by a fine of not more than \$250 or by imprisonment for not more than three months or by both such fine and imprisonment. [1937; last amended 1945.]

Sec. 60. Same: Delivery ticket; contents; tolerance; penalties.

All deliveries of solid fuel to purchasers who are consumers thereof, except solid fuel which is sold in bags in lots of one hundred pounds or less, not exceeding a total of one-quarter ton, shall be evidenced by a "delivery ticket." Such delivery ticket shall bear upon its face the following statement: "I hereby attest that I have delivered to the purchaser named herein the quantity and kind of coal specified in this ticket," and this statement shall be signed in ink or indelible pencil upon the original and one of the duplicate originals by the person actually making the delivery. Every delivery ticket shall also contain upon its face, in ink or indelible pencil, the following information: (a) date of issuance; (b) name and address of the person, firm or corporation selling the solid fuel; (c) the name and address of the purchaser; (d) the quantity in pounds and the kind, grade and size of the solid fuel delivered; (e) the signature of the licensed weighmaster issuing such ticket, together with his license number; (f) the license number on the vehicle carrying the solid fuel. Every delivery ticket shall be issued in triplicate, shall be serially numbered in each yard or branch, and shall be used only in consecutive order. One of the delivery tickets issued shall be used as the delivery receipt and shall be signed on its face by the recipient of the solid fuel or his agent. Another one

of such delivery tickets shall be given to the purchaser at the time of making the delivery. Every driver or person in charge of a vehicle in which solid fuel is being transported for delivery to a purchaser within the State of Maryland, shall at all times have in his possession delivery tickets for the solid fuel so transported or delivered, shall present them for inspection to any police officer upon request, and shall present them to the purchaser before unloading or attempting to unload the vehicle. The actual amount of the load of solid fuel being transported or delivered shall not be less than the weight represented in the delivery ticket or tickets, provided that in all cases sixty (60) pounds to a ton may be considered as an allowance for variation in scales and wastage, and the kind and size of the solid fuel being transported and delivered must be as specified in the delivery ticket. Any person transporting or delivering solid fuel in the State of Maryland except in the manner provided for in this section, shall be deemed guilty of a violation of the provisions of this section, and upon conviction thereof shall be punished by a fine of not more than five hundred dollars (\$500) or by imprisonment for not more than six (6) months or by both such fine and imprisonment. Where solid fuel is delivered in car load quantity to a single consumer or to one or more consumers who have agreed to divide a car load lot and who are transporting the solid fuel from the siding or have made arrangements for such transportation, the delivery ticket shall show merely the initial, number and location of the car from which said fuel was unloaded, the date of delivery and the name of the person making delivery. Nothing in this section shall apply to the delivery of coal to or from a boat. [1937]

Sec. 61. Same: Weighmaster's license; revocation; duties; section applicable to District of Columbia.

No person shall make or issue a delivery ticket for solid fuel as provided in this sub-title [Secs. 57-64] unless such solid fuel has been weighed as herein provided by a weighmaster duly licensed by the Bureau of Mines.¹ Application for a license shall be made upon the form prescribed by the Chief Mine Engineer,¹ shall state the name and address of the applicant's employer and shall be verified by the oath of the applicant. In addition the applicant shall furnish satisfactory evidence of good moral character, and of ability to weigh accurately, and make correct weight tickets. The Bureau¹ may issue a license upon the payment of the annual license fee of ten dollars (\$10). The license may be renewed for successive periods of one year each, upon payment of a license fee of ten dollars (\$10), which license shall be kept in the place where the weighmaster is engaged in weighing and shall be open to inspection. Every licensed weighmaster shall notify the Bureau¹ in writing of any change of the name or address of his employer. A license may be suspended or re-

voked by the Chief Mine Engineer¹ after hearing, upon due notice to the licensee, for dishonesty, incompetency, inaccuracy, or any violation of the provisions of this sub-title. No licensed weighmaster shall knowingly permit any delivery ticket to be used or issued which purports to bear his signature which was not in fact signed by him or which expresses a weight not ascertained by him, nor shall any person use a delivery ticket not signed by a licensed weighmaster, nor knowingly issue or use a delivery ticket which purports to bear the signature of a licensed weighmaster but which was not in fact signed by such licensed weighmaster. No licensed weighmaster shall weigh up and sign a delivery ticket for any load of solid fuel unless such load is weighed by him on scales located within the State, which have been tested, approved, and sealed within twelve months, by the Bureau of Mines,¹ or, in case of scales located within the City of Baltimore, by the Division of Weights and Measures of the Department of Public Works of the City of Baltimore, and unless within twenty-four hours preceding the weighing of the vehicle loaded he shall have first weighed the vehicle empty² to determine the true tare weight of the vehicle unloaded and unless all the wheels of the vehicle, tractor, trailer, or semi-trailer included, transporting the solid fuel are on the scale at one and the same time, provided, however, that if the tractor is disconnected from the trailer or semi-trailer at the time of weighing the trailer or semi-trailer may be weighed without the tractor. No licensed weighmaster shall weigh up and sign a delivery ticket for any load of anthracite transported or being transported into the State of Maryland by motor vehicle unless and until a duplicate original of the certificate of origin of such anthracite shall be filed with the weighmaster as in this sub-title hereinafter provided, and such weighmaster upon signing such delivery ticket for any such load of anthracite shall make a notation upon the delivery ticket of the serial number and date of the certificate of origin covering said anthracite; provided, however, that for the purpose of permitting licensed dealers in solid fuel in the District of Columbia to comply with the provisions of this sub-title, the Bureau of Mines¹ is authorized to issue weighmaster licenses to persons employed in the District of Columbia by a dealer in coal who has obtained a license to do business in the State of Maryland, and such persons may weigh up and sign a delivery ticket for any load of solid fuel if such load has been weighed by him on scales located within the District of Columbia which have been tested, approved and sealed by the Sealer of Weights and Measures of the District of Columbia. Application for a weighmaster license pursuant hereto shall be made in the manner hereinbefore provided and such license shall be subject to all of the provisions of this Article [Secs. 1-65] and may be revoked as in said Article provided.

This section is intended to apply solely in favor of solid fuel dealers in the District of Columbia and shall under no circumstances be held to enlarge the privileges of solid fuel dealers doing business elsewhere than in the District of Columbia or of persons employed by them and if this section or any part thereof is held to create an unlawful discrimination against such solid fuel dealers or the persons employed by them, then and in that event, this section shall be deemed to be of no effect whatever and this sub-title shall be deemed to remain in full force and effect as if this section had never been passed. [1937; last amended 1939.]

State*, 175 Md. 232."

Sec. 62. Same: Certificate of origin; weighing of loaded vehicles upon entering state; penalties.

No anthracite coal brought into the State of Maryland by motor vehicle shall be hauled, transported, purchased, sold or delivered in the State unless such anthracite is at all times accompanied by an original certificate of origin containing the following information:

(4) The name and address of the driver of the motor vehicle transporting said anthracite and the State motor vehicle registration number of said vehicle, and the date of loading of said vehicle.

(5) The name and address of the person or persons to whom said anthracite is to be delivered.

Every driver of a motor vehicle bringing anthracite into the State shall, before delivering the same, proceed to a scale operated by a licensed weighmaster. At the time of weighing every such driver shall file with the weighmaster a duplicate original of the required certificate of origin covering said anthracite. Such duplicate original certificate shall thereafter within one week, be filed with the Bureau of Mines¹ by the weighmaster with whom said certificate was first filed. Duplicate certificates of origin so filed with the Bureau of Mines¹ shall be open to public inspection during reasonable hours in accordance with the regulation of the Bureau.

of the government of the said commonwealth, and the protection and preservation of the subjects thereof, according to such acts as are or shall be in force within the same.

And while the public charges of government, or any part thereof, shall be assessed on polls and estates, in the manner that has hitherto been practised, in order that such assessments may be made with equality, there shall be a valuation of estates within the commonwealth taken anew once in every ten years at least, and as much oftener as the general court shall order. [ED. NOTE.—In the Annotated Laws of Massachusetts, following the foregoing section, it is stated: "The protection of the public against fraud is a well-recognized branch of the police power, in the exercise of which the State may abridge an individual's freedom to contract, even in private business. Instances of this are the laws regulating the sale of oleomargarine and merchandise in bulk and the laws relating to weights, measures and packages. 4 Op. A. G. 519, 521."]

When representative samples of any clinical thermometer have been submitted by the manufacturer to the director and approved by him, he shall assign a designating mark which shall thereafter be permanently engraved by the manufacturer upon all clinical thermometers which are intended for sale and which conform to the samples which have been so approved. Clinical thermometers sealed by the manufacturer shall be marked with the name, initials or trade mark of the manufacturer, and with such other marks as the director may authorize or require. The director may revoke the authority given by him to any manufacturer under the provisions of this section upon proof that the authorized seal or designating mark has been affixed to a thermometer not conforming to the approved sample or that the prescribed rules and regulations have not been complied with. When any such weight, measure, instrument or mechanical device has been tested and found correct by the director, he may seal the same. If he finds it inaccurate, he may, in his discretion, either condemn it or he may furnish the owner or user with a certificate indicating the amount and direction of any errors found by him. Each measuring glass or utensil so tested and verified or found inaccurate shall be marked accordingly by the director or by his said deputy. The fee therefor shall be two dollars, and shall be paid to the director. If a holder of a certificate is notified by the director, or by his duly designated deputy, to correct his use of such a centrifugal machine, the actual cost of an inspection to ascertain if such person has corrected his use of the said machine shall be paid by him or by his employer to the director. [1901; last amended 1929.]

The director or his deputy may make and enforce rules governing applications for such certificates and the granting thereof and may revoke the authority of any holder of a certificate who, in the opinion of the director, his deputy or inspector, is not correctly manipulating a machine as aforesaid, or is using dirty or otherwise unsatisfactory glassware or utensils in connection therewith. The director, his inspectors and deputies, may enter upon premises where tests of milk or cream are made in order to inspect any apparatus used in making such tests and to ascertain whether this and the four preceding sections are complied with. The director [director of the agriculture experiment station] shall, after reasonable notice and a hearing, and with the approval of the governor and council, prescribe, and may from time to time in like manner modify or amend, rules and regulations to govern the methods and frequency of making tests for determining the composition or milk-fat content of milk or cream as a basis for payment in buying or selling. The director or his inspectors and deputies may, and the director of milk control, his inspectors and deputies, shall, enter upon any premises where samples of milk or cream are taken, stored or tested as a basis for payment in buying or selling, in order to determine whether rules and regulations made hereunder are being observed. Sections twenty-five to thirty-one, inclusive, and the rules and regulations made thereunder, shall not affect any person using any centrifugal or other machine or test to determine the composition or milk-fat content of milk or cream if such use or test is made for the information of such person only, and not for purposes of inspection or as a basis for payment in buying or selling. [1912; last amended 1946.]

Sec. 31. Same: Penalties.

Whoever hinders or obstructs the director [director of the Mass. agriculture experiment station] or the director of milk control, or any inspector or deputy of either said director or said director of milk control, in the discharge of any authority or duty imposed upon him by any provision of sections twenty-five to thirty, inclusive, whoever violates any provision of said sections, and whoever knowingly violates any provision of the rules and regulations made thereunder, shall be punished by a fine of not less than fifteen nor more than fifty dollars. If such barrel does not contain the said number of gallons of clams, the seller shall receive payment for the number of gallons of clams it does contain, but shall pay the expense of measuring and cooping; otherwise the purchaser shall pay such expense. He, or his deputy, or inspectors, by his direction, shall at least once annually test all scales, weights, and measures used in checking the receipts and disbursements of supplies in every institution for the maintenance of which moneys are appropriated by the legislature, and he shall report in writing his finding to the supervisory board and to the executive officer of the institution concerned, and at the request of such board or executive officer the superintendent of weights and measures shall appoint in writing one (1) or more employes then in the actual service of each institution, who shall act as special deputies without extra compensation for the purpose of checking the receipts and disbursements of supplies. The superintendent shall issue from time to time, regulations for the guidance of city and county sealers, and the said regulations shall govern the procedure to be followed by the aforesaid officers in the discharge of their duties. [1913]

Sec. 290.4. County weights, measures and apparatus; certification; use as public standards.

The county sealer shall at least once each year, and as much oftener as he may deem necessary, see that the weights, measures, and all apparatus used in the county are correct. The county and state inspectors may for the purpose above mentioned and in the general performance of their official duties enter or go in upon, and without formal warrant, any stand, place, building, or premises, or stop any vendor, peddler, junk dealer, coal wagon, ice wagon, delivery wagon, or any dealer whatsoever and require him, if necessary, to proceed to some place which the sealer may specify, for the purpose of making the proper tests. Whenever the county sealer or state inspectors find a violation of the statute relating to weights and measures, they shall cause the violator to be prosecuted. Whenever any sealer or inspector compares weights, measures, or weighing or measuring instruments and finds that they correspond, or causes them to correspond, with the standards in his possession, he shall seal or mark such weights, measures, or weighing or measuring instruments with appropriate devices to be approved by the state superintendent of weights and measures. A county sealer appointed in pursuance of such an agreement for such combination, shall, subject to the terms of his appointment, have the same authority, jurisdiction, and duties as if he had been appointed by each of the authorities who are party to the agreement. Standard cream test bottles.

(b) Standard cream test bottles.

Two types of bottles shall be accepted as standard cream test bottles, a fifty (50) percent nine (9) gram short-neck bottle and a fifty (50) percent nine (9) gram long-neck bottle.

Fifty (50) percent nine (9) gram short-neck bottles. Graduation. The total percent graduation shall be fifty (50). The graduated portion of the neck shall have a length of not less than sixty-three and five-tenths ($63\frac{5}{10}$) millimeters (two and one-half ($2\frac{1}{2}$) inches.) The graduation shall represent five (5) percent, one (1) percent and five-tenths ($\frac{5}{10}$) percent. The five (5) percent graduations shall extend at least one-half ($\frac{1}{2}$) way around the neck of the bottle (to the right). The five-tenths ($\frac{5}{10}$) percent graduations shall be at least three (3) millimeters in length, and the one (1) percent graduations shall have a length intermediate between the five (5) percent and five-tenths ($\frac{5}{10}$) percent graduations. Each five (5) percent graduation shall be numbered, the number being placed on the left of the scale. The error at any point of the scale shall not exceed five-tenths ($\frac{5}{10}$) percent.

Neck. The neck shall be cylindrical and the cylindrical shape shall extend at least nine (9) millimeters below the lowest and nine (9) millimeters above the highest graduation mark. The top of the neck shall be flared to a diameter of not less than ten (10) millimeters.

Bulb. The capacity of the bulb up to the junction of the neck shall not be less than forty-five (45) cubic centimeters. The shape of the bulb may be either cylindrical or conical with the smallest diameter at the bottom. If cylindrical, the outside diameter shall be between thirty-four (34) and thirty-six (36) millimeters; if conical, the outside diameter of the base shall be between thirty-one (31) and thirty-three (33) millimeters, and the maximum diameter between thirty-five (35) and thirty-seven (37) millimeters.

The charge of the bottle shall be nine (9) grams. All bottles shall bear on top of the neck above the graduations, in plainly legible characters, a mark defining the weight of the charge to be used (nine (9) grams).

The total height of the bottle shall be between one hundred fifty (150) and one hundred sixty-five (165) millimeters (five and seven-eighths ($5\frac{7}{8}$) and six and one-half ($6\frac{1}{2}$) inches) same as standard milk test bottles.

Fifty (50) percent nine (9) gram long-neck bottles. The same specifications in every detail as specified for the fifty (50) percent nine (9) gram short-neck bottle shall apply for the long-neck bottle with the exceptions, however, that the total height of this

bottle shall be between two hundred ten (210) and two hundred thirty-five (235) millimeters (eight and one-half ($8\frac{1}{2}$) and eight and seven-eighths ($8\frac{7}{8}$) inches) and that the total length of the graduation shall be not less than one hundred twenty (120) millimeters.

Standard Babcock pipette.

(c) The standard Babcock pipette.

Total length of pipette shall be not more than three hundred thirty (330) millimeters (thirteen and one-fourth ($13\frac{1}{4}$) inches). Outside diameter of suction tube six (6) to eight (8) millimeters. Length of suction tube one hundred thirty (130) millimeters. Outside diameter of delivery tube four and five-tenths ($4\frac{5}{10}$) to five and five-tenths ($5\frac{5}{10}$) millimeters. Length of delivery tube one hundred (100) to one hundred twenty (120) millimeters. Distance of graduation mark above bulb thirty (30) to sixty (60) millimeters. Nozzle straight. Delivery seventeen six-tenths ($17\frac{6}{10}$) cubic centimeters of water at twenty (20) degrees C in five (5) to eight (8) seconds.

Standard cream test scales.

(d) Standard cream test scales.

All butterfat and cream scales used for the purpose of determining the value or percent of butterfat content of milk or cream by the Babcock test or otherwise shall be subject to the following specifications:

1. The scale shall be provided with a graduated face of at least ten (10) divisions over which the pointer shall play.

2. The pointer must reach to the graduated divisions and shall terminate in a fine point to enable the readings to be made clearly and distinctly.

3. The clear interval between the divisions on the graduated face shall not be less than five one-hundredths ($\frac{5}{100}$) inch.

4. All scales whose weight indications are changed by an amount greater than one-half ($\frac{1}{2}$) the tolerance allowed, when set in any position on a surface making an angle of three (3) degrees or approximately five (5) percent with the horizontal, shall be equipped with leveling screws and a device which will indicate when the scale is level: Provided, however, That the scale shall be re-balanced at zero each time its position is altered during the test.

5. The addition of one-half ($\frac{1}{2}$) grain to the scale when loaded to capacity shall cause a movement of the pointer at least equal to one (1) division on the graduated face.

6. The sensibility reciprocal and tolerance of cream test and butterfat test scales shall be one-half ($\frac{1}{2}$) grain (thirty (30) milligrams).

Standard weights.

Sec. 5100. General penalty for violations; inaccurate equipment to be locked or sealed, when; refusal to allow inspection prima facie evidence of inaccuracy; procedure for unlocking or unsealing.

Any person or officer, agent, servant, or employee thereof who shall violate any provision of this act [Secs. 5081-5103] shall be guilty of a misdemeanor and, upon conviction, and where no other penalty is provided in this act, shall be fined not exceeding one hundred dollars (\$100.00) for the first offense, and not exceeding two hundred dollars (\$200.00) for each subsequent offense, or shall be imprisoned in the county jail for not exceeding ninety (90) days, or shall suffer both such fine and imprisonment; and each separate sale or attempt to sell in violation of the provisions of this act shall be deemed a separate offense.

In addition to the penalties hereinabove described, and as a cumulative and enforcement measure, the comptroller or his duly appointed representatives shall have the right to request an inspection of any pump, truck, or other equipment, and if upon such inspection any such pump, truck, or other equipment is found to be inaccurate, or if the right to inspect any such pump, truck, or other equipment is refused or denied the comptroller, or his duly authorized representatives, he or they shall have the right to immediately close and lock said pump and other equipment or to seal same with the comptroller's seal, unless such inaccuracy be corrected within forty-eight (48) hours.

It shall be prima facie presumed upon any refusal to allow the right to inspect that the pump, truck, or other equipment sought to be inspected is inaccurate, or is operating in violation of this act [Secs. 5081-5103]. When any such pump or other equipment is locked or sealed, it may not be unlocked or the seal thereon broken except in the presence of a mechanic or other person called for the purpose of repairing the inaccuracy in the machinery of such pump or equipment, and such inaccuracy shall be immediately thereafter repaired, and the pump or other equipment properly regulated. The comptroller may, in his discretion, require an affidavit from the mechanic repairing such pump or other equipment, or any other proof which he may deem advisable to the effect that said pump was unlocked or the seal thereon broken in the presence of such mechanic, and that the inaccuracies therein were thereupon completely repaired or regulated. Sec. 6057. Enforcement by chief inspector.

The chief inspector [of the seafood commission] * * * is hereby constituted a peace officer of the State of Mississippi with full police power and jurisdiction to enforce all laws with reference to the sea foods of the State of Mississippi and all rules and regulations promulgated by the sea food commission, and he may exercise such powers in any county of the State of Mississippi and on any waters of the State, * * * and he shall in person or through his deputies prosecute all persons who violate any of such laws, and shall at any and all times seize any or all oysters, fish, or other sea foods which have been caught, taken or transported in a manner contrary to the laws of this state, * * *. [1930; last amended 1948.]

Sec. 6068. Standard of measure; duties of chief inspector and deputy inspectors; penalty against chief inspector.

A standard measure for oysters is hereby established, which said measure shall consist of a tub or other round vessel of the following dimensions, to wit: It shall measure seventeen inches in diameter inside at the bottom and twenty-one and one-half inches inside at the top, and fourteen and one-half inches inside from bottom to top, the unit of such tub or measure to be in the shape of inverted frustum of a cone. Two of these measures filled to the top shall make one barrel, and all oysters bought or sold in this state in the shell shall be measured in a measure of this dimension or measure holding a fraction or multiple thereof, and it shall be unlawful for any person to have in his possession any measure for oysters in the shell which shall differ in size from the measure herein provided for, or to demand or require a greater or less measure in buying or selling; and no vessel or measure shall be used in buying or selling oysters until it has

been measured and stamped by the oyster inspector with a metal tag or stamp, showing the quantity of oysters which such measure will hold. It shall be the duty of the oyster inspector to make such measurements and to visit for that purpose each place where oysters are bought and sold as required, not to exceed once in each month during the canning season, and shall keep a book in which shall be recorded the dimensions of all vessels so measured. Whenever any oysters have escaped collection of tax, as herein provided by reason of being opened or shucked on the reefs, or anywhere on the waters, by reason of a failure of the proper record being kept according to law, so that a measurement in the shell, by the barrel, cannot be made hereunder, then for the purpose of collecting the tax provided, six hundred opened or shucked oysters shall constitute a barrel. * * * [1902; last amended 1948.]

Any person violating such standards, tolerances or specifications shall be guilty of a misdemeanor.¹ [1895; last amended 1945.]

¹ See Sec. 10725, page 581, punishment for misdemeanor. Also see Sec. 4234, page 563.

Sec. 4213. Unit of extension.

The standard yard is the unit or standard measure of length and surface from which all other measures of extension, whether lineal, superficial, or solid, are derived and ascertained. [1895]

Sec. 4214. Division of the yard.

The yard is divided into three equal parts, called feet, and each foot into twelve equal parts, called inches; for measures of cloths and other commodities commonly sold by the yard it may be divided into halves, quarters, eighths, and sixteenths. [1895]

Sec. 4215. Rod, mile, and chain.

The rod, pole, or perch contains five and a half yards, and the mile one thousand seven hundred and sixty yards; the chain for measuring land is twenty-two yards long, and divided into one hundred equal parts, called links. [1895]

Sec. 4216. Acre.

The acre for land measure must be measured horizontally, and contains ten square chains, and is equivalent in area to a rectangle sixteen rods in length and ten in breadth; six hundred and forty acres being contained in a square mile. [1895]

Sec. 4217. Unit of weights.

The standard avoirdupois and troy weights are the units of standards of weight from which all other weights are derived and ascertained. [1895]

Sec. 4218. Division of pound; hundred-weight; ton.

The avoirdupois pound, which bears to the troy pound the ratio of seven thousand to five thousand seven hundred and sixty, is divided into sixteen equal parts, called ounces; the hundred-weight consists of one hundred avoirdupois pounds and twenty hundred-weight constitute a ton. The troy ounce is equal to the twelfth part of the troy pound. [1895]

Sec. 4219. Unit of liquid measure.

The standard gallon and its parts are the units or standards of measure of capacity for liquids, from which all other measures of liquids are derived and ascertained. [1895]

Sec. 4220. Barrel and hogshead.

The barrel is equal to thirty-one and a half gallons, and two barrels constitute a hogshead. [1895]

Sec. 4221. Unit of dry measure.

The standard half-bushel is the unit or standard measure of capacity for substances other than liquids, from which all other measures of such substances are derived and ascertained. [1895]

Sec. 4222. Division of the half-bushel.

The peck, half-peck, quarter-peck, quart, and pint measure for measuring commodities other than liquid are derived from the half-bushel by successively dividing that measure by two. [1895]

Sec. 4223. Division of capacity for commodities sold by heap measure.

The measures of capacity for charcoal, ashes, marl, manure, Indian corn in the ear, fruit, and roots of every kind, and for all other commodities commonly sold by heap measure, are the half-bushel and its multiples and subdivision; and the measures used to measure such commodities must

Revised Codes 1935, Vol. 2, Political Code, Ch. 330—
Weights and Measures—Continued.

be made cylindrical, with plane and even bottom, and must be of the following diameters from outside to outside: The bushel, nineteen and a half inches; half-bushel, fifteen and a half inches; and the peck, twelve and a third inches. [1895]

Sec. 4224. Heap measure.

All commodities sold by heap measure must be duly heaped up in the form of a cone; the outside of the measure, by which the same are measured, to be the limit of the case of the cone, and said cone to be as high as the article will admit. [1895]

Sec. 4225. Contracts construed.

Contracts made within this state for work to be done, or for anything to be sold or delivered by weight or measure, must be construed according to the foregoing standards. [1895]

Sec. 4226. Standard ton and bushel.

The standard ton consists of twenty hundred pounds, but a ton of mineral coal is expressed by the conventional quantity of twenty-six and one-third bushels of seventy-six pounds each. A bushel of the articles hereinafter named consists of the number of pounds affixed to each:

Any person, persons, company, or corporation who shall demand, exact, or take more than the prescribed number of pounds per bushel or per ton as fixed by the provisions of the preceding section, shall be guilty of a misdemeanor, and, upon conviction thereof, shall be punished by a fine of not less than one hundred dollars nor more than five hundred dollars, or by imprisonment in the county jail not less than three nor more than six months, or by both such fine and imprisonment, in the discretion of the court. Hereafter unless otherwise agreed to between the contracting parties, the following shall constitute the legal measurement for hay in stack in the state of Montana: Four hundred twenty-two cubic feet shall constitute a ton of clean, native, blue joint hay, after thirty days and up to three months settlement in stack; when the same shall have been in stack three months, or over, three hundred and forty cubic feet shall be considered a ton. Five hundred twelve cubic feet shall constitute a ton of alfalfa or rough slough grass, after the same shall have been in the stack thirty days or more and up to one year. Four hundred and fifty cubic feet shall constitute a ton of clean timothy and clover, after the same shall have been in the stack thirty days or more and up to one year. As to all other kinds of hay, five hundred and twelve cubic feet shall constitute a ton after the same shall have been in the stack sixty days or more and up to one year. For making measurements of hay in stack, the following is hereby made the legal method of measurement, to-wit: The width and length of the stack shall be measured, and the distance from the ground against one side of the stack, to the ground against the other side of the stack, directly over and opposite, shall be taken in linear feet and inches, and then the width shall be subtracted from the measurement over the stack, as above indicated, the result divided by two, and the result so obtained multiplied by the width, and the result thus

obtained multiplied by the length, which will give the number of cubic feet contained in the stack, and the tonnage shall thereupon be determined by dividing the total number of cubic feet by the number of cubic feet allowed under the provisions of this act for a ton. [1907; last amended 1921.]

Sec. 4234. Penalties for using, marking or stamping false weights and measures.

The penalties for using, marking, or stamping false weights and measures, or selling therewith, is provided for in sections 11428 to 11431¹ of the penal code. [1895]

¹ See page 581.

No scale platform shall be allowed to extend over the manufacturer's specifications.

(c) Any person or persons who shall sell, or direct or permit any person or persons in his or their employ to sell any commodity or article of merchandise and make or give any false or short weight or measure, or any person or persons owning or

¹ See Sec. 4264.1, page 568, penalty for violations.

Sec. 4246. Package labels; commodities and articles of merchandise; sale by net weight, measure, or count; tolerances; refusal to exhibit for test; standard berry containers; penalties.

It shall be unlawful for any person or persons, association, or corporation, to sell or offer for sale in this state any commodity or article of merchandise in a package or container, without having such package or container labeled in plain, intelligible words and figures, with a correct statement of the net weight, measure, or numerical count of its contents, designated, where not otherwise provided, by lettering of at least 1/9 inch in height (8 point type). Provided, that nothing in this section shall prevent the sale of a commodity within the provisions of this act [Secs. 4235-4264.2] when such sale is made from bulk and the quantity is weighed, measured, or counted for the immediate purpose of such sale; provided, further, that nothing in this section shall apply to commodities or articles of merchandise, except milk and cream, offered for sale or sold in packages or containers at a price of ten cents (10c) or less per such package or to commodities or articles of merchandise in packages or containers which are sold by the aggregate net weight of the contents thereof.

1. It shall be unlawful for any person to sell or offer for sale in this state any commodity or article of merchandise, except by true net weight, measure, or numerical count, except where the parties otherwise agree. Contracts for work done, or anything to be sold by weight or measure, shall be construed according to the standards hereby adopted as the standards of this state, except where the parties have agreed upon any other calculations of measurement, and all statements and representations of any kind referring to the weight or measure of commodities or articles of merchandise shall be understood in the terms of the standards of weights and measures aforesaid. It shall be unlawful for any person to sell solid substances by liquid measure.

2. It shall be unlawful for any person, in buying or selling any commodity or article of merchandise, to make or give false or short weight or measure, or to sell or offer for sale any commodity or article of merchandise less in weight or measure than he represents, or to use a weight, measure, balance or measuring device that is false and does not conform to the authorized standard for determining the quantity of any commodity or article of merchandise,

or to have a weight, measure, balance, or measuring device adjusted for the purpose of giving false or short weight or measure, or to use in buying or selling of any commodity or article of merchandise a computing scale or device indicating the weight and price of such commodity or article of merchandise, upon which scale or device the graduations or indications are falsely or inaccurately placed, either as to weight or price, or to use any computing scale having a horizontal registering bar with a barrel computing device, unless such scale is adjusted to register the correct weight from all angles of vision, and the view on the customer's side shall never be, in any manner, obstructed. The selling and delivering of any commodity or article of merchandise shall be prima facie evidence of the representation on the part of the vendor that the quantity sold and delivered was the quantity bought by the vendee. There shall be taken into consideration the usual and ordinary leakage, evaporation, or waste that there may be from the time a package or container is filled by a vendor until he sells the same. A slight variation from the stated weight, measure or quantity for individual packages not to exceed three per cent is permissible; provided, that the variation is as often above as below the weight, measure or quantity stated.

Any person, who by himself, or his employee or as a proprietor or manager, shall refuse to exhibit any article, commodity or the container of any commodity, produce or anything being sold or offered for sale at a given weight or quantity, or ordinarily so sold, to the state sealer of weights and measures, or his deputies, for the purpose of allowing the same to be tested and proved as to the quantity contained therein as in this act provided, shall be guilty of a misdemeanor.

The term container used in this act is hereby defined to be ANY receptacle or carton into which a commodity is packed, or any wrappings with which any commodity is wrapped or put up for sale, or to be offered or exposed for sale. No containers, boxes, or baskets wherein food products or other commodities are packed shall have a false bottom, false side walls, false lid or covering, or be otherwise so constructed as to facilitate the perpetration of deception or fraud. The state sealer of weights and measures, or his deputies, may seize any container which facilitates the perpetration of deception or fraud. By order of a court having jurisdiction the containers seized shall be condemned and destroyed or released upon such conditions as the court in its discretion may impose, to insure against their use in violation of this section.

There are hereby established the following standard net weights for all berry containers, or hallocks in which strawberries, red or black raspberries, blackberries, currants, gooseberries, or any other berries are sold or offered for sale in this state:

(a) Pint hallocks or containers shall be 33.6 cubic

Revised Codes 1935, Vol. 2, Political Code, Ch. 330—
Weights and Measures—Continued.

inches in capacity and the contents thereof shall have a net minimum weight of twelve (12) ounces.

(b) Quart hallocks or containers shall be 67.2 cubic inches in capacity and contents thereof shall have a net minimum weight of twenty-four (24) ounces. The sale of, or having in possession for sale, any strawberries, red or black raspberries, blackberries, currants, gooseberries or any other berries in containers or hallocks not complying with the provisions of this act shall be a misdemeanor punishable, upon conviction, by a fine of not less than ten dollars (\$10.00), nor more than twenty-five dollars (\$25.00). [1913; last amended 1939.]

Sec. 4247. State sealer: Records and reports.

The state sealer of weights and measures shall keep a complete record of all work done under his direction, and shall make a biennial report to the governor not later than the first of January of each year preceding the meeting of the legislative assembly. [1911; last amended 1939.]

Sec. 4248. False sealing; penalty.

Any person authorized to seal weights and measures in accordance with this act [Secs. 4235-4264.2] who shall, without duly verifying the weights and measures or any weighing device of any person by comparison with the standards of weights and measures, stamp any such weighing device or measure, or attach thereto a seal that said weighing device or measure has been duly tested, is hereby declared, upon conviction thereof, to be guilty of a misdemeanor.¹ [1913; last amended 1939.]

¹ See Sec. 4264.1, page 568, penalty for violations.

Sec. 4249. Trade devices to be marked and stamped; exceptions; apothecaries' weights and measures to be tested and sealed.

Every weight for use in trade, except when the small size of the weight renders it impracticable, shall have the denomination of such weight permanently marked on the top side thereof in legible figures or letters; and every measure of capacity for use in trade shall have the denomination and kind thereof permanently marked on the outside of such measure in legible figures or letters. A weight or measure not in conformity with this section shall not be sealed by the state sealer of weights and measures, or his deputies.

(a) Apothecaries and all other persons dealing in drugs, medicine and merchandise, commonly sold by apothecaries' weight or by apothecaries' liquid measure, shall at least once in two years cause such weights and measures so used to be tested and sealed by officers authorized under this act [Secs 4235-4264.2] to inspect weights and measures. [1911; last amended 1939.]

Sec. 4250. Sealer to adjust weights or forbid use; penalty.

If any weights, measures, scales or balances can be readily adjusted by such means as the sealer of

weights and measures, or his deputies, may have at hand, he, or they may adjust and seal them, but if they cannot be readily adjusted he, or they, shall affix to such weights, measures, scales or balances a notice forbidding their use until he, or they are satisfied they have been so adjusted as to conform with the standard. It shall be unlawful for any person to remove such notice, without the written consent of the officer affixing the same, unless proper repairs have first been made. And in case said notice is removed without such written consent, before proper repairs have been made, the owner, manager, proprietor, lessee or anyone in active control of the business in connection with which said weights, measures, scales or balances are used after such removal of said notice, shall be deemed guilty of a misdemeanor¹ and shall be punished accordingly. [1911; last amended 1941.] * * *

¹ See Sec. 4264.1, page 568, penalty for violations.

Sec. 4251. Condemning or confiscating scales; family scales; damages not allowed.

All weights, measures, and balances which cannot be made to conform to the standard weights and measures as herein provided shall be stamped "condemned" or "C. D." by the state sealer of weights and measures, or his deputies, or the state sealer of weights and measures, or his deputies, may confiscate and seize, without warrant, any incorrect weight, measure, weighing or measuring device or part thereof which does not conform to the state standards or specifications, and which in his or their best judgment cannot be repaired. It shall be unlawful to offer or expose for sale, sell, use or possess a faulty scale, weight or measure, or any scale or measure used in buying or selling of any commodity or things and which has been rejected by the state sealer of weights and measures or his deputies. Scales commonly known as "family scales" or scales marked when sold "not legal in trade" shall not be deemed standard and shall be subject to such seizure. The state sealer of weights and measures, or his deputies, shall not be liable to the owner of the property for damages caused by such seizure. All persons owning coin weight scales shall place their name and address on the back of the scale. In all cases where inspection fees are not paid on coin weight scales, the same may be confiscated by the state sealer of weights and measures, or his deputies. [1911; last amended 1945.]

Sec. 4252. Seizure as evidence; return or forfeiture.

The state sealer of weights and measures, or his deputies, may seize, without warrant, such weights, measures, or balances as may be necessary to be used as evidence in case of violation of any act relative to the sealing of weights and measures. They shall be returned to the owners or forfeited as the court may direct. [1913; last amended 1939.]

Sec. 4253. Itinerant vendors' scales to be tested annually.

All itinerant peddlers and hawkers, using scales, balances, weights, or measures, shall take the same to the office of the state sealer of weights and measures, or his deputies, before any use is made thereof, and have the same sealed and adjusted at least once a year. [1911; last amended 1939.]

Laws 1945, Ch. 169—Weights and Measures.

Sec. 1. State standards.

The weights and measures received from the United States under joint resolutions of Congress approved June 14, 1836, and July 27, 1866, and/or such new weights and measures as shall be received from the United States as standard weights and measures in addition thereto, and in renewal thereof, and/or such weights and measures in conformity therewith as shall be supplied by the state shall, when the same shall have been certified by the national bureau of standards, be the state standards of weights and measures. [1945]

Sec. 2. State and working standards to be compared once a year; standards to be sealed.

In addition to the state standards of weights and measures, provided for above, there shall be supplied by the state at least one complete set of copies of these, to be kept at all times in the office of the state sealer, and to be known as office standards; and such other weights, measures, and apparatus as may be found necessary to carry out the provisions of this act [Secs. 1-30], to be known as working standards. Such weights, measures, and apparatus shall be verified by the state sealer, or his deputy or inspectors, at his direction, upon their initial receipt, and at least once in each year thereafter, the office standards by direct comparison with the state standards, the working standards by comparison with the office standards. When found accurate upon these tests, the office and working standards shall be sealed by stamping on them the letters "NEV." and, in the case of working standards, the last two figures of the year, with seals which the state sealer shall have and keep for that purpose. The office or working standards shall be used in making all comparisons of weights, measures, and weighing or measuring devices submitted for test in the office of the state sealer, and the state standards shall be used only in verifying the office standards for scientific purposes. [1945]

Sec. 3. Safe-keeping of standards.

The state sealer of weights and measures shall take charge of the standards adopted by this act [Secs. 1-30] as the standards of the state, and cause them to be kept in a safe and suitable place in the office of the state sealer, from which they shall not be removed except for repairs or for certification,

and he shall take all other necessary precautions for their safe-keeping. He shall maintain the state standards in good order and shall submit them at least once in ten years to the national bureau of standards for certification. [1945]

Sec. 4. Standard units of various weights and measures.

Standard units of weights and measures in this state shall be:

a. The standard avoirdupois and troy weights are the units of weight from which all other weights are derived and ascertained.

b. The avoirdupois pound, which bears to the troy pound the ratio of seven thousand (7,000) to five thousand seven hundred and sixty (5,760), is divided into sixteen (16) equal parts, called avoirdupois ounces; the hundred weight consists of one hundred (100) avoirdupois pounds, and twenty-hundred weight constitutes a ton. The avoirdupois ounce is divided into sixteen (16) equal parts called avoirdupois drams.

c. The troy ounce is equal to the twelfth part of the troy pound. The troy pennyweight is equal to the twentieth part of the troy ounce, and the troy grain is equal to the twenty-fourth part of the troy pennyweight.

d. The apothecary's pound is equal to the troy pound. The apothecary's ounce is equal to the twelfth part of the apothecary's pound. The apothecary's dram is equal to the one-eighth part of the apothecary's ounce. The scruple is equal to the one-third part of the apothecary's dram, and the grain is equal to one-twentieth of the scruple.

e. In all sales of coal, hay, and other commodities, usually sold by the ton or fractional parts thereof, the seller shall give to the purchaser full weight, at the rate of two thousand (2,000) pounds to the ton.

f. The standard gallon and its parts are the units of capacity for liquids, from which all other measures of liquids are derived and ascertained. The liquid quart is equal to the one-fourth part of the standard gallon. The pint is equal to the one-eighth part of the gallon. The gill is equal to the one-fourth part of the pint. The fluid ounce is equal to the one-sixteenth part of the pint. The fluid dram is equal to the eighth part of the fluid ounce, and the minim is equal to the sixtieth part of the fluid dram.

g. The barrel is equal to thirty-one and one-half (31½) gallons. Two barrels constitute a hoghead.

h. The standard half-bushel is the unit of capacity of substances other than liquids, from which all other measures of such substances are derived and ascertained. The peck, half-peck, quarter-peck, quart, and pint measures for measuring commodities other than liquid are derived from the half-bushel by successively dividing that measure by two.

i. Whenever wheat, rye, shelled Indian corn, barley, buckwheat, flaxseed, or oats are sold by the bushel, and no special agreement as to the weight or measurement is made by the parties, the bushel consists of sixty (60) pounds of wheat, of fifty-six (56) pounds of rye, of fifty-six (56) pounds of shelled Indian corn, of forty-eight (48) pounds of barley, of forty-eight (48) pounds of buckwheat, of fifty-six (56) pounds of flaxseed, and thirty-two (32) pounds of oats.

j. The standard yard is the unit or standard measure of length and surface from which all other measures of extension, whether lineal, superficial, or solid are derived and ascertained.

k. The yard is divided into three equal parts, called feet, and each foot into twelve equal parts, called inches. For measures of cloths and other commodities commonly sold by the yard it may be divided into halves, quarters, eighths, and sixteenths.

l. The rod, pole, or perch contains five and one-half ($5\frac{1}{2}$) yards, and the mile one thousand seven hundred and sixty (1,760) yards. The chain for measuring land is twenty-two (22) yards long, and divided into one hundred (100) equal parts, called links.

m. The acre for land measure shall be measured horizontally, and contains ten (10) square chains, and is equivalent in area to a rectangle sixteen (16) rods in length and ten (10) in breadth. Six hundred forty (640) acres constitute a square mile. [1945]

Sec. 5. Designation of weights and liquid measure.

Designation by weight shall be in terms of avoirdupois pounds and ounces and designation by liquid measure shall be in terms of the standard gallon, quarts, pints, or fluid ounces. In lieu thereof, these designations may be in terms of the metric system of weight or measure. [1945]

Sec. 6. Flour, corn meal, hominy and hominy grits: Standard weight containers; exceptions.

It shall be unlawful for any person to pack for sale, sell, offer, or expose for sale in this state any of the following commodities except in containers of net avoirdupois weights of two (2), five (5), ten (10), twenty-five (25), fifty (50), and one hundred (100) pounds, and multiples of one hundred (100) pounds: Wheat flour, self-rising wheat flour, phosphated wheat flour, bromated flour, enriched flour, enriched self-rising flour, enriched bromated flour, corn flour, corn meals, hominy, and

hominy grits; *provided, however*, that the provisions of this act shall not apply to (a) the retailing of flours, meals, hominy, and hominy grits direct to the consumer from bulk stock, or (b) the sale of flours and meals to commercial bakers or blenders or for export in containers of more than one hundred (100) pounds, or (c) flours, meals, hominy, and hominy grits packed in cartons, the net contents of which are less than five (5) pounds, or (d) the exchange of wheat for flour by mills grinding for toll. [1945]

Sec. 7. Standard weight of bread loaf.

The standard loaf of bread shall weigh one pound, avoirdupois weight. All bread manufactured, sold, or offered for sale, in the form of loaves, shall be one of the following standard weights and no other, namely, one pound, one-half pound, one and one-half pounds, or multiples of one pound, avoirdupois weight; *provided, however*, that reasonable variations in excess and deficiency, as determined by the state sealer, be allowed; *and provided further*, that the provisions of this section shall not apply to biscuits, buns, crackers, rolls, or to what is commonly known as "stale bread." [1945]

Sec. 8. Butter and oleomargarine must be sold by weight; size of prints; marking requirements.

It shall be unlawful for any person to sell, or offer to sell, any butter or renovated or processed butter or oleomargarine in any other manner than by weight. It shall be unlawful for any person to put up, pack, or keep for the purpose of sale, offer, or expose for sale, or sell any butter or renovated or process butter, or oleomargarine, in the form of prints, bricks, or rolls in any other than the following sizes, to wit, one-quarter pound, one-half pound, one pound, and one and one-half pounds, or multiples of one pound. Each print, brick, or roll shall bear a definite, plain, and conspicuous statement of its true net weight, on the principal label, where there be such a label, otherwise on the outside wrapper thereof; such statement shall be in gothic type not less than one-quarter inch square. [1945]

Sec. 9. Meat to be sold by weight.

It shall be unlawful to sell, or offer to sell, except for immediate consumption on the premises, any meat, meat products, or dressed poultry in any other manner than by weight. [1945]

Sec. 10. Capacity of milk bottles; marking requirements; exceptions.

Bottles used for the sale of milk or cream shall be of the capacity of one-half gallon, one quart, one pint, one-half pint, and one gill. Bottles used for the sale of milk or cream shall have clearly blown or otherwise permanently marked in the side of the bottle the capacity of the bottle, and in

Laws 1945, Ch. 169—Weights and Measures—Continued.

the side or bottom of the bottle the name, initials, or trade mark of the manufacturer; *provided, however*, that certain bottle sizes not specified above, may, with the written approval of the state sealer, be used by restaurants for service of milk with meals. [1945]

Sec. 11. Fruit to be sold by weight or in standard containers.

It shall be unlawful to sell or offer to sell any berries or small fruits in any other manner than by weight, or in containers of the following capacities, when level full: One quart, one pint, or one-half pint, standard dry measure. [1945]

Sec. 12. Standard cord of firewood; loose cord loads.

A standard cord of firewood sold or offered for sale in this state shall be and contain one hundred and twenty-eight (128) cubic feet, well stowed and packed; *provided*, that nothing in this section shall prevent the selling or offering for sale of wood in loosely packed loads of one hundred and twenty-eight (128) cubic feet where the average length of the separate pieces is less than eighteen (18) inches. Such loads shall be known as loose cord loads or standard loads. [1945]

Sec. 13. Commodities in containers under federal regulations not violations.

The sale of any commodity in a container complying with any act of Congress or the opinions and regulations issued by the secretary of agriculture and appertaining to net weight or measure does not violate the provisions of this act [Secs. 1-30]. [1945]

Sec. 14. Packages or containers: Marking requirements; exceptions.

It shall be unlawful for any person to put up any commodity or article of merchandise into a package or container, and sell or offer for sale in this state such commodity or article of merchandise in that form without having such package or container labeled in plain, intelligible English words and figures with a correct statement of the net weight, measure, or numerical count of its contents; *provided*, that nothing in this section shall prevent the putting up of commodities or articles of merchandise, which have been previously sold by net weight, measure, or numerical count, into packages or containers for the purpose of delivering or transporting such commodities or articles of merchandise; *provided*, nothing in this section shall apply to packages or containers in which soap in any form is sold or offered for sale. [1945]

Sec. 15. Containers to be free of deception.

No container wherein commodities are packed shall have a false bottom, false side walls, false lid

or covering, or be otherwise so constructed, wholly or partially, as to facilitate the perpetration of deception or fraud. [1945]

Sec. 16. False or short weight or measure unlawful.

It shall be unlawful for any person, in buying or selling any commodity or article of merchandise, to make or give false or short weight or measure, or to sell or offer for sale any commodity or article of merchandise less in weight or measure than he represents, or to use a weight, measure, balance, or measuring device that is false and does not conform to the authorized standard for determining the quantity of any commodity or article of merchandise, or to have a weight, measure, balance, or measuring device adjusted for the purpose of giving false or short weight or measure, or to use in buying or selling of any commodity or article of merchandise a computing scale or device indicating the weight and price of such commodity or article of merchandise upon which scale or device the graduations or indications are falsely or inaccurately placed, either as to weight or price. [1945]

Sec. 17. Penalties for violation of act; treble damages; prima facie evidence.

Any person who shall violate any of the provisions of this act [Secs. 1-30] shall be deemed guilty of a misdemeanor, and upon conviction thereof before the justice of the peace having jurisdiction of the offense, shall be fined in a sum not to exceed two hundred (\$200) dollars, or by imprisonment in the county jail for not more than sixty (60) days, or by both such fine and imprisonment. He shall also be liable in damages to the party injured by his violation in treble the amount of the property wrongfully taken or not given, and twenty (\$20) dollars in addition thereto, to be recovered in a court of competent jurisdiction. The selling and delivery of any commodity or article of merchandise shall be prima facie evidence of the representation on the part of the vendor than the quantity sold and delivered was the quantity bought by the vendee. [1945]

Sec. 17a. Unavoidable leakage, shrinkage, etc., not a violation.

There shall be no violation under the act [Secs. 1-30], for any discrepancy between actual weight or volume at the time of sale to the consumer, and the weight marked on the container, or between the fill of the container and the capacity of the container, if such discrepancy is due to unavoidable leakage, shrinkage, evaporation, waste, or to causes beyond the control of the seller acting in good faith. [1945]

Sec. 18. District attorney to prosecute.

It shall be the duty of the district attorney to prosecute all violations of the provisions of this act [Secs. 1-30] occurring within his county. [1945]

Sec. 19. State sealer of weights and measures; deputies.

The commissioner of food and drugs appointed by the president and board of regents of the University of Nevada is hereby designated and constituted ex officio sealer of weights and measures, and shall be charged with the proper enforcement of the provisions of this act [Secs. 1-30], and he may appoint, subject to the approval of the board of regents, such deputy or deputies as he may deem necessary therefor. [1945]

Sec. 20. Same: Powers and duties.

The state sealer shall have the power, and it shall be his duty to inspect, test, try, and ascertain if they are correct, all weights, measures, and weighing or measuring devices, kept, offered, or exposed for sale, sold, or used or employed in proving the size, quantity, extent, area, or measurement of quantities, things, produce, or articles for distribution or consumption purchased or offered for sale, hire, or award, or in computing any charge for services rendered on the basis of weight or measure, or in determining weight or measure when a charge is made for such determination; and he shall have the power to, and shall from time to time weigh or measure and inspect packages or amounts of commodities of whatsoever kind kept for the purpose of sale, offered or exposed for sale, or sold or in the process of delivery, in order to determine whether the same contain the amounts represented, and whether they be offered for sale or sold in a manner in accordance with law. He shall at least once each year, and as much oftener as he may deem necessary, see that all weights, measures, and weighing or measuring devices used are correct. He may for the purpose above mentioned, and in the general performance of his official duties, enter and go into or upon, and without formal warrant, any stand, place, building, or premises, or stop any vendor, peddler, junk dealer, coal wagon, ice wagon, delivery wagon, or any person whatsoever, and require him, if necessary, to proceed to the nearest authorized place which the state sealer may specify for the purpose of making the proper tests. [1945]

Sec. 21. Same: Sealing.

Such officer shall thereupon determine the weight of the solid fuel and the vehicle on which it is carried and shall direct such person in charge to return to such scales forthwith upon unloading the solid fuel and upon such return the officer shall determine the weight of the vehicle without load. It shall be unlawful for any person in charge of a vehicle containing such solid fuel or from which such solid fuel has been unloaded to fail to take the vehicle upon the direction of said officer to the scales as aforesaid or refuse to permit the solid fuel or vehicle to be weighed by such officer. When the applicant is an equipped dealer or an employee of an equipped dealer having two or more yards, he may be designated to weigh upon any or all of the scales in the said yard or yards. No certificate of designation shall be issued to any

applicant unless he is the owner or lessee of the scales at the place designated in his application, or a bona fide employee of the owner or lessee of such scales; *provided, however*, that not more than three certificates of designation shall be issued for the same scale, unless the superintendent in his discretion deems it advisable that more than three persons shall be designated to weigh solid fuel on said scale.

The period of the certificate of designation to weigh solid fuel shall run concurrently with the term of the applicant as weighmaster and shall expire on the date of the expiration of said term. [1913]

Sec. 78-106. Same: Mason work measure.

A perch of mason work, or stone, is hereby declared to consist of sixteen and one-half [16½] feet cubic measure. [1913]

Sec. 78-107. Same: Ton; short weight; penalty.

When any commodity is sold by the ton, unless otherwise agreed upon, a ton shall consist of two thousand (2,000) pounds.

Whoever shall sell or deliver a less quantity than prescribed in section 5836 [Sec. 78-108] for a ton shall be deemed guilty of a misdemeanor.¹ [1913]

¹ See Sec. 41-106, page 687; punishment for misdemeanor.

Sec. 78-108. Same: Ton of hay.

Unless otherwise agreed upon, a ton of hay, when sold by weight, shall consist of two thousand (2,000) pounds; or, when sold by measurement, when loose upon a wagon or freshly stacked, five hundred twelve (512) cubic feet; when stacked thirty [30] days and less than sixty [60] days four hundred twenty-two (422) cubic feet; and when stacked over sixty [60] days three hundred and eighty (380) cubic feet. [1913]

Sec. 78-109. Measurement of loose hay in stack.

The following rule and method of measuring loose hay in the stack, and specifying the cubical contents of a ton of loose hay, is hereby established. [1901]

Sec. 78-110. Same: Method of measurement; computation of tonnage.

Measure the stack for length, width, and the "over," to get the "over," throw a tape line over the stack at an average place, from ground to ground, drawing it tightly.

Multiply the width by the over and divide this result by four [4].

Multiply result of division by the length, for approximate cubical contents of stack.

To reduce to tons, for hay that has stood in stack less than 20 [30] days, divide cubical contents by 512, for more than 20 [30] and less than 60 days divide cubical contents by 422, for more than sixty days divide cubical contents by 380.

Example. Stack measures 17 feet wide, 58 feet wide, 58 feet long, 36 feet over. Stack has stood 15 days.

Multiply 17 by 36 equals 612.

Divide 612 by 4 equals 153.

Multiply 153 by length 58 equals 8,874 which gives the cubical contents in feet.

Statutes Annotated 1941, Vol. 5, Ch. 78, Art. 1—
Weights and Measures—Continued.

Divide 8,874 by 512 equals 17 $\frac{3}{10}$ tons in stack. [1901]

[ED. NOTE.—In New Mexico Statutes Annotated, following the foregoing section, it is stated: "The bracketed numbers '30' were inserted by the compiler to conform to Sec. 78-108 which is a later enactment, although both were included as they are in the 1915 Code."]

[Ed. Note.—The Agriculture and Markets Law was enacted by Laws 1922, Ch. 48, constituting Chapter 69 of the consolidated laws. The bulk of its provisions was derived from three primary sources: Namely, Agricultural Law of 1909, Ch. 9; Farms and Markets Law of 1917, Ch. 802; and General Business Law of 1909, Ch. 25, Articles 2, 2-a, 13, 14, 15, 25a, and sections 390, 392-395, and 397.

Art. 16. Weights and Measures, was derived mainly from General Business Law of 1909, Ch. 25, Art. 2, as amended, and said Art. 2 in turn was derived from Laws 1896, Ch. 376, originally revised from Laws 1851, Ch. 134, as amended, and Laws 1829, Ch. 297.]

The peck, half peck, quarter peck, quart, pint and half pint measures for measuring commodities which are not liquids shall be derived from the half bushel by successively dividing that measure by two. [1922]

He shall from time to time cause to be tested all weights and measures, and weighing and measuring devices used in checking the receipt or disbursement of supplies in every state institution and report in writing to the executive officer of the institution concerned; and at the request of said officers the commissioner shall appoint in writing one or more employees, then in actual service, of each institution, who shall act as special deputies for the purpose of checking the receipt or disbursement of supplies. He shall keep a complete record of the standards, balances and other apparatus belonging to the state and take receipt for the same from his successor in office. The commissioner shall inspect all standards used by the counties or cities at least once in two years and shall keep a record of the same. He shall as often as he shall deem necessary visit the various cities and counties of the state in order to inspect the work of the local sealers and in the performance of his duties he may inspect the weights, measures, balances or any other weighing or measuring appliances of any person, firm or corporation. He shall establish specifications, amounts of tolerance, or reasonable variations allowable for weights, measures and weighing and measuring devices, and shall make rules and regulations for the purpose of making clear and effective the provisions of this chapter [Secs. 1-355] relative to weights, measures and weighing and measuring devices, which rules and regulations shall have the force and effect of law, and he shall issue instructions to the county and city sealers and these shall be binding upon and govern said sealers in the discharge of their duties. —Weights and Measures—Continued.**

be used for adjusting county standards, and the original standards shall not be used except for the adjustment of this set of copies and for scientific purposes.

The commissioner [of agriculture and markets] shall see that the foregoing provisions of this section are complied with and procure such apparatus and fixtures, if the same have not already been procured, as are necessary in the comparison and adjustment of the county standards.

He shall cause all the city and county standards to be impressed with the emblem of the United States, the letters "N.Y.," and such other devices as he shall direct for the particular county. [1922]

Sec. 182. County sealer of weights and measures; duties; salary; bond.

There shall be a county sealer of weights and measures in each county, except where such county is wholly embraced within a city, who shall be a resident of such county and who shall be appointed by the board of supervisors. He shall be paid a salary determined by the board of supervisors and shall be provided by them with the necessary working equipment of standard weights and measures. He shall take charge of and safely keep the county standards, and at least once in every five years shall submit such standards to the commissioner [of agriculture and markets], at the place where the standards of the state are kept, for calibration and certification. Where not otherwise provided by law, the county sealer shall have the power within his county to inspect, test, try and ascertain if they are correct and are being correctly used, all weights, scales, beams, measures of every kind, instruments or mechanical devices for measurement and the tools, appliances or accessories connected with any or all such instruments or measurements used or employed within the county by any proprietor, agent, lessee or employee in determining the size, quantity, extent, area or measurement of quantities, things, produce, article for distribution or consumption offered or submitted by such person or persons for sale, for hire or award. He shall at least twice in each year and as much oftener as he may deem necessary see that the weights, measures and all apparatus used in the county are correct. In the general performance of his official duties, he shall have the powers and perform the duties of a peace officer, and may enter or go into or upon and without formal warrant, any stand, place, building or premises or may stop any vendor, peddler, junk dealer, coal wagon, ice wagon or any dealer whatsoever, for the purposes of making the proper tests. Whenever the county sealer finds a violation of the statutes relating to weights and measures he shall, as he deems necessary, cause cor-

rection to be made or cause the violator to be prosecuted. The county sealer shall keep a complete record of the work done by him and shall make an annual report to his board of supervisors, and an annual report, duly sworn to, not later than the first of December to the commissioner. The county sealer of weights and measures shall forthwith on his appointment give a bond, with sureties to be approved by the appointing power, for the faithful performance of the duties of his office and for the safety of the local standards and such appliances for verification as are committed to his charge and for the surrender thereof immediately to his successor in office or to the person appointed by the proper authority to receive them. The board of supervisors of the county of Westchester may appoint and fix the compensation of such deputy county sealers of weights and measures as it may determine necessary, who shall be residents of such county and shall have the powers and perform the duties provided for county sealers of weights and measures by this section. The county sealer of weights and measures and the deputy county sealers of weights and measures shall, in the county of Westchester, have jurisdiction within the entire county, including the cities and villages therein. [1922; last amended 1939.]

Sec. 183. City sealer: Appointment; salary; duties.

There shall be a city sealer of weights and measures, or an officer having similar duties, to be appointed by the mayor with the approval of the common council of each city, or in such other way as the city charter shall designate. He shall be paid a salary to be fixed and determined by the board or body authorized to determine salaries of city officials, and no fees shall be charged or received by him or by the city for the inspection or testing of weights, measures or weighing or measuring devices. He shall perform in his city the duties of and have like powers as a county sealer in a county. [1922]

Sec. 183-a. County and city deputy and assistant sealers of weights and measures.

Subject to the provisions of this article [Secs. 176-197] governing the qualifications, appointment, powers and duties of county or city sealers of weights and measures, as the case may be, each county and city may provide for such county or city deputy and assistant sealers of weights and measures as may be deemed necessary. Wherever used in this article, the term "sealer" shall be deemed to mean and include deputy and assistant county or city sealers of weights and measures in any county or city where such officers exist.

County sealers and city sealers, and deputies and assistants, if any, may be reimbursed for actual and necessary expenses incurred in the discharge of their duties. Such expenses may be county charges in the case of county sealers and their deputies and

assistants and city charges in case of city sealers and their deputies and assistants, to be audited and paid in the same manner as other county and city charges, respectively. [1940]

Sec. 184. Sealing of approved weighing and measuring devices; semi-annual inspection of certain scales; offenses.

Whenever a city or county weights and measures official inspects any weighing or measuring device and finds that it corresponds or causes it to correspond with the standards in his possession he shall seal or mark the same with an appropriate device. All pressers of hay and straw for market, hucksters, peddlers and junk dealers shall submit the scales used in their business to the weights and measures official at least twice annually for inspection. No person shall remove any such seal or mark from any such weighing or measuring device or obliterate, cover, obstruct or deface any such seal or mark. [1922; last amended 1939.]

Sec. 184-a. Gasoline pumps to be inspected and sealed.

No gasoline pump here after installed shall be used for the purpose of dispensing and measuring gasoline until inspected by an inspector of the department or by a city or county weights and measures official and found to have been properly installed and to be properly adjusted so as to measure accurately the gasoline to be dispensed by it. If the inspection shows that such pump has been properly installed and is properly adjusted to deliver accurate measure, the pump shall be sealed or marked with an appropriate device by such inspector or weights and measures official. If not correctly installed or adjusted, it shall be corrected or shall be condemned by the placing thereon of a condemning tag or mark by such inspector or weights and measures official. [1929; last amended 1939.]

Sec. 185. Condemning of false weights and measures.

Whenever any city or county weights and measures official inspects any weighing or measuring device and finds that it does not correspond and does not cause it to correspond with the standards in his possession he shall condemn the same.

No person shall use or attempt to use any weighing or measuring device to which there has been affixed or upon which there has been placed any condemning tag, mark or device, for the purpose of determining the weight or quantity of any commodity or article of merchandise, unless such condemning tag, mark or device shall have been removed therefrom by a city or county weights and measures official.

No person except a weights and measures official, or with his consent or at his direction, shall remove from any such weighing or measuring device any condemning tag or mark which has been affixed thereto, or placed thereon by a city or county weights and measures official or obliterate, cover,

obstruct or deface the same. [1922; last amended 1939.]

Sec. 186. Disposition of condemned weighing and measuring devices.

A city or county sealer may condemn and seize any weighing or measuring device found by him to fail to conform to the standards in his possession and which is not caused by him to conform to such standards and cause the same to be destroyed or disposed of under such regulations as the commissioner [of agriculture and markets] may prescribe. [1922; last amended 1931.]

Sec. 187. Keeping false weighing and measuring devices.

No person shall retain in his possession any weighing or measuring device, knowing it to be false, unless it appears beyond a reasonable doubt that it was so retained without intent to use it or permit it to be used for determining the quantity of any commodity or article of merchandise. [1922; last amended 1931.]

Sec. 188. Use of false weights and measures; responsibility of seller or buyer; charge for service.

For the purpose of purchase, sale or service, no person shall use a false weight, measure, or other apparatus for determining the quantity of any commodity or article of merchandise.

If he be the seller, he shall not sell or deliver less of any such commodity or article of merchandise than the quantity represented to be sold; or, if he be the buyer, he shall not receive or accept more of any such commodity or article of merchandise than the quantity he represented to purchase.

No person shall determine a service charge on an amount in excess of the quantity of any such commodity or article of merchandise serviced. Nothing in this provision, however, shall prohibit the person or persons rendering the service from establishing a minimum charge therefor, such minimum charge to apply to all quantities up to and including a fixed limit, regardless of the actual weight or measure of the merchandise involved. In the event of the establishment of a minimum charge, the dispenser of the service shall inform the person receiving the service, by advertisement or otherwise, of the terms of such minimum charge. [1922; last amended 1944.]

Sec. 189. False labels; offense.

No person shall, with intent to defraud, put upon an article of merchandise or upon a cask, bottle, stopper, vessel, case, cover, wrapper, package, band, ticket, label or other thing, containing or covering such an article, or with which such an article is intended to be sold, or is sold, any false description or false indication of or respecting the number, quantity, weight or measure of such article or any part thereof; or sell or offer or ex-

pose for sale an article which to his knowledge is falsely described or indicated in any of the manners or in any of the particulars above specified. [1922]

Sec. 190. Sale of fruits, vegetables, grains and nuts by weight or numerical count only; original package; marking requirements.

Except when sold in the original container, fruits, vegetables, grains and nuts shall be sold at retail by avoirdupois weight or numerical count.

Any container so approved shall be deemed a standard container for such commodity.

1. A standard container for lettuce shall have a capacity of two thousand two hundred and eighty cubic inches, and shall have the following inside dimensions: length nineteen inches, width sixteen inches, depth seven and one-half inches, and shall be marked "standard lettuce container". When multiple loaves are baked, each unit loaf shall conform to the weight required by this section. The weights herein specified shall mean net weights not more than twelve hours after baking, or not more than twelve hours after sale and delivery by the manufacturer for resale. Such weights shall be determined by the average weight of not less than six loaves; provided, that such average weights shall be determined by the weight of at least twelve loaves, whenever such number of loaves is available at the time and place of such weighing; and provided further, that bread found upon any premises occupied for the manufacture of bread for sale, or any bread found in the wagons, trucks, baskets, boxes or other delivery vehicle or receptacles owned or controlled by the manufacturer of such bread, and being transported or delivered for sale, shall for the purposes of this section be deemed to have been baked within twelve hours unless such bread is marked, designated or segregated as stale bread. When an inspection of bread is made at any bakery by or under the direction of the commissioner [of agriculture and markets] or by or under the direction of any city or county sealer, the manufacturer of such bread or his servants or agents shall, upon the request of the official making such inspection, inform him whether such bread is manufactured for sale in any of the standard unit weights prescribed by this section and, if not so manufactured for sale in such standard units, shall furnish such official with samples of the labels or wrappers intended to be used on all such loaves of other than standard unit weights, or the notices intended to be posted with respect to such loaves. The commissioner shall make such uniform rules and regulations as are necessary to enforce this section, including reasonable tolerances or variations within which all weights shall be kept; provided, however, that the variation between the standard or represented weight and the true or actual weight shall not exceed one ounce per pound. The requirements of section one hundred and ninety-four of this chapter [Secs. 176–197] shall not apply to the sale of bread. [1924; last amended 1936.]

A tolerance at the rate of thirty pounds to the ton shall be allowed for unavoidable wastage and unavoidable variation in scales. [1933; last amended 1937.]

Sec. 197-b. Same: Weight tickets; charge; coal sold in less than 100 pound lots excepted; marking requirements.

No person, upon the sale of coal or coke shall deliver or cause to be delivered or to be started out for delivery any coal or coke without each lot being accompanied by a weight ticket of a licensed weighmaster of the state of New York, and a duplicate thereof, on each of which in ink, typewriting or indelible pencil, there shall be distinctly expressed in pounds, the net weight of the delivery, including the net weight of each size or kind of coal and coke, the name and address of the purchaser, the name and address of the seller, the date when weighed and the full signature of the licensed weighmaster by whom weighed.

One of such tickets shall be delivered to the purchaser specified thereon at the time of delivery, and the other retained by the seller for a period of ninety days. The weighmaster may charge a sum not exceeding twenty-five cents for each delivery of coal or coke requiring a separate weight ticket, weighed by him under the provisions of this article [Secs. 197-a—197-m]. When coal or coke is sold in lots of less than one hundred pounds, the provisions of this section shall not apply, provided the coal or coke is delivered in a bag or other container plainly and conspicuously marked with the correct weight of the contents. [1933; last amended 1940.]

Sec. 197-c. Same: Exception to weight certificate provision.

Such official shall thereupon determine the gross weight of the coal or coke and the vehicle in which it is carried, and shall direct such person in charge to return to such scales forthwith upon unloading the coal or coke, and upon such return the official shall determine the tare weight of the vehicle without load. No seller or driver or other person in charge of the vehicle containing such coal or coke, or from which such coal or coke has been unloaded, shall fail to take the vehicle, upon the direction of the weights and measures official or peace officer, to scales as aforesaid or refuse to permit the coal, coke or vehicle to be weighed by him. He shall also furnish evidence that he owns or leases a stationary scale suitable for weighing the tare and gross weights of a vehicle transporting coal or coke or that he is regularly employed by the owner or lessee of such a scale. The applicant shall pay a license fee of three dollars to the commissioner for remittance to the state treasury. A license shall be for a period not exceeding three years and may be renewed, in the discretion of the commissioner, for successive periods of not exceeding three years each, upon payment of a license fee of three dollars to the commissioner for remittance to the state treasury. Each license shall be kept at the place where the weighmaster is engaged in weighing and shall be open to inspection. A license may be revoked by the commissioner, after a hearing upon due notice to the licensee, for dishonesty, incompetency, inaccuracy, or a violation of the provisions of this

chapter [Secs. 197-a—197-m]. No person shall sign the name of the licensed weighmaster except the person to whom the weighmaster's license is issued. [1933; last amended 1937.]

5. No weighmaster shall weigh up any such load of coal and sign a weight ticket therefor, unless and until a duplicate original of the certificate of origin for such coal shall be filed with the weighmaster in the form required by subdivision one of this section. Such weighmaster, upon signing such weight ticket, shall make a notation thereon of the number, if any, and the date of the certificate of origin and shall also sign and date the certificate of origin accompanying the load of coal. Nothing herein contained shall be construed to require the weighing in the state of New York of any load of coal which is merely being transported through the state of New York for sale and delivery outside the state without being unloaded within the state, but the driver of any truck transporting such a load of coal shall in any event file a duplicate original of the required certificate of origin with a duly licensed weighmaster at the nearest available scales after entering the state.

6. Any person directly interested in the sale, distribution, hauling or transportation of coal in the state of New York and any association composed of persons who are so interested shall be entitled to sue for and to have injunctive relief in any court of the state of New York having jurisdiction over the parties against actual or threatened violations of the provisions of this section. It shall be unlawful to sell except for immediate consumption by the purchaser, on the premises of the seller, liquid commodities in any other manner than by weight or liquid measures, or commodities not liquid in any other manner than by measure of length, by weight, or by numerical count. When a commodity is sold by numerical count in excess of one unit, the units which constitute said numerical count shall be uniform in size and/or weight, and be so exposed as to be readily observed by the purchaser: Provided, however, that nothing in this section shall be construed to prevent the sale of fruits, vegetables, and other dry commodities in standard containers defined by acts of the United States congress known as "Standard Container Acts," and the rules and regulations promulgated in accordance therewith; or of fruits or vegetables sold by the head, or bunch, or of any other commodity which is especially provided for by some other section of this chapter [Secs. 81-1—81-70]. no other, namely: five pounds, ten pounds, twenty-five pounds, fifty pounds, one hundred pounds, and multiples of one hundred pounds. However, nonstandard weight packages may be packed for sale, offered or exposed for sale, or sold in this state, weighing three pounds or less, if said nonstandard weight packages shall be plainly and conspicuously marked showing net contents in avoirdupois weight: Provided, that nothing in this section shall be construed to prevent the retail sale of any amount of flour or meal direct to the consumer from bulk, upon order and weight at time of delivery to the consumer.

The term "flour" as used herein shall be construed to mean any finely ground product of wheat, or other grain, corn, peas, beans, seeds or other substance, with or without added ingredients, intended for use as food for man.

The term "meal" as used herein shall be construed to mean any product of grain, corn, peas, beans, seed or other substance coarsely ground, with or without added ingredients, either bolted, or unbolted, including grits and hominy, intended for use as food for man. [1945; last amended 1949.]

(a) Whenever the term "pound" is used in connection with weight, it shall be understood to be the avoirdupois pound as declared by act of the United States congress, except in those cases where it is common practice to use the "troy" pound or "apothecaries" pound, and the "ounce" is one-sixteenth part of an avoirdupois pound.

(b) The term "ton" shall be understood to mean a unit of two thousand (2000) pounds, avoirdupois weight.

(c) Whenever the term "gallon" is used in connection with liquid measure, it shall be understood to mean a unit of two hundred and thirty-one (231) cubic inches of which the liquid quart, liquid pint, and the gill are respectively, the quarter, the one eighth and the one-thirty-second parts.

The term "cord" when used in connection with such purchases of wood, shall be understood to mean a quantity of wood consisting of any number of sticks, bolts or pieces laid parallel and together so as to form a rick or stack occupying a space four feet wide, four feet high and eight feet long, or such other dimensions that will, when multiplied together, equal one hundred and twenty-eight cubic feet by volume, construed as being seventy per cent solid and thirty per cent air space or ninety solid cubic feet. [1945]

The manufacturer shall furnish proof, acceptable to the board of agriculture, that the concrete block, cinder block, or other concrete masonry units being offered for sale or sold complies with the minimum load bearing strength required by this section; and each and every sale shall be accompanied with a bill of sale or invoice on which shall be printed or stamped in ink or other indelible substance, a statement guaranteeing that the products covered by said bill of sale or invoice meets the minimum load bearing strength as required by this section signed by a duly authorized official or agent of the manufacturer; provided, however, that the provisions of this section shall not prohibit the sale or offer for sale of cement block, cinder block, or other concrete masonry units, known as "seconds" or "rejects" due to size, shape, or less than minimum load bearing requirement, if and when said sale is accompanied with a bill of sale or invoice on which is printed or stamped in ink or other indelible substance in bold letters a statement that the cement block, cinder block, or other concrete masonry units so billed or invoiced are inferior in quality and do not comply with minimum load bearing requirement signed by a duly authorized official or agent of the manufacturer. It shall not be lawful to transport such coal, coke, or charcoal to the nearest such scale for the purpose of having same weighed, but no sale or delivery of same shall take place until the load shall have been weighed.

(c) Each and every sale or delivery of coal, coke, or charcoal to the consumer shall be accompanied by a weight certificate on which shall be expressed in ink or other indelible substance the name and address of the seller or dealer, name and address of purchaser or receiver, the kind and size of coal being delivered and the gross tare and net weights, the date of weighing, the signature of the weighmaster, a place for signature of receiver, the name of delivery man, and the number or license number of delivery vehicle. The State Board of Agriculture shall appoint a State Director of Weights and Measures who shall serve at the pleasure of the Board and who shall carry out the provisions of this Act [Secs. 3.1, 81–93], and shall also appoint necessary inspectors of weights and measures; and their compensation and other expenses necessarily incurred in carrying out the provisions of this Act shall be paid from the

Department of Agriculture Trust Fund. * * *

The powers and duties given to and imposed upon the State Director of Weights and Measures by this Act are hereby given to and imposed upon his deputy and inspectors also, when acting under his instructions and at his direction. [1949]

Sec. 82. Same: Powers and duties.

The State Director of Weights and Measures, hereinafter referred to as the Director, shall have and keep a general supervision over the weights and measures and weighing and measuring devices offered for sale, sold, and in use in the State, and shall have the power to inspect, test, try, and ascertain if they are correct, all weights, measures, and weighing or measuring devices kept, offered, or exposed for sale, or caused to be done through licensed agencies; it shall be his duty at least once each year, and as much oftener as he may deem necessary, to inspect, test, try, and ascertain if they are correct, all weights, measures, and weighing or measuring devices commercially used or employed in proving the size, quantity, extent, area, or measurement of quantities, things, produce, or articles for distribution or consumption, purchased or offered or submitted for sale, hire, or award, or in computing any charge for services rendered on the basis of weight or measure when a charge is made for such determination; and he shall have the power to and shall from time to time weigh or measure and inspect packages or amounts of commodities of whatsoever kind kept for the purpose of sale, offered or exposed for sale, or sold in the process of delivery, in order to determine whether the same contain the amounts represented, and whether they be offered for sale or sold in a manner in accordance with law. He may for the purposes above mentioned, and in the general performance of his official duties, enter and go into or upon, and without formal warrant, any stand, place, building, or premises, other than a residence, or stop any vendor, peddler, itinerant buyer, person in charge of any delivery vehicle, or any person whatsoever, and require him, if necessary, to proceed, with or without any vehicle involved, to some place which the Director may specify, provided such place is within reasonable distance and provided such orders to proceed to such destination will not in any way endanger the cargo of such vehicle. [1949]

Sec. 83. Regulations of State board of agriculture; sealing and marking; condemning for repairs.

The State Board of Agriculture shall issue from time to time regulations for the enforcement of the provisions of this Act [Secs. 3.1, 81-93], after conducting public hearings as to the advisability or propriety thereof. Regulations established under this Act shall be uniform insofar as is practicable with those promulgated under Federal regulation. The said regulations may include standards of net weight, net measure, or net count for any commod-

ity product, or article, and also specifications and tolerances for all weights, measures, and weighing and measuring devices of the character of those specified in section 3 [Sec. 82] of this Act, which conforms as closely as practicable to the official standards, those which are not accurate, which are of such construction that they are faulty—that is, which are not reasonably permanent in their adjustment or which will not repeat their indications correctly—or which facilitate the perpetration of fraud. For the purposes of this Act apparatus shall be deemed to be correct when it conforms to all applicable requirements promulgated as specified in this Section, and other apparatus shall be deemed to be incorrect.

Whenever the Director compares weights, measures, or weighing or measuring devices and finds that they correspond, or if he causes them to correspond, with the standards in his possession, he shall seal or mark such weights, measures, or weighing or measuring devices with appropriate devices. The State Board of Agriculture or its Director of weights and measures, shall not enter into the business of repairing scales or devices for weighing or measuring other than minor adjustments as may be made by its inspector without rebuilding or replacing parts or sections of such scales or devices. The Director shall condemn incorrect weights, measures, or weighing or measuring devices, and he shall mark or tag same as "Condemned for Repairs." The owners or users of any weights, measures, or weighing or measuring devices of which such disposition is made shall have the same repaired and corrected. If the owner repairs same he shall notify the Director that same has been repaired; and it shall be the duty of the Director immediately upon such notification to inspect the same. [1949]

Sec. 84. Marking packages; standards of fill.

It shall be unlawful to keep for the purpose of sale, or to offer or expose for sale, or sell, any commodity in package form unless the net quantity of the contents be plainly and conspicuously marked on the outside of the package, in terms of weight, measures, or numerical count, provided, however, that reasonable variations or tolerances shall be permitted, and that such reasonable variations or tolerances and also exemptions as to small packages shall be established by rules and regulations made by the State Board of Agriculture, further provided, however, that rope and twine and cordage, which in common practice of the trade are marked and sold on a gross weight basis, may continue to be marked and sold on a gross weight basis. It shall be unlawful to keep for the purpose of sale, offer or expose for sale, or sell any commodity in package form if its container is so made, formed, or filled, or if it is so wrapped, as to mislead the purchaser as to the quantity of the contents: or if the contents of its container fall below

the standards of fill prescribed by regulations promulgated as provided in this Section. For the effectuation of the purposes of this Section the State Board of Agriculture is hereby authorized to promulgate regulations fixing and establishing for any commodity in package form a reasonable standard of fill or container. There shall be no violation under this Act [Secs. 3.1, 81-93], for any discrepancy between actual weight or volume at the time of sale to the consumer, and the weight marked on the container or between the fill of container and the capacity of the container, if such discrepancy is due to unavoidable leakage, shrinkage, evaporation, waste, or causes beyond the control of the seller acting in good faith. The words "in package form," as used in this Act, shall be construed to include a commodity in a package, carton, case, can, box, barrel, bottle, phial, or other receptacle, or in coverings or wrappings of any kind, put up by the manufacturer, or, when put up prior to the order of the commodity, by the vendor, which may be labeled, branded, or stenciled, or otherwise marked, or which may be suitable for labeling, branding, or stenciling, or marking otherwise, making one complete package of the commodity. The words "in package form" shall be construed to include both the wholesale and the retail package. Provided, that a box or carton or other package used for shipping purposes, containing a number of packages which are individually marked, as hereinbefore provided, will not be required to bear the weight or measure or numerical count of the contents thereof. Provided, further, that for the uses and purposes of this Act, the word "commodity" is hereby defined to mean and include only agricultural products. [1919]

Sec. 85. Net weights to be used.

Whenever any commodity, except as hereinabove provided, is sold on a basis of weight, it shall be unlawful to employ any other weight in such sale than the net weight of the commodity, except commodities customarily sold on basis of gross weight; and all contracts concerning commodities sold on a basis of weight shall be understood and construed accordingly. Whenever the weight of a commodity is mentioned in this Act [Secs. 3.1, 81-93], it shall be understood and construed to mean the net weight of the commodity, provided however, that rope and twine and cordage, which in common practice of the trade are sold on a gross weight basis may continue to be marked and sold on a gross weight basis. [1919]

Sec. 86. Misrepresentation of weight, price or quantity.

It shall be unlawful to misrepresent the weight of a commodity, thing, or service sold or offered or exposed for sale, or to represent the price or the

quantity of any commodity, thing, or service sold or offered or exposed for sale in any manner calculated or tending to mislead or deceive an actual or prospective customer. [1919]

Sec. 87. Hindering officials; director and inspectors to have power of peace officers.

It shall be unlawful for any person to hinder or obstruct in any way the Director, his deputy, or inspectors, in the performance of his official duties, or to impersonate in any way the Director, his deputy, or inspectors. For the purpose of the enforcement of the provisions of this Act [Secs. 3.1, 81-93], the Director, and inspectors of weights and measures, shall have the powers and authority of peace officers. Provided, however, that it shall be a sufficient compliance with the requirements of this Section if such weight or weighing or measuring device shall have been available at all times for inspection or re-examination, as the case may be.

(c) Remove from any weight, measure, or weighing or measuring device, contrary to law or regulation, any tag placed thereon by the Director, or his deputy or inspectors at his direction

Such duly licensed and qualified person may charge and retain the fee for testing service, such fee shall not exceed the schedule of fees adopted by the State Board of Agriculture. It is further provided that nothing in this section shall be construed to mean that the owners, or his assistant will not be permitted to repair his own scales and notify the inspector that same has been repaired, and ask that inspection be made.
