Journal of Research of the

National Institute of Standards and Technology

United States Department of Commerce
Technology Administration
National Institute of Standards and Technology

The National Institute of Standards and Technology was established in 1988 by Congress to "assist industry in the development of technology . . . needed to improve product quality, to modernize manufacturing processes, to ensure product reliability . . . and to facilitate rapid commercialization . . . of products based on new scientific discoveries."

NIST, originally founded as the National Bureau of Standards in 1901, works to strengthen U.S. industry's competitiveness; advance science and engineering; and improve public health, safety, and the environment. One of the agency's basic functions is to develop, maintain, and retain custody of the national standards of measurement, and provide the means and methods for comparing standards used in science, engineering, manufacturing, commerce, industry, and education with the standards adopted or recognized by the Federal Government.

As an agency of the U.S. Commerce Department's Technology Administration, NIST conducts basic and applied research in the physical sciences and engineering, and develops measurement techniques, test methods, standards, and related services. The Institute does generic and precompetitive work on new and advanced technologies. NIST's research facilities are located at Gaithersburg, MD 20899, and at Boulder, CO 80303. Major technical operating units and their principal activities are listed below. For more information contact the Public Inquiries Desk, 301-975-3058.

Technology Services
- Manufacturing Technology Centers Program
- Standards Services
- Technology Commercialization
- Measurement Services
- Technology Evaluation and Assessment
- Information Services

Electronics and Electrical Engineering Laboratory
- Microelectronics
- Law Enforcement Standards
- Electricity
- Semiconductor Electronics
- Electromagnetic Fields[1]
- Electromagnetic Technology[1]

Chemical Science and Technology Laboratory
- Biotechnology
- Chemical Engineering[1]
- Chemical Kinetics and Thermodynamics
- Inorganic Analytical Research
- Organic Analytical Research
- Process Measurements
- Surface and Microanalysis Science
- Thermophysics[2]

Physics Laboratory
- Electron and Optical Physics
- Atomic Physics
- Molecular Physics
- Radiometric Physics
- Quantum Metrology
- Ionizing Radiation
- Time and Frequency[1]
- Quantum Physics[1]

Manufacturing Engineering Laboratory
- Precision Engineering
- Automated Production Technology
- Robot Systems
- Factory Automation
- Fabrication Technology

Materials Science and Engineering Laboratory
- Intelligent Processing of Materials
- Ceramics
- Materials Reliability[1]
- Polymers
- Metallurgy
- Reactor Radiation

Building and Fire Research Laboratory
- Structures
- Building Materials
- Building Environment
- Fire Science and Engineering
- Fire Measurement and Research

Computer Systems Laboratory
- Information Systems Engineering
- Systems and Software Technology
- Computer Security
- Systems and Network Architecture
- Advanced Systems

Computing and Applied Mathematics Laboratory
- Applied and Computational Mathematics[2]
- Statistical Engineering[2]
- Scientific Computing Environments[2]
- Computer Services[2]
- Computer Systems and Communications[2]
- Information Systems

Board of Editors

Barry N. Taylor
Chief Editor

Jean W. Gallagher, Technology Services
Richard J. Van Brunt, Electronics and Electrical Engineering Laboratory
Theodore V. Vorburger, Manufacturing Engineering Laboratory
Patrick A. G. O'Hare, Chemical Science and Technology Laboratory
Ronald Collé, Physics Laboratory
Daniel B. Butrymowicz, Materials Science and Engineering Laboratory
Piotr A. Domanski, Building and Fire Research Laboratory
Alan H. Goldfine, Computer Systems Laboratory
Daniel W. Lozier, Computing and Applied Mathematics Laboratory
Matt Young, Boulder Laboratories
Chris E. Kuyatt, Washington Editorial Review Board

Donald R. Harris
Managing Editor

Julian M. Ives
Technical Production Editor

U.S. Department of Commerce—**Ronald H. Brown,** Secretary
Technology Administration—**Mary L. Good,** Under Secretary for Technology
National Institute of Standards and Technology—**Arati Prabhakar,** Director

The Journal of Research of the National Institute of Standards and Technology features advances in measurement methodology and analyses consistent with the NIST responsibility as the nation's measurement science laboratory. It includes reports on instrumentation for making accurate and precise measurements in fields of physical science and engineering, as well as the mathematical models of phenomena which enable the predictive determination of information in regions where measurements may be absent. Papers on critical data, calibration techniques, quality assurance programs, and well-characterized reference materials reflect NIST programs in these areas. Special issues of the Journal are devoted to invited papers in a particular field of measurement science. Occasional survey articles and conference reports appear on topics related to the Institute's technical and scientific programs.

Contents

Articles

Preparation and Calibration of Carrier-Free ^{209}Po Solution Standards	**R. Collé, Zhichao Lin, F. J. Schima, P. A. Hodge, J. W. L. Thomas, J. M. R. Hutchinson, and B. M. Coursey**	1
Spectral Radiance of a Large-Area Integrating Sphere Source	**James H. Walker and Ambler Thompson**	37
Deposition of Diamond Films in a Closed Hot Filament CVD System	**Guan-Ren Lai, E. N. Farabaugh, A. Feldman, and L. H. Robins**	43
Variances in the Measurement of Ceramic Powder Properties	**R. G. Munro, S. G. Malghan, and S. M. Hsu**	51
On the Applications of Discontinuous Bessel Integrals to Chronoamperometry	**William T. Yap, and Richard A. Durst**	61

Conference Reports

Third International Conference on Information and Knowledge Management (CIKM-94)	**Elizabeth Fong, Shirley Hurwitz, and Yelena Yesha**	67
Federal Wireless Users' Forum Workshop	**Mary K. Ruhl and Tish Antonishek**	71
Workshop on Water: Its Measurement and Control in Vacuum	**Stuart A. Tison and J. Patrick Looney**	75
Application Portability Profile and Open System Environment Users' Forum	**Joseph Hungate**	83
