[1845]

Purdon's Statutes Annotated, Title 76, Ch. 2—
Weights and Measures, Approval, Sale, Use, Etc.

Sec. 101. Definitions.

The word "type," as used in this act [Secs. 101-115], is defined as a class the individual objects of which are similar one to another in design, construction, size, and material.

The term "standard weights and measures," as used in this act, is to be construed to include the standards of weights and measures adopted by the United States and the State of Pennsylvania, in accordance with those furnished by the Federal Government under joint resolutions of Congress, approved June fourteenth, eighteen hundred and thirty-six, and July twenty-seventh, eighteen hundred and sixty-six, and now recognized and in use throughout the United States.

The term "use in trade or commerce," as used in this act, shall be construed to include use in buying or selling goods, wares, or merchandise.

The word "person," as used in this act, shall be construed to import both the plural and the singular, as the case demands, and shall include corporations, co-partnerships, companies, societies, and associations.

The term "Bureau of Standards" shall be held to mean under or by authority of the chief of the Pennsylvania Bureau of Standards of the Department of Internal Affairs. When construing or enforcing the provisions of this act, the act, omission, or failure of any officer, agent, or other person, acting for or employed by any corporation, company, society, or association, within the scope of his employment or office, shall in every case be deemed to be the act, omission, or failure of such corporation, partnership, company, society, or association, as well as that of the person. [1921]

[ED. NOTE.—In Purdon's Pennsylvania Statutes Annotated, following the foregoing section, it is stated: "The

Bureau of Standards was abolished by act of 1927, April 13, P.L. 207, art. 1, sec. 2, amending act of 1923, June 7, P.L. 498, art. 1, sec. 2 (section 2 of Title 71, State Government)." See page 843. "Section 13 of the act of 1927 amended section 212 of the act of 1923 so as to authorize the Secretary of Internal Affairs to establish bureaus in his department, and act of 1929, April 9, P.L. 177, No. 175, art. II, sec. 212, re-enacts such section as amended." See Sec. 331, Title 71, page 843. See also Sec. 336, Title 71, page 843, powers of Department as to weights and measures.]

Sec. 102. Approval of types.

The Bureau of Standards¹ of the Department of Internal Affairs is authorized to pass upon each type of weight and measure and weighing and measuring device manufactured, offered or exposed for sale or sold or given away, for the use in trade or commerce, or used in trade or commerce, in the Commonwealth of Pennsylvania, and to approve or disapprove of said type. The said bureau shall approve each type of weight and measure and weighing and measuring device, submitted to it for approval by any person, if such type is so designed and constructed that it conforms to, or gives correct results in terms of, standard weights or measures or in terms of values derived therefrom, and is reasonably permanent in its indication and adjustment, and does not facilitate the perpetration of fraud, otherwise the bureau shall disapprove the same. [1921]

¹ See Ed. note following Sec. 101.

Sec. 103. Submission of types for approval.

The submission of a type may be by sample or by specifications if, in the best judgment of the bureau, such specifications are adequate, or in such other manner as may be prescribed by the rules and regulations promulgated under the authority of this act [Secs. 101-115]. [1921]

Sec. 104. Certificate of approval; appeal of disapproval.

When a type of weight or measure or weighing or measuring device is approved, the said bureau shall issue a certificate to this effect to the person submitting such type. When a type is disapproved, the said bureau shall notify the person submitting the same of its decision, setting out the reasons therefor, together with such information and references as may be useful in judging of the propriety of the disapproval, and shall give such person an opportunity to be heard in support of his application for approval. The bureau shall then reconsider its decision. If the new decision is adverse to such person, and he is dissatisfied with the same, he may take an appeal from this decision to the Secretary of Internal Affairs, who shall examine the matter, and decide whether the type should be approved or disapproved. If the person is dissatisfied with the decision of the Secretary of Internal Affairs, he may appeal to the court of common pleas of the county of which he is a resident, whose decision shall be final. [1921]

Sec. 105. Manufacture, sale or use of unapproved types unlawful; exceptions.

From and after one year after this act [Secs. 101-115] takes effect, it shall be unlawful for any person to manufacture, offer or expose for sale, or sell or give away, for use in trade or commerce, or to use in trade or commerce, any weight or measure or weighing or measuring device of a type not approved in accordance with the provisions of this act: Provided, however, That in the case of weights and measures and weighing and measuring devices manufactured and ready for sale or in use in the Commonwealth of Pennsylvania at the time this section takes effect, no approval of type shall be necessary, and it shall be lawful for any person to offer or expose for sale or sell, for use in trade or commerce, or to use in trade or commerce, such weights and measures and weighing and measuring devices, unless they do not conform to or give correct results in terms of standard weights or measures or in terms of values derived therefrom: And provided further, That the type of a weight or measure or weighing or measuring device need not be approved if said weight or measure or weighing or measuring device is intended for shipment outside the State of Pennsylvania, but if said weight or measure or weighing or measuring device shall in fact be sold or offered for sale, for use in trade or commerce, or used in trade or commerce, in the Commonwealth of Pennsylvania, then this proviso shall not exempt such weight or measure or weighing or measuring device from the operation of any of the provisions of this act. [1921]

Sec. 106. Seller's or manufacturer's guaranty; seal by local scaler; liability of guarantor; effect of actual notice of non-approval.

No person shall be prosecuted under the provisions of this act [Secs. 101-115] if he can establish a guaranty, signed by the person from whom the weight or measure or weighing or measuring device was purchased, or otherwise obtained, or from the manufacturer thereof, to the effect that the type of the same has been approved, if such approval is required by the provisions of this act, and, if such approval is not required, setting out this fact, or if he can establish that the weight or measure or weighing or measuring device has been sealed by the local scaler of weights and measures. The said guaranty, to afford protection, shall contain the name and address of the guarantor, and, in such case, said guarantor shall be amenable to the prosecutions, fines, or other penalties which would attach in due course to such person under the provisions of this act. But in any case where any such person has actual notice that the type of such weight or measure or weighing or measuring device has not in fact been approved, when such approval is required by the provisions of this act, it shall be unlawful and a violation of the

—Continued.

provisions of this act, for such person thereafter to offer or expose such weight or measure or weighing or measuring device for sale, or to sell it, for use in trade or commerce, or to use it in trade or commerce. [1921]

Sec. 107. Registration; serial numbers; descriptions.

The Bureau of Standards¹ shall register and give a serial number to each type of weight or measure or weighing or measuring device submitted and approved as provided in this act [Secs. 101–115], and shall issue from time to time, descriptions of such approved types, giving serial number of each type, copies of which shall be furnished to all weights and measures officials. [1921]

¹ See Ed. note following Sec. 101, page 846.

Sec. 108. Marking of approved weights and measures.

From and after one year after this act [Secs. 101–115] takes effect, it shall be unlawful to manufacture, offer or expose for sale or sell or give away, for use in trade or commerce, or to use in trade or commerce, any weight or measure or weighing or measuring device unless it shall be conspicuously, clearly and permanently marked for purposes of identification with the name, initials or trade mark of the manufacturer, and with the manufacturer's designation, which positively identifies the pattern or the design of the device and in such manner as may be prescribed by the rules and regulations authorized by this act: Provided, however, That, whenever it shall appear to the satisfaction of the Bureau of Standards¹ that any type of weight or measure or weighing or measuring device is such as to render it impracticable to mark it as required by this section, the said bureau shall furnish a certificate to that effect to any manufacturer applying for the same, and such weights and measures and weighing and measuring devices need not be marked as required by the provisions of this section. [1921; last amended 1947.]

¹ See Ed. note following Sec. 101, page 846.

Sec. 109. Marking unapproved types; penalty.

It shall be unlawful to mark for purposes of identification in any manner any weight or measure or weighing or measuring device, the type of which has not been approved as required by the provisions of this act [Secs. 101–115], any design or device simulating a serial number required by the provisions of section seven of this act [Sec. 107].

Any person who shall violate any of the provisions of this section shall be guilty of a misdemeanor, and, upon conviction thereof, shall be punished by a fine of not less than five hundred dollars, or more than one thousand (\$1000), or by imprisonment for not less than one year, or more

than two years, or by both such fine and imprisonment, in the discretion of the court. [1921; last amended 1947.]

Sec. 110. Approval and serialization of parts.

In case any person may desire to have the type of a part of a weight or measure or weighing or measuring device separately approved and serialized, and shall apply therefor, and the Bureau of Standards¹ decides that the part is such that this may properly be done, then such part may be approved and serialized or disapproved as to type, under the same provisions and restrictions as are applied to the approval and serialization or the disapproval of a type of weight or measure or weighing or measuring device by the provisions of this act [Secs. 101–115]. [1921]

¹ See Ed. note following Sec. 101, page 846.

Sec. 111. Marking "not legal for trade."

It shall be conclusively presumed that a weight or measure or weighing or measuring device is intended for use in trade or commerce if it is manufactured, offered or exposed for sale, or sold, for use in the Commonwealth of Pennsylvania, or is used therein, unless it shall bear a plain, legible, conspicuous, and permanent statement to this effect "Not legal for trade." It shall be unlawful to use in trade or commerce any weight or measure or weighing or measuring device which is marked as described above: Provided, however, That whenever it shall appear to the satisfaction of the Bureau of Standards¹ that any type of weight or measure or weighing or measuring device is such as to render it impracticable to mark it as required by this section, or is of such design and construction that it is obviously not intended for use in trade or commerce, the said bureau shall furnish a certificate to that effect to any manufacturer applying for the same, and such types of weights and measures and weighing and measuring devices need not be marked as required by the provisions of this section. [1921]

¹ See Ed. note following Sec. 101, page 846.

Sec. 112. Enforcement; rules and regulations.

Rules and regulations for the carrying out and enforcement of the provisions of this act [Secs. 101–115], not inconsistent with the provisions thereof, shall be adopted by the Bureau of Standards,¹ with the approval of the Secretary of Internal Affairs, which rules and regulations shall include reasonable variations or tolerances which may be allowed on weights and measures and weighing and measuring devices included within the provisions of this act, and also specifications for such weights and measures and weighing and measuring devices for the guidance of manufacturers in the design and construction of such weights and measures and weighing and measuring devices. [1921]

Such inspector shall thereupon determine the gross weight of the solid fuel, and the vehicle on which it is carried, and shall direct such person in charge to return to such scales forthwith upon unloading the solid fuel, and upon such return, the inspector shall determine the weight of the vehicle without load and determine the net weight of the solid fuel delivered. the department, except as otherwise provided in this act [Secs. 342-352]. Application for such license shall be made upon a form, prescribed by the department and shall show the place where the weighmaster shall perform this function, and the type and capacity of the scale to be used by the applicant. The applicant shall furnish satisfactory evidence that he owns or leases a scale suitable for weighing the tare and gross weight of a vehicle or vehicle and trailer transporting solid fuel, or that he is regularly employed by the owner or lessee of such a scale, and that he is of good moral character, and of ability to weigh accurately, and to make correct weight certificates. The department may refer any application for a license as a weighmaster to any city or county inspector of weights and measures for report as to the accuracy of the statements made therein, the suitability of the scale, the moral character of the applicant and such other information as the department may require. The applicant shall pay a license fee of five dollars (\$5.00) to the department, for remittance to the State Treasurer through the Department of Revenue, and the State Treasurer shall return annually two dollars and fifty cents (\$2.50) of each such fee to the treasurer of the city or county wherein such scale is located. The license shall be for a period of one year from the date of issue. A license may be renewed in the discretion of the department for successive periods of not exceeding one year each, upon payment of a license fee of five dollars (\$5.00) to the department for remittance to the State Treasurer through the Department of Revenue, and the State Treasurer shall return annually two dollars and fifty cents (\$2.50) of each such fee to the treasurer of the city or county wherein such scale is located. In all cases where the county inspector of weights and measures also serves as such in any city, the two dollars and fifty cents (\$2.50) required to be returned to the city, or county, either for a new license or a renewal license, shall be paid to the county notwithstanding the fact that the scale is located in such city, and in all cases where there is an agreement between any county and any city for the inspection of weights and measures in such city, such payment shall be divided between the county and the city in such proportions, as under such agreement, the county and the city share the cost of inspection.

(1.1) Each license shall be kept conspicuously displayed at the place where the weighmaster is engaged in weighing. In the event of the change of any name or address appearing on any application the licensed weighmaster shall notify the department of such change within forty-eight hours.

A license may be suspended or revoked by the department after hearing, upon due notice to the

licensee, for dishonesty, incompetency, inaccuracy or failure to notify the department of any change of name or address stated in his application, and may be revoked by the department without hearing, if the licensed weighmaster has been found guilty of any violation of the provisions of this act, or where the licensed weighmaster has ceased to be employed at the place of weighing for which the license has been issued. Upon the revocation of a weighmaster's license the forms of weighmaster's certificates in his possession shall immediately be surrendered to the department. [1935; last amended 1945.]

Whenever solid fuel is sold and delivered to the purchaser named in the approved weighmaster's certificate and whenever the seller or his representative neglects, fails or refuses to deliver an approved weighmaster's certificate at the time of delivery or the net weight of the solid fuel shall be determined to be less than the net amount stated on the approved weighmaster's certificate or as otherwise represented to the purchaser such determination shall constitute prima facie evidence of short weight and the seller shall be prosecuted under this provision for short weight.

Whenever the gross weight of a vehicle and load, the tare weight and the net weight of solid fuel has been determined in accordance with the provisions of this act, and the net weight of the solid fuel shall be determined to be less than that stated in a weighmaster's certificate, proof of such determination shall constitute prima facie evidence of the diminution of the load of solid fuel before delivery to the purchaser. Laws 1913-14, Act No. 135—Weights and Measures.

Sec. 1. Metric system and imperial system; contracts, how construed.

That the metric system of weights and measures and the imperial system customarily used in the United States, in so far as the same are described by this Act [Secs. 1-25], are hereby recognized and established in Puerto Rico for use in all industrial, commercial, or agricultural transactions as hereinafter defined in Section 16 of this Act, and except as hereinafter expressly authorized; and it shall be unlawful in any of said transactions to use any other systems, or to use any units of weight or measure not recognized and established as a part of the said systems; Provided, however, That no contract or agreement entered into prior to the approval of this Act, which contains a description of or reference to weights or measures not authorized by this Act, shall be vitiated by reason of such an unauthorized description or reference. [1913-14; last amended 1936.]

Sec. 2. Units of measure.

In the metric system the standard meter is the unit of measure of length and surface from which all other measures of extension, whether lineal, superficial or solid, are derived and ascertained. The meter is divided into ten equal parts called decimeters, into one hundred equal parts called centimeters, and into one thousand equal parts called millimeters. The dekameter contains ten meters, the hectometer one hundred meters, the kilometer one thousand meters, and the myriameter ten thousand meters. [1913-14; last amended 1936.]

Sec. 3. Liter is unit for liquids. *

In the metric system the standard liter is the unit of measure for liquids from which all other measures of liquids are derived and ascertained, and is equal to one cubic decimeter. The liter is divided into ten equal parts called deciliters, into one hundred equal parts called centiliters, and into one thousand equal parts called milliliters. The dekaliter contains ten liters, the hectoliter one hundred liters, and the kiloliter one thousand liters. [1913-14; last amended 1936.]

Sec. 4. Cubic meter is unit for cubic measure; hectare for land measure.

In the metric system the unit of cubic measure or volume is the standard cubic meter, this being a cube whose edges are each one meter in length. The cubic meter contains one thousand cubic decimeters, the cubic decimeter one thousand cubic centimeters, and the cubic centimeter one thousand cubic millimeters.

The hectare for land measure contains ten thousand square meters; the area contains one hundred square meters and the centare one square meter. In land measurements and records the measurement by *cuerda* customarily used in Puerto Rico, which shall be equivalent to 3930.395625 square meters, may also be used. All land measurement shall be based upon horizontal extension. [1913-14]

Sec. 5. Gram is unit of weight.

In the metric system the standard gram is the unit or standard of weight from which all other weights are derived and ascertained and is equal to the weight in a vacuum of one cubic centimeter of pure water at its maximum density. The gram is divided into ten equal parts called decigrams, into one hundred equal parts called centigrams, and into one thousand equal parts called milligrams. The dekagram contains ten grams, the hectogram one hundred grams, the kilogram one thousand grams, the myriagram ten thousand grams, the quintal one hundred thousand grams and the millier or tonneau one million grams. [1913-14]

Sec. 6. Yard is unit of length in imperial system.

In the imperial system the standard yard is the unit of measure of length and surface from which all other measures of extension, whether lineal, superficial or solid, are derived and ascertained. The yard contains 0.914402 meter. The yard is divided into three equal parts called feet, and each foot into twelve equal parts called inches. [1913-14]

Sec. 7. Gallon is standard of capacity in American system.

In the American system the standard gallon is the unit of standard measure of capacity for liquids from which all other measures of liquids are derived and ascertained. The gallon is equal to 3.78543 liters. The American gallon is divided into four equal parts called quarts, each quart into two equal parts called pints, and each pint into four equal parts called gills. [1913-14; last amended 1917.]

Sec. 8. Pound is unit of weight in imperial system; hundred-weight; ton.

In the imperial system the unit or standard of weight, from which all other weights are derived and ascertained, is the imperial pound, equal to

0.45359 kilograms. The imperial pound is divided into sixteen equal parts called ounces; the hundredweight consists of one hundred pounds, the short ton of twenty hundred pounds, and the gross or long ton of 2240 pounds. [1913-14]

Sec. 9. Official standards.

A full set of said weights and measures shall be kept in the office of the Bureau of Weights and Measures of the Public Service Commission, as the official standards for the tests required by the enforcement of this Act [Secs. 1-25]. [1913-14; last amended 1913.]

Sec. 10. Public service commission to enforce act; rules and regulations; testing and sealing of apparatus; condemnation and seizure.

The Public Service Commission shall be charged with the duty of enforcing this Act [Secs. 1-25]. Any agent authorized by the Public Service Commission shall forthwith seize any weight, measure, scale, beam, steelyard, or other instrument, apparatus, or appliance used, or adapted for use, in ascertaining weights or measures in any industrial, commercial, or agricultural transaction which at any time is found not to have been sealed, or which registers, indicates, or shows a false or short weight or measure; and shall file a complaint in a court of competent jurisdiction against the owner or user thereof and against all other persons guilty of any violation of this Act or regulations hereunder bearing on the matter. The apparatus for weighing or measuring, or any article or articles, which it may have been necessary to seize in order to use it as evidence shall, after the conviction of the person or persons complained of, be forfeited to The People of Puerto Rico and shall be disposed of as directed by the Public Service Commission. [1913-14; last amended 1943.]

Sec. 11. Testing and sealing upon request.

[1913-14; last amended 1943.]

Sec. 12. Use of unsealed apparatus prohibited; exception.

From and after August 1, 1936, no weight, measure, scale, beam, steelyard, or other instrument, apparatus, or appliance for ascertaining weight or measure, shall be used in any industrial, commercial, or agricultural transaction until the same has been inspected, tested, and sealed, or otherwise marked as provided in this Act [Secs. 1-25]; Provided, That if the marking or sealing of any such instrument, apparatus, or appliance is not practicable or would be injurious or destructive thereto, such marking or sealing may be omitted and the approval thereof indicated in such manner as shall be prescribed by the regulation provided for in this Act. [1913-14; last amended 1936.]

Sec. 13. Apparatus to be exhibited to authorized person when asked for; testing and sealing.

It shall be the duty of every person, when called upon, to exhibit to any authorized person all weights, measures, scales, beams, balances, steelyards, or other instruments, apparatus, or appliances used, or intended to be used, or adapted for use, in ascertaining weight or measure in any industrial, commercial, or agricultural transaction, and to permit the said person to examine, test, regulate, and seal or mark the same. [1913-14; last amended 1936.]

Sec. 14. Apparatus not conforming to standards prohibited.

It shall be the duty of the commissioner of agriculture or his duly authorized representatives to inspect as often as practical all weights, scales, beams, measures of any kind, instruments or mechanical devices for weighing or measuring, and tools, appliances and accessories connected with any or all such instruments or measures used in trade in this State. his best judgment are susceptible of repair, shall serve a written order upon the person or persons, firms or corporations in whose possession the inaccurate device is found forbidding the use of such device, and shall attach thereto a seal, tag or statement stating the device is condemned. Also, he shall lock the weighing or measuring device in such a manner that it cannot be used. The commissioner of agriculture, however, may in his discretion release the weighing or measuring device so condemned and annul the restraining order when the requirements of the provisions of this article [Secs. 6645-6661] have been complied with. The commission is hereby empowered and authorized to prescribe and issue such regulations as may be necessary for the proper enforcement of this article and any person or persons who shall violate any regulation issued by the commissioner shall be guilty of a violation of this article. The owners or users of any weights or measures or weighing or measuring devices which have been marked condemned, and upon whom an order has been served forbidding the use of such weighing device as in this section provided, may neither use or dispose of the same in any way, or remove or allow to be removed any seal, tag or statement attached thereto by a representative of the department of agriculture without the approval and consent of the commissioner. Any person, who by himself, or his employee, or as a proprietor or manager, shall refuse to exhibit any weight, measure or weighing or measuring device of any kind, or appliance or accessories connected with any or all such devices or measures which is in his possession or under his control, to the commissioner of agriculture or his duly authorized representatives, for the purpose of allowing the same to be inspected and examined as in this article [Secs. 6645-6661] provided, or who shall hinder or ob-

struct the inspector in the general performance of official duties shall be deemed a violation of this article. [1923; last amended 1941.]

Sec. 6654. Packaged commodities: Marking requirements.

[1923]

Sec. 6655. Same: Terms in which contents shall be stated; exceptions.

The designation of the quantity of the commodity required in section 6654 shall be in terms of weight, measure or numerical count, subject however to the following provisions: (a) the quantity of the contents so marked shall be the net amount of food or stuff or other commodity in the package or container. (b) If the designation is by weight it shall be in terms of avoirdupois pounds and ounces; if the designation is in liquid measure it shall be in terms of United States gallon of two hundred and thirty-one cubic inches and its customary subdivisions, i.e., in gallons, quarts, pints or fluid ounces.

(c) The quantity of solids shall be designated in terms of weight and of fluid in terms of measure, except in case of articles in respect to which there exists a definite trade custom; in such case the designation shall be in terms of weight, measure, or numerical count, in accordance with such custom.

(d) The quantity of the contents shall be designated in terms of weight or measure, unless the container marked by numerical count gives accurate information as to the quantity of the food or other commodity in the package. When the designation is by numerical count it shall be in English words or Arabic numerals.

(e) The quantity of the contents may be stated in terms of minimum count, but in such cases the designation must approximate the actual quantity and there shall be no tolerance below the minimum.

(f) The quantity of viscous or semi-solid foods, or of a mixture of solids and liquids, may be stated in terms of weights and measure. When products are packed in brine or other preserving fluids, the weight or measure of such brine or fluids shall not be included in the weight or measure of the edible or commodity indicated on the container.

The provisions of this article [Secs. 6645-6661] shall not apply:

(a) To any sale of any commodity within the provisions of this section when such sale is made from bulk and the quantity is weighed, measured or counted for the immediate purpose of such sale.

(b) To a sale of any container of an ornamental or symbolic character with which a quantity of some commodity is sold as merely incidental.

(c) To a sale of a commodity in any container of a net weight of two ounces or less, or of a commodity of any container of a measure two fluid ounces or less, or of a commodity of any container of a numerical count of six or less.

(d) To the sale of medicine when prescribed by licensed physician, veterinarian or dentist; or to medicinal or pharmaceutical preparations or mixtures of two or more medicinal substances. [1923]

Sec. 6656. Same: Exemptions of retailer who relies on package labels; provisions thereof.

It shall not be held to be a violation of the provisions of this article [Secs. 6645-6661] when a commodity in a container is sold, or offered or exposed for sale, and there is a discrepancy between the actual quantity of the commodity in said container and the net quantity of the contents thereof indicated on the container as herein prescribed: *provided*, that the seller purchased said commodity in said container in good faith, relying upon the said indication of the net contents thereof, and sold said commodity in said container without altering the contents thereof or the indication of the contents thereof: *and provided, further*, that the exemption of this section shall not apply to any sale unless the container held the name of a packer, manufacturer, wholesaler or jobber thereon at the time the seller purchased it. [1923]

Sec. 6657. "Person" defined.

The term of person used in this article [Secs. 6645-6661] shall include every person, firm, company, copartnership, society, association and corporation. [1923]

Sec. 6658. "Container" defined.

The term container used in this article [Secs. 6645-6661] is hereby defined to be any receptacle or carton into which a commodity is packed, or any wrappings with which any commodity is wrapped or put up for sale: *provided*, that where individual packages or containers, properly labeled to comply with this article are packed in an outside case or carton for convenience in shipping or handling, the term "container" shall not be construed to include or apply to such outside case or carton. No containers, boxes or baskets wherein food products or other commodities are packed shall have a false bottom, or be so constructed as to facilitate the perpetration of deception or fraud. [1923]

Sec. 6659. Selling less than quantity represented; prima facie evidence; violation.

Any person who by himself or by his servant or agent, or as the servant or agent of another, shall offer or expose for sale, sell for use, any commodity,

package, article or thing less than the quantity he represents, then such commodity, package, article or thing shall be prima facie evidence of the fact that it was intended to be sold, or proof of such shall be deemed a violation of this article. [Secs. 6645-6661]. [1923]

Sec. 6660. Penalties for violations.

Weighing of Cotton—Continued.

Secs. 6407-1 thru 6456. Same: Specific legislation.

[ED. NOTE.—These sections provide for the election of weighers of cotton, their term of office, fees, etc., making specific provisions for the individual counties and cities. The pertinent sections are omitted as they are not general law, but relate to a particular locality.] [1894; last amended 1948.]

Sec. 6458. Regulation of cotton weighing in cities over 20,000 and less than 50,000: Platforms; weighers; penalties for violations; enforcement.

(1) In every city of more than twenty thousand and less than fifty thousand inhabitants, as shown by the last preceding United States census, and within the township in which such city is situated, the purchase and sale of cotton in bales shall be regulated by the provisions of this sub-section. The county board of commissioners shall cause to be maintained a public cotton platform adequate to hold not less than three thousand (3,000) bales of cotton, said platform to have a substantial roof, sufficient number of suitable scales, and to be located as accessibly as possible to the railroad, or railroads, and to the neighboring cotton warehouse, or warehouses, and compresses, if any, for the convenient handling of cotton from said platform to freight trains and to such cotton warehouses or compresses, said platform to be open and accessible to wagons, the cost of maintenance of the same to be paid by the county board of commissioners out of funds in their hands. The said county board of commissioners shall, on or before the first day of July, 1911, and every four years thereafter, elect and commission for the term of four years one cotton weigher for such city and township: *provided*, that said cotton weigher shall not be related within the sixth degree to any member of said board of county commissioners. Such cotton weigher, before receiving his commission, shall take and subscribe to the oath of office and enter into a bond with an approved surety company as surety, in the sum of one thousand dollars for the faithful performance of his duties, payable to the county board of commissioners for the use of any party who may be aggrieved, said bond to be approved by said board and filed with the clerk of court, the premiums on said bond to be paid by said board. Said cotton weigher shall have a night watchman on duty at said platform from sunset to sunrise of every day, and shall employ one assistant for every day from September 1st to December 31st, and may have other assistants during the year. He shall frequently test the scales at said platform and keep them accurate, and shall weigh promptly and fairly all cotton offered to him and mark each bale of cotton as indicated by tag

of buyer and number of each bale of cotton and keep together all the cotton of the several buyers separate and apart from each other, so as to facilitate prompt shipment, and issue ticket showing number, mark and weight of every bale weighed by him, and adjust any differences between sellers and buyers as to moisture and mixed or false packing. Said cotton weigher shall represent neither buyer nor seller of the cotton weighed nor be interested in any purchase or sale, except in cotton from his own farm, and shall receive and charge for his services and the use of the platform, fifteen cents for each bale weighed by him, seven cents to be paid by the seller and eight cents to be paid by the buyer, and for such cotton as may remain on the platform for more than three days the said weigher shall collect an additional charge of one cent per bale for every additional day, to be paid by the owner, all cotton to be at the risk of the weigher, loss by fire excepted, for the first three days, and thereafter at the risk of the owner. The said cotton weigher shall, during the cotton season, maintain a blanket insurance to cover at least fifty bales of cotton left upon the platform for sale, and shall compensate himself for the cost of such insurance by deducting the amount thereof from the charge hereinafter provided to be collected for the use of the platform by cotton remaining thereon more than three days. The public cotton weigher, herein provided for, shall appoint a deputy to serve in his place during necessary absence by sickness or otherwise, such appointment to be approved by the board of county commissioners, which deputy shall take the usual oath of office, the bond of the cotton weigher being liable for the official acts of such deputy. The public cotton weigher shall weigh, inspect and sample before sale every bale of cotton brought to said platform for sale, and no cotton shall be sold until after it has been so weighed and inspected. All cotton in bales weighed in such city or township for sale therein and purchased in such city or township at weights ascertained by weighing in such city or township (it being intended hereby not to include under the terms herein cotton bought upon weights stated in bills of lading of shipments to said city or town) shall be brought to said platform for sale, and no cotton in bales shall be sold or purchased in such city, town or township, by any seller or purchaser or agent, except upon certificate that it has been weighed and inspected at such platform by the public cotton weigher or deputy: *provided*, that the provisions of this sub-section shall not apply to cotton sold by regular cotton dealers out of recognized cotton warehouses or cotton compresses in such city, town or township, or to cotton weighed upon plantations or at ginhouses or bought upon the faith of weights

guaranteed by the sellers. The said cotton weigher shall render to the county board of commissioners a monthly statement of the cotton weighed by him, and shall pay to said board as compensation for the use of the platform and equipment, after deducting the cost of maintaining the blanket insurance to cover, during the cotton season, at least fifty bales of cotton left upon the platform for sale, as hereinabove provided for, one cent per bale for all cotton weighed on said platform and one-half the amount collected for cotton remaining on the platform more than three days. All other moneys received by virtue of the charges herein provided for shall be retained by the cotton weigher for his compensation and expenses. The county board of commissioners shall have power to remove from his office the said cotton weigher after at least three days' notice why he should not be removed, and on sufficient cause being shown, and said board shall fill any vacancy in the manner hereinabove provided for the election of a cotton weigher.

(2) Any and every person, for himself or as agent, and any corporation who shall sell or buy in such city or township any cotton bale or bales contrary to the provisions of sub-section 1, shall be guilty of a misdemeanor, and, upon conviction, shall be punished by a fine of not exceeding fifty dollars, or imprisonment for not exceeding ten days for each offense.

(3) It shall be the special duty of the sheriff, the rural policeman, if any, and the magistrates' constables in the county in which such city may be situate, and of the city policemen, to be on the lookout for violations of the provisions of this section, and upon information or belief to swear out warrants and cause prosecutions for the same; and it shall likewise be the duty of the solicitor and of the city attorney to prosecute in such cases. Code of 1939, Vol. 3, Title 63, Ch. 63.01—Weights and Measures, State Sealer.

Sec. 63.0101.¹ Secretary of agriculture as sealer of weights and measures; deputies; power to arrest, etc.; reports.

The Secretary of Agriculture is hereby made ex officio inspector and scaler of weights and measures and is hereby charged with the duty of carrying into force and effect the provisions of this title, [Secs. 63.0101–63.0704], except as provided in chapter 63.03.

The deputies, assistants, and inspectors, appointed for the purpose or intrusted with such duties by the Secretary of Agriculture, shall have the same powers and duties as are provided for such Secretary when acting in performance of duties assigned to them by him under the provisions of this title.

The Secretary of Agriculture, his deputy, assistants, and inspectors are hereby made special policemen, and are authorized and empowered to arrest any violator of the statutes in relation to weights and measures, to enter complaint before any court of competent jurisdiction, and to seize and use as evidence, without formal warrant, any false or unsealed weight, measure, or weighing or measuring device or package or amount of commodities found to be used, retained, or offered or exposed for sale or sold in violation of law.

The Secretary of Agriculture jointly with the State Chemist shall have authority to make, and shall issue from time to time, regulations for the enforcement of the provisions of this title. Such regulations may include specifications and tolerances for all weights, measures and weighing and measuring devices of the character of those specified in Section 63.0103 of this title, which shall be designed to eliminate from use, without prejudice to apparatus which conforms as closely as practicable to the official standards, those which are not accurate, which are of such construction that they are not reasonably permanent in their adjustment or which will not repeat their indications correctly or which facilitate the perpetration of fraud. Such specifications and tolerances shall be in conformity with the code of specifications, tolerances and regulations for commercial weighing and measuring devices issued and recommended by the National Bureau of Standards of the United States Department of Commerce and in effect on the effective date of this Act. For the purposes of this Act any weight, measure, or weighing or measuring device shall be deemed to be correct when it conforms to

all applicable requirements promulgated as specified in this section, and other apparatus shall be deemed to be incorrect.

The Secretary of Agriculture may from time to time, make, and he is hereby authorized to make reports, in printed bulletins, of the work undertaken and accomplished under this title, together with other information relative to weights and measures as may be deemed suitable. [1919; last amended 1949.]

¹ See Ch. 63.99, pages 935–937; penal provisions for violation of chapter.

Sec. 63.0102. Supervision of weights and measures; state institution inspection; state university cooperation.

Except as provided in chapter 63.03, the Secretary of Agriculture shall have and keep a general supervision of the weights, measures, and weighing or measuring devices offered for sale, sold, or in use in the state. He, or his assistants at his direction, shall at least once annually test all scales, weights, and measures used in checking the receipts and disbursements of supplies in every institution for the maintenance of which moneys are appropriated by the Legislature, and he shall report in writing his findings to the supervisory board and to the executive officer of the institution concerned, and, at the request of such board or executive officer, he shall appoint in writing one or more employees then in the actual service of the institution who shall act as special deputies for the purpose of checking the receipts or disbursements of supplies.

It is hereby made the duty of the Department of Physics of the State University of South Dakota, upon request of the Secretary of Agriculture, to assist him or his assistants in all such matters as may require the facilities of the laboratory of that department or technical knowledge relating to physical measurements. [1919; last amended 1925.]

Sec. 63.0103. Duty of inspection and testing; packaged commodities; right of entry; duty to prosecute.

When not otherwise provided for by law the Secretary of Agriculture shall have the power, and it shall be his duty to inspect, test, try, and ascertain if they are correct, all weights, measures, and weighing and measuring devices kept, offered, or exposed for sale, sold or used or employed by any proprietor, agent, lessee, or employee in proving or ascertaining the size, quantity, extent, area, or measurement of quantities, things, produce, or articles of distribution or consumption purchased or offered or submitted by such person or persons for sale, hire, or award.

He shall have the power to, and shall, from time to time, weigh or measure and inspect packages or amounts of commodities of whatsoever kind kept for the purpose of sale, offered or exposed for sale, sold, or in the process of delivery, in order to determine whether the same contain the amounts rep-

He may for the purposes above mentioned, and in the general performance of his official duties, enter and go into or upon, without formal warrant, any stand, place, building, or premises, or stop any vender, peddler, junk dealer, coal wagon, ice wagon, delivery wagon, or any dealer whatsoever, and require him, if necessary, to proceed to some place which the Secretary of Agriculture may specify, for the purpose of making proper tests.

Whenever the Secretary of Agriculture finds a violation of the statutes relating to weights and measures, he shall cause the violator to be prosecuted. [1919; last amended 1925.]

Sec. 63.0104. Sealing after inspection.

Whenever the Secretary of Agriculture compares weights, measures, or weighing or measuring devices and finds that they correspond or causes them to correspond with the standards in his possession, or subject to his use, he shall seal or mark such weights, measures, or weighing or measuring devices with appropriate seals or marks. [1919; last amended 1925.]

Sec. 63.0105. Faulty devices: Condemnation for repairs or confiscation.

The Secretary of Agriculture shall condemn and seize and may destroy incorrect weights, measures, or weighing or measuring devices which in his best judgment are not susceptible to satisfactory repair; but such as are incorrect and yet may be repaired, he shall mark or tag as "Condemned for repairs." The owners or users of any weights, measures, or weighing or measuring devices of which such disposition is made shall have the same repaired or corrected within sixty days, and they may neither use nor dispose of the same in any way, nor remove or deface any such "Condemned for repairs" tag or other mark or tag affixed by the Secretary of Agriculture until they shall have received from the Secretary of Agriculture written permission to do so. Any weights, measures, or weighing or measuring devices which have been "Condemned for repairs", and have not been repaired as required above, shall be confiscated by the Secretary of Agriculture. [1919; last amended 1925.]

Sec. 63.0106. Inspection upon complaint.

Whenever complaint shall be made to the Secretary of Agriculture that any false or incorrect scales, weights, or measures are being made use of by any person, firm, or corporation in the purchase or sale of merchandise or other commodities or in weighing any article or commodity, the piece price for which is determined by weight or measure, it shall be his duty to cause the same to be inspected

as soon as the duties of his office will permit, and he shall make such other inspections of the weights and measures as in his judgment is necessary or proper to be made, except where inspection is provided for by chapter 63.03. [1919; last amended 1925.]

Sec. 63.0107. Prosecution.

The state's attorney of each county in the state is hereby authorized and required upon complaint on oath of the Secretary of Agriculture or other person to prosecute before any court of competent jurisdiction in the name of the state of South Dakota proper action or proceeding against any person or persons violating the provisions of this title [Secs. 63.0101–63.0704]. [1919; last amended 1925.]

Sec. 63.0201. State standards; custody; testing and sealing of office and working standards.

The weights and measures received from the United States under a Resolution of Congress approved June 14, 1836, and such new weights and measures as shall be received from the United States as standard weights and measures in addition thereto or in renewal thereof, and such as shall be supplied by the state in conformity therewith and certified to by the National Bureau of Standards, shall be the state standards of weights and measures.

Nothing in this title [Secs. 63.0101–63.0704] shall prohibit the use of standard metric measures.

The State Chemist shall take charge of the standards adopted by this title as the standards of the state, and cause them to be kept in a fireproof building belonging to the state and from which they shall not be removed except for repairs or for certification, and he shall take all other necessary precautions for their safe-keeping. He shall maintain the state standards in good order and shall submit them at least once in ten years to the National Bureau of Standards for certification. He shall keep a complete record of the standards, balances, and other apparatus belonging to the state, and take receipt for same from his successor in office. Such standards shall be used only for testing any duplicate standards that may be required in the enforcement of this title.

In addition to the state standards of weights and measures provided for by law, there shall be supplied by the state at least one complete set of duplicate standards, to be kept at all times in the office of the State Chemist and to be known as the office standards; and such other weights, measures, and apparatus as may be found necessary to carry out the provisions of this title, to be known as working standards. Such weights, measures, and apparatus shall be verified by the State Chemist or his assistants at his direction, upon their initial receipt and

at least once in each year thereafter, the office standards by direct comparison with the state standards, the working standards by comparison with the office standards. When found accurate upon these tests the office and working standards shall be sealed by stamping on them the letters "S. D." and the last two figures of the year with seals which the State Chemist shall have and keep for that purpose. The office standards shall be used in making all comparisons of weights and measures and weighing and measuring devices submitted for test in the office of the Secretary of Agriculture or State Chemist. [1919; last amended 1925.]

Sec. 63.0202. State chemist to act as technical adviser.

The State Chemist shall act as technical adviser and assistant on all matters relating to the state standards of weight and measure, inspections, examinations, comparisons, and related subjects for the Secretary of Agriculture, his deputy, assistants, and inspectors, and whenever called upon to do so by the Public Utilities Commission. The equipment and facilities of the State Chemical Laboratory shall be available at all times for all such comparisons, inspections, analyses, and technical services as may be necessary for assistance of the officers and agents of the state vested with duties of inspection and enforcement of the statutes relating to weights and measures. Farm scales shall be inspected only at the request of the owner.

The Public Utilities Commission shall have authority and it shall be its duty to prescribe and enforce reasonable rules and regulations for the weighing of cars of freight offered for shipment in carload lots and livestock at stockyards scales, and of hay, grain, wood, coal, and like subjects of commerce in this state. The commission shall also make and publish reasonable rules and regulations for the installation, including specifications therefor, inspection, testing, and repairing of such scales under its jurisdiction as to it may seem necessary and desirable and not inconsistent with the laws of this state, specifying among other things the extent and nature of such scale repairs or correc-

tions as will in its judgment be practicable for its inspectors to make.

The jurisdiction of the Public Utilities Commission over the scales hereinbefore designated shall be exclusive and such inspection shall be made only by and under the direction of the Public Utilities Commission. [1937; last amended 1949.]

Sec. 63.0302. Inspectors.

The Public Utilities Commission of this state is hereby authorized and empowered to appoint suitable and competent inspectors to aid the said Commission in making such inspections and repairs, such appointments to be made for such time as the Commission shall designate. Each person so appointed shall qualify by taking an oath of office and giving a bond to the state in the sum of one thousand dollars conditioned for the faithful performance of his duties.

He shall receive a salary to be fixed by the commission and his necessary traveling expenses during the period of his employment, necessarily and actually incurred in the performance of his duties, the said salary and expenses to be paid upon vouchers itemized and accompanied by receipts as provided by law, to be approved by the Public Utilities Commission.

Such inspectors shall report to the Public Utilities Commission at such time or times and in such manner as the said Commission may require. [1937; last amended 1945.]

Sec. 63.0303. Public utilities commission may acquire standards.

The Public Utilities Commission is authorized to provide itself with such standard weights and measures and such additional facilities and equipment including motor vehicles or other means of conveyance as in the judgment of the Commission may be necessary and suitable in carrying on the work of inspecting, testing, repairing, and correcting scales and performing generally the duties entailed upon it by this chapter [Secs. 63.0301—63.0305]. [1937]

Sec. 63.0304.¹ Inspection; sealing; condemning; right of entry.

The Commission or any one or more members thereof or any agent, employee, or scale inspector of the Commission may at any time, without notice, enter any place maintaining a scale subject to the provisions of this chapter and test and seal all weighing scales and measures used in conducting such business. If the person making such inspection shall find any scales in use in such place inaccurate, he shall condemn the same and attach thereto a card, notice, or other device, indicating that the scales are condemned. It shall thereafter be unlawful for any person to remove, deface, or destroy such card, notice, or other device placed upon condemned scales, or to use again, or permit the use of such scales for any purpose, until the

Code of 1939, Vol. 3, Title 63, Ch. 63.03—Weights and Measures, Public Utilities Commission—Continued.

same shall have been repaired, retested, and found to be correct, and until the Public Utilities Commission, or the person making the inspection, shall consent to the further use of such scales.

If such scales are found to be incorrect and are condemned, upon the request of the owner of such scales or the person in charge of the same, it shall be the duty of the scale inspector or other person inspecting the same, with such competent assistance to be furnished by the owner of such scales or the person in charge of the same as may, in the judgment of said inspector or other person inspecting such scales, be necessary, to repair the same immediately. If the securing of necessary parts for the repair of such scales will occasion delay, such inspector or person inspecting the same shall perform the work of making such repairs with assistance to be furnished as aforesaid, as promptly as possible. The owner or person in charge of the scale being repaired shall furnish all materials needed in making the repairs.

Whenever directed so to do by the Commission, any common carrier or shipper or other person owning or operating a scale under the jurisdiction of the Public Utilities Commission, shall equip such scale with any sealing device considered by the Commission to be a proper and safe device to be used in sealing of scales. [1937]

Sec. 63.0305. Fees for testing; charges for repair work.

Such schedule of fees is hereby fixed as follows:

to the fee fixed in the foregoing schedule, based upon the number of man-hours of labor required for putting the scale in serviceable condition. The wage per hour shall be fixed by the Commission. Such charge shall be collected and paid as herein prescribed for scheduled rates.

All fees, repair charges, and funds of any kind collected under the provisions of this chapter shall be by the Public Utilities Commission deposited with the State Treasurer and by him credited to the General Fund. [1937; last amended 1919.]

Sec. 52.0938. Supervision; testing.

Jurisdiction and authority shall be vested in the Public Utilities Commission to require the construction of track scales and to test and correct the same from time to time and to regulate the maintenance and operation thereof.

No such track scale shall be constructed in such a way as to in any manner interfere with the opera-

tion by the railroad company of its line of railway, and no scale shall be constructed of a size which will not permit of the weighing of an entirely detached car of a capacity of not to exceed one hundred thousand pounds. [1915]

Sec. 52.0939. Private operation; procedure to procure.

Whenever any person engaged in business on the right of way or loading tracks of any station of any railroad company doing business in this state desires to construct, maintain, and operate, at his own cost and expense, a track scale for the weighing of inbound and outbound shipments of freight in carload lots, such person shall first file in the office of the Public Utilities Commission a petition setting forth in substance:

(1) The name, place of residence, business, and place of business of such petitioner;

(2) The name of the station at which such track scale is desired to be constructed and operated;

(3) The name of the railway on whose right of way it is desired that such track scale shall be constructed and operated;

(4) The reasons, stated briefly, why it is desired to construct such track scale;

(5) The place where such scale is desired to be constructed;

(6) That the petitioner is ready, able, and willing, and agrees to assume and pay all expenses in any wise incurred in the construction of such track scale and in the grading or building of any spur or side track or right of way, and all expense in connection with the complete construction of such track scale, including any necessary changes in track, grade, or right of way.

Upon the filing of such petition the Commission shall fix a time and place for hearing the petition and give at least thirty days notice thereof to the railroad company and to the petitioner interested. If, after such hearing, the Commission shall determine that there is a sufficient public demand and public necessity for the construction of such track scale, it shall, at the expense of the petitioner, procure complete plans and specifications for the construction of such track scale, and of any spur or side track, and any changes in the track or grade which may be necessary to properly install such track scale, including an estimate of the actual expenses necessarily to be incurred in completing the construction of the scale and equipping it so as to put it into operation, as well as the cost of any spur or side track and any changes in the track or grade which may be necessary to install such track scale, and shall serve a copy of such plans and specifications and estimate upon the petitioner and the railroad company interested. Upon the service of such plans and specifications and estimate, it shall be the duty of the petitioner

to pay over to the Public Utilities Commission the amount of money set down as the estimated cost and expense of constructing such track scale, and any spur or side track and any changes in the track or grade necessary for the proper installation of such track scale, and thereupon it shall be the duty of the Public Utilities Commission to cause such track scale and spur or side track to be constructed in accordance with the plans and specifications and estimate provided therefor, and after such track scale is fully completed to serve notice to that effect upon the petitioner and the railroad company interested, and set a time and place for hearing any objections to the acceptance of the track scale as constructed. The Public Utilities Commission shall have authority to determine whether such scale has been substantially constructed according to the plans and specifications and is suitable to the requirements of the shippers at that station, and upon arriving at such determination shall pay over the cost of construction thereof to the person who constructed the same. The petitioner shall make good any deficiency between the estimated and actual cost of construction within thirty days from the acceptance of such scale. And provided further, that this Section shall not be construed to apply to those commodities in package form, the manner of sale of which is specifically regulated by the provisions of other Articles of the Statutes, or to bales of cotton; and that reasonable rules and regulations for the efficient enforcement of this Act, not inconsistent herewith, and including the reasonable variations or tolerances and the exemptions prescribed herein, shall be made by the Commissioner.

(3) *"In package form" defined.*—The words "in package form" as used in this Chapter, shall be construed to include a commodity in package, carton, case, can, box, bag, barrel, bottle, phial, or on a spool or similar holder, or in a container or band, or in a roll, ball, coil, skein, or other receptacle, or in coverings or wrappings of any kind, put up by the manufacturer, or when put up prior to the order of the commodity, by the vendor, which may

The words "in package form" shall be construed to include both the wholesale and the retail package. Provided, however, that a box or carton used for shipping purposes containing a number of packages which are individually marked, as hereinbefore provided, will not be required to bear the weight or measure of the contents thereof, nor the name and place of business of the manufacturer, packer, or distributor. And provided further, that the words "in package form" shall not be construed to include paper stationery in tablet form.

Sec. D. Standards for sale of milk.—It shall be unlawful for any person to keep for the purpose of sale, offer or expose for sale, or sell, any milk or cream in bottles or other containers of any capacity other than those provided for measures of capacity for liquid in Article 5732¹, Chapter 7, Title 93, of the Revised Civil Statutes of Texas of 1925, to wit, the gallon, a multiple of the gallon, one-half gallon, quart, pint, one-half pint, and gill.

Ch. 2—"Motor Fuel Tax Law."

Art. 7065b-19. Comptroller authorized to measure containers; rules and regulations; design of vehicle tanks; testing and measuring of tanks; exemptions; violations.

(a) For the purpose of enforcing the collection of the tax levied by this Article [Articles 7065b-1-7065b-29], and to enable the Comptroller to ascertain whether or not the tax has been paid or accounted for on all motor fuel and other products which can be used as motor fuel, which may be transported in this State, the said Comptroller and his authorized representatives are hereby vested with the power and authority to measure, calibrate and determine the capacity in gallons of any vehicle tank or other container in which motor fuel, blending materials, liquefied gases and liquid fuels are transported. The Comptroller is hereby given the power and authority to promulgate and enforce any rules and regulations, which he may deem necessary to the best enforcement of the provisions of this section [Article 7065b-19].

All vehicle tanks, and all devices designed to be attached thereto and used in connection therewith, and all other containers in which any of the foregoing products are transported, shall be of such design and construction that they do not facilitate the perpetration of fraud. Each compartment of said vehicle tank or other container shall be conspicuously marked on, or immediately under, the dome thereof with a designating figure, or letter and the capacity of said compartment and each delivery faucet shall be marked with the capacity

and a corresponding figure or letter to indicate the compartment of which it is the outlet. In addition, the total capacity of all compartments of each vehicle tank shall be conspicuously marked in letters of not less than two (2) inches in height on the rear of each such vehicle tank. The Comptroller's test or certificate number shall also be printed on the rear of each vehicle tank. When a motor vehicle carrying a vehicle tank is equipped with side tanks or other auxiliary tanks or compartments, such additional tanks and compartments shall comply with all of the specifications applicable to vehicle tanks. No vehicle shall transport motor fuel upon the public highways of this State with connection from any cargo tank or container to the carburetor for the purpose of withdrawing motor fuel from said cargo tank or container, and fuel tanks, including auxiliary fuel tanks shall be separate and apart from the cargo tank, with no connection by pipe, tube, valve or otherwise. It shall be a violation of this Article to sell or distribute motor fuel from any fuel tank or auxiliary fuel tank connected with the carburetor of any motor vehicle or to withdraw said motor fuel from any such fuel tank or auxiliary fuel tank for the purpose of sale. The measurement certificate shall be carried with the vehicle tank for which it is issued and the Comptroller or his authorized representatives shall have the authority to impound and hold any truck, for a period not to exceed seventy-two (72) hours, until said certificate is produced. The owner of any vehicle tank or other container tested and measured may be required to pay a reasonable fee to any city or any person for the water used in the measurement of such tank or container.

If any vehicle tank or other container shall, after having been tested, become damaged, repaired or modified in any way which might affect the accuracy of measurement of its receipts and deliveries, it shall not again be used for the sale or transportation of motor fuel, blending materials, liquefied gases and liquid fuels until officially reinspected, and, if deemed necessary, retested and remeasured.

(b) From and after the effective date of this Article, and before using any vehicle tank or other containers in the transportation of motor fuel, blending materials, liquefied gases and liquid fuels, except in quantities of thirty (30) gallons or less in the fuel tank feeding the carburetor of the motor vehicle, every person shall have every such vehicle tank or other containers, subject to the provisions of this Section, tested, measured and calibrated by a representative of the Comptroller and shall obtain a measurement certificate from said Comptroller, showing the capacity of each such vehicle tank and other container. Provided, however, that the Comptroller may, at his discretion, accept any weights and measures certificate issued by the Division of Weights and Measures of

the Department of Agriculture, State of Texas, without retesting or remeasuring said vehicle tank or containers.

It is further provided that carriers-for-hire operating under valid permits or certificates of convenience and necessity issued by the Railroad Commission of the State of Texas, and not engaged in transporting motor fuel or other taxable petroleum products for the purpose of sale or distribution for sale, and persons operating motor buses under franchises or licenses issued by municipalities, shall not be required to produce for inspection or measurement or to have tested, measured and calibrated, any fuel tank with a capacity not exceeding one hundred (100) gallons, connected to and feeding the carburetor of any motor vehicle owned or operated by said carriers or said persons, when such fuel tank is used exclusively for furnishing fuel to propel the motor or engine of said motor vehicle, and none of the contents thereof is sold or transported for sale, distribution or delivery to any other person. Provided, however, that this exemption shall not apply to the fuel tank of any motor vehicle used to transport motor fuel or other taxable petroleum products for sale or distribution for sale.

All authorized representatives of the Comptroller shall have the power and authority to inspect, test, measure, or remeasure vehicle tanks and other containers used to transport motor fuel, blending materials, liquefied gases and other liquid fuels, or containers from which said products are sold, or to correct, condemn or mark "out of order" any such vehicle tanks or containers which may be so constructed as to prevent accurate measurement or which are not constructed in conformity with the provisions of this Act or the rules and regulations promulgated hereunder.

(c) Whoever shall remove, obliterate, or change any measurement certificate, tag, marking, or device made by any authorized representative of the Comptroller, or placed upon any vehicle tank or other container, or shall refuse or neglect to produce for inspection and measurement, at the time and place fixed by the Comptroller, not to exceed one hundred (100) miles from the point which is the customary base of operations of such truck, any vehicle tank or other container in his possession or under his control, or shall transport such products in any vehicle tank or other container which has been condemned or tagged "out of order" by any authorized representative of the Comptroller, or whoever shall fail to comply with any provision of this Section or any reasonable rule and regulation promulgated under the provisions of said Section, or shall violate the same, shall be guilty of a misdemeanor, and upon conviction, shall be punished by a fine of not less than Twenty-five Dollars (\$25) nor more than Two Hundred Dollars (\$200). Ch. 1—Measurement of Water.

Art. 7538. Standard unit.

A cubic foot of water per second of time shall be the standard unit for the measurement of flowing water for the purpose of distributing water for beneficial uses. [1917]

Art. 7539. Same.

The Standard unit for volume of static water shall be the acre-foot. [1917]

Art. 7540. Cubic foot.

A cubic foot per second of time is the quantity of water that will pass through an area of one square foot in one second, when flowing at an average velocity of one foot per second. [1917]

Art. 7541. Acre foot.

An acre foot is the quantity of water required to cover one acre one foot deep. [1917]

General and Special Laws, 51st Legislature, Regular Session, 1949, Ch. 519—"Standard Gas Measurement Law."

Sec. 2. "Cubic foot of gas" defined.

The term "cubic foot of gas" or "Standard cubic foot of gas" means the volume of gas contained in one cubic foot of space at a standard pressure base and at a standard temperature base. The standard pressure base shall be 14.65 pounds per square inch absolute and the standard temperature base shall be 60 degrees Fahrenheit. Whenever the conditions of pressure and temperature differ from the above standard conversion of the volume from these conditions to the standard conditions shall be made in accordance with the Ideal Gas Laws¹, corrected for deviation. [1949]

¹ The reference here is to physical relations for an ideal gas, and specifically to those physical laws which relate volume to temperature and pressure (of gases) known as Boyle's Law, Charles' Law, and Dalton's Law.

Sec. 4a. Railroad commission: Duties.

It shall be the duty of the Railroad Commission of Texas and said Commission is hereby authorized, empowered and directed to determine the average temperature of gas, as produced in each oil and gas field in Texas, and to determine the other variable factors necessary to calculate the metered volumes in accordance with the Ideal Gas Laws¹ and the variable factors to correct for deviation from the Ideal Gas Laws¹ in each of the oil and gas fields in the State of Texas. Upon request of any interested party the Railroad Commission of Texas shall give notice and hold a public hearing before making such determinations. Promptly upon such determinations the Railroad Commission of Texas shall make and publish such findings and promulgate such reasonable field rules as may

be necessary to effectuate the provisions of this Act. [1949]

* * * * *

¹ See footnote to Sec. 2.

Sec. 5. Sale of gas.

Each and every sale, and each and every purchase, delivery and receipt of gas by volume hereafter made in this state by, for or on behalf of an oil and gas lease owner, royalty owner thereunder or other mineral interest owner, shall be made and such gas shall be measured, calculated, purchased, delivered and accounted for on the basis of "a standard cubic foot of gas" as defined in section 2, and as determined under this Act. Whenever the provisions of this Act operate to change the basis of measurement provided for in existing contracts, then the price for gas, including royalty gas, provided for in such contracts shall, if either the purchaser or seller so desires, be adjusted to compensate for the change in the method of measuring the volume of gas delivered thereunder. This provision is intended to protect parties to contracts now in existence, so that after this Act becomes effective the total amount of money paid for a volume of gas purchased, or required to be accounted for, under existing contracts shall remain unaffected by this Act.

If the foregoing provisions of this section 5, or any part thereof, shall be held by the courts to be unconstitutional or invalid then and in that event the remaining portions of this Act shall become ineffective and inoperative.

Nothing in this section shall affect or apply to purchases or sales made on any basis other than a volume basis.

Any person, association of persons, or corporation who, as purchaser thereof, shall knowingly fail or refuse to so measure, calculate or account for any such gas so purchased, shall be subject to a penalty of not less than Ten dollars (\$10) nor more than Five Hundred Dollars (\$500) for each offense recoverable in the name of the State in any District Court in Travis County, Texas, and each day of such violation shall constitute a separate offense. But it shall be a defense to any claim for such penalty that the Railroad Commission of Texas has not made and published the findings provided for in Section 4a, as to the particular field in question.

Nothing herein shall prevent an aggrieved party from maintaining a civil suit for damages in the county or counties in which the gas is produced. [1949]

Sec. 6. Saving clause.

Subject to the provisions in Section 5 hereof, if any part, Section, subsection, paragraph, sentence, clause, phrase, or word contained in this Act shall be held by the Courts to be unconstitutional or

invalid, such holding shall not affect the validity of the remaining portions of this Act, and the Legislature hereby declares that it would have been enacted, and does here now enact, such remaining portions despite any such invalidity. [1949]

Such weighing shall be done within a reasonable time after the arrival of the car at its destination. No charge shall be made to the consignee by such common carrier for such weighing. [1919]

Sec. 76-3-13. Weighman's certificate.

but at any time that either of the parties to the agreement becomes dissatisfied with the weighman, then by joint action they may dismiss him on ten days' notice or the miners may employ a checkweighman. [1940; last amended 1944.]

Sec. 4506. Definitions.

The words "weights," "measures" or "weighing or measuring devices" as used in this article [Secs. 4506–4542] shall be construed to include all weights, scales, beams, measures of every kind, instruments and mechanical devices for weighing or measuring, and any appliances and accessories connected with any or all such instruments.

The words "sell" or "sale" as used in this article shall be construed to include barter and exchange. [1915; last amended 1919.]

Sec. 4507. State standards.

The weights and measures received from the United States under a resolution of congress approved June fourteen, eighteen hundred and thirty-six, and such new weights and measures as have been or shall be received from the United States as standard weights and measures in addition thereto or in renewal thereof, and such as shall be supplied by the State in conformity therewith and certified by the national bureau of standards, shall be the state standards of weights and measures. Such state standards may be kept at the state university in its physical laboratory, or elsewhere at the discretion of the commissioner of weights and measures. [1915; last amended 1931.]

Sec. 4508. Office and working standards.

In addition to the state standards of weights and measures provided for in this article [Secs. 4506–4542], there shall be supplied by the State at least one complete set of copies of these standards, to be known as office standards; and such other weights, measures and apparatus as may be found necessary to carry out the provisions of this article, to be known as working standards. Such weights, measures and apparatus shall be verified by the state commissioner, or at his discretion by his deputy or inspectors, upon the initial receipt of such weights, measures and apparatus and at least once in each year thereafter, the

office standards by direct comparison with the state standards, the working standards by comparison with the office standards. When found accurate upon these tests the office and working standards shall be sealed by stamping on them the letters "W. V." and the last two figures of the year with seals which the state commissioner shall have and keep for that purpose. The office standards shall be used in making all comparisons of weights, measures and weighing and measuring devices submitted for test in the office of the commissioner, and the state standards shall be used only in verifying the office standards and for scientific purposes. [1915]

Sec. 4509. Commissioner of weights and measures; deputies and inspectors.

The state commissioner of labor shall be ex officio commissioner of weights and measures, and he shall be authorized to appoint such deputies and inspectors as may be required to carry out the provisions and purposes of this article [Secs. 4506–4542] within the limits of such appropriation as may be made by the legislature for the maintenance of the work of the department of labor. [1915; last amended 1937.]

Sec. 4510. Bond of commissioner.

The state commissioner of labor shall forthwith, on his appointment, give bond in the penal sum of five thousand dollars, for the faithful performance of the duties of his office as state commissioner of weights and measures, and for the safe keeping of the standards intrusted to his care and for the surrender thereof immediately to his successor in office or to the person appointed by the governor to receive them, which bond shall be approved as to form by the attorney general, and as to sufficiency by the governor. [1915; last amended 1931.]

Sec. 4511. Standards: Care; certification; reports; assistant commissioner.

The commissioner of weights and measures shall take charge of the standards adopted by this article [Secs. 4506–4542] as the standards of the State, and

cause them to be kept in a safe and suitable place, from which they shall not be removed except for repair or for certification, and he shall take all other necessary precautions for their safekeeping. He shall maintain the state standards in good order and shall submit them at least once in ten years to the national bureau of standards for certification. He shall keep a complete record of the standards, balances, and other apparatus belonging to the State and take a receipt for the same from his successor in office. He shall annually, on the first day of January, make to the governor a report of all work done by his office. The director of the physical laboratory of West Virginia University shall be the assistant commissioner of weights and measures. It shall be his duty, upon the request of the commissioner, to make or cause to be made at said physical laboratory all such tests, calibrations and determinations as may be necessary for the carrying out of this article. [1915]

Sec. 4512. Power of commissioner to administer oaths and compel testimony.

In the exercise of his powers and the performance of his duties under this article [Secs. 4506-4542], the commissioner of weights and measures shall have the power to administer oaths and issue subpoenas to compel the attendance of witnesses and the production of books, papers, accounts and documents. In case of failure on the part of any person to comply with any proper order of the commissioner, or any subpoena issued in behalf of the commissioner, or on the refusal of any witness to testify with reference to any matters upon which such witness may be lawfully interrogated, it shall be the duty of the circuit court of any circuit, upon application of the commissioner, to compel obedience by attachment proceedings for contempt as in the case of disobedience of the requirements of a subpoena issued from such court or a refusal to testify therein. [1915]

Sec. 4513. Inspection and sealing of weights and measures of county or city; inspecting work of local sealers.

The commissioner of weights and measures, or his assistant commissioner, deputy, or inspectors, at his direction, shall at least once in five years try and prove by the office standards all standard weights, measures and other apparatus which may belong to any county or city required to appoint a sealer and to purchase and keep standards of weights and measures by the provisions of this article, and shall seal such when found to be accurate by stamping on them the letters "W. V." and the last two figures of the year with seals which he shall have and keep for that purpose.

The state commissioner, or his assistant, deputy or inspectors, at his direction, shall inspect all standard weights, measures and other apparatus used by such counties and cities at least once in two years, and shall keep a record of the same. He, or his deputy, or inspectors, at his direction, shall at least once in two years visit these cities and counties for the pur-

pose and in order to inspect the work of the local sealers, and in the performance of such duties they may inspect the weights, measures, balances, or any other weighing or measuring appliances of any person, and shall have the same powers as the local sealer of weights and measures. [1915; last amended 1931.]

Sec. 4514. Supervision by commissioner; tests on request or at state institutions.

The state commissioner of weights and measures shall have and keep a general supervision of the weights and measures and weighing and measuring devices offered for sale, sold, or in use in the State. He, or his assistant commissioner, deputy, or inspectors, at his direction, shall, upon the written request of any citizen, firm or corporation, or educational institution in the State, test or calibrate weights, measures and weighing or measuring devices used as standards in the State. He, or his assistant commissioner, deputy, or inspectors, at his direction, shall at least once annually test all scales, weights and measures used in checking the receipts or disbursements of supplies in every institution for the maintenance of which moneys are appropriated by the legislature, and he shall report in writing his findings to the state board of control and to the executive officer of the institution concerned, and, at the request of such board or executive officer, the commissioner of weights and measures shall appoint, in writing, one or more employees then in the actual service of the institution who shall act as special deputies for the purpose of checking the receipts and disbursements of supplies. [1915]

Sec. 4515. Commissioner's duties.

The state commissioner shall have the power, and it shall be his duty, either personally or by deputy or through the agency of a county or city sealer of weights and measures, to inspect, test, try and ascertain if they are correct, all weights, measures, and weighing or measuring devices kept, offered or exposed for sale, sold or used or employed by any proprietor, agent, lessee, or employee in proving the size, quantity, extent, area, or measurement of quantities, things, produce, or articles for distribution or consumption purchased or offered or submitted by such person or persons for sale, hire or award; and he shall have the power to and shall from time to time weigh or measure and inspect packages or amounts of commodities of whatsoever kind kept for the purpose of sale, offered or exposed for sale, or sold or in the process of delivery, in order to determine whether the same contain the amounts represented, and whether they be offered for sale or sold in a manner in accordance with law. He shall at least twice a year, and as much oftener as he may deem necessary, see that all weights, measures and weighing or measuring devices are correct. He and his authorized deputies may, for the purpose above mentioned, and in the general performance

Code of 1943 Annotated, Ch. 47, Art. 1—Weights and Measures—Continued.

of their official duties, enter and go into or upon, without formal warrant, any stand, place, building, or premises, or stop any dealer whatsoever, and require him, if necessary, to proceed to some place which the state commissioner may specify, for the purpose of making the proper tests. Whenever the state commissioner finds a violation of the statutes relating to weights and measures, he shall cause the violator to be prosecuted. [1915]

Sec. 4516. Sealing.

Whenever the state commissioner compares weights, measures, or weighing or measuring instruments, and finds that they correspond, or causes them to correspond with the standards in his possession, he shall seal or mark such weights, measures, or weighing or measuring instruments with appropriate devices. [1915]

Sec. 4517. Condemnation.

The state commissioner shall condemn and seize incorrect weights, measures or weighing or measuring devices which, in his best judgment, are not susceptible of satisfactory repair; but such are incorrect, and yet may be repaired, he shall mark or tag as "condemned for repairs." The owner or user of any weight, measure, or weighing or measuring device of which such disposition is made, shall have the same repaired or corrected within ten days, and the owner or user may neither use nor dispose of the same in any way, but shall hold the same at the disposal of the commissioner. Any weights, measures, or weighing or measuring devices which have not been repaired as required above, shall be seized by the commissioner. Any weight, measure, or weighing or measuring device seized under the foregoing provisions of this section may be kept by the commissioner, or delivered by him to the prosecuting attorney of the county to be by him kept, for use as evidence in the prosecution of the owner or user thereof for violation of any of the provisions of this article [Secs. 4506-4542]. If the owner or user be convicted in such prosecution, and the court or justice find that such weight, measure, or weighing or measuring device was properly seized in compliance with the provisions of this section, the court of justice shall then order the same to be destroyed. If any such weight, measure, or weighing or measuring device be so seized and not kept for use as evidence as aforesaid, it shall be kept by the commissioner for a period of ten days, during which time the owner or user thereof may serve written notice upon the commissioner to the effect that he denies that the weight, measure, or weighing or measuring device was properly seized. Upon the service of such notice, the commissioner shall, not later than ten days thereafter, serve written notice upon such owner or user to the effect that at a specified hour on a specified

day, which day shall be not less than five nor more than thirty days from the day when such notice is served on the owner or user, application will be made to a justice of the peace, named in the notice, of the county in which such weight, measure, or weighing or measuring device was seized, for an order that the same be destroyed. Whereupon, the justice, at the time appointed in such notice, shall proceed to determine whether such seizure was properly made, and, in accord with his finding, shall order that the weight, measure, or weighing or measuring device be released or destroyed. From such order there may be an appeal to the circuit court of the county in the manner provided by law for appeals from judgments of justices in other cases. Pending any such appeal, the property seized shall remain in the custody of the commissioner. If it be adjudicated that the seizure was proper, the contestant shall be adjudged to pay all costs incurred before the justice and in the circuit court. If the propriety of the seizure be not contested as aforesaid, the property seized shall be destroyed by the commissioner [1915; last amended 1931.]

Sec. 4518. Deputies and inspectors; general duties.

The powers and duties given to and imposed upon the state commissioner of weights and measures by sections seven, ten, eleven and twelve (Secs. 4512, 4515, 4516, and 4517) are hereby given to and imposed upon his deputies and inspectors also, when acting under his instructions and at his direction [1915]

Sec. 4519. County sealers; deputies.

Except in counties where the county court shall appoint a sealer of weights and measures as herein after provided, the sheriff of the county shall be ex officio county sealer of weights and measures in his county. Whenever the county court of any county shall deem it necessary, it may appoint and fix the salary of one sealer and one or more deputy sealers of weights and measures. Such sealer or deputies when not appointed merely for some temporary purpose, shall hold office for a term of four years from the date of their appointment, unless removed for just cause, and all deputies shall have the same power and may perform the same duties as the county sealer when acting under his instructions and at his direction. No fee shall be charged by the county sealer or his deputy or by the county for inspecting, testing, sealing, repairing or adjusting weights, measures, or measuring devices. [1915; last amended 1931.]

Sec. 4520. City sealers; deputies; regulation.

There may be a city sealer of weights and measures in cities of not less than twenty-five thousand population, according to the latest official statement of United States census, to be appointed by the mayor from a list to be furnished by the civil service board and under the rules of such board, where such board

exists; otherwise, to be appointed by the mayor, by and with the advice and consent of the common council. He shall hold office for a term of two years, unless removed for just cause, and receive a salary to be determined by the appointive power. There may in like manner be appointed for any such city one or more deputy sealers of weights and measures. All deputies appointed shall have the same power and perform the same duties as the city sealer when acting under his instructions and his direction. No fee shall be charged by the city sealer or his deputy or by the city for testing, trying, adjusting or repairing any weights or measures, or weighing and measuring device. [1915; last amended 1931.]

Sec. 4521. Combined territory for one set of standards and one sealer.

Nothing in sections fourteen and fifteen (Secs. 4519, 4520) of this article [Secs. 4506-4542] shall be construed to prevent two or more counties, or a county and any city therein, from combining the whole or any part of their districts, as may be agreed upon by the county courts of the counties, or such county court and the mayor and common council of the city, and employing one set of standards and one sealer, upon the written consent of the state commissioner of weights and measures. A county sealer or city sealer appointed in pursuance of an agreement for such combination shall, subject to the terms of his appointment, have the same authority, jurisdiction, and duties as if he had been appointed by each of the authorities who are parties to the agreement. [1915]

Sec. 4522. County and city sealer; bond.

Each county or city sealer or deputy sealer of weights and measures appointed under the provisions of sections fourteen, fifteen, or sixteen (Secs. 4519, 4520, 4521) of this article [Secs. 4506-4542] shall forthwith upon his appointment give bond in the penal sum of one thousand dollars, with sureties to be approved by the appointing power, for the faithful performance of the duties of his office. [1915; last amended 1919.]

Sec. 4523. Procurement and certification of county and city standards.

The county court of each county and the common council of each city required to appoint a sealer under the provisions of this article [Secs. 4506-4542] shall procure at the expense of the county or city, and shall keep at all times, a set of weights and measures and other apparatus as complete and of such material and construction as the state commissioner of weights and measures may direct. All such weights, measures, and other apparatus, having been tried and accurately proved by the state commissioner, shall be sealed and certified by him as hereinbefore provided, and shall then be deposited with and preserved by the county or city sealer as public standards for such county or city. Whenever the

county court of such county or the common council of such city shall neglect for six months so to do, the county clerk of such county, or the city clerk or recorder of such city on notification and request by the commissioner of weights and measures, shall provide such standards and cause the same to be tried, sealed and deposited at the expense of the county or city. [1915]

Sec. 4524. County and city sealers: Powers; duties; rules and regulations.

Where not otherwise provided by law, the county or city sealer shall have the same powers and shall perform the same duties within his county or city as are granted to and imposed upon the state commissioner of weights and measures in sections ten, eleven and twelve (Secs. 4515, 4516, 4517) of this article [Secs. 4506-4542]. The rules and regulations for the guidance of county and city sealers of weights and measures issued by the bureau of weights and measures of Washington, D. C., known as circular No. two, or any subsequent rules and regulations issued by such bureau of weights and measures, shall be the rules and regulations governing the inspectors and county and city sealers in the performance of their duties. And the commissioner shall issue from time to time such additional regulations, not inconsistent with those issued by authority of the federal government, as he may deem necessary for the guidance of the county and city sealers. [1915; last amended 1931.]

Sec. 4525. Same: Records; reports.

The county or city sealer shall keep a complete record of all his official acts, and shall submit monthly reports, and shall make an annual report duly sworn to on the first day of July, to the state commissioner of weights and measures, on blanks furnished by the commissioner. [1915; last amended 1937.]

Sec. 4526. Arrests and seizures.

The commissioner of weights and measures, his assistant, deputy and inspectors, and the county and city sealers and deputy sealers of weights and measures, are hereby made special policemen and are authorized and empowered to arrest, without formal warrant, any one found by them violating any of the statutes in relation to weights and measures, and to seize for use as evidence, any false or unsealed weight, measure or weighing and measuring device or package or amount of commodity found to be used, retained, or offered or exposed for sale or sold in violation of the law. [1915; last amended 1931.]

Sec. 4527. Obstruction of officers.

Code of 1943 Annotated, Ch. 47, Art. 1—Weights and Measures—Continued.

Sec. 4528. Impersonation of officers.

Any person who shall impersonate in any way the commissioner of weights and measures, his assistant, deputy, or inspectors, or any county or city sealer or deputy sealer of weights and measures, by the use of his seal or counterfeit of his seal, or otherwise, shall be guilty of a misdemeanor, and, upon conviction thereof in any court of competent jurisdiction, shall be punished by a fine of not less than one hundred nor more than five hundred dollars, or by imprisonment for not more than one year, or by both such fine and imprisonment. [1915]

It shall also be unlawful to keep for the purpose of sale, offer or expose for sale, or sell any commodity in package form unless the net quantity of the contents be plainly and conspicuously marked on the outside of the package, in terms of weights, measures, or numerical count: Provided, however, That reasonable variations or tolerances and also exemptions as to small packages shall be established by rules and regulations made by the commissioner of weights and measures: Provided further, That this section shall not be construed to apply to medicinal articles and to those commodities in packages the

[1915; last amended 1945.]

Sec. 4530. Butter and oleomargarine: Sold by weight only; marking requirements; exception.

It shall be unlawful for any person to sell or offer for sale any butter, renovated or process butter, or oleomargarine in any other manner than by weight. Sec. 2357.¹ Checkweighman where wages depend on production.

Where the amount of wages paid to any of the persons employed in any manufacturing, mining, or other enterprise employing labor, depends upon the amount produced by weight or measure, the persons so employed may, at their own cost, station or appoint at each place appointed for the weighing or measuring of the products of their labor a checkweighman or measurer, who shall in all cases be appointed by a majority ballot of the workmen employed at the works where he is appointed to act as such checkweighman or measurer. [1901]

¹ See Sec. 2455, page 1090; checkweighman at coal mines.

Code of 1943 Annotated, Ch. 22, Art. 2—Mine Scales.

Sec. 2452. Scales and measures to be procured; testing.

It shall be the duty of every corporation, company or person, engaged in the business of mining and selling coal by weight or measure, to procure and constantly keep on hand, at the proper place, the necessary scales and measures and whatever else

may be necessary to correctly weigh and measure the coal as mined by such corporation, company or person.

It shall be the duty of the sealer of weights and measures for every county in which coal is so mined and sold to visit each coal mine operated therein, and where such scales and measures are kept, at least once in each year, and test the correctness of such scales and measures. The owner or operator of such coal mine, or any two or more of the miners working therein, may in writing require his attendance at the place where such scales and measures are kept, at other times, in order to test the correctness thereof, and it shall be his duty to comply with such request as soon as he can after receiving the same.

If in any such county there be no sealer of weights and measures, the duties herein required to be done and performed by such sealer shall be done and performed by the inspector of mines for the district of which such county forms a part. In any county in which the mine inspector is required so to act, the county court of such county shall furnish him with whatever is necessary to enable him to discharge his duties, if such court has procured the weights and measures and balances provided for by article one, chapter forty-seven (Secs. 4506 et seq.¹) of this Code; and if not, the state sealer of weights and measures shall furnish him with whatever may be necessary to enable him to discharge the duties required of him. The things so furnished him, in either case, shall be returned by him to the person from whom he received them as soon as possible after he has performed the duties for which he received them. It shall be the duty of every corporation, company or person so engaged in the business of mining coal to procure and constantly keep on hand a sealed weight of at least fifty pounds, and a sealed measure of at least one bushel, to be used for the purposes herein set forth. [1891; last amended 1931.]

Sec. 2452(1). Testing: Cooperative arrangement.

The chief of the department of mines with respect to the duties of himself and his inspectors to test the correctness of scales and measures used for the weighing and measurement of coal mined by any corporation, company or person in any county in which there is no sealer of weights and measures as is provided in section seventy-three, article two, chapter twenty-two (Sec. 2452) of the code of West Virginia, one thousand nine hundred thirty-one, and the commissioner of labor with respect to his duties as ex officio commissioner of weights and measures, are hereby authorized and empowered to enter into such cooperative arrangement or agreement as may appear to be reasonably necessary and expedient concerning the testing of the correctness of such scales and measures, to the end that any of the powers, rights and duties of the chief of the department of mines and his inspectors with respect

thereto may be assumed, taken over and exercised by said commissioner of labor, his deputies and inspectors. By such arrangement or agreement, the said chief of the department of mines may agree to pay to the said commissioner of labor, his deputies and inspectors from any moneys appropriated for the department of mines for personal services or current expenses such sum or sums as may be reasonably necessary to compensate or aid in compensating said commissioner of labor, his deputies and inspectors for the assumption and exercise of said powers, rights and duties. [1939]

Sec. 2453. Coal cars: Marking and weighing.

Each car used by any such corporation, company or person in removing coal from any coal mine shall be numbered by consecutive numbers plainly marked, and placed and kept thereon as long as such car is so used. And if the coal from such mine is mined, and the miners are paid according to the weight thereof for mining the same, every such car so used shall be weighed upon such tested scales, and the weight thereof shall be plainly marked, and placed thereon as long as such car shall be used as aforesaid. If the coal at any such mine is mined, and the miners thereof are paid for mining the same by measure, the number of bushels of coal such car will hold when loaded to its capacity shall also be plainly marked, and placed and kept thereon as long as such car is so used as aforesaid. And no car shall be used for the purpose aforesaid until the provisions of this section are complied with. [1891]

Sec. 2454. Weighing coal before screening.

All coal so mined and paid for by weight shall be weighed before it is screened, and shall be paid for according to the weight so ascertained, at such price per ton as may be agreed on by such owner or operators and the miners who mined the same. And coal mined and paid for by measure shall be paid for according to the number of bushels marked upon each car in which it is removed from the mine, and before it is screened, and the price paid for each bushel so ascertained shall be such as may be agreed upon as aforesaid. [1891; last amended 1937.]

Sec. 2455. Weighman and checkweighman; employment; duties; oath.

Every such corporation, company or person shall employ a weighman, and the miners working in any such coal mine may employ a checkweighman as provided in section eight (Sec. 2357¹) article five, chapter twenty-one of this Code, and the two so employed shall supervise the weighing of each car while empty, and the weighing of the same when loaded with coal so paid for by weight, and measuring of the number of bushels therein, when necessary, so paid for by measure. Where such check-

weighman is employed by the miners working at such mine, the corporation, company or person operating the same shall furnish such checkweighman with a check or number and pay him for all coal placed to his check or number the same per ton as is paid to the miners. If the miners fail to employ such checkweighman, then the person so employed by such corporation, company or person shall perform that duty. Each of the persons so employed, before entering upon the discharge of the duties of his employment, shall take and subscribe an oath or affirmation that he will honestly and impartially do and perform the duties of his employment, and do equal and exact justice between employers and employees interested in the matter of his employment, to the best of his judgment, skill and ability.

Where the weighman is mutually selected by the consent of a majority of the miners working in any mine and the operator or agent of said company, it shall not be considered necessary to employ a checkweighman, but at any time that either of the parties to said agreement shall become dissatisfied with said weighman, they may dismiss him on ten days' notice, or the miners may employ a checkweighman. [1891; last amended 1931.]

¹ See page 1089.

Sec. 2456. Penalties for violations.

Any corporation, company or person violating any of the provisions of the four next preceding sections shall be guilty of a misdemeanor, and, upon conviction thereof, shall, for each offense, be fined not less than twenty-five nor more than five hundred dollars. And the officer, agent or employee of the corporation or company whose duty it was to do or perform the act, or cause it to be done and performed, which is the subject of the indictment, may be indicted jointly with the corporation or company; and upon conviction thereof, in the discretion of the court, he may be imprisoned in the county jail not less than ten nor more than sixty days. [1891]

Sec. 2457. Mines subject to weighing and measuring provisions.

None of the provisions of the five next preceding sections, except those relating to checkweighmen, shall apply to any corporation, company or person owning or operating a coal mine in which fewer than ten miners are employed. [1891; last amended 1931.]

Code of 1943 Annotated, Ch. 24. Art. 2—Gas, Electric and Water Meters.

Sec. 2557. Inspection and correction of meters; fees.

* * * * *
* * * The commission [public service commission] shall, when and as necessary, appoint inspectors of gas, electric and water meters. And, when such inspectors are required to act, it shall be their duty to inspect, examine, prove and ascertain the

accuracy of any gas, electric, or water meters used or intended to be used for measuring or ascertaining the quantity of gas, electricity or water furnished to, by or for the use of any person, firm or corporation, and, when found to be correct, or made correct, the inspector shall stamp or mark each of such meters with some suitable device, which device shall be recorded in the office of the commission. No public utility shall furnish or put in use any gas, electric or water meter which shall not have been inspected, proved and stamped or marked by an inspector of the commission: Provided, That in cases of emergency, gas, electric or water meters may be installed and used before being inspected, but notice thereof shall be immediately given to the public service commission by the public utility installing the same, and such meters shall be inspected, proved and stamped or marked, as soon thereafter as practicable. Every gas, electric and water utility shall provide and keep in and upon its premises suitable and proper apparatus, to be approved and stamped or marked by the commission, for testing and proving the accuracy of gas, electric and water meters furnished for use by it and by which apparatus every meter may and shall be tested on the written request of the consumer to whom the same shall be furnished, and in his presence if he so desires.

If any person, firm or corporation to or by whom a meter has been furnished shall request the commission in writing to inspect such meter, the commission shall have the same inspected and tested. If the same on being tested shall be found to be two per cent from being correct, or shall be found to be to the prejudice of the user, the inspector shall order the owner of such meter forthwith to remove the same and to place instead thereof a correct meter. The expense of such inspecting and testing shall be borne by the owner if such meter be found to be incorrect by two percent or more. If the meter, on being so tested, shall be found to be correct, or within two per cent of being correct, the expense of

such inspection and testing shall be borne by the user. A uniform charge and rule shall be fixed by the commission for this service: Provided, That nothing in this chapter [Sec. 2546-2577] shall prevent the commission from changing and modifying the method of inspecting meters and adopting such rules and regulations therefor as to the commission may seem just and proper. Whenever such city shall neglect for six months so to do, the city clerk, on notification and request by the department, shall provide such standards and cause the same to be so tried, proved, sealed, certified, and deposited at the expense of the city. [1935]

Sec. 98.04. City sealers.

The city sealer shall be appointed by the mayor from a list to be furnished by the state or local civil service board under the rules of said board, except that in cities of the fourth class he shall be appointed as determined by the city council. He shall be paid a salary to be fixed by the board or body authorized to fix the salaries of city officials, and shall be provided with suitable office quarters in said city, and no fees shall be charged by him or by the city for inspection or testing of weights, measures or weighing or measuring devices.

(3) He shall, at least once in each year or as much oftener as he may deem necessary, see that all weights, measures, and weighing and measuring apparatus used in the city are correct and that the same are in compliance with the regulations issued by the department. He may for the purpose above mentioned, and in the general performances of his official duties, with or without formal warrant, enter or go in or upon any stand, place, building, or premises; or may stop any vendor, peddler, junk dealer, coal wagon, ice wagon, or any dealer whatsoever, for the purpose of making the proper tests.

(4) Whenever the city sealer finds a violation of the statutes relating to weights and measures, he shall cause the violator to be prosecuted. Whenever the sealer compares weights and measures and finds that they correspond or causes them to correspond with the standards in his possession, and with the regulations issued by the department, he shall seal or mark the same with appropriate devices to be approved by the department. The sealer shall condemn and seize and may destroy incorrect weights and measures and weighing or measuring instruments which cannot be repaired; and such as are incorrect and yet may be repaired, he shall mark or tag as "condemned for repairs" in a manner prescribed by the department.

(5) The city sealer shall keep a complete record of the work done by him and shall make a quarterly report to the mayor, which report shall be filed with the city clerk, and a quarterly report duly sworn to, to the department, these quarterly reports to cover the three-month periods beginning July first, October first, January first, and April first, respectively, and to be submitted not later than twenty days following the expiration of the period covered by the report.

¹ A slight change has been made in the arrangement for convenience of reference.

² Pounds per cord.

Sec. 98.11. Standard bushel.

The bushel in struck measure shall contain two thousand one hundred fifty and forty-two hundredths cubic inches. The half bushel and the parts thereof shall correspond in capacity to that of the bushel and shall be the standard measure for fruits, vegetables, and other dry commodities customarily sold by heaped measure; and in measuring such commodities, the half bushel or other smaller measure shall be heaped as high as may be without special effort or design. [1935]

Sec. 98.12. Milk bottles.

(1) For the sale of milk or cream at retail, no bottle shall be used unless its capacity is one gallon, half gallon, one quart, third quart, one pint, or half pint; every such bottle shall be delivered filled to the bottom of the cap seat, stopple or other designating mark. The following variations on individual bottles may be allowed, but the average contents of not less than 25 bottles selected at random from at least 4 times the number tested must not be in error by more than one-quarter of such tolerances: 8 drams above and 8 drams below on the gallon; 6 drams above and 6 drams below on the half gallon; 4 drams above and 4 drams below on the quart; 3 drams above and 3 drams below on the pint; 2 drams above and 2 drams below on the third quart and on the half pint respectively. When milk or cream is pasteurized in the bottle in which it is to be sold or delivered, such bottle may have a capacity sufficient to permit of the expansion of the contents in the process of heating, but such bottle shall have clearly marked thereon by a line or other designating mark the point to which such bottle is filled when containing the respective capacities provided for in this section, at sixty-eight degrees Fahrenheit (twenty degrees centigrade). The department shall prescribe and adopt such rules and regulations as it may deem necessary to carry out the provisions of this section. Bottles so used shall have clearly blown or otherwise permanently marked in the side of the bottle, the capacity of the bottle and the word "Sealed" and in the side or bottom of the bottle the name, initials or the trade-mark of the manufacturer and designating number, which designating number

shall be different for each manufacturer and may be used in identifying the bottles. The designating number shall be furnished by the department upon application by the manufacturer, and upon filing by the manufacturer of a bond in the sum of \$1,000 with sureties to be approved by the attorney-general, conditioned upon their conformance with the requirements of this section. A record of the bonds furnished, the designating numbers, and to whom furnished, shall be kept in the office of the department.

(2) Any manufacturer who sells milk or cream bottles to be used in this state that do not comply as to capacity and markings with this section shall forfeit \$500, to be recovered by the attorney-general in an action against the offender's bondsmen, brought in the name of the state. Any person who uses, for the sale of milk or cream at retail, bottles that do not comply with this section as to markings and capacity, shall be punished by a fine of not more than \$100, or by imprisonment not more than six months, or by both such fine and imprisonment.

(3) Sealers of weights and measures are not required to seal bottles for milk or cream marked as in this section provided, but they shall from time to time make tests on individual bottles used by the various firms in the territory over which they have jurisdiction, in order to ascertain whether the above provisions are being complied with, and they shall report violations found immediately to the department. [1935; last amended 1945.]

Sec. 98.13. Babcock test.

(c) Cream test bottles shall receive a charge of either 9 grams or 18 grams. The 9 gram bottle shall only be used with a 9 gram charge and the 18 gram bottle shall only be used with an 18 gram charge.

The calibrated neck of the 9 gram bottle shall have a capacity equivalent to 0.1 cubic centimeters for each one per cent marked thereon and the calibrated neck of the 18 gram bottle shall have a capacity equivalent to 0.2 cubic centimeters for each one per cent marked thereon.

(1) Any person violating the provisions of this section shall be punished by a fine of not more than \$250.00.

(2) In sampling cream or milk from which composite tests are to be made to determine the per cent of butter fat contained therein, no such sample or sampling shall be lawful unless a sample be taken from each weighing and the quantity thus used shall be proportioned to the total weight of the cream or milk tested, and each weighing of milk or cream shall be thoroughly agitated immediately before taking a sample to insure a sample truly representing the aggregate from which taken.

(3) All purchasers of milk or cream from the producer, when using the Babcock test as a standard to determine the value of any milk or cream received or bought by such purchaser, shall, when paying for such milk or cream, include an itemized statement to each patron showing the daily number of pounds of milk delivered, the total amount of butter-fat content or test, transportation costs, and other charges and deductions for the period of time for which payment is made; except that the daily weights need not be shown on such statement if weight slips are furnished daily to producers.

(4) Whenever milk is sold under an agreement, express or implied, that the value of the same shall be determined by its proportion of butter fat, the price to be paid shall be based on a three and five-tenths per cent butter fat standard. [1935; last amended 1947.]

The designating number shall be furnished by the department upon application by the manufacturer and upon the filing by the manufacturer of a bond in the sum of one thousand dollars with sureties to be approved by the attorney-general, conditioned upon conformance with the requirements of this section. A record of the bonds furnished, the designating number, and to whom furnished, shall be kept in the office of the department.

(2) Any manufacturer who sells Babcock milk, cream or butter test bottles or milk pipettes, to be used in this state, that do not comply with the provisions of this section shall suffer the penalty of five hundred dollars to be recovered by the attorney-general in an action against the offender's bondsmen, to be brought in the name of the people of the state. No dealer shall use, for the purpose of determining the per cent of milk fat in milk or milk products, any bottles or pipettes that do not comply with the provisions of this section relating thereto.

(3) The department shall prescribe specifications with which the glassware mentioned in this section shall comply. The unit of graduation for all Babcock glassware shall be the true cubic centimeter or the weight of one gram of distilled water at four degrees centigrade.

(4) Sealers of weights and measures are not required to seal Babcock milk, cream or butter test bottles or milk pipettes marked as in this section provided, but they shall from time to time make tests of individual bottles used by the various firms in the territory over which they have jurisdiction in order to ascertain whether the above provisions are being complied with and they shall report immediately to the department violations found. [1935]

Sec. 98.15. Reading of test.

It shall be unlawful for any person, by himself, his servant or agent or as the servant or agent of another to falsely manipulate or underread or overread or make any false determination by the Babcock test or any other contrivance used for determining the quality or value of milk or cream delivered to a creamery, cheese factory, or condensed milk factory, or when sold or purchased. [ED. NOTE.—For enforcement of Chapter 97 by the Department of Agriculture, see Sec. 93.07, page 1102.]

As used in this section, unless the context otherwise requires:

* * * * *

* * * * *

* * * * *

(5) The department shall enforce the provisions of this section * * *.

Statutes 1947, Vol. 1, Title XIV, Ch. 126—Weighing of Grain.

Sec. 126.05. Grain and warehouse commission: Weighing of grain.

(1) The commission [grain and warehouse commission] shall weigh all grain received in Superior, and all grain received in or shipped from public warehouses.

* * * * *

(4) The commission shall appoint a chief inspector and one or more deputy inspectors, a weighmaster and one or more deputy weighmasters, a chief chemist and one or more deputy chemists.

(5) The commission shall adopt and publish regulations governing inspection, weighing and

grading of grain delivered to or shipped from public warehouses in said city; and such further regulations as will enable it to administer this chapter [Secs. 126.01–126.80]. [1945]

* * * * *

[ED. NOTE.—In Wisconsin Statutes 1947, following the foregoing section, it is stated: "Grain and warehouse commission is authorized by (1) to weigh all grain received in Superior for milling or storage, or milled or stored in Superior, or bought or sold in Superior, regardless of whether it is kept in public warehouse, and also to weigh grain shipped from public warehouses. 29 Atty. Gen. 111."]

Sec. 126.20. Inspection; test of scales; penalty.

All persons owning or interested in grain in any public warehouse and all inspectors may, during ordinary business hours, examine all grain in any public warehouse and the warehouse itself, and all proper facilities shall be extended to such person by the warehouseman, his agents and servants, for such examination. All scales in public warehouses shall be subject to examination and test by any inspector, weighmaster or scaler of weights and measures at any time when required by any person whose grain was or is to be weighed on such scales. The expense of the test by an inspector or scaler shall be paid by the warehouseman if the scales are found incorrect, but not otherwise. [1945]

Sec. 126.21. Weighmaster.

(1) The weighmaster and his deputies shall have exclusive control of the weighing of grain received into any mill or stored in or delivered to or shipped from public warehouses and the inspection of scales upon which grain is weighed; and the action or certificates of the weighmaster or his deputies, in the discharge of their duties, shall be conclusive as to the matters contained in said certificates.

(2) The fees for weighing grain shall be paid by the warehouseman, and may be added to the charges for storage.

(3) Neither the weighmaster nor any deputy shall be a member of any board of trade or association of like character. They shall each give a bond to and approved by the commission in the sum of \$2,000 conditioned for the faithful discharge of their duties.

(4) Any person who refuses access or prevents the weighmaster or his deputies from access to scales in the performance of their duties shall forfeit \$100 to be recovered in an action by the commission [grain and warehouse commission], and all moneys collected shall be turned into the state treasury. [1945]

Sec. 126.28. Commission to fix charges for weighing.

The chief inspector and deputy inspectors shall be governed by rules and regulations promulgated by the commission [grain and warehouse commission]. The commission shall fix the rates of charges¹ for inspection and weighing grain and the

Statutes 1947, Vol. 1, Title XIV, Ch. 126—Weighing of Grain—Continued.

manner in which the charges shall be collected. [1945]

¹ See Sec. 126.46, this page, which provides that the fees charged shall be sufficient to defray the expenses of the commission.

Sec. 126.33. Liens; weighing charge.

The charge for inspecting and weighing grain under this chapter [Secs. 126.01–126.80] is a lien on the grain; and whenever the grain is in transit the charges shall be treated as advanced charges to be paid by the common carrier in possession of the grain at the time of inspection. [1945]

Sec. 126.40. Supervision by commission.

The commission [grain and warehouse commission] shall exercise constant supervision over housing and marketing grain in every city in which a public warehouse is located; over handling, inspecting, weighing and storing the same; and over the management of the public warehouses. The commission shall investigate all complaints of fraud or oppression in the grain trade and in the handling and housing of grain in such cities, and, at least 3 times annually, shall verify by measurement the amount of grain in each public warehouse. [1945]

Sec. 126.41. Weighing regulations to be published.

The regulations adopted by the commission [grain and warehouse commission] for weighing and inspecting grain shall be published in a daily newspaper in each city which has a public warehouse. [1945]

Sec. 126.46.¹ Weighing and inspecting fees to defray expenses.

The fees for weighing, inspection and other services performed under this chapter [Secs. 126.01–126.80] shall be so fixed as to make the work of the commission [grain and warehouse commission] self-sustaining. [1945]

¹ See Sec. 126.28, page 1107; power to fix rates.

Sec. 126.47. Chief weighmaster to keep record; weight certificate; prima facie evidence.

The chief weighmaster shall keep a correct record of all grain weighed, giving the amount of each weight, the number and contents of each car weighed, the place where weighed and the date; and of all grain weighed into boats and the date and amount thereof, and the name of the boat. He shall, upon the payment of the weighing charges, give under his hand and the seal of the state a certificate of the weight of the grain, the date weighed, amount and kind of grain and where weighed, and the name or initial and number of the car or boat from or into which the same was weighed. Such certificate is prima facie evidence of the facts therein contained. [1945]

[ED. NOTE.—In Wisconsin Statutes 1947, following the foregoing section, it is stated: "What seal is meant? There is no provision in ch. 126 for an official seal. Naturally one would expect the seal to be that of the commission. The state's seal is with the secretary of state. (Bill 321–5)"]

Sec. 126.53. Penalties for violations.

(1) Any person who violates any provision of this chapter [Secs. 126.01–126.80] or fails to perform any duty required by any provision hereof (when the punishment is not otherwise specifically provided) shall be fined not less than \$10 nor more than \$100 and shall be liable to all persons aggrieved thereby for treble the amount of damages suffered.

(2) Any person who alters, changes or modifies any certificate issued under authority of the commission [grain and warehouse commission] shall be fined not less than \$100 nor more than \$500 and shall be liable to the commission in damages 3 times the amount incurred by reason of such alterations, changes or modifications. [1945]

Sec. 126.57. Locus of sale; weighing.

In all sales of grain to be delivered in Superior or where the purchase price is to be determined by weighing the grain in Superior or where delivery or weighing is contemplated or afterwards takes place there, the sales shall be deemed to have been made in said city within the provisions of this chapter [Secs. 126.01–126.80] and the grain shall be inspected and weighed under this chapter. [1945]

Sec. 126.58. Presumption of sale.

All grain delivered from any warehouse to cars or boats in Superior, is presumed to have been delivered upon, or in fulfillment, in whole or in part, of a contract for the sale thereof and shall be weighed and inspected under this chapter [Secs. 126.01–126.80] at the time of delivery. But this section does not apply to the use of boats for storage out of navigation season, provided the grain is afterwards returned to the warehouse for inspection and weighing. [1945]

Sec. 126.59. Unauthorized weighing; penalty.

Only the chief weighmaster or his deputy shall weigh grain received into any warehouse or mill in Superior or shipped out of such warehouse or mill. Any violation of this section shall be punished by a fine of not less than \$100. The section does not prevent the owner of grain from weighing his grain where the weighing does not relate to a sale or delivery or payment for said grain and is solely for his private use; but the burden of proving that the weighing is for his private use shall be upon him. [1945]

Sec. 126.61. No delivery until fees paid.

No railway company shall deliver in Superior any inspected grain until the fees for inspection are paid as provided in section 126.33; and for a violation of

this section, it shall be liable to the commission for 3 times the amount of the fees so unpaid. [1945]

Sec. 126.62. Refusal by warehouseman to pay charges; sales.

In case any consignee of grain or other person to whom grain is ordered delivered refuses to pay the inspection charges or refuses to receive the grain upon which said charges are a lien, by reason of the railway company insisting upon payment of such charges, the company shall immediately notify the consignor or owner of the grain of the refusal and shall collect the charges from him, and in case the charges are not paid promptly the company may upon one day's notice (oral or in writing or by telegram) sell the grain in the open market in Superior, and out of the proceeds of sale pay the expenses, inspection fees, weighing charges and transportation charges, and pay the balance to the person entitled thereto. [1945]

Sec. 126.64. Penalty for sale without inspection; locus of sale.

No person shall sell or offer grain for sale in Superior, until it has been inspected, or deliver any grain in said city in pursuance of any contract made elsewhere, to any person, warehouse or mill, or from any such warehouse to cars or boats, until inspection is made. Any person violating this section or participating in any such sale or delivery or receiving such grain shall be fined not less than \$100 or imprisoned not exceeding 90 days or both. Every sale, offer for sale or delivery of grain within the meaning of this section shall be deemed made in said city, notwithstanding the contract was made elsewhere, if such grain, at the time, is within the city or is thereafter delivered in said city. In determining whether there is a delivery in the city, no delivery to a common carrier outside of the city is deemed a delivery to the purchaser unless the exact amount of the purchase price has been paid. This section does not prohibit making executory contracts for the delivery of grain if they provide for the inspection and weighing of the grain under the supervision of the commission [grain and warehouse commission]. [1945]

Sec. 126.70. No shipment until weighed; penalty.

No grain shall be delivered from any warehouse in Superior to any boat or car until the grain has been inspected, graded and weighed under the supervision of the commission [grain and warehouse commission], and the fees for inspection, grading and weighing paid on demand contemporaneously with such delivery. Any violation of this section shall be punished by a fine of not less than \$100, nor more than \$500, or by imprisonment not exceeding 6 months, or by both such fine and imprisonment. [1945]

Sec. 126.71. Penalty for obstructing weighmaster.

Any person who resists or interferes with the chief inspector or deputy, or the weighmaster or his

deputy, while engaged in the performance of his duty, shall be punished by imprisonment in the county jail not more than 6 months, or by fine not exceeding \$200, or by both such fine and imprisonment. [1945]

Sec. 126.72. Construction of chapter 126.

This chapter shall be liberally construed to insure an honest inspection, grading and weighing of grain between sellers and purchasers in the market at Superior, and of all grain delivered to or by any elevator in said city, and to prevent fraud therein. [1945]

[ED. NOTE.—In Wisconsin Statutes 1947, following the foregoing section, it is stated: "The intent of old 126.72 would probably be more exactly expressed if "public warehouse" were substituted for "elevator." However the value of this section is open to question. * * * (Bill 321-5)."]

Sec. 126.74. Milwaukee excepted.

This chapter [Secs. 126.01–126.80] does not apply to cities of the first class. [1945]

Statutes 1947, Vol. 1, Title XV, Ch. 161—Narcotic Drugs.

Sec. 161.10. Marking requirements.

(1) Whenever a manufacturer sells or dispenses a narcotic drug, and whenever a wholesaler sells or dispenses a narcotic drug in a package prepared by him, he shall securely affix to each package in which that drug is contained a label showing in legible English the name and address of the vendor and the quantity, kind and form of narcotic drug contained therein. * * * [1935]

Sec. 161.19. Enforcement.

(1) It is the duty of the state board of health and state board of pharmacy, their officers, agents, inspectors and representatives, and of all peace officers within the state, and of all district attorneys, to enforce all provisions of this chapter [Secs. 161.01–161.275], except those specifically delegated, and to cooperate with all agencies charged with the enforcement of the laws of the United States, of this state, and of all other states, relating to narcotic drugs. [1935; last amended 1939.]

[1935]

Statutes 1947, Vol. 1, Title XVI, Ch. 167—Match Boxes and Containers.

Sec. 167.07. Match boxes and containers.

* * * * *

(2) * * *; all matches shall be packed in boxes or suitable packages, containing not more than seven hundred matches in any one box or package; provided, however, that when more than three hundred matches are packed in any one box or package, the said matches shall be arranged in two nearly equal portions, the heads of the matches in the two portions shall be placed in opposite directions, and all boxes containing three hundred and fifty or more matches shall have placed over the matches a center holding or protecting strip, made of chipboard, not less than one and one-quarter inches wide; said strip shall be flanged down to hold the matches in position when the box is nested into the shuck or withdrawn from it.

(3) All match boxes or packages shall be packed in strong shipping containers or cases; maximum number of match boxes or packages contained in any one shipping container or case, shall not exceed the following number:

<i>Number of boxes</i>	<i>Nominal number of matches per box</i>
One-half gross -----	700
One gross -----	500
Two gross -----	400
Three gross -----	300
Five gross -----	200
Twelve gross -----	100
Twenty gross -----	over 50 and under 100
Twenty-five gross -----	under 50

No shipping container or case constructed of fiber board, corrugated fiber board, or wood, nailed or wirebound, shall exceed a weight, including its contents, of seventy-five pounds; and no lock-cornered wooden case containing matches shall have a weight, including its contents, exceeding eighty-five pounds; nor shall any other article or commodity be packed with matches in any such container or case;

* * *

(4) Any person, association or corporation violating any of the provisions of this section shall be fined for the first offense not less than \$5 nor more than \$25, and for each subsequent violation not less than \$25. [1945]

Statutes 1947, Vol. 1, Title XVII, Ch. 195—Weighing of Freight.

Sec. 195.03. Powers and duties of commission.

* * * * *

(15) The commission [public service commission] may prescribe rules and regulations covering the charges and manner of conducting the business of public elevators and warehouses upon railroad ground.

(16) The commission may make reasonable regulations for furnishing cars to shippers, and for moving, loading and unloading cars and for weighing

cars and freight, and to test railroad weights and scales used in weighing freight or cars. [1943]

* * * * *

Sec. 195.07. Law enforcement.

(1) The commission [public service commission] shall inquire into the neglect or violation of the laws of this state by railroads and public utilities (as defined in chapters 195 and 196), or by the officers, agents or employees thereof, or by persons operating railroads or public utilities, and shall have the power, and it shall be its duty, to enforce all laws relating to railroads or public utilities, and report all violations thereof to the attorney-general. [1943]

* * * * *

Sec. 195.22. Railroads to weigh correctly.

* * * * *

(3) Every railroad shall correctly weigh all freight shipped by weight and shall also correctly weigh all empty cars when freight is shipped in carload lots. [1943]

Sec. 195.23. Livestock scales.

At every point at which any railroad maintains a stockyard and an agent, from which point twenty-five carloads or more of stock were shipped during each of the four preceding years, such railroad shall maintain suitable platform scales properly housed and available for the weighing of live stock. The capacity of such scales may be prescribed by the commission upon the application of the railroad or of any person shipping live stock from such point during the preceding year; provided that upon such notice as the commission may prescribe to each person who shipped live stock during the preceding year from any such point upon its line, any railroad may apply to the commission for and may obtain an order exempting such point from the operation of this section upon proof that the probable benefit to accrue to shippers in their dealings with the railroad will not warrant the financial burden that would be imposed upon it by the installation of such scales, and in the determination of such benefits or burdens the commission shall not consider any benefit that might accrue to shippers in their dealings with other than the carrier concerned. [1943]

Sec. 195.36. General penalty upon railroads.

If any railroad shall violate any provision of this chapter [Secs. 195.01–195.39], or shall do any act herein prohibited, or shall fail or refuse to perform any duty enjoined upon it, for which a penalty has not been provided, or shall fail, neglect or refuse to obey any lawful requirement or order made by the commission [public service commission], or any judgment or decree made by any court upon its application, for every such violation, failure or refusal in respect to any matter prescribed by this chapter such railroad shall forfeit not less than one hundred dollars nor more than ten thousand dollars. The

act, omission or failure of any officer, agent or other person employed by any railroad, acting within the scope of his employment, shall be deemed to be the act, omission or failure of such railroad. [1943]

Sec. 195.38. Freight bills; examination; refunds.

Within three years after the delivery of any shipment of property at destination, any person, firm or corporation may submit to the public service commission, by mail or in person, any railroad or express company expense bill or receipt showing charges paid for transportation of such property by freight or express for the purpose of having the same examined with respect to the correctness of weights, rates and charges indicated thereon. Upon receipt of any such expense bill or receipt the commission shall make such examination as is necessary, and if it shall be found that any such weights, rates or charges are incorrect, the commission shall order the express or railroad company in error to refund to the person, firm or corporation which submitted such expense bills or receipts, any over or excessive charges paid by such person, firm or corporation; provided, however, that the public service commission shall not be required to audit or examine more than fifteen such expense bills or receipts from any one shipper or consignee in any one calendar month. [1943]

Statutes 1947, Vol. 1, Title XVII, Ch. 196—Public Utilities.

Sec. 196.01. Definition.

As used in chapters 196 and 197, unless the context requires otherwise, "public utility" means and embraces every corporation, company, individual, association, their lessees, trustees or receivers appointed by any court, and every sanitary district, town, village or city that may own, operate, manage or control * * * any plant or equipment or any part of a plant or equipment, within the state, * * * for the production, transmission, delivery or furnishing of heat, light, water or power either directly or indirectly to or for the public. * * * The term "public utility" as herein defined includes any person, firm, or corporation engaged in the transmission or delivery of natural gas for compensation within this state by means of pipes or mains. [1937; last amended 1947.]

Sec. 196.02. Powers of commission.

(1) The commission [public service commission] is vested with power and jurisdiction to supervise and regulate every public utility in this state, and to do all things necessary and convenient in the exercise of such power and jurisdiction.

* * * * *

(3) The commission shall have power to adopt reasonable rules and regulations relative to all inspections, tests, audits and investigations. [1931]

* * * * *

Sec. 196.16. Standard measurements; accurate appliances.

(1) The commission [public service commission] shall fix adequate and serviceable standards for the measurement of quality, pressure, initial voltage or other condition pertaining to the supply of the product or service rendered by any public utility, and prescribe reasonable regulations for examination and testing of such product or service and for the measurement thereof.

(2) It shall establish reasonable rules, regulations, specifications and standards to secure the accuracy of all meters and appliances for measurements. [1931]

* * * * *

Sec. 196.17. Tests of meters; fees.

(1) The commission [public service commission] shall provide for the examination and testing of all appliances used for measuring any product or service of a public utility.

(2) Any consumer or user may have any such appliance tested upon payment of the fees fixed by the commission.

(3) The commission shall establish reasonable fees to be paid for testing such appliances on the request of the consumers or users, the fee to be paid by the consumer or user at the time of his request, but to be paid by the public utility and repaid to the consumer or user if the appliance be found defective or incorrect to the disadvantage of the consumer or user.

(4) The commission may purchase materials, apparatus and standard measuring instruments for such examinations and tests. [1931]

Sec. 196.171. Examination of meters.

Any officer or agent of any public utility furnishing or transmitting gas or electric current or both or water to the public or for public purposes, for that purpose duly appointed and authorized by such utility, at all reasonable times, upon exhibiting a written authority signed by the president or a vice president and secretary or assistant secretary of the utility, or in the case of a municipally owned plant, the commissioner of public works or such other official in charge of the utility, may enter any dwelling, store, building, room or place supplied with gas, electricity or water by such utility, for the purpose of inspecting, examining, repairing, installing or removing the meters, pipes, fittings, wires and works for supplying or regulating the supply of gas, electricity or water and of ascertaining the quantity of gas, electricity or water supplied. Any person who shall, directly or indirectly, prevent or hinder any such officer or agent from so entering any such premises, or from making such inspection, examination, removal or installation at any reasonable time, shall be punished by a fine of not more than twenty-five dollars for every such offense. [1935]

Statutes 1947, Vol. 1, Title XVII, Ch. 196—Public Utilities—Continued.

Sec. 196.18. Entry on premises.

The commission [public service commission], its agents, experts or examiners may enter upon any premises occupied by any public utility for the purpose of making the examinations and tests provided in this chapter [Secs. 196.01–196.855] and set up and use on such premises any apparatus and appliances and occupy reasonable space therefor. Such weights, measures and apparatus shall be verified by the state superintendent of weights and measures, or his authorized assistants, at his direction, upon their initial receipt and at least once in each year thereafter, by comparison with the state standards. When found accurate upon these tests the working standards shall be sealed by stamping on them the letter "W" and the date with seals which the state superintendent of weights and measures shall have and keep for that purpose. The state standards shall be used in making all comparisons of weights, measures, and weighing or measuring devices submitted for test in the office of the state superintendent of weights and measures. Sec. 56-910. Rules and regulations by state superintendent of weights and measures.

All scales used in the operation of live stock sales rings must be inspected and tested by the State Superintendent of Weights and Measures, and he is hereby authorized to make reasonable rules and regulations relative to the method of weighing live stock at all live stock sales rings. Compiled Statutes 1945 Annotated, Vol. 4, Ch. 57, Art. 5—Mine Scales.

Sec. 57-505. Weighing before screening.

It shall be unlawful for any mine owner, lessee, operator, agent or company in this state, employing miners at bushel or ton rates, or other quantities, in mining coal, to pass the output of coal mined by said miners over any screen or any device which shall take any part of the marketable coal from the amount thereof, before the same shall have been weighed and duly credited to the employees sending the same to the surface, unless otherwise agreed upon between miners and their employers. In case of any agreement where coal is credited to miners after having been screened and weighed, said miners or employees shall receive compensation for all marketable or saleable coal sent by them to the surface, and accounted for at the customary rate of weights; provided, that this section shall also apply to the class of workers in mines known as loaders engaged in mines where mining is done by machinery whenever the workers are under contract to load coal by the bushel, ton or quantity. [1911]

Sec. 57-506. Weighman: Oath; penalty.

The weighman employed at any mine shall subscribe an oath or affirmation before a justice of the peace or other officer authorized to administer oaths, to do justice between employer and employee and to weigh the output of coal from miners in accordance with the provisions of Section 1 [Sec. 57-505] * * *. Said oath or affirmation shall be kept conspicuously posted in the weigh office and any weigher of coal or person so employed who shall knowingly violate any of the provisions of the Act [Secs. 57-505—57-509] shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a fine of not less than twenty-five dollars [\$25.00] nor more than one hundred dollars [\$100.00] for each offense, or by imprisonment in the county jail for a period of not to exceed thirty [30] days, or by both such fine and imprisonment. [1911]

Sec. 57-507. Check weighman.

The miners employed by or engaged in working for any mine owner, lessee, operator, agent or company in this state shall have the privilege, if they so desire, of employing at their own expense a check weighman, who shall have like rights and privileges in the weighing of coal as the regular weighman and be subject to the same oath and penalties as the regular weighman. [1911]

Sec. 57-508. Owner to provide scales; testing.

The owner, lessee, operator, agent or company operating any coal mine in this state, at which miners are paid by weight, shall provide suitable and accurate scales of standard manufacture for weighing of coal which may be procured from such mines; such owner, lessee, operator, agent or company shall be required to keep United States standard weights to test said scales.

At every mine where the coal miner is paid for by weight it shall be the duty of the weighman and the check weighman to examine and balance the scales each morning, and in no case shall any coal be weighed until such scales are tested by the United States standard weights and found correct; provided, that if the weighman and check weighman shall disagree, work may continue until the inspector of mines can be present, and any erroneous weights made during such time shall be rectified. When differences shall arise between the weighman and the check weighman, or operator, of any mine, as to the correctness of the scales, the same shall be referred to the inspector of mines whose duty it shall be to see and regulate the same at once. The mine inspector of the district upon each regular visit to each mine, shall test the scales used for the weighing of coal; if for any reason, he believes the scales to be inaccurate he shall call in the county assessor, as county sealer of weights and measures, and they shall proceed to test out the scales according to United States standards; if any inaccuracies are discovered they shall direct the scales to be properly repaired or adjusted until they register approximately correct weights. Any failure on the part of the mine inspector, and county assessor when called on to perform these duties shall constitute a refusal to perform the duties of their office and upon failure to do so they shall be reported to the governor of the state in writing. The inspector of mines upon each regular visit to each mine shall test the scales used for the weighing of coal. Miners employed in the mine and others personally interested shall at all proper times have full right of access to and examination of scales or apparatus used for weighing coal in or about said mine; provided, however, the provisions of this Act [Secs. 57-505—57-509] shall not apply to mines classed as prospects, but only to those having regular output. [1911]

Sec. 57-510. State inspector of coal mines to examine mine scales.
