SOLAR-GEOPHYSICAL DATA

CONTENTS

The descriptive text was republished in November 1964. Addenda have been given in the introduction to each of the CRPL-F Part B reports, December 1964 through October 1965.

169 Mc/s, Nançay, France:

Beginning with the chart for October 1965 the flux density for the storm centers is no longer given on an arbitrary scale. Therefore the indicated numbers are not comparable to those of preceding years.

Fleurs, Australia:

East-west solar scans from the 21 cm solar radio array of the University of Sydney are presented beginning with October 1965 data. The fan-beam has 2' of arc resolution. The two short horizontal lines drawn crossing the center line indicate the cold-sky level and the estimated quiet-sun level. The gain may differ from day to day. The curves have not been normalized to account for these gain variations other than the indication of the estimated quiet-sun level.

(1) These small and ephemeral plages were seen on the disk for only one day.
(2) Region 8018 is primarily a new plage, although it also contains some weak remnants of region 7983 of the previous rotation.
(3) Region 8027 contains remnants of part of region 7989.
(4) Regions 8041 and 8047 are parts of region 8004.

No calcium plage observations were secured at the McMath-Hulbert Observatory on October 1, 7, 8, 9, 20, 21, 22, 1965.

* In progress

The equipment was down during the following times:

October	1	1700-1800, 2045-2110, 2135-2330 UT
	2	1840-2330 UT
	3	1700-2330 UT
	4	2005-2330 UT
	5	1945-2330 UT
	8	2310-2330 UT
	9	1720-2230 UT
	10	1845-2330 UT
	11	1950-2330 UT
	12	2120-2130 UT
	14	2115-2225 UT
	17	1600 - October 18, 1830 UT
	25	2025-2030, 2045-2100 UT
	30	1700-1750 UT

Normal Observing hours were from 1700-2330 UT

1) THE ADVANCE J_c-FORECASTS ARE SCORED AGAINST THE AVERAGE HIGH LATITUDE WHOLE-DAY INDICES.

2) THE OBSERVED INDICES FOR THE NORTH PACIFIC ARE LOW WEIGHT BECAUSE OF INSUFFICIENT DATA AVAILABLE FOR THEIR PREPARATION.

3) THE PREDICTED A_{FR} INDICES ARE ISSUED EACH WEDNESDAY FOR THE COMING SEVEN DAYS. THE VALUE FOR THE FIRST DAY OF EACH PREDICTION PERIOD IS UNDERSCORED.
